Release Notes - StageNow v2.10

Contents

Introduction

StageNow is Zebra Technologies' next-generation Staging Solution for Zebra Android Mobile Devices. Staging is top of mind for our customers and partners as it is the initial process by which devices are taken out-of-the-box and prepared for production use. Staging Enterprise Mobile Devices can be done manually which is error prone and time consuming. Custom solutions are also used but are often not supported or forward compatible with newer devices. Zebra Technologies' Tier 1 MDM products can also be used to stage and manage Mobile Devices; however these powerful tools come with a price tag. StageNow is not only free of charge but also helps eliminate deployment barriers that add additional IT complexity, time, and costs.

User guide is available online at http://techdocs.zebra.com/stagenow/2-10/about/

Description

StageNow provides an easy way to stage Android mobile computers from Zebra Technologies. StageNow v2.10 now supports features such as support for Nougat, Marshmallow, Lollipop, Kitkat devices and MX7.2, MX7.1, MX7.0, MX 6.3, MX6.2, MX6.1, MX6.0, MX5.2, MX5.1 software update, exporting profiles for MDM, enrolling for MDM, seamless upgrade from older versions to latest.

Connection of the device to network, configuration of device settings and security, performing OS Updates, Install and Launch Applications, wipe and reset device, or enroll MDM by simply creating and Scanning Staging barcodes or Audio, NFC Tags.
The application can be downloaded for free and installed on any Windows 7 PC with no pre-requisite software — no need to purchase, locate, license or install other components
