

2026
PORTFOLIO
GUIDE

Workflow transformation from the frontline to the bottom line

For more than 55 years, Zebra has delivered innovative solutions and technologies that help organizations manage their inventories and activities—from barcode printers and scanners, to RFID tags and readers, to mobile and wearable computers, to enterprise software and more—all backed by a robust services portfolio.

Many of our customers have come to depend on Zebra products for their day-to-day operations and year-to-year success. But even our most loyal champions may not fully appreciate everything Zebra has to offer.

Every business in every industry will find innovations in our portfolio that will help them operate more efficiently and effectively: products designed to improve visibility and decision-making, and solutions for achieving sustainability and regulatory compliance.

When our innovation story turned the page to AI, we built it on the foundation of our 55 years of expertise. By innovating products and software that are already proven, we are leveraging AI specifically to improve frontline work.

Examine your capabilities today and consider how you want your business to grow—then ask your Zebra representative how we can help you get there. With over 10,000 partners in over 100 countries, we are where you need us to be, equipped with the local knowledge, deep capabilities, and industry experience required to deliver real value to your business.

“Technology delivers tangible business benefits that change the way business is done. Now more than ever, it’s critical for businesses to digitize and automate their environments with technology that empowers their frontline workforce with real-time visibility.”

— **Bill Burns**, CEO, Zebra Technologies

* Not available in all countries

Engineered for every industry

Transportation and Logistics

Deliver nonstop service from the first mile to the last.

Manufacturing

Increase productivity and profitability on the plant floor.

Healthcare

Streamline care delivery with enhanced workflows and reduced workarounds.

Retail

Accelerate retail transformation and improve customer experiences.

Hospitality

Enhance guest experience and increase operational efficiency.

Warehousing

Manage inventory across your supply chain.

Field Service and Utilities

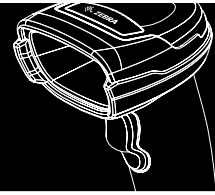

Empower your team wherever the job takes them.

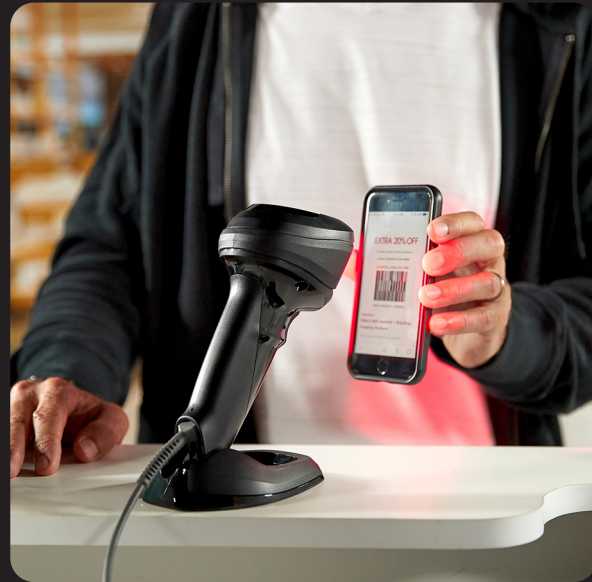

Government and Public Safety

Improve services and safety.

General Purpose Scanners

Jobs may differ, but workers' needs remain the same: split-second, fail-proof, error-proof scanning. Give them scanners made to increase productivity, no matter what their environment or challenge.

Use our scan selector tool to find out which barcode scanners are right for your specific industry, environment, and requirements.

DS9900 Hybrid Handheld/ Hands-Free Scanner

One-of-a-kind hybrid design

Maximum flexibility and superior comfort, designed to boost productivity at the POS.

- Hybrid design offers handheld and hands-free flexibility
- Supports Digimarc™ to speed checkout
- Elevated electronics protect the device from casual spills

INDUSTRY:

DS55 Fixed Mount Scanner

Proven scanning performance in a compact, fits-anywhere design.

- Megapixel sensor delivers 184% higher resolution than the previous generation DS457 for superior performance on damaged and poorly printed barcodes
- Innovative 3-in-1 mount accessory is a computer mount, wall mount and presentation stand all in one

INDUSTRY:

DS2200 Handheld Scanner

The benefits of 2D imaging at an outstanding value with minimal investment.

- Corded and cordless models
- Average 21% faster for a variety of checkout tasks compared to similar models*

INDUSTRY:

DS4600 Handheld Scanner

Keep checkout lanes, manufacturing lines and warehouses running smoothly.

- A model for every need in your organization
- 14% faster scanning through plexiglass during checkout compared to the nearest competitor*

INDUSTRY:

DS82 Handheld Scanner

Premium scanning performance designed with unmatched innovation.

- Programmable multi-function button optimizes workflows
- Fast, inductive charging reduces maintenance

INDUSTRY:

DS9300 Hands-Free Scanner

A fit-anywhere form factor coupled with stylish aesthetics.

- Designed for hands-free scanning but can be handheld
- Compact form factor ideal for limited checkout counter real estate

INDUSTRY:

CS60 Companion Scanner

Easily converts between corded and cordless, hands-free and handheld operation.

- One device can be used for multiple workflows
- Pocketable and wearable when mobility is essential

INDUSTRY:

* Study by US Ergonomics, August 2021.

Service offerings for your scanners

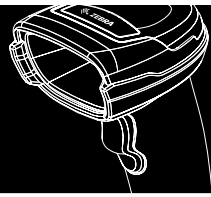

- Zebra OneCare Select or Essential
- VisibilityIQ Foresight
- Professional Services

When you choose Zebra barcode scanners, your workers get the performance, comfort, and ease of use they need to get the job done right—and fast.

Zebra DNA for Scanners covers every stage of your scanning workflows, ensuring that your scanners evolve with your business needs.

Industrial Scanners

Our product design teams work alongside customers like you, observing how they use scanners in warehouses, retail stores, and manufacturing plants. From our rich insights, we designed scanners built to elevate your performance.

Learn how Saddle Creek Logistics raised fulfillment accuracy and efficiency with Zebra ultra-rugged scanners.

Single-Plane and Multi-Plane Scanners

Zebra scanners have been developed and refined through more than 55 years of field-proven innovation, with options for every purpose and price point.

DS3600 Ultra-Rugged Barcode Scanner

Be unstoppable with relentless performance

Takes a beating and still scans faster and farther.

- Corded and cordless models
- Multiple data capture models: standard range, high density, DPM, extended range, and more
- Built to withstand extreme heat, cold, and humidity
- IP65 and IP68 sealing

INDUSTRY:

MP72 Multi-Plane Scanner

Redefine the checkout experience with unmatched speed and unrivaled innovation.

- Maximize checkout speed with a wide field of view
- Future-ready with optimized 2D and GS1 Digital Link performance

INDUSTRY:

SP20 Single-Plane Scanner

Essential scanning features and performance at an outstanding value.

- Easy set-up right out-of-the-box
- Compact form factor and multiple mounting options fit almost any POS

INDUSTRY:

SP72 Single-Plane Scanner

Speed up and simplify your checkout line experience with in-counter and on-counter scanning.

- Best-in-class scan performance with PRZM Intelligent Imaging Technology
- 2MP color camera option to enable vision-based applications

INDUSTRY:

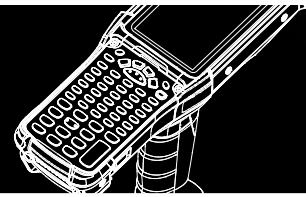

Service offerings for your scanners

- Zebra OneCare Select or Essential
- VisibilityIQ Foresight
- Professional Services

The Zebra DS3600-KD performed up to 14% faster when scanning compared to the nearest competitor.

Handheld Computers

So smart, these multi-taskers speed up work. And a familiar interface is one you'll immediately recognize and know how to use. But unlike consumer devices, they won't fail you. They're made for work—enterprise-rugged and ultra-secure.

MC9 Series

MC9400/MC9450 Mobile Computers

The next evolution loaded with the latest mobile technologies

With the new Qualcomm platform offering 2.5x more processing power and 50% more RAM than the MC9300.

- With the new SE58 Extended Range Scan Engine with Intellifocus™ technology, scan barcodes in hand and over 100 feet (30.5 meters) away*
- New optional 7,000 mAh BLE-enabled battery to locate lost devices even when powered down or low in battery
- The latest in wireless connectivity with Wi-Fi 6E and 5G data-only cellular
- Fully backward compatible with all MC9300 accessories without the need for adapters or replacements of any kind

INDUSTRY:

Identity Guardian is a cutting-edge solution that provides secure, seamless, and personalized user access to enterprise mobile devices using biometric authentication and SSO integration, ensuring the utmost protection in both personal and shared deployments.

MC3 Series

MC3400/MC3450 Mobile Computers

Engineered for the toughest environments and modern workflows—now with more power, advanced scanning, Wi-Fi 6E, and 5G connectivity.

- Two form factor options—straight shooter and gun
- Three keypad options with larger keys and more space between them
- 2.5x more processing power

INDUSTRY:

TC8 Series

TC8300 Mobile Computer

Revolutionary enterprise mobile computer designed to boost productivity and reduce user fatigue.

- Advanced industrial barcode scanning, from 3 inches to 70 feet
- Supports ease of Android migration with All-Touch Terminal Emulation

INDUSTRY:

TC5 Series

TC501 Mobile Computer

Combine advanced mobile technology with sustainability, ensuring seamless communication and data management to meet the dynamic needs of frontline workers.

- Wi-Fi 7, 5G (3rd Gen), Private 5G, CBRS, BT 6.0
- 6-inch FHD+ Hybrid OLED display
- Withstands multiple 8 ft. (2.4 m) drops to concrete per MIL-STD 810-H
- Integrated short-range UHF RFID

INDUSTRY:

TC53/TC58 Mobile Computers

Zebra mobile computers are designed to do more, with hardware and software innovations that redefine mobile computing performance.

- Advanced 6-inch Full HD+ edge-to-edge display
- Withstands multiple 5-foot (1.5-meter) drops to tile over concrete across temperature range
- Four battery options: standard, extended capacity, BLE, and wireless charge
- True Hot Swap
- Wi-Fi 6E, 5G, Private 5G, CBRS

INDUSTRY:

TC53e/TC58e/TC53e-RFID Mobile Computers

These devices in Zebra's popular TC5 series are designed to be more sustainable and meet the evolving mobility needs of today's frontline workers.

- Secure Element support improves power and security
- Wi-Fi 6E, 5G (2nd Gen), Private 5G, CBRS
- Choice of three scan engines
- Integrated short-range UHF RFID (TC53e-RFID only)

INDUSTRY:

Zebra DNA Cloud makes it easier to set up, deploy, manage, and support Zebra mobile devices from a single interface.

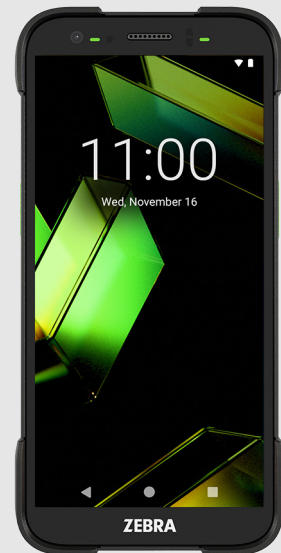

Service offerings for your mobile computers

- Zebra OneCare Select or Essential
- VisibilityIQ Foresight
- Professional Services
- Device Managed Services

* Printing resolution, contrast, and ambient light dependent.

TC7 Series

TC701 Mobile Computer

Redefining tomorrow with innovation today

This new ultra-rugged device offers robust performance in challenging environments, empowering frontline workers with seamless communication and real-time data access.

- Wi-Fi 7, 5G (3rd Gen), Private 5G, CBRS, BT 6.0
- 6 in. FHD+ Hybrid OLED display
- Multiple 12 ft. (3.66 m) drops to concrete per MIL-STD 810H
- Integrated short-range UHF RFID

INDUSTRY:

TC73/TC78 Mobile Computers

Ultra-rugged Wi-Fi 6E/5G mobile computers reimagined to support the new generation of mobile solutions.

- Withstands multiple 10-foot (3.05-meter) drops to concrete at room temperature
- Advanced 6-inch Full HD+ edge-to-edge display
- Four battery options: standard, extended capacity, BLE, and wireless charge

INDUSTRY:

When you choose Zebra, you're in good company. Many of the world's largest organizations trust Zebra enterprise mobile computers to keep their businesses going, including many Fortune 500 companies.

TC1 Series

TC15/TN28 Mobile Computers*

Rugged mobile computer with a new level of affordability built for your supply chain.

- 5G, ultra-long-lasting battery, superb ergonomics
- Integrated scanner and 6.5-inch bright screen

INDUSTRY:

TC2 Series

TC22/TC27 Mobile Computers

Ergonomic and lightweight styling and pricing with big business features that boost productivity and customer service quality.

- Choice of standard or advanced range scanner, Wi-Fi 6/6E, 5G, CBRS
- Value-adds: workstation, POS, RFID, digital wallets, and tap-to-pay ready

INDUSTRY:

EM45 Series

EM45 Enterprise Mobile Computer

Ultra-thin and lightweight—two in one for personal productivity—smartphone ergonomics, built-in RFID and enterprise functionality in one device.

- 5G, Wi-Fi 6E, 6.7-inch bright screen
- Optional integrated short-range UHF RFID
- 4,750 mAh ultra-long-lasting battery

INDUSTRY:

* Available in select countries. TN28 available in China only.
** FR55 available in EMEA only.

Service offerings for your mobile computers

- Zebra OneCare Essential or Special Value
- VisibilityIQ Foresight
- Professional Services
- Device Managed Services

FR55 Series

FR55 First Responder Mobile Computer**

A rugged, mission-critical device designed for public safety, offering advanced broadband capabilities for seamless and secure communication and efficiency in critical situations.

