Index
ABOUT THIS GUIDE

This guide provides information on using the MC40 and accessories.

NOTE  Screens and windows pictured in this guide are samples and can differ from actual screens.

This guide covers Android™ operating system Android Open Source Project (AOSP) Version 5.1.1 (Lollipop).

Documentation Set

The documentation set for the MC40 provides information for specific user needs, and includes:

- **MC40 Quick Start Guide** - describes how to get the device up and running.
- **MC40 Regulatory Guide** - provides required regulatory information.
- **MC40 User Guide** - describes how to use the device.
- **MC40 Integrator Guide** - describes how to set up the device and accessories.

Configurations

This guide covers the following configurations:

<table>
<thead>
<tr>
<th>Configuration</th>
<th>Radios</th>
<th>Display</th>
<th>Memory</th>
<th>Data Capture Options</th>
<th>Operating System</th>
</tr>
</thead>
<tbody>
<tr>
<td>MC40</td>
<td>WLAN: 802.11a/b/g/n/r WPAN: Bluetooth v 4.0 Low Energy</td>
<td>4.3” color WVGA</td>
<td>1 GB RAM / 8 GB Flash</td>
<td>camera and imager or camera, imager and MSR, optional RS507 Hands-free Imager</td>
<td>Android-based, Android Open-Source Project 5.1.1 (Lollipop)</td>
</tr>
</tbody>
</table>
Software Versions

To determine the current software versions touch 🛠 > 🔄 About device.

- **Model number** - Displays the model number.
- **Android version** - Displays the operating system version.
- **Kernel version** - Displays the kernel version number.
- **Build number** - Displays the software build number.

To determine the device serial number, touch 🛠 > 🔄 About device > Status.

- **Serial number** - Displays the serial number.

To determine the Device Patch Version, touch 🛠 > 🔄 About device > SW components.

- **Device Patch Version** - Displays the device patch version number.
  
  Over-the-Air (OTA) update packages/incremental updates allow for patching the device with necessary software updates.

Build Number

The build number contains the software revision number and whether the MC40 is VoIP telephony ready and FIPS ready.

Example Build Number: XX-XX-XX-L-V0-M1

- XX - Software version number
- L - Lollipop
- V - VoIP telephony ready / F - FIPS & VoIP telephony ready
- M - Hardware version number

Chapter Descriptions

Topics covered in this guide are as follows:

- **Chapter 1, Getting Started** provides information on getting the MC40 up and running for the first time.
- **Chapter 2, Using the MC40** provides basic instructions for using the MC40, including powering on and resetting the MC40.
- **Chapter 3, Applications** Provides information on specific applications installed on the device.
- **Chapter 4, Data Capture** provides information for capturing bar code data using the internal camera and optional scan modules and Bluetooth scanner.
- **Chapter 5, WLAN** provides information for configuring Wi-Fi.
- **Chapter 6, Bluetooth** provides information for configuring Bluetooth.
- **Chapter 7, Accessories** describes the available accessories and how to use them with the MC40.
- **Chapter 8, Maintenance and Troubleshooting** includes instructions on cleaning and storing the MC40, and provides troubleshooting solutions for potential problems during MC40 operation.
• Appendix A, Technical Specifications provides the technical specifications for the MC40.

Notational Conventions

The following conventions are used in this document:

• *Italics* are used to highlight the following:
  • Chapters and sections in this and related documents
  • Icons on a screen.
• **Bold** text is used to highlight the following:
  • Dialog box, window, and screen names
  • Drop-down list and list box names
  • Check box and radio button names
  • Button names on a screen.
• Bullets (•) indicate:
  • Action items
  • Lists of alternatives
  • Lists of required steps that are not necessarily sequential
• Sequential lists (for example, lists that describe step-by-step procedures) appear as numbered lists.

Icon Conventions

The documentation set is designed to give the reader more visual clues. The following graphic icons are used throughout the documentation set. These icons and their associated meanings are described below.

WARNING! The word WARNING with the associated safety icon implies information that, if disregarded, could result in death or serious injury, or serious product damage.

