
Release Notes – WT6000 Upgrade from Lollipop to Nougat

Important Notes

Use the UPL(WT6000_L2N_Upgrade.upl) file to upgrade from Android L to Android N through EMM or internal SDCard.

Warning / Known issue: Upgrade using the package (WT6000_L2N_FPU_AOSP_12_29.zip) directly is not supported. If you try to upgrade with the package without the UPL file, the device will become stuck at the splash screen

Installation Instructions

EMM upgrade from Android L to Android N steps – Device with Non-Encrypted Data

1. Make sure the following
 - a. Device is updated with the CFE-WT6000-L-XX-041003-N-00-06.zip (BSP 04.10.03, LifeGuard Update 06)
 - b. The configs are persisted using persist manager. Please refer to the Persist Manager under <http://techdocs.zebra.com>
2. Extract the WT6000_L2N_Upgrade.zip file contents.
3. Push the extracted files (WT6000_L2N_Upgrade.upl and WT6000_L2N_FPU_AOSP_12_29.zip) to root of the WT6000 internal storage.
4. Invoke the upgrade using the WT6000_L2N_Upgrade.upl file

EMM upgrade from Android L to Android N steps – Device with Non-Encrypted Data

1. Make sure the following
 - a. device is updated with the CFE-WT6000-L-XX-041003-N-00-06.zip (BSP 04.10.03, LifeGuard Update 06)
 - b. The configs are persisted using persist manager. Please refer to the Persist Manager under <http://techdocs.zebra.com>
2. Perform an Enterprise Reset to decrypt the device.
3. Extract the WT6000_L2N_Upgrade.zip file contents.
4. Push the extracted files (WT6000_L2N_Upgrade.upl and WT6000_L2N_FPU_AOSP_12_29.zip) to root of the WT6000 internal storage.
5. Invoke the upgrade using the WT6000_L2N_Upgrade.upl file.

Downloadable Software Included in this Release

Filename	Description
WT6000_L2N_Upgrade.zip	<p>Contains the WT6000_L2N_Upgrade.upl and WT6000_L2N_FPU_AOSP_12_29.zip.</p> <p>Warning / Known issue: Upgrade using the package (WT6000_L2N_FPU_AOSP_12_29.zip) directly is not supported. If you try to upgrade with the package without the UPL file, the device will become stuck at the splash screen</p> <p>Use the WT6000_L2N_Upgrade.upl file to upgrade the device.</p>

Known Issues and Limitations

1. Upgrading / downgrading Android L SKUs (WT60A0-TS0LEUS, WT60A0-TS0LEWR) to Android N will cause the Data partition to be reformatted.
2. Upgrading Android L SKUs (WT60A0-TS0LEUS, WT60A0-TS0LEWR) to Android N will result in slightly less battery run time.
3. Downgrading Android N SKUs (WT60A0-TS2NEUS, WT60A0-TS2NEWR) to Android L is not supported. This error message will appear: "This package only for standard SKU"
