SPECIALIZED DISCLOSURE REPORT

Zebra Technologies Corporation

(Exact name of the registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

000-19406
(Commission
File Number)

36-2675536
(IRS Employer
Identification No.)

3 Overlook Point, Lincolnshire, Illinois
(Address of principal executive offices)

60069
(Zip code)

Jim L. Kaput

847-793-5802

(Name and telephone number, including area code, of the
person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1, 2017 to December 31, 2017.

Introduction

Effective for the year ending December 31, 2017, Zebra Technologies Corporation (“Zebra”) must disclose whether any conflict minerals necessary to the functionality or production of a product manufactured by Zebra (or contracted by Zebra to be manufactured) originated in the Democratic Republic of the Congo (“DRC”) or a country adjoining the DRC [Angola, Burundi, Central African Republic, Republic of the Congo, Rwanda, South Sudan, Tanzania, Uganda, and Zambia, together the “Covered Countries”], or whether the conflict minerals are from recycled or scrap sources. The disclosure requirement arose from Congress’s determination that trade in conflict minerals in a DRC country is financing conflict in those areas, contributing to a humanitarian crisis.

The term “conflict mineral” is defined in Section 1502(e)(4) of the Act as (A) columbite-tantalite, also known as coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted); or their derivatives; or (B) any other mineral or its derivatives determined by the Secretary of State to be financing conflict in the DRC or Covered Countries (“Conflict Minerals”).

Section 1 – Conflict Minerals Disclosures

Item 1.01 Conflict Minerals Disclosure and Report

Conflict Minerals Disclosure

In accordance with Rule 13p-1 under the Securities Exchange Act of 1934 (“Rule 13p-1”), Zebra Technologies Corporation (“Zebra”) has filed this Specialized Disclosure Form (“Form SD”) and the associated Exhibit 1.01 Conflict Minerals Report for the reporting period January 1, 2017 to December 31, 2017 and is publicly available on Zebra’s website under “**Company Information**”/“**Compliance**”/“**Products and Materials Compliance**” found on Zebra’s website at <https://www.zebra.com/us/en/about-zebra/company-information/compliance/products-and-materials-compliance.html>.

After conducting a reasonable country of origin inquiry and our supply chain due diligence inquiry, Zebra has been unable to determine that certain of its conflict minerals did not originate in the Covered Countries or come from recycled or scrap sources, or that such conflict minerals did not directly or indirectly finance or benefit armed groups in the Covered Countries.

Item 1.02 – Exhibits

The Zebra Technologies Corporation Conflict Minerals Report is attached to this report as Exhibit 1.01.

Section 2 – Exhibits

Item 2.01 Exhibits

Exhibit 1.01 – Conflict Minerals Report of Zebra Technologies Corporation for the period January 1, 2017 to December 31, 2017, as required by Items 1.01 and 1.02 of this Form SD.

* * * * *

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

ZEBRA TECHNOLOGIES CORPORATION

Dated: May 31, 2018

By: /s/ Jim Kaput

Name: Jim L. Kaput

Title: Senior Vice President,
General Counsel and Corporate Secretary

EXHIBIT INDEX

Exhibit Number

Description of Exhibits

1.01 Conflict Minerals Report of Zebra Technologies Corporation for the period January 1 to December 31, 2017.

CONFLICT MINERALS REPORT OF
ZEBRA TECHNOLOGIES CORPORATION

FOR THE REPORTING PERIOD FROM
JANUARY 1 TO DECEMBER 31, 2017

I. Introduction

In accordance in all material respects with Rule 13p-1 (“Rule 13p-1”) under the Securities Exchange Act of 1934 (the “Act”), Zebra undertook efforts to determine whether the necessary Conflict Minerals in our products were or were not “DRC conflict free.” This is the Conflict Minerals Report of Zebra Technologies Corporation (“Zebra”, the “Company”, “our” or “we”) for calendar year 2017 (excepting Conflict Minerals¹ that, prior to January 31, 2017, were located outside of the supply chain) in accordance in all material respects with Rule 13p-1 (the “Report”). Numerous terms in this Report are defined in Rule 13p-1 of the Act and Specialized Disclosure Form (“Form SD”) and the reader is referred to those sources, as well as, to Release No. 34-67716 (August 22, 2012) of the Act (the “Adopting Release”) for such definitions.

