Wall Mount Bracket Kit
Installation Guide
for the SAC5000-8000CR Cradle

Introduction

This guide provides instructions for mounting the KT-102376-01R bracket for use with one SAC5000-8000CR (eight-slot) battery charger.

✓ *NOTE* Refer to the CA50 Client/UCA Server Developer Guide (p/n 72E-93914-xx) for detailed product information.
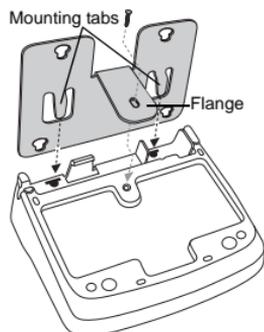

Included Hardware

- One KT-102376-01R Mounting Bracket
- One black .5" Phillips round head, thread cutting screw.
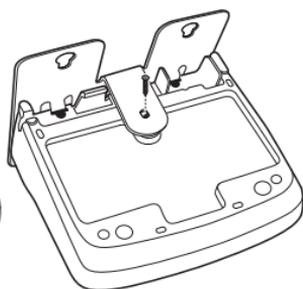

Mounting Instructions

⚠ *WARNING!* Use the screw supplied in this kit to attach the cradle to the mounting bracket only. This screw is not intended for mounting the bracket on a wall.
For safety and stability, it is recommended that you use the appropriate wall mounting hardware for installation. For safe mounting, it is essential to use wall anchors appropriate to the wall type (i.e. plaster, drywall, concrete, etc.). Mount to wood studs whenever possible.

Mounting tabs

Flange

1. Slide the two bracket mounting tabs into the receptacles on the bottom of the cradle as shown. Ensure the screw hole in the bracket flange aligns with the screw hole in the cradle.

2. Screw the .5" Phillips screw (supplied) into the bracket flange and tighten until the cradle is securely attached to the bracket.

3. Use four screws to mount the bracket to a wall. Ensure to use additional wall mounting hardware, as needed, for safe mounting to the wall type.

Warranty