- Interoperability with narrowband devices
- 6-inch Full HD+ display
- Top-mounted Red duress programmable button
- Large push-to-talk (PTT) button
- Supports dual nanoSIM, nanoSAM, and eMBMS

INDUSTRY:

Personal Shopper Series

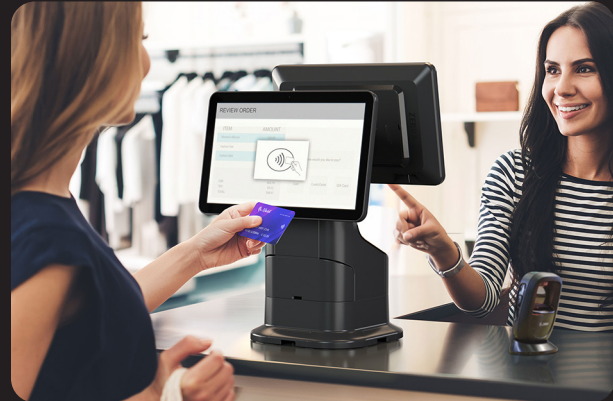

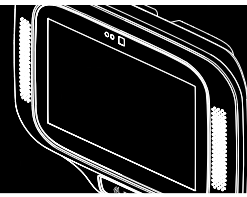

PS30 Personal Shopper

Improve shopper experiences and drive customer loyalty with this all-new, scan-as-you-shop solution.

- Flowing modern ergonomics
- Tap-to-pay and digital wallet-ready
- Enhanced location sensor data for actionable shopper analytics

INDUSTRY:

Interactive Kiosks

When you need the functionality of a tablet without the need for mobility, these fixed, Android-based kiosks elevate customer engagement, offering convenient self-service options customers expect.

Zebra Kiosk System

Delivering excellence in self-service, assisted service, and digital signage.

Exceptional consumer design

- Inviting and intuitive design
- Multi-touch bright screen and voice support
- Accessibility compliant

Complete flexibility

- Choose your size, orientation, and peripherals
- Mount anywhere—wall, desk, counter, and floor—with Universal VESA 75 and VESA 100 mounts
- Power over Ethernet (PoE) for easy installation
- Z-Flex Connectors to instantly add an LED lightbar and SE4720 scanner

Unmatched manageability

- Comprehensive control over kiosk hardware via your EMM
- Powerful cloud-based content management
- Easy to set up, secure, manage, and optimize with Zebra DNA

All-day, everyday reliability

- Built-in durability
- Sealed and ball impact tested
- Maximize uptime with Zebra OneCare support plans

INDUSTRY:

* According to blog post written by Mike Withers, July 2021, citing a Bain & Company report.

Kiosks increase the average retail transaction value by 30% and decrease wait times during pickup and return transactions.*

KC50 Kiosk Computer

The heart of the Zebra Kiosk System

Designed for consumers and built for business with ultimate flexibility.

- 15-inch or 22-inch, portrait or landscape
- Android, Qualcomm® 5430, 2.1 GHz Octa Core
- Wi-Fi 6E
- Voice and digital assistant support
- NFC payment and digital wallet ready

INDUSTRY:

CC6 Series 5-inch and 10-inch Kiosks

Gain tablet-like performance and connectivity for fixed installations.

- Use for digital signage, product demos, or Android interactive apps
- Integrated 2D scanner and Full HD camera for remote video chat
- Supports Wi-Fi, Bluetooth®, NFC, and Ethernet
- Mount horizontally or vertically with floor-facing 2D scanner

INDUSTRY:

ZEC500 Enterprise Computer

A powerful Android computer with flexibility to do any job, from digital displays to workstations on-demand.

- Qualcomm 5430, Wi-Fi 6E, NFC, and BT5.3
- Compatible with any display
- One tap or scan to cast from a Zebra mobile device
- Universal VESA 75 mount

INDUSTRY:

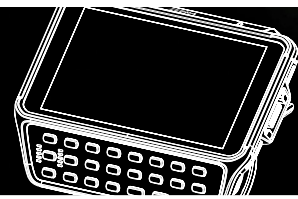

Service offerings for your kiosks

- Zebra OneCare Select, Essential, or On-Site
- VisibilityIQ Foresight
- Professional Services

MOBILE COMPUTERS, TABLETS, AND INTERACTIVE KIOSKS

For more information, visit zebra.com or contact a sales associate.

Wearable Computers and Devices

The rush is on. Free up your workers to handle more, and watch their accuracy and productivity skyrocket. Hands down, these are the best hands-free solutions.

WS5 Series

WS501 Android Wearable Computer

All-in-one Android enterprise-class wearable mobile computer

With a rugged enterprise display, this device improves productivity and task accuracy.

- One-piece wearable; workers only need to wear one device to capture and access data, instead of a host mobile computer and ring scanner
- With different wearing styles: on the wrist, two fingers, or the back of the hand
- Android OS AOSP
- Advanced enterprise-class scanner
- Integrated audio and PTT hardware ready

INDUSTRY:

Device Guardian is a cloud-based solution that efficiently safeguards Zebra Android mobile devices by locating missing ones, identifying devices that are at risk of being lost, helping prevent inventory loss, and securing sensitive data.

Service offerings for your wearables

- Zebra OneCare Select or Essential
- VisibilityIQ Foresight
- Professional Services

“The only way people can move as fast as humanly possible in a warehouse is if they have their hands totally free to pick items, pack and pick up boxes, operate equipment, and more.”

— Samuel Gonzales,
Director of Global Systems and Solutions, Ivanti

WS1 Series

WS101 Bluetooth Communication Badge

This hands-free device integrates with Zebra or consumer mobile computers and tablets, allowing workers to effortlessly manage inventory, communicate, and enhance customer service.

- Use voice to boost productivity and efficiency
- One press of the duress button can connect to a host application to summon help
- Less than two inches square and just over a half-inch thin

INDUSTRY:

WS3 Series

WS301 Wearable Computer

A virtually weightless, hands-free Android enterprise mobile computer designed for unserved hands, boosting communication and collaboration.

- Voice commands to manage tasks effortlessly
- 13 MP camera to capture images and barcodes
- Programmable duress button
- Less than three ounces for all-day comfort

INDUSTRY:

WT5 Series

WT5400 Wearable Computer

Bringing all-day, hands-free comfort and productivity to retail workflows.

- Wi-Fi 6E wireless connectivity
- Large 4.7-inch display screen size

INDUSTRY:

WT6 Series

WT6400 Wearable Computer

Increase workflow efficiency and workforce productivity with the next generation in hands-free wearable computing.

- Large 4.7-inch display screen size
- Uninterrupted operation down to $-22^{\circ}\text{F}/-30^{\circ}\text{C}$ with extended battery

INDUSTRY:

RS2 Bluetooth Series

RS2100 Bluetooth Ring Scanner

The world's smallest and lightest enterprise wearable scanner.

- Bare palm grip capability
- Compatible with Device Tracker to prevent misplacement

INDUSTRY:

RS5 Corded Series

RS5000x Corded Ring Scanner

High-performance 1D/2D scanning from the warehouse freezer to the retail floor.

- Ideal for grocery and pharmaceutical supply chains in operating temperatures down to $-22^{\circ}\text{F}/-30^{\circ}\text{C}$
- SE4770 1D/2D scan engine offers exceptional motion tolerance

INDUSTRY:

RS5 Bluetooth Series

RS5100 Bluetooth Ring Scanner

Single-finger Bluetooth ring scanner enables hands-free mobility, giving workers comfort.

- Advanced scanning technology and PRZM Intelligent Imaging
- Multiple trigger options: single trigger, double trigger, or top trigger

INDUSTRY:

RS6 Bluetooth Series

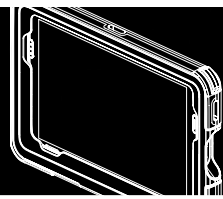

RS6100 Bluetooth Ring Scanner

The industry's most advanced, most rugged Bluetooth ring scanner.

- Multi-color LED line-of-sight sorting
- Advanced scanning technology and PRZM Intelligent Imaging

INDUSTRY:

Enterprise Tablets

Zebra tablets are built to adapt to frontline teams' unique workflows. With powerful connectivity, customization options, and reliable security and support, Zebra delivers higher productivity and smoother operations. It's more than just a tablet—it's a partner that helps you achieve more, every day.

Use our tablet selector tool to find the right tablets for your industry, environment, and workflows.

ET4 Series

ET401 Enterprise Tablet

The sleek design your workers expect, with the power and rugged reliability your enterprise needs

The next generation of Zebra's best-selling ET40/ET45 tablets with a familiar thin-and-light consumer design, combined with today's most advanced mobile technologies.

- Android OS, 8-inch or 10-inch screen
- Fastest wireless connectivity: Wi-Fi 7, optional 5G
- Integrated data capture options: scanning, RFID, wide-angled camera
- AI powered touchscreen and audio, AI-ready processor
- Fully rugged consumer-style design

INDUSTRY:

ET40/ET45 Enterprise Tablets

Right-priced tablets that have it all right out of the box.

- Android OS, 8-inch or 10-inch screen, integrated scanner
- Fully rugged with consumer-style design
- Fast wireless connectivity: Wi-Fi 6, optional 5G

INDUSTRY:

Service offerings for your tablets

- Zebra OneCare Select or Essential
- VisibilityIQ Foresight
- Professional Services

ET6 Series

ET60/ET65 Android Enterprise Tablets

The most versatile and rugged Android business tablets.

- Android OS, 10-inch screen, optional integrated scanner
- Tablet, 2-in-1, or vehicle-mount computer
- Rugged for the most demanding environments, including the freezer
- Fast wireless connectivity: Wi-Fi 6E, optional 5G

INDUSTRY:

ET60W/ET65W Windows Enterprise Tablets

AI-driven tablets delivering unmatched performance and productivity.

- Windows OS, 10-inch screen, optional integrated scanner
- AI-powered touchscreen and audio, AI-ready processor
- Tablet, 2-in-1, or vehicle-mount computer
- Rugged for the most demanding environments
- Fastest wireless connectivity: Wi-Fi 7, optional 5G

INDUSTRY:

ET8 Series

ET80/ET85 2-in-1 Windows Tablets

Dependable 12-inch tablets created for workers the world depends on.

- Rugged, yet thinner and lighter than major 2-in-1 competitors
- 2-in-1: standalone tablet and true laptop replacement
- Fast wireless connectivity: Wi-Fi 6E, optional 5G

INDUSTRY:

Vehicle-Mounted Computers

VC8 Series

VC8300 Vehicle-Mounted Computer

Android keyboard/touch vehicle mount computer designed for the most extreme environments.

- Flexible data entry with integrated full alphanumeric keyboard
- Supports ease of Android migration with Terminal Emulation
- Configure Zebra scanners with the VC8300 to accelerate staging

INDUSTRY:

"We want our drivers to focus on maintaining road safety and engaging with our farmer shareholder community without getting distracted by equipment issues. Zebra's solutions enable exactly that."

—Vijay Reddy, General Manager IT – Operations, Fonterra

Mobile Computer Accessories

Whatever you need to simplify and speed up your day, we have. With enterprise-class accessories ranging from Workstation Connect cradles and hubs to RFID adapters and trigger handles, you can convert your mobile devices to workstations, POS stations, packing stations, RFID readers, or advanced-range scanners for warehouse use.

Boost the durability and functionality of your Enterprise Mobile Computers and Tablets with versatile accessories.

Carrying Solutions

Carry the day

Get a firm grip on work with belt clips, holsters, hand mounts, or shoulder and hand straps that keep mobile devices handy. Choose from a wide range of sizes for maximum comfort. They're made to perform in your rugged environments.

Docks, Cradles, and Mounts

When productivity is the destination

Develop a comprehensive plan with our versatile docking and mounting solutions for any application—from forklifts to patrol vehicles. Choose from Zebra and third-party options, including office, industrial and vehicle mounts, as well as cradles and docks for warehouse, manufacturing, and retail environments, ensuring efficient device charging and storage.

Power Supplies

Charge ahead

Ensure all-day power, every day. Keep going with 24/7 Extension Back PowerPacks, warm and hot swap removable batteries and cables.

And then some

Expand choices; expand capabilities

With this much versatility, there are accessories for every application. Ask us about our styluses, headsets, mobile payment options, screen protectors, and more.

Increase productivity and reduce costs in your packing stations

Bluetooth Adapter

Pair up to seven Zebra scanners to a Bluetooth adapter, and allow packers to quickly and easily capture barcodes on the tote (and all the items in a tote) to ensure 100 percent accuracy in order fulfillment—before the box is sealed.

Two-Bay Charger

Packers no longer need to leave their stations to change a battery—batteries and wearable scanners can be charged right at the packing station.

Don't keep customers waiting. Turn your mobile computer into a do-it-all mobile solution that works faster.

Mobile Computer Software Solutions

Save in management costs while increasing the collaboration and performance of your employees, security, and network with software designed to enhance Zebra's mobile device solutions.

Zebra Guardian Portfolio

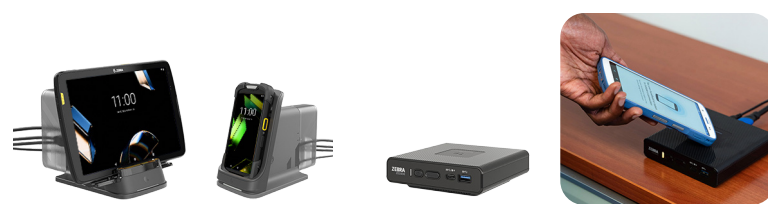

Zebra is uniting four key software solutions under the new Zebra Guardian umbrella to simplify access to a comprehensive suite. The new Zebra Guardian portfolio offers secure device log-in, access control, device recovery, and loss and theft prevention, ensuring employees have ready-to-use devices at the start of each shift. This move enhances capabilities, making it easier to customize secure access to meet specific business needs.

