Putting Sustainability at the Heart of Our Products

When it comes to creating sustainable products, Zebra is committed. From company-wide global initiatives to the end-to-end product life cycle from manufacturing to retirement, our green initiatives protect the planet—and the people who make and use our products.

Eco-friendly attributes⁵

- No halogens
- No mercury
- No PFO/PFOAs
- No latex
- Compliant with global ROHS requirements

A-to-Z sustainable packaging

Our corrugated packaging is 100% curbside recyclable:

- 98% biodegradable packaging by weight including a bio-based TPU retention film
- All cardboard is made with FSC Mix certified paper

EPEAT certification for proven sustainability

- EPEAT Silver Certified⁶

Lower consumption of devices, accessories and batteries through maximized life cycles

Most carbon emissions occur in the raw material and manufacturing stages—the fewer devices you use, the more you reduce greenhouse gasses

- Maximized Lifecycle with Zebra's Rugged design
- 10+ years of security: keep your devices secure every day of their long life cycle with LifeGuard™ for Android™³
- 10+ years of repair and technical support: no need to retire working devices due to lack of available support³
- Multislot shared cradles are compatible with past and future device generations
- No lost devices to replace: Device Tracker locates lost or misplaced devices even if the battery is dead
- Reduced spare device pool: no-cost Mobility DNA™ troubleshooting tools keep devices on-site and in the hands of your workers—instead of the service center

Green battery technology

- Removable, easy to recycle battery
- Reduced spare battery pool: 23.5 hour battery run time², plus visibility into battery health to ensure that all batteries can hold a full charge
- Zebra Charge Manager allows more efficient charging and longer battery lifetime

Power consumption

- Consumes 39% less energy than the US Department of Energy (DoE) required threshold¹
- Green Mode settings allow for intelligent limiting of power consumption across a fleet of devices
- Fast charging in just 1 hour, 41 minutes⁴
- Zebra Technologies external power supplies meet DoE Level VI and all international efficiency requirements

Use fewer device types

Zebra solutions provide 4-in-1 true device convergence—the device also has an integrated scanner, push-to-talk capability, NFC payments, and can replace a workstation, substantially reducing plastics and electronics volumes, as well as cost

Zebra's Circular Economy provides life cycle management of products that reduce your overall carbon impact

Takeback Recycling Program

Zebra offers free recycling for end of life devices and will provide a certificate of destruction upon request

Device Buy-Back Program

Your end of life devices may be eligible for a device buy-back, enabling a 'green' upgrade to the next generation device

Certified Refurbished Device Program

Purchase or rent Certified Refurbished devices, which perform like new and may include End of Life products, to meet season surges and bridge gaps to a tech refresh

Battery Recycling Services

We offer a variety of options, depending on location, from convenient drop-off locations to complete a-to-z battery management, where Zebra handles it all for you

Sustainability results apply to: TC78 and TC73

1. Testing the TC78, with 1-slot charge only cradle, in accordance with the Unit Energy Consumption for battery chargers test. 2. TC78 device using an outdoor browser intensive profile and a 4400 mAh battery. 3. Minimum of ten (10) years of LifeGuard and Zebra OneCare support are available from the first date product is available for sale. 4. Charging the device from 5% to 90% with a 4400 mAh battery and a USB charger. 5. All electronic products from Zebra may contain other trace amounts of chemicals on the IEC 62474 list of hazardous substances. 6. TC78 device only
