

# TAKE THE QUICKEST ROUTE TO BETTER T&L

In T&L, the fastest company wins. Time to speed up training and daily tasks, deepen collaboration and support real-time visibility for quicker decision-making.

**\$523 BILLION**

Online sales in the U.S. by 2020

**61%**

Consumers are willing to pay more for same-day delivery

**64%**

Manufacturers rank speed of delivery as a top customer demand

## 4 Ways to stay ahead

SEE WHICH GENERATION LEADS THE WAY

### LEGACY MOBILE DEVICES

### MODERN MOBILE DEVICES

**1**

#### Expedite Training and Workflows

Can't always capture barcodes if they're damaged or dirty, leading to redundancy or manual data entry

Outdated UX and green screens lengthens training and adoption

Inefficient routes and redundant delivery efforts waste valuable time

Manual data entry is time-consuming and error prone

Eliminate redundancy with first time, every time reading of barcodes in virtually any condition

**15%** Productivity increase with touchscreens and UX workers already know

Streamline routes via task management apps

Save time by automatically populating fields with text, signatures, graphics, barcodes and images simultaneously captured in a single scan

**2**

#### Get Immediate Access to People and Data

Limit your ability to quickly track employees

Team communication between disparate devices and networks is cumbersome and slow

Manual completion of vehicle inspection reports

Get bogged down by Big Data

Monitor the location, movement and behavior of your fleet

Unify communication with all team members with instant PTT voice and text

Automate tasks, such as driver vehicle inspection reports

Get rapid processors and fast operating systems

**3**

#### Gain Real-Time Visibility into your Operations

Vulnerable to unexpected downtime and delays

Harder to get actionable data from IoT sensors

Limited/delayed visibility into asset status resulting in damaged goods

Predict and prevent downtime with complete visibility into your operations

Unleash the full potential of IoT and RFID sensors

Predict and prevent damage to arriving cargo

**4**

#### Take T&L to Another Dimension

Automatic Dimensioning helps you plan in advance, to accelerate your speed of business. Legacy mobile devices are equipped with the tech to get you there.

Ensure that trucks are lined up for delivery

Anticipate cargo

Pack trailers properly to lower transport costs, resulting in more efficient deployment to your Distribution Centers

#### Say goodbye to bottle necks

### COUNT ON ZEBRA FOR A SMOOTH TRANSITION

#### CONSULTING SERVICES

Get expertise to create a plan for success

#### MIGRATING SERVICES

Migrate quickly and smoothly with less cost and risk

#### ASSET VISIBILITY SERVICES

Gain device insight to gain device uptime and ROI

**Everything you need to save time in training, loading, delivering and processing.**

### READY FOR THE FUTURE OF T&L?