The statements below are based on the due diligence activities performed to date and in good faith by Zebra and are based on the information available at the time of this filing. There are factors that could affect the accuracy of these statements. These factors include, but are not limited to, incomplete supplier data or available smelter data, errors or omissions by suppliers or smelters in responding to information requests, incomplete information from industry or other third-party sources, and continuing guidance regarding the SEC final rules.

II. Zebra’s Manufacturing and Outsourcing Description

We are a global leader in the Automatic Identification and Data Capture (“AIDC”) market. The AIDC market consists of mobile computing, data capture, radio frequency identification devices (“RFID”), barcode printing, and other automation products and services. Zebra’s solutions are proven to help our customers and end-users achieve their mission critical strategic business objectives, including improved operational efficiency, optimized workflows, increased asset utilization, and better customer experiences.

We design, manufacture, and sell a broad range of AIDC products, including: mobile computers, barcode scanners, RFID readers, specialty printers for barcode labeling and personal identification, real-time location systems (“RTLS”), related accessories and supplies, such as self-adhesive labels and other consumables, and software utilities and applications. We also provide a full range of services, including maintenance, technical support, repair, managed and professional services, including cloud-based subscriptions. Final assembly of our hardware products is performed by third-parties, including electronics manufacturing services companies (“EMS”) and joint design manufacturers (“JDMs”). Our products are produced primarily in facilities located in China, Mexico, and Brazil. These JDMs or manufacturers produce our products to our design specifications. We maintain control over portions of the supply chain, including supplier selection and price negotiations for key components. The manufacturers purchase the components and subassemblies used in the production of our products. Our products are shipped to regional distribution centers, operated by third-party logistics providers (“3PL’s”) or by Zebra. A portion of products are reconfigured at the distribution centers through firmware downloads, packaging, and customer specific customization before they are shipped to customers. In addition, certain products are manufactured in accordance

¹ The term “Conflict Mineral” is defined in Section 1502(e)(4) of the Act as (A) columbite-tantalite, also known as coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted); or their derivatives (**collectively referred to as “3TG”**).

with procurement regulations and various international trade agreements, and remain eligible for sale to the United States government. Production facilities for our supplies products are located in the United States and Western Europe. We also supplement our in-house production capabilities with those of third-party manufacturers to offer our supplies, principally in Asia.

III. Zebra's Product Description

In October of 2014, Zebra acquired the Enterprise business ("Enterprise") from Motorola Solutions, Inc. ("MSI"), excluding its iDEN, or Integrated Digital Enhanced Network Business. The Enterprise products include rugged and enterprise-grade mobile computers, barcode scanners and RFID readers, WLAN solutions, and accessories, software and services that are associated with these products. Our operations consist of two (2) segments. In January 2018, Zebra changed the names of these reportable segments to better reflect business operations: (1) Asset Intelligence & Tracking ("AIT"), formerly "Legacy Zebra", which is comprised of barcode and card printing, location solutions, supplies, and services; and (2) Enterprise Visibility & Mobility ("EVM"), formerly Enterprise, which is comprised of mobile computing, data capture, RFID, and services.

