

ZebraLink Mirror

REDUCE THE AMOUNT OF “OVERHEAD” REQUIRED TO SUPPORT ZEBRA PRINTER CONFIGURATIONS.

The Solution — Mirror

ZebraLink™ Mirror can automatically ensure printers are functioning with the latest intended information to keep operations running smoothly — important printer information can be loaded once on a networked server and sent to any or all printers on a network.

The information stored on a server can include printer firmware, files (fonts, images, formats), and printer settings. The printers can be synchronized with the files maintained on a server:

- Automatically when the printer is powered up
- At specified time intervals
- Both on power up and at time intervals
- On command

Benefit

Automatically managing printer configurations can save Operations and IT staff time and money, and ensure printers are functioning with the needed configuration. For example, as printer firmware is updated, the firmware can be loaded once on a networked server. At a specified time, firmware for all printers at all sites across the globe can be synchronized with the most recent firmware... imagine the time and expense of manually managing this across all printers in a global Fortune 100 company!

Zebra Development Services

Zebra® can create mirror-capable compatible files and assist with network set-up. To learn more visit: www.zebra.com/developmentservices

Part of the ZebraLink Software / Tools Suite

What's Needed?

- Supported printers:

Xi4™ Series	GK420™	ZE500™ Series
105SLPlus™	GK420 Healthcare	ZQ500™ Series
ZT400™ Series	GC420™	iMZ Series™
ZT200™ Series	GT800	EZ320™
KR403™	ZD410	ZQ110™
ZD500™	ZD410 Healthcare	HC100
GX420™	ZD500R™	ZE500R™
GX430™	TLP 2824 Plus™	R110Xi4™
ZD420	QLn™ Series	
ZD420 Healthcare	QLn Series Healthcare	

- Printer firmware version x.17.2 or later
- Customer FTP Server with required Mirror folder structure
- Files to be stored, such as firmware, images or fonts, and commands for the printer to execute
