Zebra Validation Program

Application Test Overview

Retail Mobile POS

Summary

- [Retail Mobile POS](#) was launched by [FoundryLogic LLC](#) as a point-of-sale application designed for iOS devices that allows sales associates to get out from behind the counter to checkout customers more quickly and conveniently, increasing both sales and customer satisfaction.
- After product launch, FoundryLogic realized the need to integrate their software with a leading mobile receipt printer supplier. The Zebra Global Validation team worked with engineers at FoundryLogic to test and validate Retail Mobile POS with Zebra's iOS compatible iMZ mobile printer

Product Details

Description: Retail Mobile POS allows you to answer questions, provide personal service, and checkout customers directly on the sales floor. Key features include:

- Item Search: Lookup item price and on hand quantities
- Customer Search: lookup customers, change customer details, and add new customers
- Barcode scanner: supports enterprise sleds for iPod touch, external Bluetooth barcode scanners, or read barcodes using Apple's built-in camera.
- Tenders: process cash and credit cards, accept multiple tenders, and capture digital signatures.
- Receipts: create regular sales receipts, assign a customer to a receipt, add items and change item quantities, add item discounts and reason codes.

Verticals: Retail / MPOS
