**FOREWORD**

This manual contains installation and operation information for the P310 Series card printers manufactured by Zebra Technologies Corporation, Camarillo, California.

**RETURN MATERIALS AUTHORIZATION**

Before returning any equipment to Zebra Technologies Corporation for in-warranty or out-of-warranty repair, contact Repair Administration for a Return Materials Authorization (RMA) number. Repack the equipment in the original packing material and mark the RMA number clearly on the outside. Ship the equipment, freight prepaid, to the address listed below:

For USA and Latin America:
Zebra Technologies Corporation
Card Imaging Division
1001 Flynn Road
Camarillo, CA. 93021-8706. USA
Phone: +1 (805) 579-1800
FAX: +1 (805) 579-1808

For Europe, Asia, and Pacific:
Zebra Technologies Corporation, Southern Europe
Card Imaging Division
Zone Industrielle, Rue d'Amsterdam
44370 Varades, France
Phone: +33 (0) 240 097 070
FAX: +33 (0) 240 834 745

**COPYRIGHT NOTICE**

This document contains information proprietary to Zebra Technologies Corporation. This document and the information contained within is copyrighted by Zebra Technologies Corporation and may not be duplicated in full or in part by any person without written approval from Zebra. While every effort has been made to keep the information contained within current and accurate as of the date of publication, no guarantee is given or implied that the document is error-free or that it is accurate with regard to any specification. Zebra reserves the right to make changes, for the purpose of product improvement, at any time.

**TRADEMARKS**

P310 is a service mark of Zebra Technologies Corporation. Windows and MS-DOS are registered trademarks of Microsoft Corp. All other marks are trademarks or registered trademarks of their respective holders.
PRODUCT WARRANTY STATEMENT

Printers

All Zebra Card Printers are warranted against defects in material or workmanship for twelve (12) months from the purchase date.

Proof of purchase or shipment date is required to validate the warranty period. The warranty becomes void if the equipment is modified, improperly installed or used, damaged by accident or neglect, or if any parts are improperly installed or replaced by the user.

Note: Products returned must be packaged in the original or comparable packing and shipping container. In the event equipment is not so packaged, or if shipping damage is evident, it will not be accepted for service under warranty. Surface transportation charges for return to customers in the continental United States is paid by Zebra. Otherwise, Zebra pays CPT (carriage paid to) nearest airport, customer pays duties, taxes, and freight from airport to destination. If Zebra determines that the product returned for warranty service or replacement is not defective as herein defined, the customer will pay all handling and transportation costs.

Printheads

Since printhead wear is part of normal operation, the original printhead is covered by a twelve (12) month warranty. Warranty period begins on purchase date.

To qualify for this warranty, the printhead must be returned to the factory or to an authorized service center. Customers are not required to purchase Zebra supplies (media and/or ribbons) for warranty qualification. However, if it is determined that the use of other manufacturer supplies has caused any defect in the printhead for which a warranty claim is made, the user is responsible for Zebra’s labor and material charges required to repair the defect. The warranty becomes void if the printhead is physically worn or damaged; also if it is determined that failure to follow the preventive maintenance schedule listed in the User’s Guide has causes defect in the thermal printhead for which a warranty claim is made.

Spare Parts

All parts, maintenance kits, options kits, and accessories are warranted to be free of defects in material and workmanship for 90 days (except where otherwise denoted) from date of purchase. This warranty become void if the item is modified, improperly installed or used, or damaged by accident or neglect.
DECLARATIONS OF CONFORMITY

European Council Directive | Compliance to Standards
--- | ---
89/336/EEC | EMC Directive EN 55022-B, CISPR 22, RF Emissions Control
Modified by 92/31/EEC & 93/61/EEC |  
EMC Directive EN 500082-1, IEC 801, Immunity to Electromagnetic Disturbances
73/23/EEC | Low Voltage Directive EN60950, Product Safety
Modified by 93/68/EEC

Model: P310 conforms to the following specification:

FCC Part 15, Subpart A, Section 15.107(a) and Section 15.109(a) Class A digital device

Supplemental Information:
This device complies with Part 15 of the FCC Rules. Operation is subject to the following Two Conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

INDUSTRY CANADA NOTICE

This device complies with Industry Canada ICS-003 class A requirements.

Cet équipement est conforme à l’ICS-003 classe A de la norm Industrielle Canadian

INTRODUCTION

Thank you for choosing the Zebra P310 Plastic Card Printer.

