Important News

1. **End of support for Windows Vista** – Beginning with the next version of USBDownload, the support for Windows Vista operating system will be removed. USBDownload will continue to support Windows XP, Windows 7 and Windows 8.

Introduction

Motorola USBDownload is a PC application which allows you to download .hex files from a PC to a supported Motorola mobile computer via a USB connection. Normally when changing the Operating System (OS) on a Motorola mobile computer the recommendation is to use OSUpdate, UpdateLoader, AirBeam or MSP. However in cases where the OS may not be functional, or for purposes of disaster recovery where these tools cannot be used, USBDownload may be used to reload or change the OS on supported mobile computers.

Description

Version 1.2

1. Added support to download hex files via USB 3.0 port.
2. New support for Windows 8 PC installation. USBDownload v1.2 can now be installed on Windows XP, Windows Vista, Windows 7 and Windows 8.
3. Added support for MC2100 CE6.0 Professional. Earlier versions of USBDownload already supported MC2100 CE6.0 Core device. **(added February 2014)***

* New device approval has been received for this package. The approval did not require any software changes. If you already installed the package, there is no need to download and install it again.

Contents

1. USBDownload010200.zip
