Competitive Advantages

Our portfolio of intelligent edge solutions and devices is designed to deliver a performance edge wherever the front line may be. Devices that have the reliability, ruggedness and ease of use that front-line users demand. Dynamic and responsive systems that link teams, assets and information in real time to deliver best-action guidance for business-critical decisions. And solutions, delivered in collaboration with a specialized ecosystem of partners, that enable customers to create smart environments and optimize operations through connected, collaborative workflows.

Portfolio of Intelligent Edge Solutions, Platform, and Devices

Mobile Computing

Zebra's mobile computing solutions capture real-time data and increase the productivity of an on-the-go workforce. Our versatile integrated voice and data mobile computing products allow organizations to capture and exchange information specific to their enterprises' demands.

Printing

Zebra is a leading global provider of rugged and reliable thermal printers. Our broad selection of printers — including industrial, desktop, mobile and wristband — meet a wide variety of needs, helping organizations improve data management and accessibility, reduce costs and increase productivity.

Data Capture

Zebra's barcode scanning solutions help organizations quickly and accurately capture data. Zebra has an extensive range of barcode scanners for a number of industries and applications — from mobile point of sale payments to inventory management to medication tracking.

RFID

Radio frequency identification (RFID) readers, antennas and printers from Zebra help organizations capture, move and manage critical information to and from every point of business activity for maximum visibility into enterprise assets, improving efficiency and accuracy.

Location Solutions

Zebra's location solution products and real-time locating system (RTLS) software work together to provide a digital view of physical operations. Our Sports Solution platform delivers real-time analytics that improve the fan experience — and give teams insights that lead to victories.

Savanna

Our data-intelligence platform aggregates and analyzes data from edge devices to reveal actionable workflow insights, powers next-gen applications and solutions that deliver best-action guidance, and integrates with existing hardware, software and data ecosystems to give you a more complete picture of your business.

Software

The intelligence that powers Zebra® solutions is the software. Our suite of software offerings allow businesses to integrate, configure and manage devices, extend device capability with voice, implement retail mobile payment and enable IoT strategy.

Supplies

Our comprehensive range of specialty supplies include labels, receipt paper, wristbands, ribbons and custom supplies. Before any material gets the Zebra name, it goes through stringent testing to ensure it will perform well in Zebra printers and customers' applications.

Signature Services

Disruptive market conditions, emerging technologies, and rising customer expectations mean investing in edge-data solutions is now mainstream. Yet it's not always easy to integrate these technologies — those that Zebra calls "intelligent edge solutions" — into existing IT environments and workflows. Signature Services solve this issue by accelerating the speed with which businesses can introduce new intelligent edge solutions to operate more productively.

Awards and Locations

Product Design and Company Awards

Fourth Consecutive Award for Innovative Approach to Product Design

Named to Forbes' Best Employer List for Third Consecutive Year

5-Star Rating for Partner Program Guide for Second Consecutive Year