Enterprise Visibility & Mobility

Mobile Computing: We design, manufacture, and sell rugged and enterprise-grade mobile computing products in a variety of specialized form factors and designs to meet a wide variety of enterprise applications. Industrial applications include inventory management in warehouses and distribution centers; field mobility applications include field service, post and parcel, and direct store delivery; and retail and customer facing applications include e-commerce, omnichannel, mobile point of sale, inventory look-up, and staff collaboration. Our products incorporate both Android™ and Microsoft® Windows® operating systems and support local- and wide-area voice and data communications. Our mobile computing products often incorporate barcode scanning, global position system ("GPS") and RFID features, and other sensory capabilities. We also provide related software tools, utilities, and applications. **Data**

Capture and RFID: We design, manufacture, and sell barcode scanners, image capture devices, and RFID readers. Our portfolio of barcode scanners includes laser scanning and imager products and form factors, including fixed, handheld, and embedded original equipment manufacturer ("OEM") modules. Zebra's data capture products capture business-critical information by decoding barcodes and images, and transmit the resulting data to enterprise systems for analysis and timely decision making. Common applications include asset identification and tracking and workflow management in a variety of industries, including retail, transportation and logistics, manufacturing, and healthcare. Our RFID line of data capture products is focused on ultra-high frequency ("UHF") technology. These RFID devices comply with the electronic product code ("EPC") global Generation 2 UHF standard and similar standards around the world. We also provide related accessories. **Services:** We provide a full range of maintenance, technical support, and repair services. We also provide managed and professional services that, among other things, help customers design, test, and deploy our solutions as well as manage their mobility devices, software applications and workflows. Our offerings include cloud-based subscriptions and multiple service levels. They are typically contracted through multi-year service agreements. We provide our services directly and through our global network of partners.

Asset Intelligence & Tracking Barcode and Card Printing: We design, manufacture, and sell printers, which produce high-quality labels, wristbands, tickets, receipts, and plastic cards on demand. Our customers use our printers in a wide range of applications, including routing and tracking, patient safety, transaction processing, personal identification, and product authentication. These applications require high levels of data accuracy, speed, and reliability. They also include specialty printing for receipts and tickets for improved customer service and productivity gains. Plastic cards are used for secure, reliable personal identification (e.g. state identification cards and drivers' licenses, healthcare IDs), access control (e.g. employee or student building access), and financial cards (e.g. credit, debit and ATM cards) by financial institutions. Our RFID printers/encoders are used to print and encode passive RFID labels. We offer a wide range of accessories and options for our printers, including vehicle mounts and battery chargers.

Supplies: We produce and sell stock and customized thermal labels, receipts, ribbons, plastic cards, and, wristbands suitable for use with our printers, and wristbands which can be imaged in most commercial laser printers. We support our printing products, resellers, and end-users with an extensive line of superior quality, high-performance supplies optimized to a particular end-user's needs. We promote the use of genuine Zebra branded supplies with its printing equipment. We also provide a family of self-laminating wristbands for use in laser printers. These wristbands are marketed under the LaserBand® name. We operate supplies production facilities located in the United States and Western Europe. We supplement our in-house production capabilities with those of third-party manufacturers to offer genuine Zebra supplies, principally in Asia.

Services: We provide a full range of maintenance, technical support, and repair services. We also provide managed and professional services including those which help customers manage their devices and related software applications. Our offerings include cloud-based subscriptions and multiple service levels. They are typically contracted through multi-year service agreements. We provide our services directly and through our global network of partners.

Location Solutions: The Company offers a range of RTLS and services which incorporate active and passive RFID and other tracking technologies to enable users to locate, track, manage, and optimize the utilization of enterprise assets and personnel. We provide substantially all elements of the location solution, including tags, sensors, excitors, middleware software, and application software. Our location solutions are deployed primarily in manufacturing, aerospace, transportation and logistics, sports, and healthcare industries. Various sports teams utilize our MotionWorks® sports solution to track the location and movement of personnel and objects in real-time during sporting events, as well as in training and practice activities.

