

WRISTBANDS SAVE LIVES. WILL YOURS?

Patient wristbands are the foundation for a safer, more efficient process for delivering care. However, not all wristbands are of equal quality. Some wristbands are not durable enough to withstand the rigors of a busy hospital environment, leading to workarounds and mistakes that increase costs and compromise patient care.

COMFORTABLE TO WEAR

Gentle enough to protect sensitive skin from injury without sacrificing quality.

DURABLE

Strong enough to last throughout the entire patient stay, whether it is 2 days or 2 weeks, and withstand a wide range of hand sanitizers.

QUALITY CONSTRUCTION

Tough enough to endure constant exposure to water and hand sanitizers without fading, smudging or smearing.

EFFORTLESSLY PRINTED

Reliable enough to quickly and easily print without encountering feeding issues and paper jams.

EASILY SCANNED

Readable 100% of the time without having to awaken patients to adjust bands for scanning.

THE ANATOMY OF A QUALITY WRISTBAND

Unlike many wristbands, Zebra's are specifically designed to withstand the rigors of the harshest healthcare settings and include solutions for neonatal, maternity and outpatient services

ZEBRA LASERBANDS

LaserBand makes it easier to position the band flat on the patient's wrist for quick scanning and superior patient comfort

Patented self-laminating seal protects the print from moisture and hand sanitizers, preserving patient data, including text and barcodes, for longer wristband usability

LaserBand2 Advanced was engineered to prevent the wristband from twisting on a patient's wrist, laying flat for easy scanning

Lay-flat and anti-wicking materials are resistant to temperature and humidity changes, reducing feeding issues and jamming

Zebra developed and patented the first direct-print laser wristband as well as the next generation of laser wristbands to improve ease of assembly, scannability and patient comfort

ADDED PROTECTION

SUPERIOR SCANNING

RELIABLE PRINTING

NOTEWORTHY INNOVATION

Z-BAND THERMAL WRISTBANDS

Z-Band wristbands can withstand continuous contact with hand sanitizers ensuring high levels of scannability, reducing the need for nurse workarounds

Patented silver antimicrobial coating protects wristbands from fading. Print endures crockmeter testing with industry-leading results: 740 cycles (Purell Waterless) and 1,400 cycles (3M Avagard)

Scannable for up to 14 days and in many cases lasting much longer

Staff can quickly and easily print and secure, using an adhesive tab or clip, in less than one minute

The Z-Band UltraSoft wristband is the softest thermal wristband in the market. The HC100 Patient ID solution is the only printing solution in the market developed solely for patient identification

14 OF THE TOP 20 HOSPITALS

on the U.S. News 2017-18 Best Hospitals Honor Roll use Zebra wristbands

NEARLY 2 BILLION PATIENTS

globally since 1998 and more than 215 million patients in the U.S. in 2017 were identified by Zebra wristbands
