**ZEBRA** | **MATROX IMAGING**

Accelerate Go-to-Market Production and Distribution

Today's fast-paced manufacturing requires you do more than just instantly identify and locate assets. With labor constraints, your speed and agility depend on automating quality verification and decision-making.

Know What, Where and How Every Asset Is

Producing goods is complex. Verifying quality and compliance doesn't have to be. Our acquisition of Matrox Imaging allows you to automatically ensure final products are to spec and in compliance with ever-increasing customer expectations and ever-evolving regulations.

Meet On-Demand Challenges with Machine Vision

Reduce Costs
Reduce waste, flaws and recalls; predict and prevent downtime

Elevate Quality
Eliminate excessive variability and delays from manual inspections

Raise Compliance
Automatically flag and remediate anomalies

Increase Throughput
Match consumption rates to Just-in-Time manufacturing

Simplify Machine Vision with One Interoperable Portfolio

Tap into the synergies of Zebra and Matrox Imaging's union. Matrox Imaging's sophisticated hardware and software complements Zebra's recently developed fixed industrial scanning and machine vision portfolio, creating a robust lineup that delivers greater flexibility, choice, simplicity and value.

HARDWARE

Zebra Technologies
- Fixed industrial smart cameras to support the most challenging barcode scanning
- Core machine vision through a simple software upgrade

Matrox Imaging
Diverse portfolio of advanced offerings:
- Frame Grabbers
- Smart Cameras
- Vision Controllers
- I/O Cards
- 3D Sensors

SOFTWARE

Zebra Aurora™
- User-friendly, intuitive platform
- Consolidates fixed industrial scanning and machine vision automation

Aurora Vision™ *(formerly known as Adaptive Vision)*
- Configuration libraries
- Deep learning technology
- Compatible with a broad set of machine vision products and brands

Matrox Imaging
Hardware-agnostic tools for advanced machine vision applications:
- Matrox Imaging Library
- Matrox Design Assistant

What can you expect from this acquisition?

✓ Simplified Sourcing
Reduce complexity in how you qualify, procure and deploy machine vision products, software and components.

Interoperable Software
Enjoy broad capabilities and user-friendly interfaces that communicate with any camera and 3rd-party systems.

Advanced Hardware
Leverage the highest-quality smart cameras, 3D sensors, frame grabbers, vision controllers and I/O cards to make any system or line perform better.

Partner Centricity
Configure or customize solutions with a leading network of OEMs, machine builders, distributors and system integrators.

Expanded Support
Take advantage of service and support that go beyond technology and span every corner of the world.

Accelerate Speed to Market. Ensure Quality. Simplify Your Automation Strategy. All with Zebra.