IV. Zebra's Due Diligence Process

Zebra's Conflict Minerals Report relates to the diligence process undertaken for Zebra products that were manufactured, or contracted to be manufactured on behalf of Zebra, during calendar year 2017. Zebra's process to exercise due diligence and to determine country of origin was based on the following approach:

- 1) Identification of Zebra products that contain 3TG metals necessary to the functionality or production of said products;
- 2) Collection and review of supplier conflict minerals reports for completeness and accuracy;
- 3) Evaluation and verification of the collected data, including smelter information reported from each source; and
- 4) Review and reporting of results.

Zebra supports an industry initiative which audits the smelters' and refiners' due diligence activities: that industry initiative is the Responsible Minerals Initiative ("the "RMI"), which was formerly known as the Conflict-Free Sourcing Initiative ("CFSI"), organized and operating under the auspices of the Responsible Business Alliance ("RMA") [formerly known as Electronic Industry Citizenship Coalition ("EICC")] and Global e-Sustainability Initiative ("GeSI"). The RMI designed and manages the Responsible Minerals Assurance Process ("RMAP"), formerly the Conflict-Free Smelter Program ("CFSP"), to identify the smelters that process 3TG and to independently audit those smelters to certify those whose operations are conformant with the RMI RMAP audit protocol.

The data on which we relied for certain statements in this report was obtained through our membership in RMI using the Reasonable Country of Origin Inquiry report for members – Zebra’s RMI member code for 2017 was V292018-03-16ZKXB.

The Zebra collection and diligence process utilized the RMI “Conflict Minerals Reporting Template (“CMRT”)", which is the standardized reporting tool that facilitates the collection and transfer of information through the supply chain regarding mineral country of origin and the smelters and refiners being utilized. Throughout the data collection process for the 2017 reporting year, Zebra continued to utilize the latest versions of the CMRT during our diligence process (Zebra utilized two (2) versions of the CMRT during 2017: CMRT 5.01 and CMRT 5.10, and both versions were published in 2017).

The following steps were taken as part of our overall risk assessment process:

- **Identify in-scope products** – Zebra utilized a cross-functional team of employees to review the categories of products that we sell to determine the products that are in-scope as described in the Adopting Release. Through this analysis, Zebra identified 164 active suppliers comprising approximately 99% of Zebra’s 2017 spend on component parts supplied and used in the manufacture of Zebra products during 2017.
- **Conduct Reasonable Country of Origin Inquiry (“RCOI”)** – Zebra procures its components from a variety of suppliers around the world, and we rely on our direct suppliers to provide information on the source of the 3TG materials contained in components and products supplied to Zebra – including sources of 3TG that are supplied to them from upstream suppliers. As part of the RCOI, Zebra utilized the industry developed CMRT survey tool, which requests suppliers to identify the 3TG in their products, report information about the sources of the 3TG and provide other information that is used to assess whether they are potentially sourcing from smelters or refiners known to directly or indirectly support conflict in the Covered Countries. We conducted our data collection by approaching suppliers directly to request completion of the currently available CMRT and to submit the data to us by the 2017 year-end. We also utilized other RMI tools, including the smelter database, RMI due diligence library, RBA SOR Master (an RMI developed tool for review of supplier CMRTs and evaluation of smelter status), and the RCOI matrix to review and assess both a supplier’s due diligence process and the reported smelter information.

In total, Zebra collected and reviewed 3TG information for 157 unique suppliers representing 98% of our total spend during 2017. Zebra evaluated for completeness and accuracy the survey responses and other information submitted by suppliers in compiling this Report. For smelters and refiners not certified as conformant or not engaged in the RMAP, we conducted additional independent research of public domain information and NGO sites to reasonably determine the level of risk. Finally, to further evaluate the survey responses by our suppliers, Zebra utilized the information gained from our participation in the activities of the RMI Smelter Engagement Team and RMI Due Diligence Working Group.

