➢ This LG patch is applicable for 11-19-19.00-RN-U00-STD-WTX-04 BSP version.

Version Information

Below Table contains important information on versions

Description	Version
Product Build Number	11-19-19.00-RN-U06-STD-WTX-04
Android Version	11
Security Patch level	December 5, 2022
Component Versions	Please see Component Versions under Addendum section

Device Support

The products supported in this release are WS50 product family.

Please see device compatibility details under Addendum Section.

Known Constraints

- For optimal performance:
    - It is recommended that the sum of memory consumed by all installed applications should not exceed 350MB.
    - It is recommended to use DataWedge Intent API instead of Keyboard Wedge

- Bluetooth PAN, HID and OBEX profiles are not supported on this platform.
- DataWedge UI is limited to selection profiles. The profiles will need to be configured on another device and imported.
- Key Remapping and Ethernet Config need to be configured via EMM or StageNow.
- Recent app functionality is not supported on this platform.
- Full OTA packages are advised for Recovery mode OS updates.
- Delta OTA packages should be used with LifeGuard Over the Air (OTA) APIs or StageNow/MDM solution.
    - Full OTA packages are advised for Recovery mode OS updates. Using delta updates in recovery mode is no longer supported.
