Strengthen Enforcement with E-Citations

ID checks, citation issuance, and incident reporting demand precise data. However, manual records are prone to errors that slow down processes, operations, and compromise both accuracy and efficiency.

Digital citations enhance precision, minimise errors, and ensure compliance. Mobile devices with advanced optical character recognition (OCR) technology enable accurate real-time ticket issuance, effortless data exchange and immediate record updates, letting officers issue citations faster and focus more on safety and order.

Zebra's e-citation solutions — including mobile computers, tablets, and printers — provide instant ticketing, seamless data sharing, and real-time record updates, reducing paperwork and improving accuracy.

AUTOMATE

Citations for efficiency

By automating the entire citation process, from ticket issuance through to data submission, organisations save valuable time and resources. This ensures consistent accuracy, reduces manual data entry, minimises mistakes and strengthens compliance.

INTEGRATE

Real-time data and retrieve records instantly

Gain instant access to real-time data and connect smoothly to existing systems, enabling informed decisions. Quick verification of information and access to previous records provide up-to-date intelligence, better communication across departments, improved accuracy, and increased efficiency.

ISSUE

Instant on-the-spot citation

Mobile ticketing enables personnel to quickly capture data and issue citations at the scene. Accurate digital records and on-the-go printing drastically reduce paperwork and ticketing time, allowing officers to operate more efficiently.

ENSURE

Faster processing for officer safety

Zebra's e-citation solutions boost safety for officers such as police, parking enforcers, and border agents, by reducing the amount of time spent outside their vehicles. Hands-free barcode scanners and rugged devices automate data capture, letting officers process citations quickly while staying focused on their surroundings.