CAUTION The word CAUTION with the associated safety icon implies information that, if disregarded, may result in minor or moderate injury, or serious product damage.

NOTE Contains information more important than the surrounding text, such as exceptions or preconditions. They also refer the reader elsewhere for additional information, remind the reader how to complete an action (when it is not part of the current procedure, for instance), or tell the reader where something is located on the screen. There is no warning level associated with a note.

Service Information

If you have a problem with your equipment, contact Zebra Support Center for your region. Contact information is available at: http://www.zebra.com/support

When contacting the Zebra Support Center, please have the following information available:

- Serial number of the unit (found on manufacturing label)
- Model number or product name (found on manufacturing label)
- Software type and version number

Zebra responds to calls by email or telephone within the time limits set forth in support agreements.

If your problem cannot be solved by the Zebra Support Center, you may need to return your equipment for servicing and will be given specific directions. Zebra is not responsible for any damages incurred during shipment if the approved shipping container is not used. Shipping the units improperly can possibly void the warranty.

If you purchased your product from a Zebra business partner, contact that business partner for support.
CHAPTER 1 GETTING STARTED

This chapter provides the features of the MC40 and explains how to set it up for the first time.

Unpacking

Carefully remove all protective material from the MC40 and save the shipping container for later storage and shipping.

Verify the following items are in the box:

- MC40
- Lithium-ion battery
- Quick Start Guide
- Regulatory Guide.

Inspect the equipment for damage. If any equipment is missing or damaged, contact the Zebra Support Center immediately. See Service Information on page iii-x for contact information.

Setup

To start using the MC40 for the first time:

- Install the battery
- Charge the MC40
- Power on the MC40.

Table 1-4   Features - Back View

</tbody>
</table>
Installing the Battery

To install the battery:

1. Align the battery with the slots in the battery compartment.

2. Lower the battery and press down until it snaps into place.
3. Press down on the battery latch.
4. Press the Power button to turn on the MC40.

Charging the Battery

**CAUTION** Ensure that you follow the guidelines for battery safety described in *Battery Safety Guidelines on page 8-1*.

Before using the MC40 for the first time, charge the main battery until the Right light emitting diode (LED) turns solid green (see *Table 1-5 on page 1-8* for charge status indications). To charge the MC40, use a cable or a cradle with the appropriate power supply. For information about the accessories available for the MC40, see *Chapter 7, Accessories*.

The MC40 is equipped with a memory backup battery that automatically charges from the fully-charged main battery. When using the MC40 for the first time, the backup battery requires approximately 36 hours to fully charge. This is also true any time the backup battery is discharged, which occurs when the main battery is removed for several hours. The backup battery retains random access memory (RAM) data in memory for at least 10 minutes (at room temperature) when the MC40’s main battery is removed, when Battery Swap feature is used. When the MC40 reaches a very low battery state, the combination of main battery and backup battery retains RAM data in memory for at least 48 hours.

For cable and cradle setup and charging procedures refer to the MC40 Integrator Guide.

- Micro USB Cable
- Single Slot Charging Cradle
- Five Slot Charge Only Cradle.

</tr>
</tbody>
</table>

**Charging Temperature**

Charge batteries in ambient temperatures from 0 °C to 40 °C (32 °F to 104 °F) or up to 45 °C (113 °F) as reported by the battery. To view the battery temperature, touch 🌋 > About device > Battery Information.

Note that charging is intelligently controlled by the MC40. To accomplish this, for small periods of time, the MC40 or accessory alternately enables and disables battery charging to keep the battery at acceptable temperatures. The MC40 or accessory indicates when charging is disabled due to abnormal temperatures via its LED.

**Charging Spare Batteries**

See Chapter 7, Accessories for information on using accessories to charge spare batteries.

**Powering On the MC40**

If the MC40 did not turn on when the battery was installed, press the Power button until the Right and Left LEDs flash once. The splash screen displays for about a minute as the MC40 initializes its flash file system. Note that these windows also appear upon reset.

