Free your workers' hands to enable the non-stop movement needed to process more orders, every shift with the WS501 Android Wearable Computer

Meet the WS501 Wearable Computer, your newest productivity booster

- Put-away
- Picking
- Packing
- Sorting
- Shipping
- Loading/unloading
- Part verification on the production line

What can you do with the world's smallest all-in-one Android enterprise-class hands-free wearable computer? Streamline and increase accuracy in scan intensive workflows, from the warehouse to the loading dock and manufacturing production line.

Small in size —big in performance

Features:

More memory for more apps—run multiple workflows simultaneously

Fast, reliable 'won't drop' wireless connections with Wi-Fi 6 and Wireless Fusion

Fast accurate scanning of virtually every barcode in any condition

High motion tolerance to capture barcodes —even if the item and worker are in motion

Support back-to-back shifts with **hot-swappable batteries**

Faster collaboration to increase the speed of work with **Push-to-talk (PTT) support**

2-inch AMOLED advanced touchscreen display, easy to read at practically any angle

Comfort for every worker on every shift

Two interchangeable wearing styles adapt to any workflow, bringing all-day comfort with a lightweight design under 5 oz.

Two finger mount
Keeps palm free for handling boxes

Back of hand mount
Fits gloves and bare hands, left or right

Simplifies tasks

1. Voice-enabled: built-in microphone and speaker, Bluetooth headset and PTT support

2. Bright AMOLED display, readable at any angle, low power—no backlight required, vibrant colors

3. Programmable buttons provide one touch access to frequently used features: PTT, scanning or apps

One device that does it all

True all-in-one solution replaces a host mobile computer and ring scanner. Less complexity. Lower TCO. Simpler workflows.

ONE device to wear—fewer products, lower costs

ONE battery to charge and track

ONE device to deploy and manage

ONE service contract to support

Easy to deploy
Easy to manage
Built for the enterprise

Enterprise platform includes:

Rugged—survives 6 ft. (1.8 m) drops, tumbles, and hose downs

Modular multi-slot charging options simplify the backroom

Backed by a long Android roadmap that grows with your business

Easy to manage via Enterprise Mobility Management (EMM) systems

Built on Android for seamless integration with your other Zebra mobile devices

Prevent the high cost of device loss and quickly locate misplaced devices with Zebra's Device Guardian[3]

Making work better every day with:

Easy to manage 'to-do' lists[2]
Send to-do lists to workers, complete with instructions, details and checklists that make it easy to remotely monitor status

Instant communications[2]
Push-to-talk, voice calls and secure multimedia text messaging for easy, anywhere and anytime collaboration

Zebra printers and supplies
An unmatched portfolio of mobile, desktop and industrial printers to meet any printing need, plus simple one-stop shopping

Zebra OneCare™
Our service plans cover it all—from normal wear and tear to accidental damage

Work smarter with Zebra software, printers and services

Boost productivity on your frontline with the hands-free WS501 Android Wearable Computer
