## DESCRIPTION

*Changes since BSP 03.44.0004:*

General Stability/Exceptions/Crashes/Lockups

SPR24853 – Resolved an issue where the device would freeze on one of the bootup splash screens and fail to complete bootup, and would require a reload of the OS to function.

### Note:

- The OS update package does not wipe the application folder. If it is preferred to wipe the Application folder during the OS update, the CleanAppl.bin command should be added to the pkgs.lst file. The CleanAppl.bin file is already included in the OS Update package.
- “Clean Boot” and “CleanBoot and Clean Application” packages have been updated (“ES400-MC65-CleanBoot&CleanBoot-Blank\_v2.zip”) for OS versions containing the Datalight FlashFX flash file system. The new packages are compatible with older OS versions as well.