Zebra Pay™

Zebra Pay is the industry's first integrated enterprise-class SPoC-based mobile payment solution, enabling enterprises to accept all major card brands, anywhere, on compatible Zebra mobile devices. This EMV L3-certified cloud-based solution supports tap-to-pay, chip, and magstripe, complete with PIN entry on Zebra mobile computers and tablets.

INDUSTRY:

Zebra Workstation Connect

Transform Zebra mobile computers and tablets into mobile-driven workstations and POS stations on demand. The same Zebra mobile device workers use to complete many tasks throughout the day can also power a fully featured workstation or POS, driving costs and energy usage down—and the value of Zebra mobile devices up.

Easily connect and cast your Zebra mobile devices to a larger display, wirelessly. Just tap a supported Zebra mobile device on the ZEC500 or scan a QR code on a connected display and use Zebra Wireless Workstation Connect app to connect. It even works on proximity to automatically connect/disconnect to a previously paired device.

INDUSTRY:

Zebra Tread Intel*

Next gen tread depth reader

Capture accurate tire tread depth with a simple swipe across the tire with the Zebra Tread Intel, a snap-on accessory for Zebra's TC78 and TC58e rugged mobile computers.

Zebra Dimensioning™

Zebra Dimensioning Certified Mobile Parcel captures accurate parcel dimensions and calculates shipping charges on Zebra mobile computers with a press of a button. And with Mobile Parcel, you can instantly and automatically capture the dimensions of both cuboidal and non-cuboidal parcels, improving load planning and space optimization.

INDUSTRY:

Identity Guardian

Effortless authentication with your identity

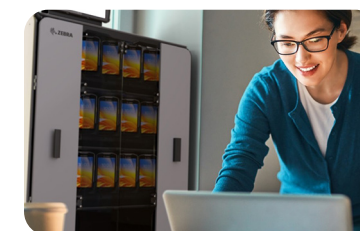

Leverage facial biometrics and SSO compatibility for simple, convenient, and secure device and application access, supporting both shared and personal device deployments.

Device Guardian

Locate and protect your devices

Eliminate time-consuming searches with this full-scale, cloud-based solution that gives entire teams visibility into device location. Give your teams everything they need to monitor, flag, and recover devices.

Device Guardian Access Management

Harness full visibility of your devices for secure access and maximal optimization

Practically eliminate the time spent managing devices and devices access. With Device Guardian Access Management, you can see the real-time status of your devices—whether in service, charging, or missing. Improve device utilization for a higher return on investment and increase productivity by ensuring access to fully charged devices.

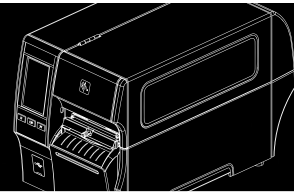

Guardian Cabinets and Cradle Locks*

Safeguard your devices with effortless convenience

Easily and securely store and charge Zebra mobile computers, tablets, and more to significantly reduce device damage and loss. Together with the rest of the Zebra Guardian portfolio, you can create a complete solution to optimize how your enterprise mobile devices are stored, accessed, tracked, and managed to harness the most efficient use of devices and workers.

- Consolidate and connect to maximize performance
- Protect devices with authorized-only security
- Five sizes to accommodate between 20 and 100 devices
- RF-friendly design and materials—devices won't lose Wi-Fi or cellular connection in the cabinet

* Not available in all countries.

Industrial Printers

Zebra industrial printers are designed for harsh and demanding environments. With rugged durability and future-proof adaptability, our user-friendly barcode label and RFID printers are designed to provide 24/7 reliability. Don't compromise—choose Zebra for your high- to mid-volume applications.

ZT4 Series

Rugged durability, designed to grow with your evolving business needs.

- Built to handle a wide variety of media and applications
- Linerless, RFID, and on-metal RFID options available
- 4- and 6-inch print widths

INDUSTRY:

ZT2 Series

A feature-packed printer at a value-class price.

- Space-saving, compact design with bi-fold door
- Optional media handling, wireless, and RFID
- 4-inch print width

INDUSTRY:

ZT1 Series

When labeling needs demand more than a desktop printer.

- Compact footprint
- Ideal for light industrial and commercial environments
- 4-inch print width

INDUSTRY:

Print Engines

ZE5 Series

OEM print engine for print-and-apply labeling applications.

- Maximize uptime with onboard analytics and toolless printhead replacement
- High print speeds to keep up with fast-paced operating lines
- 4- and 6-inch print widths
- Optional RFID

INDUSTRY:

ZT6 Series

Intelligence and industrial brawn

Industrial strength and full featured for every challenge.

- All-metal construction supports continuous heavy-duty performance with high throughput
- New and improved ZT610 Micro Label option delivers high precision for labels as small as 3 mm
- 4- and 6-inch print widths

INDUSTRY:

ZT5 Series

An ideal balance between performance and value with essential features for heavy-duty printing.

- All-metal construction supports continuous performance without throughput delays
- 4-inch print width

INDUSTRY:

Ready to replace an existing printer? Select your current model in this tool to discover the new, innovative Zebra model designed to lower costs, elevate efficiency, and ease IT management.

The ZT411 is part of Zebra's **ZeroLiner Linerless Printing Solution**, which improves productivity while reducing carbon emissions from labeling. Streamline your workflow with fewer roll changes, no calibration, and the convenience of instant label application—no need to peel before sticking.

Don't forget

Printing Supplies

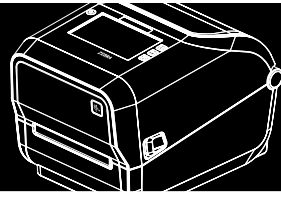

Zebra Certified Supplies are trusted for consistent labeling performance and long-term value across industries including healthcare, retail, logistics, and manufacturing. With hundreds of stock items and extensive customization options, we offer solutions for most applications.

Service offerings for your industrial printers

- Zebra OneCare Select or Essential
- VisibilityIQ Foresight

Desktop Printers

Zebra desktop printers are compact and simple to operate, and they offer the durability your business demands for low- to mid-volume printing. Don't sacrifice performance for savings; Zebra has a desktop printer at every price point, available in direct thermal or thermal transfer models, for all your barcode label, receipt, wristband, and RFID applications.

ZD4 Series

Elevated features, flexibility, reliability, and security.

- Multiple media handling and connectivity options
- 2- and 4-inch print widths
- Healthcare and ribbon cartridge models available

INDUSTRY:

ZD2 Series*

Simple operation, basic feature set, exceptional value.

- Quality dual-wall construction
- Easy media loading
- 4-inch print width

INDUSTRY:

ZD6 Series

Premium features and maximum performance

Invest in the best for years of quality and secure printing.

- Comprehensive range of factory and field-installable options and accessories
- Intuitive color touch display and easy-to-use menu features
- 2- and 4-inch print widths
- Linerless, healthcare, and RFID models available

INDUSTRY:

Your ability to print accurate, quality labels in a timely manner affects your ability to successfully track and manage all your workflows.

Service offerings for your desktop printers

- Zebra OneCare Essential
- VisibilityIQ Foresight

Don't forget

Printing Supplies

Zebra Certified Supplies are trusted for consistent labeling performance and long-term value across industries including healthcare, retail, logistics, and manufacturing. With hundreds of stock items and extensive customization options, we offer solutions for most applications.

* Available as the ZD888 Series in China.

Mobile Printers

Zebra mobile printers increase employee productivity and accuracy by enabling portable printing of barcode labels, receipts, and RFID tags at the point of application. We offer a handheld mobile printer at every price point for every industry, and accessories for a complete portable solution.

ZQ5 Series

- The industry's most rugged mobile printer.
- High-duty-cycle receipt and medium-duty-cycle label printing on-the-go
- Fast print speed with up to 5 ips
- 2-year standard warranty (ZQ511/ZQ521)
- Linerless and RFID models available
- 3- and 4-inch print widths

INDUSTRY:

ZQ3 Series**

- Two lightweight yet durable designs to meet your business needs.
- Mid-range 2- or 3-inch printers for moderate receipt and label printing
- Multiple charging options available, including convenient USB charging
- Linerless models available

INDUSTRY:

ZQ2 Series***

- Zebra's smallest and most affordable mobile printer.
- Compact and lightweight, yet durable and reliable
- Linerless model available****
- 2- and 3-inch print widths
- Receipt and label printing in multiple media widths when used with media spacers

INDUSTRY:

* Available as ZR668 Plus in China.

** Available as ZR328 Plus in China.

*** Not available in all countries. Available as ZQ120 Plus in India, ZR1 Series in China.

**** ZQ210 only.

Zebra DNA for Printers lets you easily configure, manage, secure, and maintain your printer fleet.

Printing Supplies

Zebra Certified Supplies are trusted for consistent labeling performance and long-term value across industries including healthcare, retail, logistics, and manufacturing. With hundreds of stock items and extensive customization options, we offer solutions for most applications.

“Material handlers can combine fixed vehicle computers with mobile printers to help improve labeling compliance, item track and trace, and more extensive inventory management efforts, such as cycle counts.”

— Zebra Edge Blog Team

Card Printers

Zebra card and badge printers make it easy to create and print high-quality, durable cards for a variety of applications. Whether you're printing ID cards, hospitality badges, or financial cards, Zebra printers offer the supplies, software, and security you need for a full solution.

ZC10L

Edge-to-edge personalization, rugged design.

- Single-sided dye sublimation printer
- Prints large, oversized cards and badges

INDUSTRY: 

ZC100*

Compact size facilitates front-office deployments.

- Affordable and easy to use
- Direct to card single-sided printing

INDUSTRY:   

Don't forget

Card supplies

Zebra card supplies offer comprehensive solutions for high-quality card production, including vibrant print ribbons, secure plastic cards, and cleaning supplies to maintain printer performance, ensuring efficient and secure card printing.

Ribbons

Zebra's specialty ribbons offer vibrant colors and sharp text, with options like holographic overlays, scratch-off panels, and metallic effects. The long-life ribbon enhances card durability and adds years of life to cards without the higher cost of lamination.

ZC3 Series*

Compact card printers that deliver it all

Easy setup with painless plug-and-play deployment.

- Direct to card single- or dual-sided printing
- Options for long-life card printing and security features
- Fits-everywhere design

INDUSTRY:       

CardStudio 2.0 and Digital ID

Easy-to-use card design and issuance software.

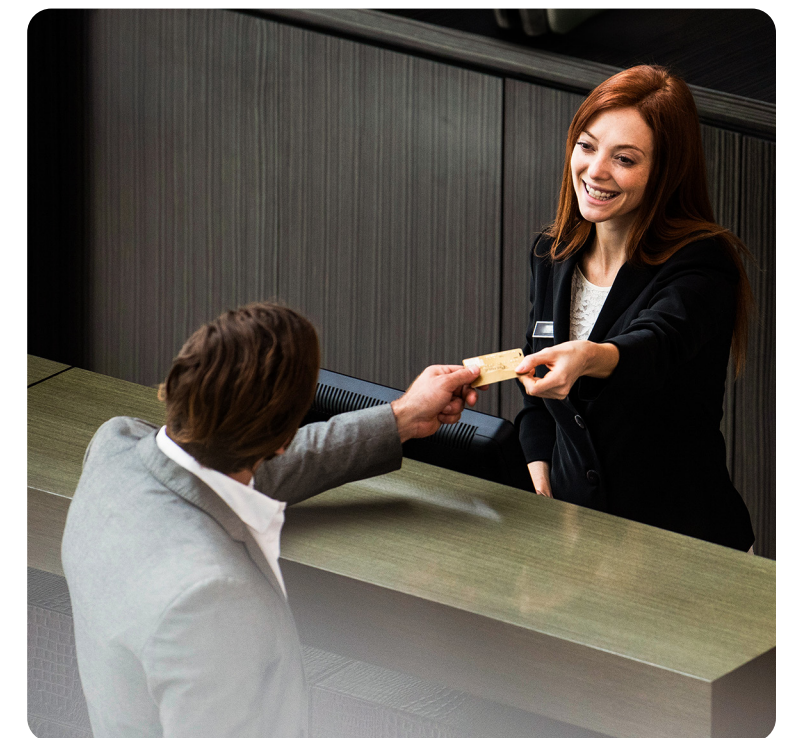

- Create any card design, from simple to sophisticated, single- or double-sided, color or monochrome
- Securely issue and update Digital IDs to complement printed cards

INDUSTRY:       

Service offerings for your card printers

- Zebra OneCare Select or Essential

“Zebra card printers are designed to simplify all end-user touch points in order to create an intuitive, worry-free experience.”

— Curt Croley, Senior Director, Innovation and Design, Zebra Technologies

* Three-year limited warranty.

Zebra cards and ribbons offer greater value and durability. Learn about the longevity and security benefits of Zebra's Long-Life Ribbon, available on select models in the ZC3 Series.

Printer Accessories

Make your printers even more productive

Increase the functionality and longevity of your Zebra printers with our comprehensive selection of readily available parts and accessories for mobile, desktop, and industrial models. From replacement batteries and RFID upgrade kits to carrying cases and connectivity options, we have everything needed to streamline workflows, reduce downtime, and adapt to evolving business demands across a range of print applications.

Batteries

Energy management is critical to keeping your workforce mobile and productive. Balance performance and power with efficient batteries and battery accessories. Zebra's long-lasting batteries power your mobile printers without limiting productivity. Available in both standard and extended packs to meet your different needs. Or mobilize your desktop printer with the ZD Series battery accessory.

Chargers, Power Supplies, Cradles, and Mounting

Zebra power adapters and chargers fully recharge a battery in just 2.5 to 5 hours, and they deliver the superior reliability and longevity you need to keep batteries in service. Choose between single and multi-slot battery chargers, charging cradles, wall chargers, and on-the-road charging solutions.

Our comprehensive printhead and platen roller protection programs support the longevity and optimal performance of your printers.

Carrying and Protection Options

Ensure your printer is at hand when you need it and out of the way when you don't. These quality, custom-designed printer cases and covers make them easy to carry on your belt or over your shoulder. Plus, they're weather-resistant and add an extra layer of protection when they're bumped around.

