Zebra Validation Program Application Test Overview UberServices 2.0

Summary

- [UberServices](#) was launched by [Uberall LLC](#) to allow companies to increase visibility, have an effective ticket management and a better insight of their field operations while reducing costs.
- The Zebra Global Validation team worked with engineers at Uberall LLC to test and validate UberServices with Zebra's iMZ mobile printer

Product Details

Description: UberServices – This mobile app is specially designed to optimize itinerant work processes. UberServices allows companies to receive work orders from clients (via e-mail or phone) and assign them to itinerant workers by using a web browser. Key features include:

- Mobile workers can consult, manage and complete work orders on the field
- Print tickets on field
- Allow to Geo-reference clients by sending information to the Operations Center
- Status notification change in real time
- Multi-User, Multi-Lingual
- Scalable and Worldwide applicable

Verticals: Transportation & Logistics
