This build is Compliant up to [Android Security Bulletin](#) of September 1, 2023.

Approved Cellular Carriers

- N/A

Version Information

Below Table contains important information on versions

Description	Version
Product Build Number	13-22-11.00-TG-U00-STD-ATH-04
Android Version	13
Security Patch level	September 1, 2023

Linux Kernel	5.4.233
Component Versions	Please see Component Version under Addendum section

Device Support

Legacy devices supported in this release: **ET60**

New devices supported in this release: **ET65**

Please see device compatibility details under Addendum Section.

New Features

- This is an upgrade of Android 13 GMS release for the ET60 product. This is a new release for the ET65 product.
- Added support for the serial port on the Vehicle Dock accessory (including Serial port scanning and Screen Blanking)
- Added support for the 2-in-1 keyboard accessory

Resolved Issues

- None

Usage Notes

- None

Known Issues

- DHCP Option 119 & Auto PAC Proxy feature is currently not supported in this release. Zebra is working on enabling these 2 features in future Android 13 releases.
- The icon for power-off charging mode is incorrect. It shows an unknown battery indicator instead of a battery charging indicator. The battery charging functions normally, this issue is only with the indicator displayed.
- The device fails to roam when the Cisco 9800 controller with software 17.12.1 is configured with "SAE H2E-only" (Hash-to-element).
- There is a bug in GBoard (the default keyboard from Google) where the device "Back" button may not function correctly under the following conditions:
 - GBoard is set as the device default keyboard
 - An external keyboard is attached to the device
 - The "Use on-screen keyboard" setting is disabled
 - Display focus is in a text box

This is expected to be fixed in a future release of GBoard by Google