**Replacing the Battery**

1. Press the Power button until the menu displays.
2. Touch Battery swap. The Right and Left LEDs light red.
3. Wait until the LEDs turns off.
4. Lift the battery latch.

Figure 1-6  Lift Battery Latch

5. Remove the battery out of the battery compartment.

Figure 1-7  Remove Battery

6. Align the replacement battery in the battery compartment.
7. Lower the battery and press down until it snaps into place.
8. Press down on the battery latch.
9. Press the Power button to turn on the MC40.

---

**Battery Management**

**NOTE** Prior to checking the battery charge level, remove the MC40 from any AC power source (cradle or cable).
To check the charge status of the main battery, touch 📷 > 🧪 About device > Status.

**Battery status** indicates that the battery is discharging (not charging) and **Battery level** lists the battery charge (as a percentage of fully charged).

### Monitor Battery Usage

The Battery screen lists which applications consume the most battery power. Also use it to turn off applications that were downloaded if they are consuming too much power.

Touch 📷 > 🧪 Battery.

![Battery Screen](image)

**Figure 1-8  Battery Screen**

The Battery screen lists the applications using the battery. The discharge graph at the top of the screen shows the rate of battery discharge since last charged (short periods of time when connected to a charger are shown as thin green lines at the bottom of the chart), and how long it has been running on battery power.

Touch an application in the Battery screen to display details about its power consumption. Different applications display different information. Some applications include buttons that open screens with settings to adjust power use.
Low Battery Notification

The user should replace the battery or charge the MC40 using one of the charging accessories.

![Low Battery Notification Screen](image)

**Figure 1-9  Low Battery Notification Screen**

When the battery charge drops below 17%, the MC40 displays a message to connect the MC40 to power. It displays the message again at 15%.

When the battery charge reaches 12%, the MC40 goes into suspend mode. The Right and Left LEDs light red while it goes into critical suspend mode to save data. Once it reaches critical suspend mode the Right and Left LEDs turn off.

The user must replace the battery or charge the MC40 using one of the charging accessories to retain data.

Battery Optimization

Observe the following battery saving tips:

- Leave the MC40 connected to AC power at all times when not in use.
- Set the screen to turn off after a short period of non-use.
- Reduce the screen brightness.
- Turn off all wireless radios when not in use.
- Turn off automatic syncing for Email, Calendar, Contacts, and other applications.
- Use the Power Control widget to check and control the status of radios, the screen brightness, and syncing.
- Minimize use of applications that keep the MC40 from suspending, for example, music and video applications.

Setting the Date and Time

The date and time is automatically synchronized using an NTP server when the MC40 is connected to a wireless network. The user is only required to set the time zone or set the date and time when not connected to a wireless network.

1. Touch 🌙 > ⌚ Date & time.
2. Touch Automatic date & time to disable automatic date and time synchronization.
3. Touch Set date.
4. Select the month, date and year.
5. Touch OK.
6. Touch Set time.
7. Select the hour, minutes and part of the day.
8. Touch OK.
9. Touch Select time zone.
10. Select the current time zone from the list.

11. Touch 🕒.

---

**Display Setting**

Use Display settings to change the screen brightness, change the background image, enable screen rotation, set sleep time and change font size.

**Setting the Screen Brightness**

To manually set the screen brightness:

1. Touch ☀️ > ☑️ Display.
2. Touch Brightness level.

![Brightness Dialog Box](image)

Figure 1-10  *Brightness Dialog Box*

3. Use the slider to set a brightness level.

4. Touch ☑️.

To automatically set the screen brightness:

1. Touch ☀️ > ☑️ Display.
2. Touch Adaptive brightness. The control switch moves to the right and turns green indicating the option is enabled.