Cables and Other Accessories

For speed, reliability, and precise data transmission, depend on Zebra cables. They are manufactured to the highest standards to be durable and to deliver seamless, timely, and hassle-free connectivity and communication. Don't trust just any cable, because when you need to be connected—you need to be connected.

Mounting Kits

Zebra offers a variety of printer mounting kits that add flexibility to your printer installation and use case. Securely attach a printer on a wall, on a vehicle, or create a custom self-service printing kiosk solution.

Printheads and Platen Rollers

Prioritize maintenance to keep your operations running smoothly. Regularly replace printheads and platen rollers to maintain performance, extend printer life, and minimize unexpected downtime.

Media Handling Accessories

Expand your printer capabilities if and when you need to with our field-installable media handling options. As your environment changes, you don't have to change your printer—simply purchase an accessory such as a peeler or a cutter and install it in minutes.

PRINTING SUPPLIES

Printing Supplies

Enhance performance and print quality with Zebra Certified Supplies—engineered and tested to work seamlessly with Zebra printers. Backed by 50+ years of expertise, our supplies reduce reprints, minimize downtime, and ensure reliable results that keep operations running smoothly.

Zebra Barcode Labels, Tags, and Receipt Paper

Zebra barcode labels and tags are engineered for accuracy and durability. With a wide range of materials and adhesives, they enable fast, reliable scanning and confident tracking—minimizing errors across transportation and logistics, retail, healthcare, and beyond. Zebra receipt paper delivers clean, fade-resistant print results for fast, reliable transactions. With a variety of top-coated and premium options, it supports high-speed printing, improves legibility, and helps reduce delays at the point of service.

Hospital Bracelet and Patient ID Wristbands

Zebra patient ID wristbands enable fast, accurate scanning for positive patient identification. Available in a range of sizes, colors, and materials, they're designed for comfort and durability to help reduce errors and enhance safety. Featuring thermal and RFID technology, these wristbands streamline patient management, reduce errors, and improve overall care efficiency.

Event Wristbands

Zebra hospitality and event wristbands enhance the guest experience through secure admission and fast identification. Available in multiple colors and formats, they help streamline check-in, reduce wait times, prevent fraud, and improve operational flow.

Thermal Transfer Ribbons

Zebra thermal transfer ribbons deliver sharp, durable print quality while helping extend printhead life. Matched to your label material, they ensure consistent, long-lasting results—minimizing reprints and maximizing efficiency to keep operations running smoothly. Available in wax, wax/resin, and resin formulations, they cater to different application needs.

ZeroLiner Linerless Printing Solution

Zebra linerless labels reduce waste and boost efficiency by eliminating backing liners and minimizing roll changes. With up to 50% more labels per roll and no liners to discard, they're ideal for fast-paced applications focused on productivity and sustainability.

ENVIRONMENTAL SENSORS

For more information, visit www.zebra.com or contact a sales associate.

Environmental Sensors

Zebra's cutting-edge portfolio of environmental sensors reimagines supply chain visibility, offering intelligence that goes beyond conventional monitoring. Our innovative temperature indicators and electronic sensors deliver valuable data enabling accurate temperature checks and effective monitoring of environmental conditions throughout the supply chain. From ready-to-use indicators to thermal printable indicators and electronic sensors that enable wireless monitoring, our sensors help analyze temperature variations, enabling informed decisions relating to your cold-chain logistics.

Electronic Sensors

ZS300 Electronic Temperature Sensors Solution wirelessly monitors environmentally sensitive products so you can analyze excursions and act upon them in real time.

- High-performance Bluetooth connectivity automates data collection
- Easily and securely integrates into existing systems
- IP67 rated
- Battery shelf life of 12–18 months
- LED display status

INDUSTRY:

Ready-to-Use Indicators

Gain visibility into the temperature exposure of products with a simple card or self-adhesive indicator.

- Available on rolls or as a TransTracker card
- Response temperature options
- Ascending or descending indicators
- Irreversible, single use
- No activation required

INDUSTRY:

Printable Indicators

ZeOn-demand printable indicators offer an easy-to-read environmental indicator on a thermal label, providing insight into a product's exposure to environmental conditions.

- Customizable size and material
- Response temperature options
- Ascending or descending indicators
- Irreversible or reversible, single use
- Activation required for some indicators
- RFID high-heat indicators

INDUSTRY:

Activatable Indicators

Activatable temperature indicators provide an intuitive and reliable way for users to monitor the temperature exposure of products in transit. These single-use indicators enable instant visual identification if product quality or freshness may have been impacted by heat exposure during shipment.

INDUSTRY:

In healthcare, there's no room for error. Zebra's healthcare technology solutions help you to streamline care delivery with enhanced workflows and reduced workarounds so you can quickly locate staff and critical equipment and ensure patient safety and reduce errors.

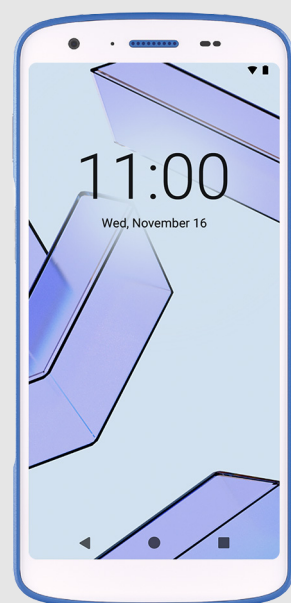

Mobile Computers and Tablets

Equip your nurses, clinicians, and non-clinical healthcare workers with devices specifically designed for busy healthcare facilities. Made to be durable to hold up to rigorous, frequent cleaning and disinfection.

Zebra mobile computers help the Paracelsus Group achieve a dynamic, digital healthcare operation.

HC50/HC55 Healthcare Mobile Computers

Improve efficiency and patient outcomes for clinical healthcare workers

Purpose-built to deliver all the features clinical healthcare professionals need to improve efficiency, accuracy, and the quality of patient care and patient outcomes.

- Advanced 6-inch FHD+ edge-to-edge display
- Fast wireless connectivity (Wi-Fi 6E, 5G)
- True Hot Swap battery
- Front-facing camera
- Zebra DNA Enterprise
- Dedicated red duress programmable button

INDUSTRY:

HC20/HC25 Healthcare Mobile Computers

Perfectly designed to meet the needs of all your healthcare workers.

- Advanced 6-inch FHD+ edge-to-edge display
- Fast wireless connectivity (Wi-Fi 6, 5G)
- Dedicated red duress programmable button
- Zebra DNA Professional

INDUSTRY:

ET40-HC/ET45-HC Healthcare Tablets

Built to meet the demands of healthcare and your budget.

- Android OS, 10-inch screen, integrated scanner
- Dedicated red duress programmable button
- Advanced medical-grade, disinfectant-ready plastics with fully rugged consumer-style design
- Fast wireless connectivity (Wi-Fi 6, optional 5G)

INDUSTRY:

WS101-H Bluetooth Communication Badge

This hands-free device integrates with Zebra or consumer mobile computers and tablets, allowing workers to effortlessly manage inventory, communicate, and enhance customer service.

- Use voice to boost productivity and efficiency
- One press of the duress button can connect to a host application to summon help
- Less than two inches square and just over a half-inch thin

INDUSTRY:

Zebra healthcare mobile computing is designed to enhance efficiency, accuracy, and patient care outcomes for all healthcare workers.

"We're delighted with the success of this project. It's improving care for our patients and helping our teams work more efficiently."

— Anjali Sherlin Menezes, Acting Head of Purchasing Division, Paracelsus Group

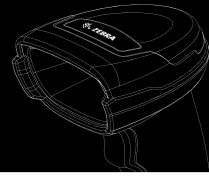

Zebra DNA Cloud makes it easier to set up, deploy, manage, and support Zebra mobile devices from a single interface.

- VisibilityIQ Foresight
- Professional Services

Scanners

Zebra scanners simplify caregivers' interactions with their patients. Scanning applications, though routine in nature to the caregivers, help prevent medical errors, improve patient safety, and increase productivity. With imaging technology automating many administrative requirements, caregivers can focus on the needs of the patient.

Learn how the Royal Children's Hospital enhanced blood scanning accuracy by **50%** with Zebra scanners built for healthcare.

DS9900 for Labs Hybrid Handheld/Hands-Free Scanner

Built for life in the lab

Improve workflow efficiency and accuracy with a hybrid presentation imager built for the lab.

- Hybrid design offers handheld and hands-free flexibility
- Elevated electronics protect the device from casual spills
- Disinfectant-ready housing can handle regular sanitizing

INDUSTRY:

DS55 for Labs Fixed Mount Scanner

Proven scanning performance in a compact, fits-anywhere design built for the lab.

- With IP54 sealing and a purpose-built design with no exposed openings, the DS55 Series allows for safe and frequent wipe-downs
- Innovative 3-in-1 mount accessory is a computer display mount, wall mount, and presentation stand all in one

INDUSTRY:

DS8100-HC Scanner

Seamlessly integrates into existing workflows.

- Corded and cordless models
- Disinfectant-ready housing can handle regular sanitizing

INDUSTRY:

DS2200-HC Scanner*

Dependable, affordable, and purpose-built for healthcare.

- Corded and cordless models
- Disinfectant-ready housing can handle regular sanitizing

INDUSTRY:

DS4600-HC Scanner

A versatile healthcare scanner that does more for the whole hospital.

- Corded model
- Disinfectant-ready housing can handle regular sanitizing

INDUSTRY:

* Not available in all countries.

CS60-HC Scanner

Easily converts between corded and cordless, hands-free and handheld operation.

- One device can be used for multiple workflows
- Disinfectant-ready housing can handle regular sanitizing

INDUSTRY:

Zebra DNA for Scanners covers every stage of your scanning workflows, ensuring that your scanners evolve with your business needs.

Service offerings for your healthcare scanners

- Zebra OneCare Select or Essential
- VisibilityIQ Foresight

Printers

Efficiently manage workflows and minimize mistakes with thermal printers that help strengthen patient care at every stage of the patient journey. Zebra healthcare printers are purpose-built with medical-grade, disinfectant-ready materials that can be safely cleaned between each use.

ZQ610 Plus-HC

Zebra's most versatile mobile healthcare printer

Reduce the risk of errors in specimen collection with premium mobile printing at the point of care.

- Comprehensive remote management, configuration, and security tools
- Superior battery power and power management
- Wi-Fi 6 (802.11ax) connectivity option for fast, reliable, and secure printing
- 2-inch print width

INDUSTRY:

Service offerings for your healthcare printers

- Zebra OneCare Select or Essential
- VisibilityIQ Foresight

ZD621-HC

Premium features and maximum performance.

- Full-color LCD touch display and intuitive user interface
- Healthcare-compliant power supply
- Optional RFID capability
- 4-inch print width

INDUSTRY:

ZD421-HC

Advanced features and ease of use.

- Optional cartridge model for foolproof ribbon loading
- Healthcare-compliant power supply
- 4-inch print width

INDUSTRY:

ZD510-HC

Wristbands printed by a specialist.

- Easy-loading wristband cartridge for fast-paced environments
- Ultra-compact, quiet operation

INDUSTRY:

ZD611 RFID

Compact with premium features, RFID capabilities, and unmatched security.

- Print and encode RFID wristbands
- Full-color LCD touch display and intuitive user interface
- 2-inch print width

INDUSTRY:

ZD411-HC

The "fits anywhere" printer.

- Battery option for printing at the point of care
- Peeler option to reduce labeling steps
- Healthcare-compliant power supply
- 2-inch print width

INDUSTRY:

ZQ620 Plus-HC

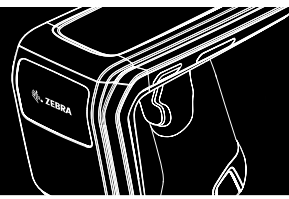

Improve specimen labeling and accuracy.

- Wi-Fi 6 (802.11ax) connectivity option for fast, reliable, and secure printing
- Large color display for easy configuration and operation
- 3-inch print width

INDUSTRY:

Zebra printers, labels, and wristbands assist healthcare providers in identifying patients, tracking samples, and managing inventory.

Handheld RFID Readers

Track, trace, and inventory assets in real time. Choose from sleek handhelds, hands-free devices, rugged form factors, and RFID sleds. Here are just a few ways to handle RFID easily and accurately.

TC22R Integrated Handheld RFID Reader

Accelerate your inventory management

The Zebra TC22R Integrated Handheld RFID Reader empowers workers with an all-touch, all-in-one RFID reader that's easy to use, configure, and manage for enhanced productivity over extended periods. With industry-leading performance and a lightweight form factor, this handheld reader provides improved ergonomics, greater connectivity, and easier deployment to give your business a competitive edge.

INDUSTRY:

RFD40 RFID Premium and Premium Plus Sleds

The RFD40 UHF RFID Premium and Premium Plus Sleds build on the same great features of the standard model and offer better support for third-party smartphones by providing a 1D/2D barcode imager,* Bluetooth, and NFC. Integrated Wi-Fi allows for over-the-air device management.

INDUSTRY:

RFD40 RFID Standard Sled

Work more efficiently. Optimize cycle-counting with industry-best read rates and read range, plus increased battery capacity. Most important, it connects to current and future Zebra mobile computers, so you get a future-proof device.

INDUSTRY:

RFD90 Ultra-Rugged UHF RFID Sled

Deliver higher volumes at greater speeds with these ultra-rugged sleds built for the most demanding environments, featuring industry-best read rates and read ranges. Connect directly or wirelessly to Zebra mobile computers and third-party smartphones. Integrated Wi-Fi 6 capability allows easy over-the-air device management.

INDUSTRY:

*RFD40 Premium Plus only.

MC3330xR Series UHF RFID Readers

Bring a new level of comfort, speed, ease of use, and accuracy to your RFID applications. Superior RFID read performance and receiver sensitivity enable fast and accurate capture of even the most challenging RFID tags. Built for maximum uptime with a large touch screen and physical keypad, yet lightweight with the right ergonomics for all-day comfort.