These printers produce cards ideal for personalized identification, access control, visitor, membership, promotion and luggage card, badges and tags. This manual guides you to an efficient start up and operation of your new Card Printer.
Zebra’s Product Numbers tell the story:

Here is a quick review of Zebra’s Card Printer Series numbering and lettering system to help you.

Zebra’s P310C Plastic Card Printer Series employ Dye Sublimation and Resin Thermal Transfer technologies. Model numbers include identifiers that specify options and items in the Ship-Away kits.

**P310C - X X X X X - X X**
- **Smart Card:**
  - 0 = No
  - E = Yes
- **Magnetic Encoder:**
  - 0 = No
  - M = Yes
- **Magnetic Encoder Options:**
  - 0 = No
  - 1 = Stripe Down HICO
  - 2 = Stripe Down LOCO
  - 3 = Stripe Up HICO
  - 4 = Stripe Up LOCO
- **Memory:**
  - 0 = Standard
  - 1 = Extended
- **Interface:**
  - P = Parallel (DB-25 Male)
  - S = Serial (DB-25 Female)
  - U = USB
  - A = Parallel/Serial (DB-25 Male DB-9 Female)

  - P = Portugese
  - B = Others
- **Power Cord:**
  - 0 = None
  - A = 120 VAC
  - E = 220 VAC
  - U = UK
ICONS Throughout this manual, different icons highlight important information, as follows:

- **Important general information**
- **Mechanical hazard**, such as one associated with moving parts, capable of resulting in equipment damage or personal injury.
- **Electrical hazard**, such as an exposed voltage point, capable of causing electrical shock and personal injury.
- An area where electrostatic discharge (ESD) can cause component damage. Use a grounding wrist band.
- **Elevated temperature hazard**, capable of producing a burn.
- **Keep Card Printer clean** by minimizing cover open time.

GETTING STARTED

UNPACKING YOUR CARD PRINTER
Your P310 printer ships in a carton and protective anti-static bag. Keep all packing material in case you need to move or re-ship the printer.

While unpacking, inspect the carton to ensure that no damage occurred during shipping.

Please ensure that you have a clean and nearly dust free environment for proper operation and storage of the printer.
In addition to user documentation, make sure the following items are included with your P310 printer:

- CARD CARTRIDGE
- POWER CABLE
- CARD OUTPUT HOPPER
- INTERFACE CABLE
- SWABS & SATURATED CLEANING CARDS
- CD ROM (OPTIONAL)

CARD CLEANING CARTRIDGE and PRINTER QUICK REFERENCE
(Not Shown)

If any items are missing, please contact your dealer.

To reorder, please refer to Appendix C of this manual.
**INDICATORS AND CONTROLS**

Your P310 Printer has three Status indicators and a panel button on the front and a power switch on the rear:

**INDICATORS** (green, amber & red) signal printer activity by illuminating or flashing, as follows:

<table>
<thead>
<tr>
<th>INDICATOR</th>
<th>ON</th>
<th>FLASHING</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>POWER ON</td>
<td>PROCESSING</td>
</tr>
<tr>
<td></td>
<td>LOAD CARDS</td>
<td>REPLACE RIBBON</td>
</tr>
<tr>
<td></td>
<td>PRINTER ALERT</td>
<td>ENCODER ALERT</td>
</tr>
<tr>
<td></td>
<td>REREFER TO TROUBLESHOOTING</td>
<td>REREFER TO TROUBLESHOOTING</td>
</tr>
</tbody>
</table>

**OTHER ALERTS**

<table>
<thead>
<tr>
<th>AMBER &amp; RED</th>
<th>PRINTER CLEANING PROCESS REQUIRED</th>
</tr>
</thead>
<tbody>
<tr>
<td>FLASHING</td>
<td></td>
</tr>
<tr>
<td>ALL FLASHING</td>
<td>PRINT HEAD COOL DOWN MODE</td>
</tr>
<tr>
<td></td>
<td>PRINTING WILL RESTART SHORTLY</td>
</tr>
</tbody>
</table>

**PANEL BUTTON** This is a push button to operate the printer for:

- CLEAR ERROR
- CLEANING PROCESS
  - SEE CHAPTER 4
- TEST CARD
  - SEE CHAPTER 2
**PRINTER INSTALLATION**

The following will guide you through the installation of your P310 Printer.

