- Improved image resolution retention after editing.

What's New in this Release

- Optimized capture resolutions.

Known Issues and Limitations

- Annotations do not scale properly during crop or orientation changes.
- Portrait gallery image artifacts placed on top of landscape gallery after changing orientation.

Installation and Configuration Instructions

To manually install SnapWorks 2.0.5455.30829, perform the following steps:

1. Download the update and save to the directory location of your choice.
2. Unzip the file to a location on your local drive.
3. Uninstall previous version of SnapWorks prior to installation.
4. Manually delete the SnapWorks folder, if one exists, in C:\Program Files (x86)\Motion Computing.
5. Double-click the installer (SnapWorks.msi) and follow the prompts, browsing to your license file when requested. If you had a previous version installed, it will automatically use your existing license file. If you do not have a license file, contact your Sales representative.
6. If you did not have a previous version installed, you will want to configure your platform camera button to launch SnapWorks. Copy the appropriate registry file to your desktop and double click on it.

To silently install SnapWorks 2.0.5455.30829 perform the following steps:

1. Run a command shell as Administrator.
2. Navigate to the directory you placed the SnapWorks msi installer and registry edit files.
3. Run the command SnapWorks.msi /qb LICENSEFILE=<path>\SnapWorks.lic

Licensing

Refer to your applicable end-user licensing agreement for usage terms.