INDUSTRY:

DS9908R RFID Scanner

Close the supply chain loop. Read RFID-tagged merchandise at the point of sale for up-to-the-minute inventory tracking, or RFID tags on laboratory assets and specimen samples for improved laboratory management. The DS9908R is a hybrid handheld/hands-free scanner that offers best-of-breed barcode scanning with RFID reading capabilities in a single platform.

INDUSTRY:

DS82R RFID Scanner

Premium scanning performance designed with unmatched innovation.

- Programmable multi-function button optimizes workflows
- Fast, inductive charging reduces maintenance

INDUSTRY:

ET401 Enterprise Tablets

The latest addition to the ET4 series tablets with optional integrated short-range RFID, enabling a new way for workers to manage inventory, track high value assets, and ensure quality control, all with their tablet.

INDUSTRY:

Service offerings for your handheld RFID devices

- Zebra OneCare Select or Essential
- VisibilityIQ Foresight

EM45 RFID Enterprise Mobile

Ultra-thin and lightweight two-in-one for personal productivity—smartphone ergonomics, built-in RFID, and enterprise functionality in one device.

INDUSTRY:

TC53e-RFID Mobile Computer

Part of Zebra's popular TC5 Series, this device features an integrated short-range UHF RFID and is designed to be more sustainable and meet the evolving mobility needs of today's frontline workers.

INDUSTRY:

TC501 Mobile Computer

The newest model in Zebra's popular TC5 Series, this device boosts operational efficiency with integrated RFID for precise inventory tracking and asset management. It combines advanced technology with a robust design to ensure durability and seamless performance.

INDUSTRY:

TC701 Mobile Computer

This new ultra-rugged device offers robust performance in the most challenging environments. With integrated RFID and superior connectivity, it empowers frontline workers with seamless communication and real-time data access, boosting productivity and efficiency.

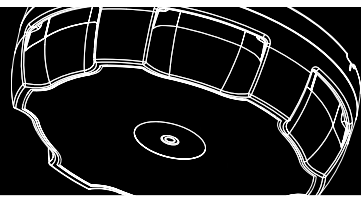

INDUSTRY:

WS501-R Android Wearable Computer

Give your disconnected task workers more tools to complete more types of tasks, boosting collaboration, productivity, and workflow efficiency. Worn on the back of hand or on two fingers, this powerful ergonomic device provides an integrated host-free UHF RFID reader, an optional external antenna, a barcode scanner that can capture virtually any barcode in any condition, two-way radio instant push-to-talk capabilities, and more.

INDUSTRY:

Fixed RFID Readers and Infrastructure

Achieve maximum asset visibility across your enterprise. Zebra RFID Readers provide visibility into the pinpoint location of all your tagged assets, including those on the move.

G3 Boats, a division of Yamaha Motors, implemented an RFID solution that would provide insight into its manufacturing process.

FXR90 Ultra-Rugged Fixed RFID Reader

Rock-solid reliability against punishing conditions.

INDUSTRY:

FX9600 Fixed RFID Reader

Top-of-the-line performance for high-volume and rugged environments.

INDUSTRY:

FX7500 Fixed RFID Reader

The small enterprise reader, big on speed and accuracy.

INDUSTRY:

FXP20 POS Fixed RFID Reader

Maximum performance without compromise.

INDUSTRY:

ST5500 Transition RFID Reader*

Know what's entering and exiting your facility.

INDUSTRY:

* Not available in all countries.

“One of our core principles is respect for our people, and automating manual processes is one way we can achieve our goal of making their jobs more enjoyable.”

— Marc Castillo,
General Manager at G3 Boats

RFID does not require line-of-sight or a light source for tags to be read, a dramatic advantage over previous technologies, such as barcodes. A reader can discover what's in a box's entire contents without opening it or pinpoint a specific item in an area containing hundreds of diverse components.

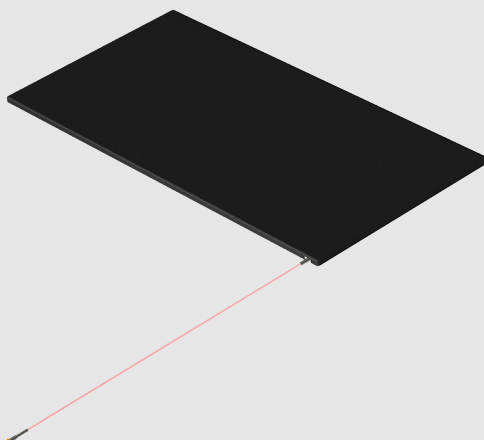

Service offerings for your fixed RFID devices

- Zebra OneCare On-Site or TSS
- Professional Services

RFID Antennas

Quickly and accurately track inventory and assets. Our robust RFID antennas offer the high performance and range needed for high traffic and precision.

AN670 Low-Profile RFID Antenna

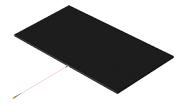

Discreet form factor without the compromise

The AN670 low-profile, near-field RFID antenna is designed with a tightly constrained spatial range for precise control, allowing you to read assets within a specific proximity.

INDUSTRY:

“We’re rolling out the RFID system, including Zebra readers and antennas, to all of our facilities in order to improve warehouse and inventory control. When it’s all in place, we’ll see thousands of dollars in annual savings, and we expect to achieve ROI on the RFID system in less than two years.”

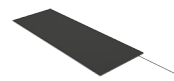

— John Underwood,
Engineering Manager, Southeastern Container

AN660 Low-Profile RFID Antenna

Super-sleek form factor with high-gain performance for greater accuracy.

INDUSTRY:

AN650 Ground RFID Antenna

Rugged and ultra-low profile.

INDUSTRY:

AN620 Slimline RFID Antenna

Slimline, ultra-low profile.

INDUSTRY:

AN610 Slimline RFID Antenna

Sleek. Discreet. Rugged.

INDUSTRY:

AN480 RFID Antenna

Global flexibility for all enterprises.

INDUSTRY:

AN440 RFID Antenna

Capacity and range for reliable RFID tag reading.

INDUSTRY:

Service offerings for your RFID antennas

- Zebra OneCare On-Site or TSS

AN720 RFID Antenna

Compact indoor/outdoor antenna for customer-facing environments.

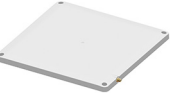

INDUSTRY:

AN520 Ultra-Rugged RFID Antenna

Small form factor and high performance.

INDUSTRY:

AN510 Ultra-Rugged RFID Antenna

Ultra-rugged and low profile for use indoors and outdoors.

INDUSTRY:

SN5604 RFID Reader and Antenna*

Track inventory and mobile devices.

INDUSTRY:

SP5504 Point of Sale RFID Antenna*

Track inventory in your POS lanes or will-call areas.

INDUSTRY:

SR5502 Transition Point RFID Antenna*

Track inventory in the backroom from arrival to departure.

INDUSTRY:

* Not available in all countries.

RFID Printers/Encoders

Your solution depends on reliable data. Zebra offers the industry's widest range of printers that accurately encode RAIN RFID labels, tags, and cards where and when you need them. Build your solution on RFID data you can trust.

ZT6 and ZT2 Series RFID Industrial Printers

These printers keep your operations running in harsh environments and the most demanding RFID applications.

INDUSTRY:

ZE5 Series RFID Print Engines

Zebra's enhanced RFID-ready OEM print engines are ideal for high-volume industrial applications for manufacturing, shipping, receiving, and more.

INDUSTRY:

ZD6 Series RFID Desktop Printers

Premium features, maximum performance, and unmatched security in an easy-to-use compact printer.

INDUSTRY:

ZC3 Series Card Printers

Whether you need high performance or a compact size with groundbreaking simplicity, Zebra UHF RFID card printers deliver.

INDUSTRY:

ZT4 Series RFID Industrial Printers

Rugged durability, designed to grow with your evolving business needs

Print and encode RFID tags or labels to gain a competitive edge with great tracking abilities, deeper visibility, and enterprise insights.

- Adaptive encoding technology simplifies RFID setup
- Optional on-metal RFID version enables metal asset tagging

INDUSTRY:

ZQ6 and ZQ5 Series RFID Mobile Printers

Our premium mobile printers can print at the point of application, making them a convenient and efficient solution. They are user-friendly for workers and easy for IT to integrate and manage.

INDUSTRY:

RFID Labels and Tags

Zebra has the largest number of in-stock, on-demand RFID printing supplies featuring the latest generation of RFID chips to support faster inventory audits and longer read ranges. Available in a wide range of materials and formats, they enhance inventory visibility, accelerate asset tracking, and support compliance.

“RFID solutions are ultimately about data, and it’s the role of the printer/encoder to make sure that your tag data is encoded accurately and efficiently.”

— Michael Fein,
Director, Product Management, RFID & Advanced Locationing Technology

Reader Software

You don't have to be an expert to set up and optimize Zebra RFID readers. Our tools help you every step of the way—easily configure and deploy your RFID readers without complications or delays.

123RFID Desktop

Make RFID deployments as easy as 1-2-3

Our free, intuitive wizard presents easy-to-understand options in drop-down menus, radio buttons, and sliders. Use built-in help and how-to-videos to find answers to your questions.

123RFID Mobile

Get RFID deployment mobility

Leverage 123RFID mobility for more flexible deployment and easier access to our free, intuitive wizard.

Resonate™ RFID Reader Management

The easiest way to deploy, manage, and scale passive RFID

Deploy, configure, manage, and monitor every cloud-ready Zebra passive RFID reader in your enterprise from a single, consolidated application.

INDUSTRY:

Resonate RFID Reader Management makes it easy to control a complete network of Zebra passive fixed RFID readers. With it, you can configure and monitor the status of every cloud-ready Zebra reader in your network from one consolidated application, without requiring multiple tools to manage different types of readers.

Software Development Kits (SDK)

Lower IT burden, easier RFID implementation

Zebra RFID SDKs provide a powerful set of APIs to take full advantage of handheld reader performance, functionality, and versatility and offer support for Android, iOS, Windows, and Xamarin.

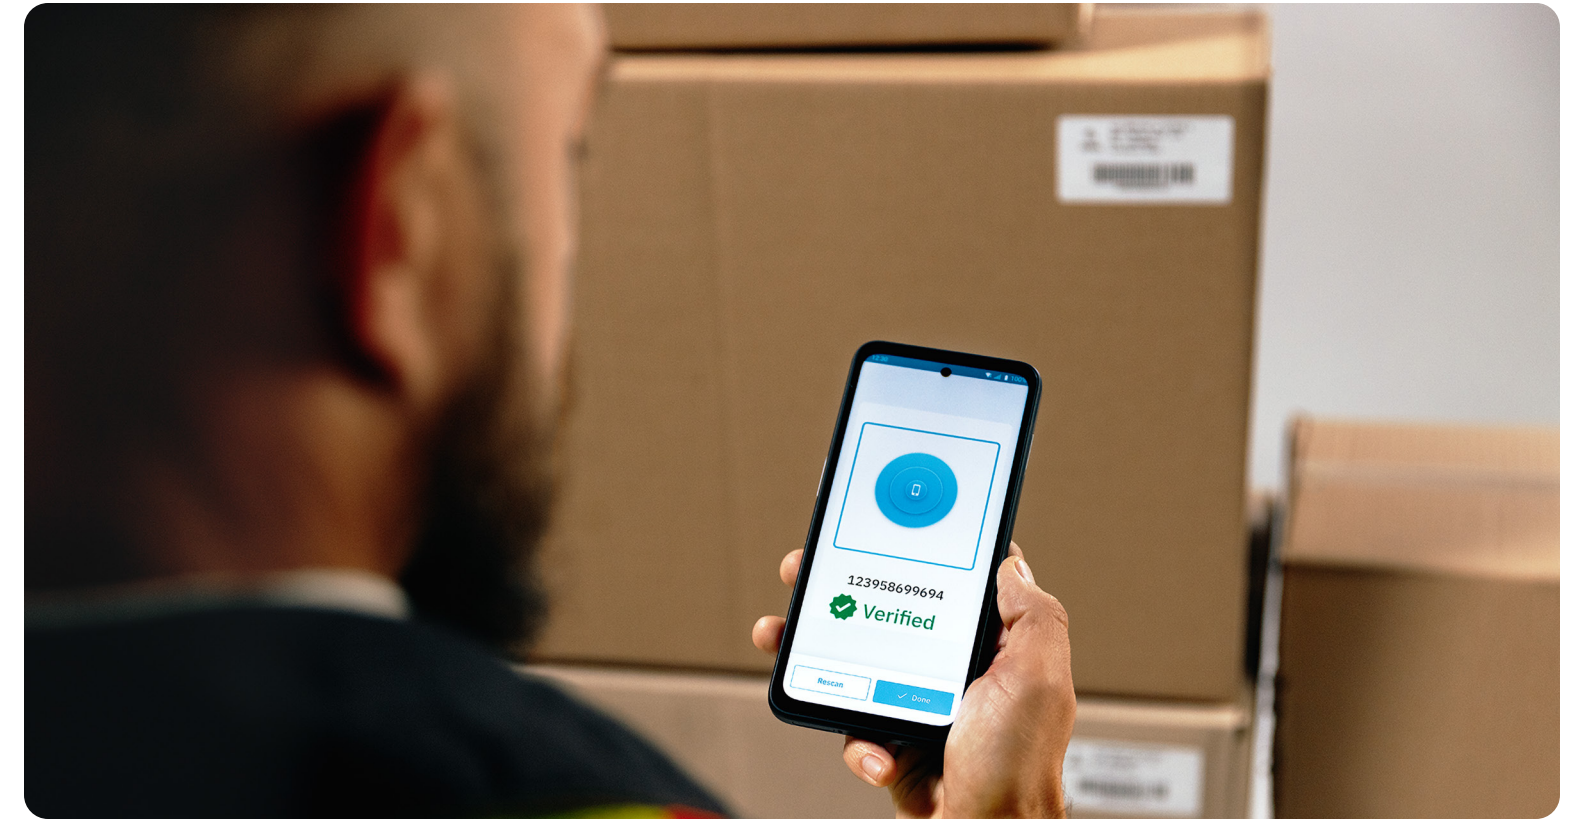

“RFID technology has reached a tipping point. While barcodes are incredibly useful and as cost-effective as it’s possible to be, RFID can be more versatile and efficient in taking automation to the next level. And affordable RFID tags are quickly becoming commonplace at every step of the supply chain.”

