

# LaserBand2 Advanced Wristbands

Zebra's self-laminating LaserBand2® Advanced wristbands feature an advanced shape and design that makes assembly easy and allows the wristband to lie flat on the wrist to enable quick scanning, while providing superior patient comfort.

Zebra's self-laminating direct-print laser wristbands allow printing wristbands and labels on one sheet utilizing existing laser printers.

- Patented self-laminating seal protects the wristband from moisture and hand-sanitizers, preserving patient data including text and barcodes for longer wristband usability
- Ability to simultaneously print patient chart labels and the wristband on one sheet, streamlining patient admissions
- Available with hole-punches for securement into patient charts
- Adhesive-free zones around form edges and holes prevent printer jams and reduces costly printer maintenance
- Enables quick deployment of a bar-coded wristband solution without the need for a separate printer for wristbands

## Features Include

- Self-laminating design protects printed text and barcodes
- Tamper-evident, adhesive closure
- Wristband extender to fit a wide range of wrist sizes
- Available in adult, pediatric and infant sizes, as well as a labor and delivery format
- Latex-free

## Companion Wristband Solutions

### Alert Identification Wristbands

Enable quick identification of special patient conditions (such as, allergy, DNR and Fall Risk) with pre-printed, color-coded wristbands. Available in vinyl with clip-closure or Tyvek® with adhesive closure.

### Alert Identification Labels

Spot-alert color-coded labels can be adhered to any wristband and feature a strong adhesive that causes the label to tear if tampered with. They are available in standard color and designation combinations to support the most critical patient conditions.

### ComfyCuff Infant Solutions

The ComfyCuff family of solutions ensures infant comfort.

- Soft, foam cuff protects an infant's delicate skin
- Swaddle Band enables quick scanning of swaddled babies by creating an extension between the ComfyCuff and the barcode ID tag.

# LaserBand2 Advanced Wristbands Specifications

LaserBand2 Advanced wristbands are available in a wide offering of configurations to fit the patient identification needs of virtually all hospitals.