3. Touch ☑️.

**Setting Screen Timeout Setting**

To set the screen sleep time:

1. Touch ☀️ > ☑️ Display > Sleep.
2. Select one of the sleep values.
   - 15 seconds
   - 30 seconds
   - 1 minute (default)
   - 2 minutes
   - 5 minutes
   - 10 minutes
   - 30 minutes
3. Touch 

**Setting Font Size**

To set the size of the font in system applications:

1. Touch 
   >  >  > Font size.
2. Select one of the font size values.
   - Small
   - Normal (default)
   - Large
   - Huge
3. Touch 

**Setting Key Light Timeout Setting**

To set the key light sleep time:

1. Touch 
   >  > Key light.
2. Select one of the sleep values.
   - Always on
   - 6 seconds (default)
   - 10 seconds
   - 15 seconds
   - 30 seconds
   - 1 minute
3. Touch 

**Setting Screen Rotation**

The user can set the MC40 screen to rotate 90 degrees left or right.

1. Touch 
   >  > When device is rotated.
2. Touch one of the following options:
   - Rotate the contents of the screen - automatically switch orientation when the screen is rotated.
   - Stay in portrait view - does not switch orientation when the screen is rotated.
3. Touch
**General Sounds Setting**

Use the **Sound & notification** settings to configure media, alarm, and ring volumes, and to set notifications. On the Home screen, touch 🎧 > **Sound & notification**.

![Default Sound & Notification Screen](image)

**Figure 1-11** *Default Sound & Notification Screen*
• Sound
  • Media volume - Controls the music, games and media volume.
  • Alarm volume - Controls the alarm clock volume.
  • Ring volume - Controls the ringtone volume.
  • Also vibrate for calls - Touch to enable the MC40 to also vibrate on incoming calls (VoIP telephony ready only).
  • Interruptions - Use to prioritize sound notifications. Touch the settings to turn call and message interruptions on or off.
    If user turns Messages notifications on, touch Calls/messages from to specify from whom to accept notifications (Anyone, Starred contacts only or Contacts Only).
  • Phone ringtone - Touch to select a sound to play on incoming calls when a VoIP call is received. (VoIP telephony ready only).
  • Default notification ringtone - Touch to select a sound to play for all system notifications.
• Other sounds
  • Dial pad tones - Plays a sound when a dial pad key is touched (default – enabled)
  • Screen locking sounds - Plays a sound when locking and unlocking the screen (default – enabled)
  • Touch sounds - Plays a sound when making screen selections (default – enabled).
  • Vibrate on touch - Vibrates when making screen selections (default – enabled).
• Notification
  • When device is locked - Manage whether notifications can be seen when the MC40 is locked.
  • Show all notification content - Notifications and their details display on the lock screen.
  • Hide sensitive notification content - Notifications display on the lock screen, but any details that could reveal private information is automatically hidden.
  • Don't show notifications at all - Notifications do not display on the lock screen. Notifications display once the device is unlocked.
  • App notifications - Modify the notification settings individually for an application. The setting under When device is locked always takes precedence over the setting for an individual application.
  • Notification access - Displays which applications can access notifications.
    When a notification arrives, its icon appears at the top of the screen. Icons for pending notifications appear on the left, and system icons on the right.
Zebra Volume Control

By default, Zebra Volume Control is not enabled.

To enable Zebra Volume Control:

1. From the Home screen, touch ☰ > Apps.
2. Swipe the screen right or left until the Disabled tab appears.
3. Touch ZebraVolumeControl.
4. Touch ENABLE.
To set the Zebra volume controls after it is enabled:

1. From the Home screen, touch 🌋 > 🔄 Sound & notification. The Zebra volume controls setting appears and can be configured.
2. Touch Zebra volume controls.

![Sound & notification settings](image)

**Figure 1-13** Zebra Volume Controls Enabled
3. On the **Volumes** screen, slide each setting as desired.

![Volumes Screen](image)

**Figure 1-14  Volumes Screen**

- **Volume Controls**
  - ![volume](icon) - Controls the music, games and media volume.
  - ![ringer](icon) - Controls the ringtone volume.
  - ![notification](icon) - Controls the system notification volume.
  - ![alarm](icon) - Controls the alarm clock volume.
  - ![beep](icon) - Controls the scan good decode beep volume.