— **John Hughes**,
Director of Software Product Management,
Zebra Technologies

Zebra MotionWorks Sport™*

When you can track everything—and put insights derived from real-time data immediately to work—you can accomplish anything. Automating visibility to your critical assets allows you to ramp up productivity, boost efficiency, and grow your business—by delineating data that arms your enterprise with actionable insights.

Did you know?

Zebra RFID readers throughout every NFL stadium track RFID tags placed in players' shoulder pads, charting individual movements within inches.

Location Technologies

Zebra offers a full portfolio of best-in-class hardware options for capturing location data to satisfy a large variety of requirements for range, accuracy, and precision. Zebra delivers real-time visibility with Ultra-Wideband (UWB) and Bluetooth Low Energy (BLE) devices available in multiple form factors and price points.

Total visibility in sports

Use real-time performance statistics to scout for players and create winning strategies.

- Optimize athlete performance by helping trainers keep athletes at peak performance
- Strengthen coaching and training with a consistent, data-forward analysis method
- Engage fans by broadcasting player statistics on television, mobile engagement, and in stadiums

* Not available in all countries.

Hyperconnected distribution centers are the new reality. Zebra's recent vision study found that 43% of organizations plan to implement real-time location systems (RTLS), enabled in part by RFID tagging and Bluetooth technology like beacons. These systems give distribution center managers a bird's-eye view of operations, allowing for real-time cross-checking of an asset's location.

“In less than a year, our productivity ratings skyrocketed—by over 1,000%!”

— Tom Healy, Director, Logistics Technology and Projects, Cepheid

Fixed Industrial Scanners

Zebra's fixed industrial scanners automatically track and trace items from production to distribution. Easily keep track of every part and package with a model for every application. Upgradeable features grow as you do to meet the evolving needs of your business.

Discover how Zebra's innovative industrial automation solutions address real-world manufacturing and logistics challenges. Gain insights into how fixed scanning and machine vision can enhance efficiency and precision in your business.

FS20 Fixed Industrial Scanner

Zebra's smallest networkable fixed industrial scanner integrates high-quality scanning to track and trace every item moving through production, storage, and fulfillment.

- Integrates easily into PLCs or host networks using multiple connectivity options
- Reduce setup complexity and cost with support for Power-over-Ethernet (PoE) laptop, tablet, or any other host device

FS70 Fixed Industrial Scanner

Completely customizable scanner facilitates challenging track-and-trace applications. Choose from a variety of C-mount external lens and lighting options to achieve the working range and field of view the application and environment require.

- Address complex imaging requirements with a range of customizable options for depth of field, reading distance, and lighting
- Built-in Ethernet/IP with Add-On Profile, PROFINET, and other network protocols enables painless integration with common PLCs or host systems

FS40 Fixed Industrial Scanner

Broad capabilities meet complex barcode capture requirements and can be tailored to specific needs, with flexible options like decode range, illumination, connectivity, and power.

- Isolate production data and store images in the cloud or on a local server with two available Ethernet ports
- Capture up to 16 different images of a single item—each with its own unique setting for focus, exposure, gain, illumination control, and more—with ImagePerfect+

FS42 Fixed Industrial Scanner

Maximize performance with advanced imaging, expanded on-board memory, and an integrated NPU for faster, smarter data processing.

- Excels with high-speed scanning and deep-learning-based OCR applications in demanding environments
- Unlock greater operational insight and future-proof systems by easily adding on software licenses for advanced machine vision capabilities

FS80 Fixed Industrial Scanner

Superior read rates and coverage for package and product traceability applications

Exceptionally precise barcode capture that boosts productivity in fast-paced logistics and manufacturing environments.

- Harness high-resolution sensors and integrated LED lighting for superior readability across expansive areas and distances
- Experience seamless operation with dual laser aiming and comprehensive 360° visual and audible feedback

FS10 Fixed Industrial Scanner

Easily track and trace items as they move through warehouses and distribution centers with this compact, fits-anywhere, plug-and-play scanner.

- Enjoy first-time, every-time data capture with Zebra-exclusive features
- Connect to the USB port of a workstation, laptop, tablet, or any other host device

Aurora Focus™ Software

On-device software for Zebra's FS scanners, Aurora Focus comes ready-made for barcode reading and verification, OCR, and presence/absence vision inspection.

- Configure scanners easily to perform tasks like barcode comparison and quality assessment with intuitive job creation tools
- Seamlessly integrate with enterprise systems and leverage advanced features like ImagePerfect+, Golden Image Compare, Object Locate, and more

GS20 Connectivity Gateway

Combines advanced decoding technology with rugged durability to ensure accurate package tracking and sorting in fast-paced production environments.

- Connect to up to 16 cameras to support a variety of package sizes and label orientations
- Built-in support for Rockwell, Siemens, Mitsubishi, and Omron programmable logic controller (PLC) devices

Aurora Velocity Scan Tunnel

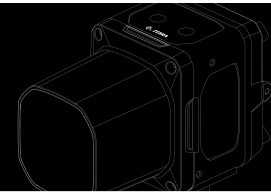

As a recognized leader in transportation, logistics, and warehouse operations, Zebra leverages state-of-the-art identification, inspection, and dimensioning capabilities to deliver a vision-based scan tunnel system designed to dramatically increase throughput, reduce errors, and control costs.

- Industry-leading read rates for conveyor speeds up to 660 fpm
- Include additional cameras, RFID readers, 3D sensors, and other components, all from the same vendor for a highly scalable solution
- Rapid and seamless integration with existing solutions and our team of experts

Service offerings for your fixed industrial scanners

- Zebra OneCare Select and Essential

Smart Sensors and Cameras

Elevate production quality, increase throughput, and optimize efficiency with Zebra's smart cameras and sensors. Harness advanced machine vision for real-time data and actionable insights, ensuring unmatched precision in warehouse and manufacturing operations. From track-and-trace to quality inspections, Zebra's smart cameras and sensors keep you ahead of demand and ensure consistent output.

VS20 Machine Vision Smart Sensor

Multiple connectivity options easily integrate into a PLC or host network, enabling primary machine vision applications to feed all the processes that drive the business.

- Integrates easily with PLCs or host networks via Ethernet and serial ports
- Add machine vision tools or support for new barcode symbologies with a simple software upgrade

VS40 Machine Vision Smart Camera

Support a variety of inspection applications on the production line by choosing from a range of complementary lenses, illumination, connectivity, power, and filters.

- Expand application functionality and improve error-proofing with up to nine programmable I/O ports
- Modular architecture lets you select the Machine Vision toolset you need now and add new functionality any time in the future.

VS70 Machine Vision Smart Camera

Whether there is need for a wide-angle lens to capture large parts, a zoom lens to inspect distant components, or a specialized lens for precise measurements, this smart camera is completely customizable for any need.

- Reduce cost, training, and management time, as well as the need for external peripherals, with Zebra-exclusive features
- Support any external C-mount lens and any external lighting solution

Machine Vision Cameras

Color and monochrome cameras built for multi-camera industrial inspection and automation applications.

CV60 Series

High-resolution machine vision cameras deliver outstanding frame rates.

- Pair with Zebra vision controllers or frame grabbers
- Keep critical inspections running optimally with cameras purpose-built for the factory floor
- GigE and USB 3.0 models available

NS42 Smart Vision Sensor

AI-powered for solving challenging machine vision inspections

Revolutionize machine vision inspections with AI-powered capabilities, delivering fast, accurate results for anomaly detection and complex OCR tasks.

- Enjoy out-of-the-box support for anomaly detection and deep-learning-based OCR to quickly solve challenging applications
- Leverage a quad-core processor and increased on-board memory for accelerated data processing

Iris GTX

Fast high-resolution image sensing, efficient dual-core-embedded processing, and comprehensive I/O capabilities in a rugged smart camera.

- Perform real-time, on-device image acquisition and analysis to accelerate decision-making and optimize throughput
- Pair with Aurora Design Assistant software to form an all-in-one, scalable vision solution

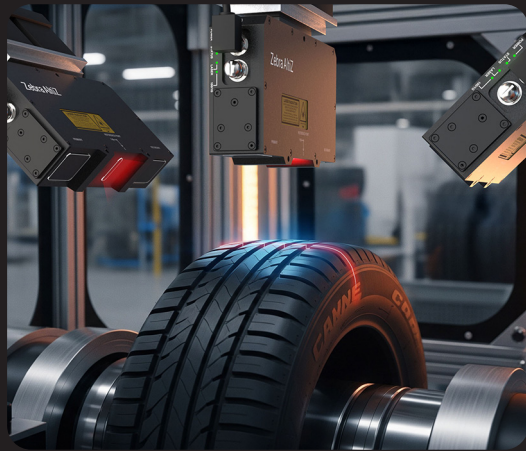

Machine vision technology delivers precise, actionable insights that enhance process monitoring and quality control across your entire operation.

Service offerings for your smart sensors and cameras

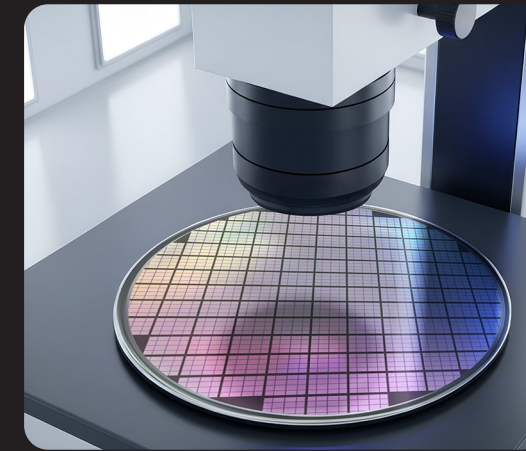

- Zebra OneCare Select and Essential

Gain unrivaled asset visibility and effortlessly integrate Zebra's cutting-edge machine vision solutions across your manufacturing and supply chain operations, keeping you at the forefront of the ever-evolving industrial landscape.

Industrial Vision Controllers

Embedded PC technology, expansion capabilities, optimized size, and sturdiness mean Zebra's industrial vision controllers effectively watch over one or more production lines. Pair with add-in boards to handle image acquisition, network interface, and processing offload demands for single high-speed or multi-camera imaging installations.

Frame Grabbers

From cost-sensitive entry-level models to boards integrating flexible high-rate acquisition and pre-processing capabilities, or a range of inputs, interfaces, and data rates, Zebra frame grabbers provide all the features necessary to make critical decisions with confidence and accuracy.

Supersight

High-density industrial computing platforms accommodate up to four computers and a broad range of image-acquisition interfaces into a standard 4U enclosure, ideal for the factory floor.

- Scale system operations over one to four system host boards (SHBs) to optimize performance
- Split acquisition and processing over one, two, or four compute clusters for optimized expansion capabilities

4Sight Series

Desktop-level performance and substantial expansion capabilities for single high-rate or multi-camera imaging and machine vision applications. Zebra's industrial vision controllers are also suitable for traditional machine vision tasks and deep learning inference.

- Tackle the most demanding imaging applications with powerful embedded processors
- Connect to multiple cameras and boards

Rapixo Series

Multi-input CoaXPress-over-Fiber (CoF), multi-input CoaXPress, and Camera Link frame grabbers support the highest resolutions and frame rates currently available on the market.

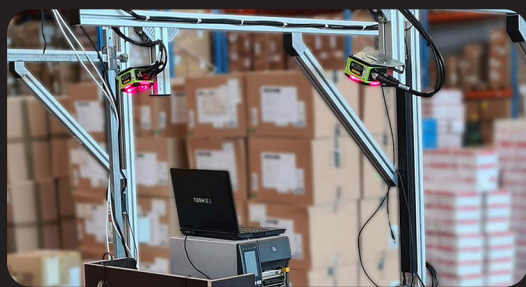

- Connect to multiple high-performance cameras simultaneously
- Offload host computer of optional image processing demands via an FPGA device

GevIQ

Smart network interface cards (NICs) handle generic GigE Vision acquisition offload at speeds up to 25 Gigabits/s per port, ensuring a more versatile alternative to custom-built or proprietary solutions based on 10+ GbE.

- Acquire high-bandwidth streams from two 25 GbE ports, with GigE Vision packet processing performed directly onboard
- Aggregate multiple GbE cameras for up to 32 input sources

I/O Cards

Indio cards provide industrial I/O and communication capabilities that allow users to turn any PC running Aurora Imaging Library or Aurora Design Assistant vision software into a genuine vision controller.

Clarity UHD

Multi-format, multi-input video capture cards handle onboard multi-stream H.264 encoding to optimize video transmission and storage.

- Capture SD, HD, and UHD video formats
- Handle multiple video sources of up to eight HD or two UHD streams

Radiant eV-CL

High-performance frame grabbers handle image capture from a single Camera Link device and connect to high-performance Camera Link cameras to best achieve imaging needs while simplifying overall setup.

- Optimize multi-camera setups
- Simplify connectivity and maintain maximum throughput at extended cable lengths

Indio

Multi-input I/O cards with hardware-enabled real-time synchronization with automation devices.

- Range of industrial I/O with eight discrete inputs and outputs per board
- Synchronize in real time via a dedicated hardware-assisted mechanism

“With Zebra's machine vision system, we have shown we can meet the high-quality standards of the automotive industry.”

