

Support Your Clinicians With High-Quality Healthcare Wristbands and Labels

The technology and systems your clinical teams rely on must work with exceptional reliability: especially patient wristbands and asset labeling. If these items are printed poorly, or are of substandard quality, they may fail to scan or stay adhered which will impact data capture and therefore patient care and critical workflow.

That’s why a majority of hospitals trust in Zebra’s thermal or laser hospital wristbands, and label supplies, to identify patients and items. Our dedicated healthcare solutions are engineered from innovative materials which are sympathetic to the skin while withstanding constant use of disinfectants. They are meticulously tested too, to ensure they remain clearly legible and easy to read across the duration of their expected application, helping your teams optimize patient care while underpinning operational efficiencies from the ward to lab, pharmacy, and beyond.

Over 4 Billion Patients

globally, since **1998**, have been identified by Zebra wristbands.

Poor quality and inconsistent printing supplies can negatively affect your printers, workforce, and patients.

Positive Patient Experiences

	Patients & Clinicians	Laboratory	Pharmacy	Organization
Why Legible, Easy-To-Scan Supplies Matter in Healthcare Settings	<p>Help protect patients’ rights by properly identifying patients, drugs, and specimens, to reduce the risk of errors</p> <p>Ensures the five patient rights – right patient, right drug, right dosage, right method, right time</p>	<p>Forgo misdiagnosis and inappropriate treatment with accurate sample identification and reports</p> <p>Eliminate the costly need to re-collect the sample, redo tests and reprint labels</p> <p>Enables precise specimen collection and management</p>	<p>Reduce the risk of picking the wrong drug and/or dosage</p> <p>Assist with accurate inventory management</p>	<p>Reduce hidden costs associated with compatibility issues by using supplies tested with Zebra printers</p> <p>Improves workforce productivity and efficiency, with fewer calls to IT due to label issues</p> <p>Elevates compliance and ensures positive patient experiences</p> <p>Allows for critical asset tracking</p>

Why Zebra Supplies are Business Critical

Consistently Outstanding Quality	Exceptional Service	Unmatched Expertise
<p>Using our high-quality supplies will help ensure that workflows are unimpeded, while your printers will last longer and require fewer adjustments.</p> <p>How do we ensure consistency?</p> <p>Our R&D experts select and rigorously test all materials to ensure best-in-class print quality and durability with Zebra printers.</p> <p>We certify only those offering the best thermal printing performance.</p> <p>We never substitute raw materials, so our customers get consistent quality.</p>	<p>We offer consultation and customization to design, produce, and deliver the right printing supplies to meet your needs.</p> <p>We offer a wide range of stocked products and inventory management options, so you need to hold less inventory on site while your supply orders are expedited quickly.</p>	<p>For over 30 years, we've excelled in thermal printing, mastering the creation of printing hardware and supplies.</p> <p>We only use inks, varnishes, tools, and equipment which give the best results with thermal printing materials.</p> <p>Our supplies are engineered to enhance the performance and printhead life of Zebra printers.</p>

Wristbands for Healthcare

As a leader in patient ID solutions, we offer you the widest range of the most durable and simple-to-use direct-print laser and thermal wristbands.

The wristbands are designed to stay affixed as long as you need, and remain scannable no matter what sanitizer is used, or how often. We also offer a broad range of wristbands, from the general patient population to labor and delivery, to neo-natal and outpatient services, and everything in between to match your needs.

Accurate, Seamless Adult Patient ID (Thermal Printers)

Zebra's Z-Band® wristband solutions are designed for use in our thermal printers. The bands cover a wide range of requirements, from patient comfort and reducing medical errors to improving workflow and streamlining admission. We also offer bands designed specifically for babies and toddlers' sensitive skin, which are engineered from soft, comfortable and safe materials.

Failure to correctly identify patients is one of the most serious risks to safety. With barcode wristbands in place, your teams can accurately identify patients and ensure they are given the correct care.

Accuracy = Safety and Lower TCO

Considering redraws, retesting, and additional treatment which result from sample errors cost the healthcare industry an estimated

\$200M to \$400M per Year.

