Ensure patient safety with Zebra's comfortable, proven wristbands

Patient identification wristbands that fail to scan can impact patient safety and the ability to provide timely patient care. That's why a majority of hospitals choose Zebra thermal- or laser-printed wristbands.

Zebra patient ID wristbands provide easy and reliable scannability, long-term durability, improved accuracy in patient identification, and better operational efficiency at the point of care.

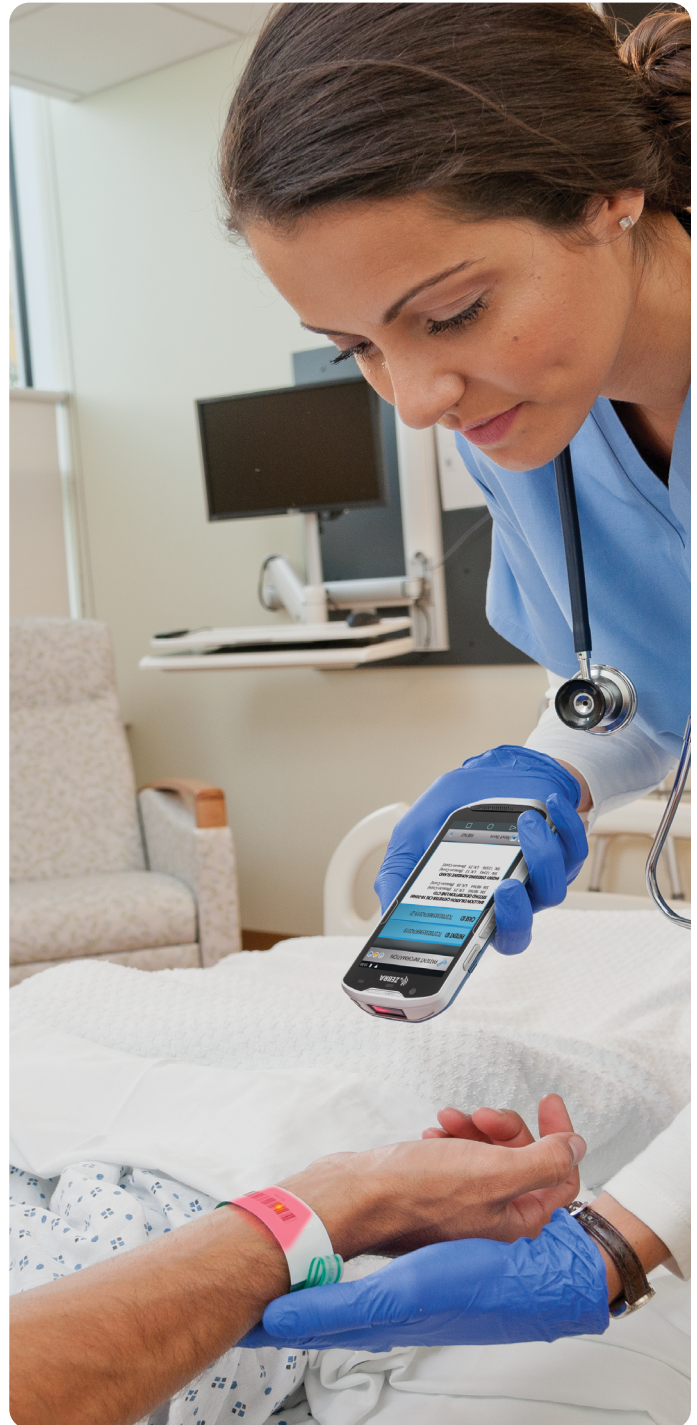

Globally, more than 4 billion patients have been identified by Zebra patient ID wristbands, which offer the widest range of the most durable and easy-to-use direct-print solutions, with both thermal and laser printing options. When you choose Zebra wristbands, you get safe and reliable results you can trust, including:

Improved patient identification. Zebra's thermal and laser wristbands use specialized materials, coatings and printing to ensure the durability of printed barcodes and patient information. They resist repeated exposure to harsh sanitizers and protect against smudging, fading, and scanning or readability issues. In turn, this helps ensure positive patient identification and helps match patients to the right care, medication administration, and specimens.

Reduced nursing workarounds. Zebra thermal and laser wristbands are quick and easy to fasten securely to each patient, with adhesive closures or clips, a comfortable fit, and long-term durability that helps eliminate scanning and readability issues and reduces the need for nursing workarounds and reprinting.

One source for all patient identification needs. Solutions are available for every patient need and use case, with sizes for infants to adults and specialized features for neonatal care, pediatrics, MR safety, and more.