— **Temel Tas,**
 Managing Director, TAS GmbH

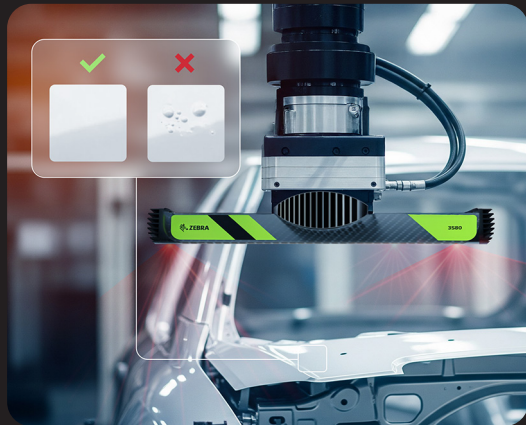

Concord PoE

Multi-port Gigabit Ethernet adaptors interface with one or more GigE Vision cameras, handle command and streaming protocols, and provide power over a single standard connection.

- Interface to one or more GigE Vision cameras supporting PoE
- Trigger multiple cameras simultaneously with hardware-assisted Trigger-over-Ethernet (ToE)

“One of our installations has been working up to 20 hours a day, six days a week, for almost three years, with barely any maintenance required.”

— **Pau Sánchez Carratalá,**
 Vision and Robotics Engineer, Marexi

3D Sensors

Zebra's 3D sensors deliver unmatched accuracy and versatility, capturing detailed data from stationary or moving objects, handling various shapes and textures with ease. Their advanced algorithms provide reliable 3D data matched with RGB image, 3D profiles, depth maps, or point clouds, and detect defects missed by 2D solutions.

Photoneo 3D Sensors

MotionCam-3D Color

Accurate 3D scanning without stopping the production line. MotionCam-3D Color is the only 3D sensor that delivers submillimeter accuracy at up to 20 fps even on moving objects thanks to its Parallel Structured Light and COMPIS sensor. Best suited for robot guidance and 3D inspection in motion, ultra-fast object handling, and time-critical applications.

- Achieve uncompromised precision when scanning even the most challenging objects, including glossy, translucent, and transparent surfaces. No matter if it's static objects or rapid motion.
- Now available with red and blue laser, they can be used for simultaneous scanning in multi-camera setups thanks to different laser wavelengths.

PhoXi 3D Scanner Gen3

From finest detail to long-range precision, this 3D scanner is engineered for the most accuracy-demanding applications. Best for high-res inspection, high-accuracy robot guidance, and long-distance 3D scanning.

- Advanced structured light technology delivers dense point clouds, while award-winning ambient light suppression technology enables data capture in any lighting conditions.
- Now available with red and blue laser, they can be used for simultaneous scanning in multi-camera setups thanks to different laser wavelengths.

“By combining world-class 3D sensors from Photoneo with Zebra’s global reach and best-in-class 3D software, customers will be able to unlock considerable business value from machine vision across new, exciting use cases.”

— Jan Zizka,
Co-founder and CEO, Photoneo Brightpick Group

Altiz Series

Featuring single-camera or dual-camera single-laser designs that reduce scanning gaps and voids and deliver exceptionally high 3D reproduction fidelity.

- Operate two cameras in tandem for maximum quality, or alternate for twice the scanning output.
- Work with Zebra or third-party vision software thanks to a standard GigE Vision interface.

3S Series

Delivering accurate, real-time 3D imaging for both static and moving objects, these sensors are designed to enhance quality control and inspection in high-speed manufacturing and logistics environments.

- Capture ultra-precise 3D images at high speeds to identify fine details and anomalies.
- Integrate seamlessly with Aurora Design Assistant or Aurora Vision Studio software for streamlined deployment and advanced automation of vision applications.

Photoneo Software Suite

Bin Picking Studio

Automate your entire bin picking application in a smooth end-to-end setup—localize, plan optimal paths with collision avoidance, find the best gripping point, and pick.

- Features like calibration, integrated vision system components (scanner, localization, gripping strategy), multi-view support, and scenario-specific modules for challenging items.
- Best suited for real-time bin picking even with occlusions and object variance, supporting all major robot brands.

Locator Studio

A powerful GUI-driven solution to implement robot guidance applications quickly and easily. Its capabilities include robot-camera calibration, AI- and CAD-based object localization, and predefined robot program modules for all major robot brands.

- Utilize a web-based interface for remote configuration and monitoring.
- Streamline vision system setup for advanced automation tasks, including AI-powered depalletization and delayering.

Digital Twinning

Create 3D digital replicas of physical objects with two complementary tools: Instant Meshing and 3D Meshing.

- Empower developers and automation engineers to generate precise 3D models for various use cases, from real-time integration into robotic pipelines to detailed object digitization for inspection and analysis.

Depalletization

The depalletization module combines advanced 3D vision with artificial intelligence to automate the unloading of randomly stacked, mixed-SKU pallets in demanding intralogistics environments.

Delayering

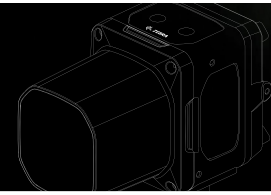

Delayering automates the removal of entire layers of goods from pallets. The AI-powered system handles diverse goods across mixed-item pallets, using advanced 3D vision for fast scanning and precise layer removal without pre-sorting.

Photoneo sensors and software revolutionize industrial automation with advanced 3D vision technologies for manufacturing, logistics, and other enterprises.

MACHINE VISION

Zebra Aurora™ Software Suite

The Zebra Aurora suite of industrial automation software enables users of all experience levels to solve their track-and-trace and vision inspection needs. Experienced users will appreciate how easy it is to develop, refine, and customize jobs, while first-time users can take advantage of interactive, step-by-step guidance to develop powerful applications for a wide range of industries.

Aurora Focus

Aurora Focus empowers Zebra's FS, VS, and NS devices with on-device software for specific tasks like barcode reading and deep learning OCR and anomaly detection.

- Leverage one powerful software platform to control all enterprise-wide automation solutions
- On-demand Zebra-only features like ImagePerfect+, Golden Image Compare, Object Locate, and more

Aurora Imaging Library

With deep code-level customization for machine vision projects, Aurora Imaging Library is a powerful programming environment featuring a strong 3D toolkit. The platform ensures maximum development flexibility and performance optimization.

- End-to-end coverage with utilities to optimize performance, shorten ramp-up time, and improve outcomes
- Single, portable API can move between interfaces or OS to best protect the original investment

Aurora Vision Library

Designed for experienced programmers proficient in vision applications, Aurora Vision Library provides sophisticated functionality presented in programming language.

- Totally customizable software affords complete control over vision applications
- Save time with code-generator capabilities to streamline programming projects

Aurora Design Assistant

A flowchart-based drag-and-drop platform, Aurora Design Assistant speeds up machine vision development through graphical programming. It offers capabilities such as barcode reading, DL-OCR, 2D/3D guidance, and inspection, plus an add-on toolkit for vision-guided robotics (VGR).

- Hardware-independent environment supports branded and third-party smart cameras, vision controllers, and PCs
- Communicate actions and results to automation equipment in real time with discrete I/Os and supported protocols

Aurora Vision Studio

Create, integrate, and monitor powerful machine vision applications without the need to write a single line of code with Aurora Vision Studio software.

- Includes a set of over 3,500 proven and ready-to-use filters to support a simple, three-step workflow
- Hardware agnostic, it also includes robust AI and deep learning tools for complex vision tasks

Explore this white paper to discover how cutting-edge 3D imaging techniques are revolutionizing machine vision, enhancing precision in complex industrial applications, and unlocking new levels of quality control and production efficiency.

ENVIRONMENTAL RESPONSIBILITY

Environmental Responsibility and Sustainability

Zebra takes environmental responsibility seriously and places sustainability at the heart of our product portfolio. These are some of the ways we're delivering on the promise of sustainability that we've made to our customers through purpose-built hardware, software, and cloud analytics.

Reducing carbon footprints

Our approved science-based targets (SBT) help our customers lower their carbon emissions. We prioritize carbon reductions using data from product life cycle assessments.

- 50% absolute carbon emission reduction at Zebra sites from 2020 to 2030
- 15% carbon emission reduction in supplier manufacturing and customer product use by 2030

Lower energy use

We're helping our customers reduce electricity use.

- ~98% of our eligible products meet ENERGY STAR® requirements.
- Our data capture products reduce energy use with LED and integrated ASIC designs
- Our external power supply surpasses international requirements with a Level VI efficiency rating

Purpose-driven design

We deliver on performance and positive results.

- Accessible designs and ergonomic form factors support our customers' inclusion priorities
- Our broad product portfolio and solution ecosystem drives sustainability objectives
- Several new Zebra products have implemented recycled plastics, including our MC34 Mobile Computers, designed and constructed with 49% post-consumer recycled plastics
- Zebra has four handheld computers and 11 tablets registered to EPEAT
- Zebra has implemented Forestry Stewardship Council (FSC) certified paper and cardboard packaging for several new products

Extending product life cycles

Ruggedized designs, software security, and proactive battery replacement enable longer life cycles and greater returns on investment, while end-of-life reuse and recycling helps minimize our environmental impact.

- Interchangeable designs such as shared charging cradles and batteries encourage reuse and enable a more circular economy

Minimal packaging

We help customers achieve zero-landfill targets through multipack and eco-packaging.

- The PS30 packaging utilizes fully recyclable corrugated materials and is 100% biodegradable
- Simplifying packaging, such as 17% slimmer touch computer packaging
- Encouraging customer adoption of multipacks and returnable containers

Environmentally friendly supplies

Keep your operations running smoothly with environmentally sustainable solutions.

- ZeroLiner Linerless labels eliminate backing waste
- Recyclable cartridges, made of PET-1 ocean-bound plastic, can be recycled in standard curbside collections, promoting circular economy practices
- BPA and phenol-free print supplies remove hazardous materials

Zebra AMRs*

Power your productivity and empower your workforce with Zebra Robotics Automation (ZRA), a robust, versatile, cloud-based portfolio of autonomous mobile robots (AMRs) and intelligent software. Zebra AMRs move independently across your facility to fulfill orders faster and automate time-consuming and repetitive material movement tasks so your skilled workers can focus on more meaningful work.

Zebra Connect Series*

Use any web-enabled or integrated device such as Zebra tablets or mobile computers to execute a workflow or request a pick-up. Zebra Connect will automatically move to the pick-up area and autonomously transport it to the selected drop-off area. Upon arrival, Zebra Connect automatically detaches from the cart and is ready for the next task, keeping workers productive in their zones.

- Available in three sizes, cart options support a wide range of workflows
- Simple setup and control for associates through handheld devices or fully configured schedules

Zebra Flex*

Designed for versatility, the Zebra Flex series features adjustable shelving that supports a variety of tote, bin, and carton sizes simultaneously. They're ideal for order transport in fulfillment operations with goods-to-person (GTP) stations, optimizing productivity by minimizing touches and eliminating manual travel.

- Dynamic LED lighting improves pick accuracy with put-to-light guidance and highly configurable picker interface
- Can be loaded and unloaded from either side
- Supports item, batch, and case picking

Zebra Symmetry™ Fulfillment

Created specifically to help you realize the full potential of AMR-assisted picking

Drive down your cost per unit with the Zebra Symmetry Fulfillment ecosystem. Optimize worker pick paths and robot utilization with Team Intelligence, a directed workflow that delivers unparalleled picking efficiency.

- A threefold strategy enables workers to pick more items in less time while reducing robot fleet sizes.
- Utilization balance: Achieve more cost-effective accumulation by buffering with inexpensive carts instead of additional robots or labor.
- More cubic capacity: Carts boost pick density, reducing your robot count while handling up to 300% more capacity.
- Optimized pick paths: Workers and robots always have orchestrated work assignments; there's never a robot without a picker or a picker without a robot.

WT6400 and RS6100

Zebra Roller Series*

Zebra Roller and Roller Guide help elevate efficiency in conveyor, sortation, and AS/RS driven environments by bridging islands of automation. The adaptable design and autonomous navigation enable seamless loading/unloading to conveyors or from manual or automated pick locations without human intervention.

- Utilizing the Roller series in workflows, long stretches of fixed conveyor can be replaced to free up space for storage or value-added operations
- Roller Guide's integrated touch screen, barcode scanner, and smart LEDs easily communicate status, destination, and jobs to be done to your workers so they can efficiently communicate

* Not available in all countries.

Symmetry Software*

Zebra Symmetry is a cloud-based software platform for your AMR fleet and automation workflows. Accessible from anywhere, Zebra Symmetry delivers simplicity, performance, and ease of use for any operation that needs AMRs deployed. Effortlessly add robots and modify workflows with a few clicks of a button for rapid ROI.

AMRs provide many solutions across multiple industries. In fulfillment and distribution centers, they enable optimized picking to help fill orders faster. In manufacturing, AMRs can be used for moving raw materials, work-in-process, parts, tools, and finished goods around the facility.

Zebra Symmetry Fulfillment boosts your efficiency with up to 30% fewer robots, handling up to 300% more cubic capacity with a workflow engineered to maximize your profits and reduce your cost per order.

Zebra Workcloud™ has native interoperability with Zebra devices, creating operational efficiency and elevating product availability by optimizing your most valuable resources: your workforce, inventory, time, and funding.

Read success stories of how customers across industries used Zebra Workcloud to improve operations and customer experience.

Zebra Workcloud

Zebra is more than just industry-leading hardware—it's the software inside that makes us a differentiated market leader. Our purpose-built software solutions empower your frontline operations and workers like no one else can. With Zebra, you get an unmatched combination of hardware and connected software designed specifically to drive workforce engagement, enhance collaboration, and optimize inventory. This is what sets us apart and keeps you ahead.

When you partner with Zebra, you partner with the leader in task and collaboration software. Your frontline is striving to do better every day by your customers, and so are we. Zebra's Workcloud software platform streamlines your employees' job so they can do what they're best at—satisfying customers and boosting sales.

Workcloud also maximizes your other main asset—your inventory—by handling forecasting, replenishment, and pricing so that you can offer your customers the perfect, personalized experience.

