## **Introduction**

The Motorola RFD5500 RFID sled reader is a business class sled for the Windows Mobile 6.5 based MC55, MC65, MC67 (WEH 6.5) platforms. It is ideally suited for customers who desired the benefits of the MC55/MC65/ MC67(WEH 6.5) mobile computers and want to expand business operations to include RFID.

## **Description**

This download is in addition to the main RFID CAB file install released for the devices.

When the main RFID CAB file is installed on the a MC55, MC65, MC67 (WEH 6.5) which runs a localized OS, the icons in the Start menu do not appear. This APR resolution is intended to address this problem. It is intended to make the various RFID icons easily accessible when the OS on the target device is a *non-English localized version of the WEH 6.5 OS*. The end user is required to install the main RFID CAB file from the appropriate support link prior to installing this CAB file if required.

If the end user is using a standard English version of the OS on the MC55, MC65, MC67(WEH 6.5), *this SPR resolution does not apply.*

## **Contents**

- Motorola RFID Apps International Pack.CAB

## **Device Compatibility**

This software release has been approved for use with the following Symbol devices.

<b>Device</b>
MC55 (A0/N0) – WEH 6.5 (localized OS)
MC65 – WEH 6.5 (localized OS)
MC67 – WEH 6.5 (localized OS)

## **Installation Requirements**

1. Please ensure that the base OS of the device is a WEH 6.5 localized version OS
2. Download the RFD5500 RFID CAB file for the MC55, MC65, MC67(WEH 6.5) and install it on the device.
3. Download the 'Motorola RFID Apps Internal Pack.CAB) cab file from this SPR resolution and install it on the device.
4. The appropriate icons will now be visible on the System Start menu.
