

Zebra DNA Cloud 2.5

Release Notes – Jan 2023

Highlights

- Enhanced zDNA Cloud Dashboard
- Enhanced “Delete Device” behavior

Device Support

Newly supported devices and required software updates:

Device Models	Supported OS	Device Software Location
ET40/ET45	11-13-14.00-RG-U00 or later	Go to download page
TC15	11-14-13.00-RG-U00 or later	Go to download page
TC53	11-12-31.00-RG-U00 or later	Go to download page
TC58	11-12-31.00-RG-U00 or later	Go to download page
WS50	11-19-19.00-RN-U00 or later	Go to download page
All SDM660-platform devices running Android 11	11-26-05.00-RG-U00 or later	Go to download page

New Features in zDNA Cloud 2.5

- **Dashboard** (see [Dashboard](#))
 - High-level system overview now displays:
 - Device Battery Health (updated every 24 hours)
 - New Android Updates (updated every 24 hours)
 - “Add a Device” function
 - Banner summarizing what’s new in the current release, link to new-feature details
- **My Devices** (see [My Devices](#))
 - Delete Device functionality adds an option to reset device(s) to factory-fresh state

Resolved Issues

- SPR-48469: All uploaded apps (.apk files) now display Managed Configuration details

Requirements

Refer to the [System Requirements](#) section in zDNA Cloud documentation

Usage Notes

- Delete Device Factory Reset option requires DNA Cloud 2.5 (or later) on the device for proper operation

Known Issues

- Battery health screen sometimes displays information different than that displayed on the device. In most cases, this issue self-corrects after 24 hours.
- Configuring NFC settings sometimes displays an error despite being applied properly on the device.
- When creating a managed configuration for Enterprise Keyboard, remapping a programmable key requires two backslash ("\") characters (rather than one, as documented).
- Deploying a managed configuration (MC) generated from a newer version of a third-party app schema can cause duplicate or missing MC values to be displayed in the Review and Apply pages of a setup Profile of an older version of the app.

About Zebra DNA Cloud

[Zebra DNA Cloud](#) integrates our Mobility DNA portfolio solutions into a single, intuitively organized interface. By harnessing our existing software's capabilities, we offer customers and partners secure solutions that help deploy, manage and support every stage of device lifecycles. With Zebra DNA Cloud, organizations can tailor device settings to meet their specific needs by leveraging Mobility Extensions (Mx). Application management and configuration of Mobility DNA tools will ensure users have access to the Zebra applications required to accomplish their work. Administrators can leverage LifeGuard OTA to ensure their devices are always up to date with the latest features and security, all with a single click and without having to touch each device physically.
