

# Advanced Technology for the Defence Industry

## Mission Readiness. Situational Awareness. Trusted Technology.

Maintaining agility and connectivity in unpredictable defence environments is essential. Whether preparing forces, tracking assets, or securing remote locations, access to reliable advanced mobility solutions and real-time intelligence is critical to mission success.

Designed and built to withstand extreme environments, Zebra's rugged mobile devices, AI-driven analytics, 5G connectivity and secure cloud integration empower defence personnel with real-time intelligence and optimised logistics. Zebra Technologies can boost readiness and precision for virtually every mission, anywhere.

## Situational Training for Real-World Readiness

### SIMULATE | EVALUATE | PREPARE

Immersive training enhances situational awareness, sharpens coordination, and strengthens decision-making. Zebra's digital training solutions combine live data, immersive drills, and real-world simulations to prepare teams for any scenario. Real-time performance tracking builds skills, improves response times, and refines tactics, while AI-driven insights and post-exercise analysis provide intelligence to evaluate outcomes and continually raise readiness.

## Asset Tracking to Maximise Efficiency

### TRACK | DEPLOY | SECURE

Maintaining control and visibility over mission-critical assets whether at bases, depots, or in the field, is essential to ensure everything is accounted for, securely stored and fully serviceable. With Zebra's mobile computers, RFID and barcode solutions, you get precise asset tracking in real-time, reduce search times, prevent misplacement, avert unauthorised movement, and ensure assets are operational, secure, and ready for rapid deployment.

## Remote Monitoring and Surveillance

### DETECT | MONITOR | RESPOND

Security threats can emerge anywhere, at any time, requiring constant vigilance and situational awareness. Zebra's remote monitoring and surveillance solutions provide real-time intelligence, visibility and automated monitoring, enabling rapid and informed responses to threats and operational demands. With Zebra, you get 24/7 situational awareness across equipment, vehicles, locations and supply chains to strengthen security, safeguard personnel, and protect assets.
