rev. 06/00
Quick Reference

Introduction
The Phaser P 360/460 Memory Scanner brings new flexibility and economy to data capture and data management in retail operations. The Phaser has an integrated keypad and display, and is able to operate in both corded and battery-powered cordless modes. This provides advanced point-of-sale scanning and also allows the Phaser to be used for other in-store tasks such as delivery, inventory, pricing, and even gift registry. There are two versions available:

- P 460: the batch retail version
- P 360: the batch industrial version

This Quick Reference Guide provides basic instruction on the set up and use of the scanner. Unless otherwise noted, the term Phaser refers to both versions of the scanner.
Setting up the Phaser

Installing the Cable

Note that the P 360 does not have a cable interface.

There are two kinds of cables that attach to the Phaser:

- an RS-232 which connects directly to a host
- a Synapse Adapter cable that connects to a Synapse Smart Cable.

To Install a Synapse Smart Cable

Refer to the instructions from the Synapse cable.

To Install an RS-232 Cable

1. Switch off all devices connected to the Phaser cable.
2. Plug the modular connector on the cable into the receptacle in the bottom of the Phaser handle.
Quick Reference

3. Turn the cable twist-lock 1/8 turn clockwise to seat it.

4. Gently pull the cable to make certain it is properly seated.
5. Plug the other end of the cable to the host computer.

Disconnecting Cables
Most hosts require RS-232 cables, all other hosts require Synapse cables. To disconnect the scanner cable:

1. Power down all the devices connected to the Phaser cable.
2. Remove the cable by twisting the twist-lock 1/8 turn counterclockwise and pulling the cable out.
Installing or Changing the Battery
1. Slide the battery compartment release latch down and remove the battery compartment cover.

2. Slide the battery towards the bottom of the scanner and then pull the bottom of the battery up and out of the scanner.

Replacing the Battery
1. Seat the battery fully in the scanner and then slide it up the handle.
2. Replace the battery compartment cover and slide the release latch up to secure the cover in place.
Quick Reference

Powering Up the Scanner
To turn the scanner on, press the “Enter” key or pull the trigger. The scanner is automatically brought out of sleep mode and into scanning mode.

Recharging the Scanner in the Cradle
To recharge the scanner, place it front-side down into the cradle. Make sure that the contacts in the bottom of the scanner match up with the metal contacts on the cradle.

A full re-charge takes up to 4 hours, you may need less time depending upon the remaining charge in the battery. The LED light on the bottom of the cradle becomes solid to alert you when the battery has been recharged.

Scanning with the Phaser
For POS operation, the scanner ships with a default application that is ready-to-use right out of the box. Otherwise, consult the Phaser Series Scanner Product Reference Guide (p/n 70-33629-xx) for programming instructions. If you need assistance, contact your local supplier or Symbol Support Center.
1. If you are using the scanner in a POS environment, make sure all cable connections are secure. Otherwise, make sure the battery is charged.
2. Make sure the bar code is in the correct scanning range. Aim and press the trigger. When the scanner has read the symbol:
   - You hear a beep.
   - The LED above the screen turns green.
   - The red laser turns off.

**Keyboard Entry**
Instead of scanning a bar code, you can enter the bar code's data using the keypad on the top of the scanner. To enter numeric characters, press the number key on the keypad.

To enter alpha characters, press the Mode key once to put the scanner in Alpha Mode. Press the numeric key with the letter you want above it - once for the first letter, quickly twice for the second letter, or quickly three times for the third letter.

To return to numeric mode, press the Mode key again.
Quick Reference

The * key is a special key that can be programmed for custom specific operations. Ask your system administrator for more information.

Host Communications
With some terminal types, the Phaser is unable to answer host terminal polls until the appropriate host type is selected. This may result in an error message generated by the host computer. Contact your System Administrator for assistance.

Aiming
Hold at an angle
Do not hold the scanner directly over the bar code. Laser light reflecting directly back into the scanner from the bar code is known as specular reflection. This strong light can “blind” the scanner and make decoding difficult. The area where specular reflection occurs is known as a “dead zone”.

You can tilt the scanner up to 65° forward or back and achieve a successful decode. Simple practice quickly shows what tolerances to work within.
Scan the entire symbol
- The scan beam must cross every bar and space on the symbol (as in the left bar code below).
- The larger the symbol, the farther away you should hold the scanner.
- Hold the scanner closer for symbols with bars that are close together.

