# Zebra Validation Program

## Application Test Overview

### Mobi Print Application

## Summary

- [Mobi Print](#) by [Arrowhead Corporation](#) gives its users the capability to print (Bluetooth or Wi-Fi) PDF's, Images or Cloud based label formats to Zebra mobile or desktop printers on iOS devices.
- Mobi Print app takes printing to a whole new level of ease by using the native iOS functions to print PDF's, Images, or webpages. Mobi Print also supports inter app data sharing in case you already have a native iOS app or web service and would like to pass variables to Mobi Print
- [Download Mobi Print from the AppStore](#)<sup>SM</sup>

## Product Details

**Description:** Mobi Print gives users the ability to print their documents, PDF's, images, or data variables in a true mobile environment. (where in some places there is no Wi-Fi). In fact Mobi Print does not need any internet connection to work at all. This allows us to transfer PDF's, images, data strings and other variables into our app for printing and manipulating.

Key features include:

- Print Anywhere - Easily print from FileMaker, iOS Apps, Safari, Chrome, Mail, Google Docs.
- PDF Printing - Open PDF's from Mail, Safari, FileMaker or another application to print with functionality to print and return to source app.
- No Drivers Needed - The app has CPL & ZPL within it so printing is as easy as possible.
- Print an image from a URL - Send the URL of the image to Mobi Print and you will be printing images to Zebra Printers.
- Print from Google docs - by using the Google Drive app you can open any document and "open in" Mobi Print for printing.
- User Friendly – With tools like Auto-Detect & Auto-Print - easily print and stay within your app with no extra work.
- Mobi Print serves an excellent utility for managing Zebra printers, with tools such as firmware updates, speed adjustments, battery notifications, print head darkness and more.
- Once your label format is selected, you can print variable data to your selected formats or even scan/type data into fields to print. Now you are able to print without the need for a network outside in the field or in remote areas.

**Verticals:** Horizontal
