

WFC Provisioning Manager Version 3.1.23412

Release Notes – April 2024

Highlights

Release v3.1.23412 of the WFC Extension Manager is now available to customer access. This release contains the following updates.

- Eliminating device obsolescence from the portal
- Exporting data from history, events
- Notification Functionality for Customer Communications

New in WFC Extension Manager v3.1.23412

Eliminating device obsolescence from portal

Portal users will no longer have the ability to obsolete devices from the portal.

Exporting data from history, events

Portal users will now have the ability to export data from the History and Event tabs.

Notification Functionality for Customer Communications

Our latest update introduces a new notification feature that empowers system admins to efficiently communicate with customers.

Resolved Issues

- None

Usage Notes

- The Provisioning Manager URL is <https://wfc-provisioning1.pttpro.zebra.com/admin/login>. To request portal access to the WFC Provisioning Manager, contact Zebra support.
- Bootstrapping is supported with the following client versions:

Client	First GA Release with bootstrapping
WFC Voice	9.0.23406
PTT Pro Android	3.3.10257
Profile Client	2.0.23401

- Feature-based licensing as provided by the Provisioning Manager is first supported in WFC Voice v9.0.20306. The customer may view the licensed devices in the Provisioning Manager portal, in the Licensing/Assigned tab.
- The customer may release standard licenses from specific devices by obsoleting them in the Extension Manager portal, in the Portal/Devices tab.
- **Important:** Note that premium licenses can only be used for premium PBXs. Standard PBXs require standard licenses. Customer with premium licenses should ensure that their devices are all configured to use premium PBXs.
- Licensing notes:
 - Existing 9.x customers upgrading to WFC Voice v9.0.20306 must contact Zebra to enable the migration of their current licenses to AID-free licensing.
 - Licenses for the WFC Voice Client 9.x may include a 30-day grace period. The client will display the expiration date including the 30-day grace period, but any renewals will be based off the actual expiration date. Refer to your entitlement email from Zebra Onboarding for your actual expiration date.
- 3rd party device support for stand-alone clients requires the following client versions:
 - WFC-Voice v9.0.22308 or above (WFC Voice is not supported on iOS devices)
 - PTT Pro Android v3.3.10197 or above
 - PTT Pro iOS v1.0.11086 or above

Refer to PFM release notes for client versions supporting 3rd party devices using PFM deployments.

Known Issues

- None