What Does The Beep Mean?
When you hear 1 beep (short high tone) it means data has been decoded successfully. If any other beeps are heard, contact the technical person in charge of scanning.

Troubleshooting
If the scanner does not work after you’ve followed these operating instructions:
- Check the system power.
- Check that scanning is enabled.
- Check that the battery is installed correctly.
- Check for loose cable connections.
- Be sure the Phaser is programmed to read the type of bar code you are trying to scan.
- Check to be sure the symbol is not defaced.

Cleaning
Wipe the scanner window periodically with a lens tissue or other material suitable for cleaning optical material, such as eyeglasses. Caution: Do not pour, spray or spill any liquid on the scanner.
Quick Reference

Warranty
Symbol Technologies, Inc. ("Symbol") manufactures its hardware products in accordance with industry-standard practices. Symbol warrants that for a period of twelve (12) months from date of shipment, products will be free from defects in materials and workmanship.

This warranty is provided to the original owner only and is not transferable to any third party. It shall not apply to any product (i) which has been repaired or altered unless done or approved by Symbol, (ii) which has not been maintained in accordance with any operating or handling instructions supplied by Symbol, (iii) which has been subjected to unusual physical or electrical stress, misuse, abuse, power shortage, negligence or accident or (iv) which has been used other than in accordance with the product operating and handling instructions. Preventive maintenance is the responsibility of customer and is not covered under this warranty.

Wear items and accessories having a Symbol serial number, will carry a 90-day limited warranty. Non-serialized items will carry a 30-day limited warranty.

Warranty Coverage and Procedure
During the warranty period, Symbol will repair or replace defective products returned to Symbol’s manufacturing plant in the US. For warranty service in North America, call the Symbol Support Center at 1-800-633-5350. International customers should contact the local Symbol office or support center. If warranty service is required, Symbol will issue a Return Material Authorization Number. Products must be shipped in the original or comparable packaging, shipping and insurance charges prepaid. Symbol will ship the repaired or replacement product freight and insurance prepaid in North America. Shipments from the US or other locations will be made F.O.B. Symbol’s manufacturing plant.

Symbol will use new or refurbished parts at its discretion and will own all parts removed from repaired products. Customer will pay for the replacement product in case it does not return the replaced product to Symbol within 3 days of receipt of the replacement product. The process for return and customer’s charges will be in accordance with Symbol’s Exchange Policy in effect at the time of the exchange. Customer accepts full responsibility for its software and data including the appropriate backup thereof.

Repair or replacement of a product during warranty will not extend the original warranty term.

Symbol’s Customer Service organization offers an array of service plans, such as on-site, depot, or phone support, that can be implemented to meet customer’s special operational requirements and are available at a substantial discount during warranty period.
General

Except for the warranties stated above, Symbol disclaims all warranties, express or implied, on products furnished hereunder, including without limitation implied warranties of merchantability and fitness for a particular purpose. The stated express warranties are in lieu of all obligations or liabilities on part of Symbol for damages, including without limitation, special, indirect, or consequential damages arising out of or in connection with the use or performance of the product.

Seller’s liability for damages to buyer or others resulting from the use of any product, shall in no way exceed the purchase price of said product, except in instances of injury to persons or property.

Some states (or jurisdictions) do not allow the exclusion or limitation of incidental or consequential damages, so the proceeding exclusion or limitation may not apply to you.

Ergonomic Recommendations

Caution: In order to avoid or minimize the potential risk of ergonomic injury follow the recommendations below. Consult with your local Health & Safety Manager to ensure that you are meeting with your company’s safety programs to prevent employee injury.

- Reduce or eliminate repetitive motion
- Maintain a natural position
- Reduce or eliminate excessive force
- Keep objects that are used frequently within easy reach
- Perform tasks at correct heights
- Reduce or eliminate vibration
- Reduce or eliminate direct pressure
- Provide adjustable workstations
- Provide adequate clearance
- Provide a suitable working environment
- Improve work procedures.

Regulatory Information

Radio Frequency Interference Requirements

This device has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the Federal Communications Commission’s Rules and Regulations. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.
Quick Reference

However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radio Frequency Interference Requirements - Canada

This Class B digital apparatus complies with Industry Canada Standard ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 d'Industrie Canada.