---

**CAUTION:** Limit AC power supplied to the P310 to 110 ~ 230 volts, 60 ~ 50 Hertz, for an associated 680 ~ 280 milliamps. Limit excess current draw to 16 amps or less, using an associated circuit breaker or other such device. Never operate the printer in a location where operator, computer, or printer can get wet. Personal injury could result. The electrical security of the printer is based on the reliability of the mains power source.

---

1. **Place the printer in a location that allows easy access to all sides.** The printer should never be operated while resting on its side or upside down.

2. **Place the printer’s power switch in the OFF (0) position.**

3. **Insert the power cable into the printer power socket and attach to grounded electrical socket of the proper voltage and type.**

4. **Attach interface cable to printer and computer and then secure.**

5. **Switch power on.**

---

**CAUTION:** Intermittent or unpredictable operation may occur from unsecured connectors. If damaged, the power cable must be replaced by an exact equivalent.
P310 PRINTER The following shows the features found on your P310 Printer:

STANDARD FEATURES
1. Print Head
2. Print Head Unlock Lever
3. Manual Holder
4. Card Output Hopper
5. Status Indicators
6. Panel Button
7. Card Cleaning Cartridge
8. Card Cartridge
9. Card Thickness Control

OPTIONAL FEATURES
A. Magnetic Encoding Station
B. Smart Card Contact Station

PLEASE NOTE: Any blue items inside the printer can be operated by the user.
LOADING RIBBONS

The P310 Printer requires approved ribbons (See Appendix C). The Resin Thermal Transfer and Dye Sublimation ribbons are specifically designed for your P310 Printer. For optimum performance and printer life (Print Head), always use approved ribbons.

DO NOT TOUCH the print head or the electronic components on the print head carriage. Discharges of electrostatic energy that accumulates on the surface of the human body or other surfaces can damage the print head and other electronic components used in this device.

1. Remove ribbon from packaging.

2. Open cover and press down on the print head unlock lever to open the print head carriage. The print head carriage will pop open.

Continued on next page .........
3. Load ribbon onto the supply spindle (under print head carriage) and empty core (with tape attached) onto the take-up spindle. Make sure the ribbon comes off of the top of the supply spindle and feeds to the top of the take-up spindle.

4. Push down on the Print Head Lock Lever until an audible ‘click’ signals the locked-down position.

5. Close Cover.

Please note that the ribbon automatically synchronizes whenever the print head lock down occurs.
LOADING CARDS  To help you load, print, and collect cards, the P310 has with the following items:

A - CARD CARTRIDGE
For loading cards.

1. Install Card Cartridge by hooking onto printer as shown and clicking down.

2. Install cards into Cartridge.*

DO NOT bend cards or touch print surfaces as this can reduce print quality. The surface of the cards must remain clean and dust free. Always store cards in an enclosed container. Ideally, use cards as soon as possible. If cards stick together, carefully shuffle them.

3. Close hopper.
**B - CARD THICKNESS CONTROL LEVER**

This item is operated by the user to prevent more than one card feeding into the printer at the same time and causing a jam.

Open Cover, and adjust lever to correct position. Repeat for different card thickness. (Factory setting is for 30mil (0.762mm) card thickness. See diagram below:

Card Thickness:
A - 60mil (1.524mm) to 50mil (1.27mm)
B - 40mil (1.016mm)
C - 30mil (0.762mm)
D - 20mil (0.508mm)
E* - Less than 20mil (0.508mm)

* Start at lowest position and move lever up to match card thickness.

For other card thickness, start lever at lowest position and move up until cards feed.

**C - CARD OUTPUT HOPPER**

For collecting printed cards

Install Card Output Hopper onto printer by hooking over bottom edge of card exit aperture.
**FEEDING ONE CARD AT A TIME**

A Manual Feed Slot is available on the side of the Card Input Hopper for feeding single cards. Cleaning Cards are fed manually through this slot. The Card Cartridge must be empty for manual card feeding to work properly.

For one-at-a-time printing, feed cards through slot on side of

Do not feed more than one card at a time.

**REMOVING CARD CARTRIDGE**

Remove the Card Cartridge prior to packaging the printer for shipment.

To remove, pull hook back, and lift hopper out.
**PRINTING A TEST CARD** With ribbon and cards loaded, your P310 printer is ready to print. To check the operation of the printer you should print a test card.

