Zebra Validation Program Application Test Overview *AirWatch*

Summary

- AirWatch is the world’s largest mobile security and enterprise mobility management provider. As it approaches a decade in business, AirWatch continues to develop solutions that empower companies to focus on innovative uses of mobile technology rather than dealing with the complexities of managing mobility.
- AirWatch saw the need to enable their customers to manage peripheral devices such as mobile enterprise printers. AirWatch and Zebra collaborated to add support for Zebra Link-OS products into AirWatch software through a joint developed effort.

Product Details

Description: The AirWatch software, in conjunction with the Zebra AirWatch Connector, allows users to manage Link-OS printers from anywhere. This software is web based with a database to log device information. Key features include:

- Automatic printer enrollment