Patient ID solution expertise. As a manufacturer of healthcare-grade patient ID wristbands, thermal printers, barcode scanners and mobile computers, Zebra is a trusted healthcare partner with decades of experience in delivering purpose-built solutions for hospitals and clinics worldwide.

Z-Band Thermal Wristbands

Zebra's Z-Band Wristbands are one of the most durable wristbands on the market.

A barcode that fails to scan or requires repeated attempts to scan jeopardizes patient safety and staff productivity. Zebra's supplies research and development team has worked with our coatings suppliers to develop a wristband that stands up to not only moisture but also a wide array of hand sanitizers to ensure optimum image durability and scanning performance.

Zebra's Z-Band® direct thermal wristbands:

- Feature a silver antimicrobial coating that protects the wristband
- Enable staff to quickly and easily print and securely fasten in less than a minute, using an adhesive tab or color clip
- Are latex-free
- Use direct thermal imaging chemistry composed primarily of leuco dyes and developers; use only UV varnishes and water based inks; and contain zero metal content, which allows them to be considered MR-safe.

For more details on the durability testing performed, please download our white paper [here](#).

Compatible with HC100 & ZD510-HC Printers

The ZD510-HC and HC100 are the easiest wristband printers to use on the market. Just insert the wristband cartridge containing Zebra Z-Band® wristbands and print. The smartchip in each cartridge allows automatic calibration. The ZD510-HC and HC100 instantly identifies the wristband size and automatically configures darkness and speed settings for optimal print quality and wristband durability. The result? No wasted wristbands. Support calls for wristband loading issues are virtually eliminated, and admissions personnel can focus on the patient, not printing wristbands.

Environmentally Friendly Wristband Cartridge: Supporting your Sustainability Goals

As well as designing our wristbands to enhance patient safety, we innovate to support your environmental, social and governance goals. Our new Environmentally Friendly Wristband Cartridge, for use with our HC100 / ZD510-HC Wristband Printers, is made from PET 1 material. PET 1 can be recycled in standard curbside collections, reducing landfill and promoting circular economy practices.

Z-Band UltraSoft	Part Number	Size	
- Ultra-soft wristband - Adhesive closure - Resistance to hand sanitizers such as Purell® - One of the softest direct thermal wristbands on the market. - Available in a Maternity ID Solution to streamline the identification process with the print of wristbands in one set, enabling identification and association of a mother and her newborn baby - The Extended Stay wristband reduces the need for re-banding patients during extended healthcare stays.. Z-Band Fusion

Zebra's self-laminating Z-Band Fusion® direct thermal polypropylene wristband is perfect for use at specialized hospitals where the average patient stay exceeds 14 days.

The advanced shape and design makes assembly easy and allows the wristband to lie flat on the wrist to enable quick scanning, while providing superior patient comfort.

Features Include

- Self-laminating design protects the printed text and barcodes
- Adhesive-closure
- Wristband extender to fit a wide range of wrist sizes
- Available in Adult, Pediatric, and Infant sizes
- Includes Patient Chart Label
- Durable for an extended time
- Latex-free

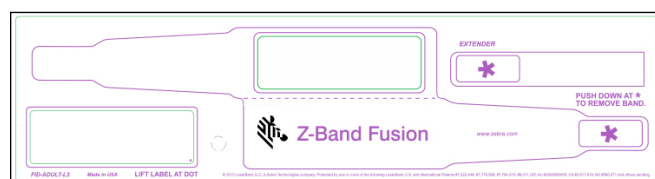

Z-Band Fusion Specifications

Part Number: FID-BABY-L3-1-200T

Hospitality and Event Wristbands

You can quickly and easily create wristbands using a Zebra barcode printer and direct thermal Z-Band® Fun or Z-Band Splash wristbands. The wristbands are blank and have no value until they're printed on demand. You can also create unique or limited edition wristbands, incorporating your brand into the design, to add exclusivity to the guest experience and a memento which people may collect and keep.

Features Include

- Reduced ticket fraud
- Ease of access flow
- Taking payments
- Making it memorable
- Optimizing costs

Infant Comfort Solutions

Wristbanding infants is a sensitive issue. While hospitals go to great lengths to properly identify infants, staff members are also concerned with the comfort and durability of the wristbands. Zebra kept these challenges in mind when creating a complete line of infant comfort solutions.

ComfyCuff

This soft foam cuff features an adjustable Velcro® closure, ensuring infant comfort. It can be used in conjunction with LaserBand2 Advanced pediatric / infant ID tags.

5" x 1.25", Latex Free, Part Number: LB2-BABY-P
