

# WRISTBANDS SAVE LIVES. WILL YOURS?

Patient wristbands are the foundation for a safer, more efficient process for delivering care. However, not all wristbands are of equal quality. Some wristbands are not durable enough to withstand the rigors of a busy hospital environment, leading to workarounds and mistakes that increase costs and compromise patient care.

## COMFORTABLE TO WEAR

Gentle enough to protect sensitive skin from injury without sacrificing quality.

## DURABLE

Strong enough to last throughout the entire patient stay, whether it is 2 days or 2 weeks, and withstand a wide range of hand sanitizers.

## QUALITY CONSTRUCTION

Tough enough to endure constant exposure to water and hand sanitizers without fading, smudging or smearing.

## EFFORTLESSLY PRINTED

Reliable enough to quickly and easily print without encountering feeding issues and paper jams.

## EASILY SCANNED

Readable 100% of the time without having to awaken patients to adjust bands for scanning.

## THE ANATOMY OF A QUALITY WRISTBAND

Unlike many wristbands, Zebra's are specifically designed to withstand the rigors of the harshest healthcare settings and include solutions for neonatal, maternity and outpatient services

### ZEBRA LASERBANDS

LaserBand makes it easier to position the band flat on the patient's wrist for quick scanning and superior patient comfort

Patented self-laminating seal protects the print from moisture and hand sanitizers, preserving patient data, including text and barcodes, for longer wristband usability

LaserBand2 Advanced was engineered to prevent the wristband from twisting on a patient's wrist, laying flat for easy scanning

Lay-flat and anti-wicking materials are resistant to temperature and humidity changes, reducing feeding issues and jamming

Zebra developed the next generation of laser wristbands to improve ease of assembly, scanability and patient comfort

### ADDED PROTECTION

### SUPERIOR SCANNING

### RELIABLE PRINTING

### NOTEWORTHY INNOVATION

### Z-BAND THERMAL WRISTBANDS

Z-Band wristbands can withstand continuous contact with hand sanitizers ensuring high levels of scanability, reducing the need for nurse workarounds

Features an antimicrobial coating that protects the wristband from degradation. Independent lab test results show Z-Bands are up to 6x more durable than the leading competitor when exposed to hand sanitizers

Consistently outperforms competitors when repeatedly exposed to hand sanitizers

Staff can quickly and easily print and secure, using an adhesive tab or clip, in less than one minute

Z-Band UltraSoft is one of the softest thermal wristbands in the market. Zebra developed the first wristband printing solution solely for patient identification (HC100, now the ZD510-HC)

## 14 OF THE TOP 20 HOSPITALS

on the U.S. News 2017-18 Best Hospitals Honor Roll use Zebra wristbands

## NEARLY 2 BILLION PATIENTS

globally since 1998 and more than 215 million patients in the U.S. in 2017 were identified by Zebra wristbands