1. Place the printer’s power switch in the OFF (0) position.

2. While pressing the panel button, switch printer on. Green indicator will show.

3. Keep pressing panel button until green indicator starts flashing.

4. Release panel button and a test card will print after a few seconds.

This is an example of the test card.
Printing with the P310 Printer requires the Windows printer driver, the WindCard software, or printer command level programming through the printer interface.

The P310 Card Printer can be used with any Windows 95/98 and Windows NT 4.0 software application program, using the drivers provided with the printer.

This section contains information on the printing of a sample card in color (using the 5-Panel color ribbon YMCKO) and the Windows printer driver.

BEFORE installing updated printer driver versions, always delete the existing printer driver version from your computer.
TO INSTALL THE P310 PRINTER DRIVER INTO WINDOWS 95, USE THE FOLLOWING STEPS:

1. Start your computer and then Windows.

2. Insert either the CD ROM or Diskette containing the Windows Driver into the associated drive.

3. Under Windows click the Start button, Select Settings, then Printers.

4. Double-click on the Add Printer icon. The Add Printer Wizard will display a list of printers. Select Have Disk and locate the P310 Drivers on the CD. For more information about how to install a Windows driver please consult the appropriate Microsoft documentation.

Once the printer driver has been successfully installed, you will need to configure it for your printer. This driver provides control of several printer features when printing from Windows applications. These features are accessed through the P310 Plastic Card Printer Properties. To access these properties select the Zebra P310 Card Printer icon in Printers. Then click File Menu and select Properties.

The P310 Printer screen appears. Change the options as follows:

1. On the Printer Tab configure the magnetic encoder feature. If your printer is equipped with a Magnetic Encoder option, select With Magnetic Encoder option.

2. On the Card Tab select card orientation:
   Landscape or Portrait - Select ‘Landscape.’

3. On the Ribbon Tab, select the Ribbon Type. Select YMCKO for the standard 5-panel ribbon.

4. In the same tab, go to Black Panel area and select Text Only. This option allows the text printing using the Black Resin Panel from the Color Ribbon.

Now that you have loaded media and set up the printer driver, the P310 Printer is ready to print.

EXAMPLE: FOLLOW THESE STEPS TO PRINT YOUR FIRST CARD:

1. Go to the Microsoft Word Software.

2. If the printer was not selected as the default printer, go to the File menu and point Printer Setup and choose Zebra P310 Card Printer in the list. Then press Close button.
3. Come back to **File** menu and point **Page Setup**.

4. Select **Size Tab** and in **Paper Size** choose **Card**. Then select the orientation: 'Landscape.'

5. Go to **Margins Tab**, put the top, bottom, left and right margins with 0 values.

6. Press OK to close Page Setup Window.

7. The card appears on the screen.

8. Design a card with both black and colored text and with colored pictures, i.e.:

9. Once you are ready to print, go to **File** and point **Print**.

10. The printer will feed in a card and start printing (the data downloading time will vary depending on the complexity of the card design and the processing speed of your computer).

11. Once the printing job is achieved the card is ejected from the printer.
CLEANING

PROTECT YOUR FACTORY WARRANTY!
The recommended maintenance procedures must be performed to maintain your factory warranty. Other than the recommended cleaning procedures described in this manual, allow only Zebra authorized technicians to service the P310 Printer.

NEVER loosen, tighten, adjust, or bend, etc. a part or cable inside the printer.

NEVER use a shop air compressor to remove particles in the printer.
CLEANING SYSTEM

Your P310 Printer includes a simple cleaning system using the Pre-saturated Cleaning Cards provided. The regular use of these cards will clean and maintain important parts of your printer: including the Print Head, Transport Rollers, and Magnetic Encoder Station.

WHEN TO CLEAN

When the amber & red indicators flash
(Every 1000 cards* approx.)
*Using 5-panel color ribbon (YMCKO).
*Optional factory setting.

HOW TO CLEAN

1. Leave power on.
   Open Cover and release Print Head Bracket to remove ribbon.
   Close Print Head.
   Close Cover. Remove cards from Card Cartridge.

2. Insert one Pre-saturated Cleaning Card (provided) through slot on the side of the Card Cartridge.

3. Press the Panel Button for a few seconds. The Card will feed into printer and carry out the cleaning process. Repeat the process with a new Cleaning Card if necessary.

Note: For cleaning prior to the WHEN TO CLEAN signal, press the Panel Button for 3 seconds to start the cleaning process.