- **Identify smelters/refiners** – Zebra’s 157 suppliers identified 319 smelters or refiners in their CMRT survey responses. In finalizing our data analysis, we relied upon the RMI RCOI matrix, RMI due diligence library, RBA SOR Master and our independent research of publicly available information. We evaluated the reported smelters and refiners against the list of smelters and refiners listed on the RMI’s Standard Smelter List as having valid smelting or refining operations, and against the list of smelter facilities designated as “conformant” by the RMI’s independent third-party smelter audit program or the equivalent certifying bodies such as London Bullion Market Association (the “LBMA”) and the Responsible Jewelry Council (the “RJC”); and based upon this analysis, 270 reported smelters or refiners are either certified as conformant or are engaged in the RMI RMAP (260 and 10, respectively), and a total of 49 smelters or refiners and recyclers are not considered “conformant”.

Based on the information received from our suppliers through Zebra’s diligence process, some information provided by our suppliers was unverifiable or incomplete and as such, we are unable to verify with certainty the source and chain of custody of all 3TGs used in our products. Please see Table 1 to this Report for the list of facilities that have been reported as the source of 3TGs used in the manufacturing Zebra products during the 2017 reporting year.

We have consolidated the results of Zebra’s due diligence on the 3TG used in Zebra’s in-scope products, and said results are summarized in the below table:

<u>Smelters*</u>	<u>Tantalum</u>	<u>Tin</u>	<u>Tungsten</u>	<u>Gold</u>
Number of smelters reported	42	79	50	148
Number of smelters listed as conformant or engaged in RMAP	41	72	46	111

* The table represents those smelters and refiners disclosed by our suppliers that are listed on the RMI’s Standard Smelter List as having valid smelting or refining operations in 2017, and those which are listed as being certified as conformant or engaged in RMAP, based upon the information available on the RMI’s website (<http://www.responsiblemineralsinitiative.org/>).

V. Conflict Minerals Report

After conducting a reasonable country of origin inquiry and our supply chain due diligence assessment, Zebra has been unable to determine whether sourcing of 3TG metals used in its products directly or indirectly contributed to armed conflicts in the Covered Countries. Accordingly, this Conflict Minerals Report has been filed with the SEC and is available on Zebra’s website under “**Company Information**”/“**Compliance**”/“**Products and Materials Compliance**” found on Zebra’s website at <https://www.zebra.com/us/en/about-zebra/company-information/compliance/products-and-materials-compliance.html>.

- **Product Determination**

As a result of Zebra’s diligence efforts, we have concluded that as of December 31, 2017, our products are not considered to be “DRC conflict free” (as defined). Zebra is making this determination because we have concluded in good faith that during 2017, we do not have sufficient information from suppliers or other sources to conclude at this time whether the necessary conflict minerals for in-scope products are in fact DRC conflict free.

VI. Steps to Improve Due Diligence

Zebra expects that the amount of information globally on the traceability and sourcing of Conflict Minerals will continue to increase and this will enable Zebra to continue to make informed decisions regarding its supply chain. Zebra will continue to evaluate its diligence process and work to improve the diligence conducted to help reduce the risk that our necessary Conflict Minerals do not directly or indirectly benefit armed groups in the DRC and Covered Countries.

Zebra's diligence of its suppliers will be ongoing and we will continue to work to collect accurate and complete responses from our suppliers through the continued use of tools like the Conflict Minerals Reporting Template. Zebra will also review and test its supplier responses against the information collected via independent conflict free smelter validation programs such as the Responsible Minerals Initiative.

Finally, Zebra will continue to monitor changes in circumstances that may impact our determination under the Act.

VII. Independent Private Sector Audit

As Zebra has not described any of its products as "DRC conflict free" in this Report, and pursuant to the Act, an audit is not required for calendar year 2017.

Table 1**SMELTERS CURRENTLY CERTIFIED AS CONFORMANT BY RMI OR EQUIVALENT ORGANIZATION
(LBMA, RJC)**

This list contains certified conformant smelters reported by Zebra suppliers using 2017 RMI Conflict Minerals Reporting Templates v.5.01 or 5.10.