CE Marking and European Union Compliance

Products intended for sale within the European Union are marked with the CE Mark which indicates compliance to applicable Directives and European Normes (EN), as follows. Amendments to these Directives or ENs are included:

Applicable Directives
- Low Voltage Directive 73/23/EEC

Applicable Standards
- EN 55024:1998, Information Technology equipment - Immunity characteristics - Limits and methods of measurement
- IEC 1000-4-2:1995; Electromagnetic compatibility (EMC); Part 4:Testing and measurement techniques; Section 4.2; Electrostatic discharge immunity test
- IEC 1000-4-3:1997; Electromagnetic Compatibility (EMC); Part 4:Testing and measurement techniques; Section 3. Radiated, radio frequency, electromagnetic field immunity test.
- IEC 1000-4-4:1995; Electromagnetic compatibility (EMC); Part 4:Testing and measurement techniques; Section 4; Testing electrical fast transient/Burst immunity.
- IEC 1000-4-5:1995; Electromagnetic compatibility (EMC), Part 4:Testing and measurement techniques; Section 5; Surge Immunity
- IEC 1000-4-6:1996; Electromagnetic compatibility (EMC), Part 4:Testing and measurement techniques; Section 6; Immunity to conducted disturbances, induced by radio frequency fields.
• IEC 1000-4-11:1994; Electromagnetic compatibility (EMC), Part 4: Testing and measurement techniques; Section 11: Voltage Dips, Short Interruptions, and Voltage Variations.
• EN 60 950 + A1+A2+A3+A4+A11 - Safety of Information Technology Equipment Including Electrical Business Equipment
• EN 60 825-1 (EN 60 825) - Safety of Devices Containing Lasers

Laser Devices

Class 1 Laser devices are not considered to be hazardous when used for their intended purpose. The following statement is required to comply with US and international regulations:

Caution: Use of controls, adjustments or performance of procedures other than those specified herein may result in hazardous laser light exposure.

Class 2 laser scanners use a low power, visible light diode. As with any very bright light source, such as the sun, the user should avoid staring directly into the light beam. Momentary exposure to a Class 2 laser is not known to be harmful.

Service Information
Before you use the unit, it must be configured to operate in your facility's network and run your applications.

If you have a problem running your unit or using your equipment, contact your facility’s Technical or Systems Support. If there is a problem with the equipment, they will contact the Symbol Support Center:

Scanner Labeling

AVOID EXPOSURE - LASER LIGHT IS EMMITTED FROM THIS APERTURE
EVITER TOUTE EXPOSITION - LUMIERE LASER EME PAR CETTE OUVERTURE
In accordance with Clause 5, IEC 0825 and EN60825, the following information is provided to the user:

- **ENGLISH**: CLASS 1 LASER PRODUCT
  - Do not look directly into the beam.

- **HEBREW**: קלאס 1 גרף לייזר
  - אל חיוך אל התאורה

- **ITALIAN**: CLASSE 1 PRODOTTO LASER
  - Non fissare il raggioproduotto

- **DUTCH**: KLASSE 1 LASERPRODUKT
  - Niet in straalmijn kijken

- **FRENCH**: CLASSE 1 PRODUIT LASER DE LA CLASSE 1
  - Ne pas regarder le rayonnement

- **GERMAN**: LASERPRODUKT DER KLASSE 1
  - Nicht direkt in den Laserstrahlen schauen

- **SPANISH**: CLASSE 1 PRODUCTO LASER DE LA CLASSE 1
  - No mire directamente el haz

- **PORTUGUESE**: LUZ DE LASER NÃO PODE SER VISIVEL
  - Não visualize o raio

- **FINNISH**: LUOKKA 1 LASERTUOTE
  - Älä katso suoraan valoa

- **SWEDISH**: KLASS 1 LASERPRODUKT
  - Utan direkt exponering

- **DENMARK**: KLASS 1 LASERPRODUKT
  - Klargahreb ikke ind i strålen

- **NORWEGIAN**: KLASS 1 LASERPRODUKT
  - Klargahreb ikke ind i strålen

- **JAPANESE**: カテゴリー1 レーザー製品
  - 直接光線に見えないように

- **CHINESE**: 1类激光产品
  - 不要直接目视激光

- **HINDI**: 1 क्लास लाइजर प्रोडक्ट
  - अभाव को नज़र न दें
