Zebra Validation Program Application Test Overview *zTicketDispenser*

Summary

- [zTicketDispenser](#) was launched by [Moving2U Lda](#)
- zTicketDispenser allows users to manage and print numbered tickets for one or more queues, in the same way old ticket dispensers did.

Product Details

Description: zTicketDispenser is an iPad application to print queue turn number. Application can manage several queues. User simply touches the queue line, and application increments turn number for that queue and prints a label containing Header information, Queue ID, Turn Number, Turn Number barcode, and Footer. Key features include:

- Choose number of queues to manage
- Give each queue a name and description
- Choose custom background image
- Create multiple location/profiles
- Manage available queues to each location/profile

Verticals: Retail