Our modular, market-leading Workcloud software scales seamlessly, giving you the flexibility to modernize at your pace. Deploy faster, minimize risk, and ensure peak performance with Zebra's global expertise—so your frontline operations can be better every day.

We're not just a solutions provider—we're your competitive edge. Let's work together to empower your teams and give your customers the experience they desire.

Workcloud Enterprise Collaboration Suite

Real-time collaboration is the key to fostering connected frontline workers who can quickly adapt and respond to the ever-changing needs of today's customers. As the market leader in enterprise task and collaboration, the Workcloud Enterprise Collaboration Suite empowers your frontline employees with a unified communication system that streamlines projects, activities, and messages. Our suite of solutions removes confusion and accelerates task execution by automatically directing associates to focus on what's most important based on real-time events and signals and simultaneously enables role flexibility and the ability to answer customer questions at the push of a button, fostering more connected and responsive teams.

Workcloud Sync

Empower a more collaborative workforce with Workcloud Sync, a unified and secure solution purpose-built for the frontline. From one single application, equip your frontline with push-to-talk, voice-and-video calling, multimedia messaging, and task functionality, making information and co-workers immediately accessible. Utilize real-time communication to engage and encourage your workers to be at their most efficient and effective.

Workcloud Task Management

Simplify work and streamline task execution for a more efficient, higher-performing operation. Automate task assignments to keep workloads balanced and completion rates high. Automatically direct staff to tackle the highest-priority assignments. With real-time visibility into job status and completion rates, managers can manage by exception. Empower employees to complete their work with confidence and succeed in their roles with a clear understanding of tasks and directives.

Workcloud Workforce Optimization Suite

Leverage AI-powered forecasting to increase frontline engagement and tighten alignment between staffing and customer demand, dynamically adjusting plans in real time to solve unexpected challenges and changing needs. Empower your workforce by giving associates more control over their schedules and daily work for greater flexibility and work-life balance. Your employees will be happier, more productive, and in turn more loyal. What's more, your customers will reap the benefits of an agile and empowered frontline.

Workcloud Scheduling

Optimize budgeting, forecasting, and scheduling to empower your employees and manage workforce costs. Ensure you have who you need, where and when you need them, while providing employees with flexibility and control over their schedules. Share resources across locations, departments, and roles, aligning schedules with customer traffic, skills, certifications, and employee preferences.

Workcloud Timekeeping

Keep your employees and your operations compliant while optimizing timekeeping. Track time entry and labor to control costs and maintain compliance with labor laws and regulations. Prioritize employee safety with touch-less clocking. Maximize productivity with accurate attendance records and real-time visibility across the enterprise.

Software solutions may differ by country. Contact your Zebra Sales representative for details.

Workcloud Inventory Optimization Suite

Satisfy customers and maximize profit potential by ensuring your inventory aligns with shifting demand and is both accurate and available for purchase. With our solutions, you can keep the right mix of inventory on the shelves for higher sell-through and fulfillment at less cost. You'll have advanced analytics to improve visibility, merchandising compliance, and loss prevention activities. No more hunting for data. Instead, you will automatically pinpoint leaks across all channels and eliminate inaccuracies with automated scanning. With the ability to diagnose inventory health, identify root causes of inefficiencies, and guide corrective actions, your enterprise will gain a critical, competitive edge.

Workcloud Actionable Intelligence

Discover cost savings in your data and instantly communicate corrective actions to your frontline to regain lost revenue and boost sales. With AI-generated insights, you can identify and correct inventory anomalies, close more investigations with less effort, and automatically assign and track tasks, assessing their monetary impact on your operation. Reduce shrink and improve inventory accuracy when you consolidate disparate data streams and root out loss at the source.

Workcloud Inventory Visibility

Move away from third-party inventory services and achieve up to 50% in cost savings when you equip your own associates with self-directed inventory counting technology. With meticulous guidance at every step, Workcloud Inventory Visibility makes it easier to plan and execute inventory events, and drives better inventory accuracy and visibility.

Workcloud Demand Intelligence Suite

Experience the power of the Workcloud Demand Intelligence Suite, leveraging cutting-edge AI and ML (machine learning) technologies to accurately forecast and analyze demand to meet various challenges across your organization. With advanced analytical capabilities, the suite enables businesses to anticipate consumer trends to make informed decisions for driving revenue and customer satisfaction and capturing more market share.

Workcloud Lifecycle Pricing

Maximize profitability and efficiency with Workcloud Lifecycle Pricing. This solution automates pricing strategies across the product lifecycle, integrating with your existing systems to deliver real-time analytics and actionable recommendations. Reduce manual workload and improve decision-making with AI-powered automation that adapts to market changes and business goals.

Workcloud Allocation

Optimize inventory placement and reduce waste with Workcloud Allocation. Harness advanced AI and ML to get the right product to the right store at the right time, integrating seamlessly with your ERP and retail systems. Benefit from real-time demand adjustments, weather data integration, and scalable automation that drives measurable ROI and operational efficiency.

Workcloud Inventory Ordering

Make smarter, faster inventory decisions with AI-driven order recommendations and real-time visibility. Automate order promising and predictive ordering to reduce out-of-stocks, minimize waste, and ensure the right products are on the right shelves at the right time—across every channel and location. Built for scale and simplicity, it streamlines collaboration, boosts fulfillment precision, and adapts instantly to changing business needs.

Software solutions may differ by country. Contact your Zebra Sales representative for details.

Workcloud Demand Forecasting & Analysis

Bring together advanced AI-powered forecasting and intuitive demand analysis, giving planners and retailers a unified, real-time view of demand across every channel and location. With automated insights, exception alerts, and seamless integration, you can spot trends, react to anomalies, and make smarter decisions—fast. Built for scale and simplicity, it helps teams reduce planning time, improve accuracy, and drive better business outcomes.

Workcloud Modeling Studio

Unlock smarter forecasting with Workcloud Modeling Studio—designed for data science and operations teams who demand transparency, scalability, and seamless integration. Build, test, and deploy predictive models faster, leveraging high-quality data and AI-driven insights to optimize demand planning and inventory decisions. Stand out with a platform that accelerates time-to-insight and supports global growth.

Zebra Frontline AI Suite

At Zebra, we are transforming frontline operations with a relentless commitment to helping our customers and partners work Better Every Day. We empower industries such as retail, healthcare, logistics, and manufacturing with AI solutions that digitize your environments, operationalize your intelligence, and optimize your operations.

Our Frontline AI Suite exemplifies our commitment to continuous innovation. It includes:

Frontline AI Enablers

The building blocks of Zebra's frontline AI strategy deliver advanced on-device capabilities like product recognition, multimodal data capture, and optical character recognition—empowering workers to complete tasks faster, easier, and more accurately.

Frontline AI Blueprints

Templates combine multiple enablers into predefined workflow automations. Blueprints act as templates that bring together computer vision, voice, and sensor data, models, and business logic to simplify and automate multi-step workflows such as proof of delivery, material receiving, and voice-based assistance.

Zebra Companion

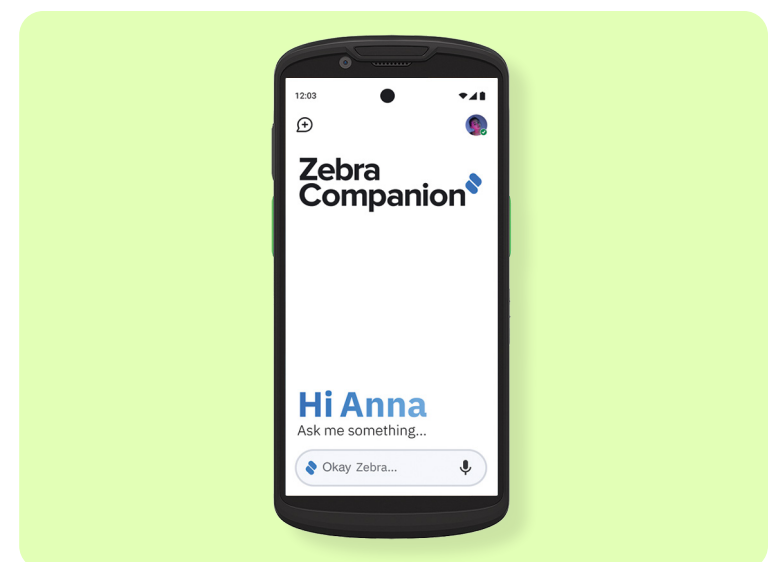

An intelligent AI companion designed specifically for frontline workers. It can answer domain-specific questions on operations and product knowledge (like ChatGPT for the enterprise) and take direct action within frontline workflows.

Composed of multiple GenAI-powered agents, frontline workers can instantly access critical information and troubleshooting assistance to solve problems and make work easier. Whether locating assets in the back room, identifying mislabeled or expired products, or answering questions about return policies, Zebra Companion is expanding what's possible for the frontline.

▪ **Knowledge Agent:** Pre-loaded with your standard operating procedures and policies to help your workers in tasks like processing returns or requesting time off. With self-service options, your managers can spend less time onboarding and more time growing your business.

- **Sales Agent:** Assists with product-related inquiries, availability, and pricing, while offering dynamic cross-sell and upsell recommendations to associates during customer interactions. Elevate your service and boost sales with seamless, informed engagements!
- **Device Agent:** Ensures optimal usage and maintenance of Zebra devices by providing troubleshooting and contextual data integrations, reducing device downtime so retail operations are not disrupted.
- **Merchandising Agent:** Combines advanced image recognition technology and augmented reality to assess shelf health and inform frontline teams how to fix merchandising issues, such as shelf gaps, misplacements, planogramming issues, and inaccurate pricing and signage.

ZEBRA DNA™

Set up. Secure. Manage. Optimize.

With advances in technology continuously accelerating, it's the software inside your Zebra devices that determines whether they remain relevant, agile, and high-performing with a strong ROI over their entire lifecycle. The beauty of Zebra DNA is that this ecosystem can be used as a standalone portfolio of tools or to complement third-party MDMs.

Hardware + Zebra DNA = frontline confidence

Made of applications, utilities, and tools, Zebra DNA is what delivers the unmatched experiences your team gets from Zebra mobile computers, scanners, and printers. That's why with next-gen design driven by decades of innovation, R&D expertise, and proven use cases, Zebra DNA enhances every device.

Fleet insights

Preempt problems with device diagnostics to increase productivity and improve ROI.

Optimal uptime

Simplify device management with tools to increase accuracy and reduce delays.

Flexible workflow performance

Adapt Zebra devices to your network, environment, or workflow with purpose-built software and APIs that unlock operational efficiency.

Set up

Stage and deploy devices rapidly, with the power to easily create and integrate apps for multiple workflows.

Secure

Give IT the ability to protect your systems from emerging cyber threats.

Manage

Convenient remote management to protect fleet uptime and worker productivity.

Optimize

Tailor device capabilities to your needs, enabling workers to complete more tasks in less time.

Behind every great piece of hardware is an even better set of software tools. Learn more about Zebra DNA.

We have committed decades to researching and developing Zebra DNA in the laboratory. We've run thousands of simulations and studied even more real-world use cases to understand the journey each Zebra device will take once it leaves our manufacturing facilities and warehouses.

Discover the **Zebra DNA Selector Tool**, a quick way to match the right DNA software features to your mobile computers, scanners, and printers.

Maximize your ROI with Zebra Services

Embarking on a technology transformation can be complex and costly. Zebra Services is here to help you minimize risks and maximize productivity. Our robust portfolio ensures your Zebra devices, software, and solutions are expertly built, efficiently managed, and quickly returned to your team after service is performed. Trust us to streamline your operations and enhance the value of your investment.*

“We just couldn’t ask for better customer support. You’re not going to find any other companies we deal with that stand behind their word and their service like that.”

— Mark Kaufmann Jr.,
Chief of Charles County Volunteer Fire and EMS

Zebra OneCare™ Maintenance Plans

Protect your Zebra hardware purchase with a Zebra OneCare Maintenance Plan tailored to your needs.* Offering live-agent support, swift repair turnaround time, and accidental damage coverage, Zebra has your back long after you buy your devices. With OS updates, LifeGuard security, and efficient repair status, you can rest easy knowing your devices are up-to-date, secure, and back to working condition in a timely manner. And for additional coverage needs, Zebra provides commissioning, battery, and expedited shipping enhancements for seamless, uninterrupted operations.**

Zebra
OneCare

Zebra VisibilityIQ™ Foresight

Optimize your operations with our Visibility Services, providing comprehensive insights into device inventory, utilization, and performance. Access crucial battery statistics, track repair status, and ensure device readiness. Forecast seasonal demands and predict potential issues, ensuring seamless productivity and minimizing downtime.

Zebra
VisibilityIQ
Foresight

Zebra Professional Services

Maximize efficiency with our Professional Services, seamlessly integrating into existing processes to accelerate business outcomes and realize ROI sooner. We collaborate with you on your RFID journey to enhance adoption and drive success. Benefit from our Discover, Design, and Build approach, ensuring smooth integration and deployment tailored to your needs.

Zebra
Professional
Services

Zebra Device Managed Services

Enhance your Zebra OneCare Plan with Device Managed Services. Our experts manage your devices daily, ensuring optimal performance with 24/7 support. Benefit from consistent software and security updates, a dedicated contact for service delivery, and continuous improvement, freeing your IT staff for critical tasks.

Services

Circular Economy*

Zebra is committed to responsible innovation and creating a better, greener future. The Circular Economy initiative aims to revolutionize the way technology is produced, used, and disposed of. This includes initiatives such as refurbishment, buybacks, and recycling, which can help extend the life cycle of Zebra devices and minimize environmental impact.

Circular Economy Program
Buy Back | Refurbish | Recycle

* Service availability, service feature, and/or repair turnaround time may differ by country. Please contact your Zebra sales representative for details.

** VisibilityIQ OneCare available for mobile computers and scanners only.