Although the amber and red indicators will keep flashing until the cleaning process has been performed, the printer will continue to operate.
CLEANING THE PRINT HEAD

A cleaning using the Cleaning Cards usually suffices. However, a separate Print Head cleaning using swabs can remove more stubborn deposits when print anomalies persist. To avoid deposits, only use foam-tipped swabs. Never use a sharp object to scrape deposits from the print head. Permanent damage will result.

1. Raise Print Head and remove the Ribbon.

2. Clean Print Head by moving alcohol-moistened swab tip side-to-side across Print Head elements. Only use moderate force. (To reorder swabs see Appendix C.)
CARD CLEANING CARTRIDGE

Your P310 Printer also has a Card Cleaning Cartridge. This item cleans the cards entering the printer. To ensure print quality, the cleaning roller requires periodic replacements.

WHEN TO MAINTAIN
When the amber & red indicators flash.
(Every 1000 cards* approx)
*Using 5-panel color ribbon (YMCKO)
*Optional factory setting.

HOW TO MAINTAIN
1. Turn power off. Open Cover and locate Cleaning Cartridge.

2. Gently remove by rotating up and away from printer.

Continued on next page...
Although the amber and red indicators will keep flashing until maintenance has been performed, the printer will continue to operate.

3. Remove Cleaning Roller from Cartridge and discard.

4. Install new Cleaning Roller into Cartridge*. To avoid contamination, always hold the Cleaning Roller assembly by the ends.

5. Carefully peel off wrapper from new Cleaning Roller while in Cartridge.

6. To replace Cartridge into printer:
   Make sure the arrow on top of the assembly is facing toward the rear of the printer.
   Hook assembly into slot on printer and rotate down. Ensure the assembly locks in place.

   DO NOT touch the roller surface that contacts the cards.

7. Close Cover.

* See Appendix C for replacement Cleaning Rollers.
The following offers causes or solutions to symptoms related to improper operation. Check this table when experiencing any loss of operation or print quality. Note that the LEDs appear white for ON, dark for OFF, and circled with radial lines for FLASHING.

TECHNICAL SPECIFICATIONS

**General**
- High speed printing, over 140 cards/hour edge to edge in full color (YMCKO) throughput
- Small footprint
- Easy to use Wind Card Classic utility tool (option)
- Windows Drivers for 95 and NT 4.0 (option)
- One year printer warranty
- One year (100k passes) print head warranty
- Powerful EPCL (Zebra’s Command Language)

**Color Printing**
- Color dye sublimation or monochrome thermal transfer printing
- 25 seconds per card edge to edge in full color (YMCKO)
- 300 dpi (11.8 dots/mm) print resolution
- Edge to edge printing standard

**Bar Codes**
- Code 39
- Code 128 B & C with & without check digit
- 2 of 5 & 2 of 5 industrial
- UPCA
- EAN8 & EAN 13
- PDF 417 2D bar code and other symbologies available via WindCard Classic utility tool (option)

**Fonts**
- Resident: Normal 100, Bold 100
• True Type fonts available via Windows Driver and WindCard Classic utility tool (option)

**Cards**

* Types PVC, Composite
* Card width/length: ISO CR-80 - ISO 7810, 2.125” (54mm) by 3.385” (86mm)
* Option: Magnetic Stripe - ISO 7811
* Option: Smart Card - ISO 7816-2
* Card thickness: 10 mil (0.25mm) to 60 mil (1.524mm)
* Card Cartridge capacity: Up to 210 cards (10 mil), up to 75 cards (30 mil)
* Card Output Hopper capacity: up to 210 cards (10 mil), up to 75 cards (30 mil)

* Use Zebra approved media only.
Ribbons*  
- Monochrome: 1500 cards/roll
- Monochrome colors: black, red, blue, green, silver, gold, white, scratch-off grey
- K-resin + O: 800 cards/roll
- K-dye + O: 800 cards/roll
- YMCKO: 350 cards/roll

Overlay Varnish  
- Thermal transfer
- 4 microns thick
- Clear and holographic options:
  - Clear
  - Genuine/Secure Hologram
  - Pcard Hologram
  - Custom Hologram

Interfaces  
- Parallel Standard (cable included)
- RS-232C Serial (option)

Mechanical  
- Width: 11.8” (315mm)†
- Depth: 7.75” (198mm)†
- Height: 8.7” (220mm)†
- Weight: 13.4lbs (6.1kg)

Electrical  
- 110 ~ 230 Volts AC, 60 ~ 50 Hz
- FCC Class A, CE, UL, and CUL approved

Environmental  
- Operating Temperature: 60 to 86°F (15 to 30°C)
- Operating Humidity: 20 to 65% non condensing
- Storage Temperature: -23 to 158°F (-5 to 70°C)
- Storage Humidity: 20 to 70% non condensing
- Ventilation: Free air

* Thermal transfer (Resin) ribbons offer more durability than dye sublimation, with greater resistance to scratches and UV-induced fading.

