TC53	11-12-13.00-RG-U00 or later	Go to download page
TC58	11-12-31.00-RG-U00 or later	Go to download page
WS50	11-17-03.00-RN-U00 or later	Go to download page
All other Android 11 devices (SDM660 platform only)	11-23-13.00-RG-U00 or later	Go to download page

New Features in zDNA Cloud 2.3

- **My Apps** (see [My Apps](#))
 - Zebra App Collection now supports multiple app versions
 - Enhanced Google Drive interface for Zebra and third-party apps
 - Once the Google Drive has been configured in My Services Tab, It is advisable to edit all existing profiles that were linked to other Google drive accounts previously and select files from the newly configured drive
- **My Services** (see [My Services](#))
 - A “My Services” tab has been implemented in the My Profile section for management of external connected service accounts by the tenant owner. Currently contains Google Drive service information only, and is accessible only by the tenant owner. **NOTE: Does not store login information.**
- **UI Changes, Enhancements**
 - New icons for side menus and enhanced coloring to indicate menu selection state
 - Enhanced Managed Configuration UI in New Setting Advanced Wizard and in Zebra and third-party apps

Requirements

Refer to the [System Requirements](#) section in zDNA Cloud documentation.

Usage Notes

- Refer to the zDNA Cloud documentation

Known Issues

- Battery health screen sometimes display information different than that displayed on the device.
- Configuring NFC settings sometimes displays an error despite being applied properly on the device.
- When creating a managed configuration for Enterprise Keyboard, remapping a programmable key requires two backslash ("\\") characters (rather than one, as documented).
- Deploying a managed configuration (MC) generated from a newer version of a third-party app schema can cause duplicate or missing MC values to be displayed in the Review and Apply pages of a setup Profile of an older version of the app.

About Zebra DNA Cloud

[Zebra DNA Cloud](#) integrates our Mobility DNA portfolio solutions into a single, intuitively organized interface. By harnessing our existing software's capabilities, we offer customers and partners secure solutions that help deploy, manage and support every stage of device lifecycles. With Zebra DNA Cloud, organizations can tailor device settings to meet their specific needs by leveraging Mobility Extensions (Mx). Application management and configuration of Mobility DNA tools will ensure users have access to the Zebra applications required to accomplish their work. Administrators can leverage LifeGuard OTA to ensure their devices are always up to date with the latest features and security, all with a single click and without having to touch each device physically.