Application	Material and Ribbon	Printer
Adult Patient ID	Z-Band UltraSoft Z-Band Direct	HD510-HC 4" Desktop
Long-term Patient ID and Mortuary	Z-Band Fusion	4" Desktop
Patient Record Labeling	Z-Select 2000D Z-Select 2000T +2100 Ribbon	Industrial or Desktop
Newborn	Z-Band Newborn Z-Band UltraSoft	HD510-HC Direct Thermal

Laser Printed Wristband Solutions

Developed by Zebra, LaserBand was the first direct-print laser wristband that featured a self-laminating seal to protect the wristband from moisture and hand sanitizers. Our latest LaserBand2 lineup features enhancements to improve the patient and clinician experience, including an enhanced shape and design which makes assembly easier and allows the band to lie flat to the wrist for both superior comfort and superior data capture. All LaserBands are resistant to temperature and humidity changes, reducing feeding issues and jamming.

LaserBand Type	Features	Sizes
LaserBand2 Advanced	Advanced design and shape Easy assembly Wristband lies flat on the wrist to enable quick scanning	Adult Pediatric
LaserBand2 Dura	Classic design Improved comfort and ease-of-assembly	Adult
LaserBand Original	Classic design	Adult Pediatric Infant
LaserBand2ST	For use in short-term ambulatory surgery centers and outpatient clinics Less than 1 day durability	Adult

Labeling and asset management

We offer a wide range of labels for hospital applications in different sizes, materials, and adhesives, including solutions for test tubes, vials, blood bags, pharmacy dispensing, and many more.

Asset Tracking and Unique Device Identification (UDI)

Zebra’s durable labeling solutions allow you to track your critical patient care medical assets and devices to maintain compliance and improve operational efficiency. Labels for asset tracking and UDI applications must be readable and scannable throughout a product’s life span, both during use and its disposal.

Application	Media	Printer
Equipment Tracking	Z-Ultimate 3000T White + 5095 Ribbon	Industrial or Desktop
Labeling surgical kits during sterilization	Z-Ultimate 3000T White + 5095 Ribbon	Industrial or Desktop
Unique device ID for medical devices	Z-Ultimate 3000T White + 5095 Ribbon	Industrial or Desktop

Sample Labeling

Accurate sample labeling is the best defense against misidentification errors and their significant consequences. Labeling samples at the bedside is a proven method to reduce errors.

Application	Media	Printer
Test tube labeling from a mobile printer	Z-Select 2000D PolyPro 4000D	Mobile
Sample labeling from a fixed location or computer-on-wheels (COW)	Z-Select 2000D	Mobile or Desktop

Blood Labeling

In order to correctly identify blood and intravenous (IV) fluid bags, two types of labels must be applied at different stages of the supply chain.

Application	Media	Printer
8000T Blood Bag Labeling	8000T Blood Bag Deep Freeze 8000T All Temp	Industrial
Secondary Blood Bag Labeling / Identifying Blood	8000T Blood Bag Deep Freeze	Industrial

Laboratory Labeling

Barcode labeling of specimens delivers accuracy and reduces risk at the point of care. It also saves time, enabling lab staff to concentrate on clinical rather than clerical activities.

Application	Media	Printer
Cryogenic labeling	8100T CryoCool	Industrial or Desktop
Slide labeling	Z-Ultimate 3000T White + 5095 Ribbon Z-Xtreme 5000T + Image Lock Ribbon 8000T Lab Resist + Image Lock Ribbon	Industrial or Desktop
Test tube labeling	PolyPro 4000D Z-Select 2000D	Mobile or Desktop
Asset ID	Z-Ultimate 3000T White + 5095 Ribbon	Industrial or Desktop

Pharmacy Labeling

Zebra’s supplies help increase pharmacy safety by adding variable data to every prescribed drug at the unit-dose level. Dispensing labels should be no smaller than 35mm x 70mm and must include the details specified within the labeling regulations under the Medicines Act. This ensures the medication, in the correct dosage, is administered to the correct patient.

Application	Material and Ribbon	Printer
Prescription labeling	Z-Perform 1000T + 2100 Ribbon Z-Select 2000T + 3200 Ribbon	Industrial or Desktop

A Wide Range of Mobile Devices

To help your teams quickly, easily, and accurately capture wristband and label data, Zebra offers a large lineup of mobile computers and scanners. Designed for healthcare, they are built to withstand the rigors of life in busy clinical environments and the constant use of disinfectants, while including all the features your teams need to work speed, ease, and accuracy.