Dye Sublimation printing requires dye sublimation ribbons, with either black or cyan, magenta, and yellow (plus black resin) panels.

† Measured without card feeder and card hopper
Options

- RS-232C serial port
- Smart Card Contact Station (30 mil cards only)
- Magnetic Encoder (30 mil cards only)
- Extended Warranty program
- Hot Swap Warranty program
- Cleaning supplies
- Service Manual
- WindCard design software

Use only Zebra-approved card and ribbon media. Using non-approved card or ribbon media can void your warranty.

Refer to the Accessories section for more information about Card and Ribbon Media available from Zebra Technologies.
Operation and maintenance requirements for the P310 Printer with the optional magnetic card stripe encoder. (See Chapter 2 for location). The magnetic encoder can be set for either high and low coercivity.

The magnetic encoder is a factory installed item with the read/write head positioned below the card path, available with HICO encoding (P310CM1 or P310CEM1) or LOCO encoding (P310CM2 or P310CEM2).

When loading cards into the Card Cartridge, please ensure the magnetic stripe is facing towards the printer and closest to the rear.

Also available are Printer models with the Magnetic Read/Write head positioned above the card path, with HICO encoding (P310CM3 or P310CEM3) or LOCO encoding (P310CM4 or P310CEM4).

When loading cards, please ensure the magnetic stripe is facing away from the printer and closest to

NOTE:
M1 - HICO encoding - stripe down  M3 - LOCO encoding - stripe up
M2 - HICO encoding - stripe down  M4 - LOCO encoding - stripe up

Approved HICO & LOCO PVC cards are available. (See Appendix C.)

SAMPLE ENCODING PROGRAM
Refer to Programmer’s manual (Part number 980081-001)

ONLY USE cards that comply with ISO 7810 & 7811 standards for magnetic stripe cards. The magnetic stripe must be flush to the surface of the card to work properly. Never use taped-on magnetic stripes.
The read/write head requires periodic cleaning to maintain error-free encoding

**WHEN TO CLEAN**

When the amber & red indicators flash (Every 1000 cards* approx.)
*Using 5-panel color ribbon (YMCKO).
*Optional factory setting.

**HOW TO CLEAN**

1. Leave power on.
2. Open Cover and release Print Head Bracket to remove ribbon.
3. Close Print Head.
   Close Cover. Remove cards from Card Cartridge.

2. Insert one Pre-saturated Cleaning Card (provided) through slot on the side of the Card Cartridge.
3. Press the Panel Button for a few seconds.
   The Card will feed into printer and carry out the cleaning process. Repeat the process with a new Cleaning Card if necessary.

**Note:** For cleaning prior to the WHEN TO CLEAN signal, press the Panel Button for 3 seconds to start the cleaning process.

Although the amber and red indicators will keep flashing until the cleaning process has been performed, the printer will continue to operate.

‡ Including Start, Stop and LRC characters. Also note that these 3 characters are automatically managed by the magnetic encoder according to the ISO Standard Norms. **NOTE:** Refer to the Card Printer Programmer’s Manual for complete programming information.
This section contains information on the additional operations of the P310 Printers with Smart Card Contact Stations. (See Chapter 2 for location.)

**INTRODUCTION**

Smart Cards can have a built-in microcomputer and a battery. Card Memory can store fingerprints, voice recognition patterns, medical records and other such data. The P310 may be equipped with an optional contact station for programming Smart Cards (ISO 7816). This printer model responds to commands that position the cards at the contact station, where the printer connects to the contacts on the Smart Cards. All other printer operations remain the same as the standard P310 model.
Orient the cards with the Smart Card Chip at the top of the card and facing away from the printer.

When a command to the parallel printer interface sends a card to the Smart Card Contact Station, the printer connects the Smart Card Contact Station to the female DB-9 connector on the rear of the printer.

An attached external Smart Card Programmer can be used to program Smart Card chips.
