

ZEBRA Workcloud Task Management

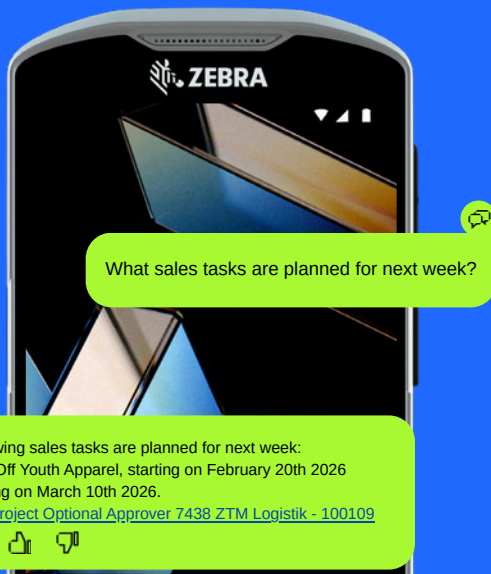

Task Agent

Workcloud's AI-powered Task Agent transforms how your entire organization interacts with operational data, making it more intelligent, intuitive, and integral to your daily workflows.

By embedding advanced conversational AI directly into Zebra Workcloud Task Management, we empower your teams to move beyond simple data lookups or arduous fact-finding work.

Task Agent allows you to engage in a true, multi-lingual dialogue with your enterprise knowledge base—turning static information into instant action.

Built on a privacy-by-design architecture, Task Agent also meets the highest standards of enterprise security and data privacy.

Give frontline associates the user experience they need to streamline communication and execute tasks more efficiently.

Boost Corporate Productivity and Planning

Accelerate the creation and analysis of operational directives. Task Agent gives corporate teams the tools to work smarter, not harder:

- **Insights On Demand:** Leverage top insights to analyze communications between corporate and store teams, surfacing valuable trends that drive strategy.
- **Streamlined Authoring:** Use AI Re-write to instantly optimize project and task titles for clarity, while Generate Notes automatically builds comprehensive task context based on historical data.
- **Instant Clarity:** Utilize content summarization to distill lengthy documents and complex project plans into easily digestible, critical takeaways for your field teams.

Empower Flawless In-Store Execution

Give your store teams the clarity they need to make faster, smarter daily decisions. Task Agent removes friction from the shift, keeping associates focused on the customer:

- **Smart Prioritization:** Equip associates with quick task summaries and clear task categories so they always know what's next and can optimize their time.
- **Frictionless Workflows:** With smooth voice and text guidance and top actions for quick task management, frontline teams can execute directives efficiently, driving significantly higher on-time completion rates.

Turn Your Documents Into a Dialogue

Massive amounts of valuable intelligence are often locked inside static attachments. Task Agent's Talk To Data ability securely analyzes your documents, images, audio, video, and data files, transforming them into a fully searchable, interactive knowledge hub.

- **Seamless Interaction:** Users can ask questions and receive answers in their native languages, while chat history tabs save sessions for easy retrieval later.
- **Enterprise-Grade Control:** A dedicated configuration dashboard allows administrators to securely manage user settings and client preferences, ensuring your operational data remains protected while remaining highly accessible.