- **Bottom row icons:**
  - ![silence](icon) - Places all sounds except media and alarms in silence mode.
  - ![vibrate](icon) - Places all sounds except media and alarms in vibrate mode.
  - ![sound](icon) - Places all sounds in sound mode.
This chapter describes the screens, status and notification icons, and controls on the MC40, and provides basic instructions for using the MC40.

Home Screen

The Home screen displays when the MC40 turns on. Depending upon the configuration, the Home screen might appear different. Contact your system administrator for more information.

After a suspend or screen time-out, the Home screen displays with the lock sliders. Slide up to unlock the screen. For screen locking information see Un-Locking the Screen.

Figure 2-1  Home Screen
The Home screen consists of the following:

**Table 2-1  Home Screen Items**

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 — Status Bar</td>
<td>Displays the time, status icons (right side), and notification icons (left side). For more information see Status Icons and Managing Notifications.</td>
</tr>
<tr>
<td>2 — Browser Icon</td>
<td>Opens the Browser application.</td>
</tr>
<tr>
<td>3 — All Apps Icon</td>
<td>Opens the APPS window.</td>
</tr>
<tr>
<td>4 — Settings Icon</td>
<td>Opens the Settings window.</td>
</tr>
<tr>
<td>5 — Shortcut Icons</td>
<td>Opens applications installed on the MC40. See Application Shortcuts and Widgets for more information.</td>
</tr>
<tr>
<td>6 — Widgets</td>
<td>Launches stand-alone applications that run on the Home screen. See Application Shortcuts and Widgets for more information.</td>
</tr>
</tbody>
</table>

The Home screen provides four additional screens for placement of widgets and shortcuts. Swipe the screen left or right to view the additional screens.

---

**Status Bar**

The Status bar displays the time, notification icons (left side) and status icons (right side).

![Notification and Status Icons](image)

**Figure 2-2  Notification and Status Icons**

If there are more notifications than can fit in the Status bar, displays indicating that more notifications exist. Open the Notifications panel to view all notifications and status.
### Status Icons

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Clock icon" /></td>
<td>Indicates that the Alarm is active.</td>
</tr>
<tr>
<td><img src="image" alt="Ring Tone icon" /></td>
<td>Indicates that all sounds except media and alarms are silenced and vibrate mode is active.</td>
</tr>
<tr>
<td><img src="image" alt="Silent Mode icon" /></td>
<td>Indicates that all sounds except media and alarms are silenced.</td>

</tbody>
</table>
### Notification Icons

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Message" /></td>
<td>Indicates that more notifications are available for viewing.</td>
</tr>
<tr>
<td><img src="image" alt="Sync" /></td>
<td>Indicates that data is syncing.</td>
</tr>
<tr>
<td><img src="image" alt="Schedule" /></td>
<td>Indicates an upcoming event.</td>
</tr>
<tr>
<td><img src="image" alt="Wi-Fi" /></td>
<td>Indicates that an open Wi-Fi network is available.</td>
</tr>
<tr>
<td><img src="image" alt="Song" /></td>
<td>Indicates that a song is playing.</td>
</tr>
<tr>
<td><img src="image" alt="Warning" /></td>
<td>Indicates that a problem with sign-in or sync has occurred.</td>
</tr>
<tr>
<td><img src="image" alt="Upload" /></td>
<td>Indicates that the device is uploading data.</td>
</tr>
<tr>
<td><img src="image" alt="Storage" /></td>
<td>Indicates that the Internal Storage is almost full.</td>
</tr>
<tr>
<td><img src="image" alt="Download" /></td>
<td>Indicates that the device is downloading data when animated and download is complete when static.</td>
</tr>
<tr>
<td><img src="image" alt="USB" /></td>
<td>Indicates that the device is connected via USB cable.</td>
</tr>
<tr>
<td><img src="image" alt="VPN" /></td>
<td>Indicates that the device is connected to or disconnected from a virtual private network (VPN).</td>
</tr>
<tr>
<td><img src="image" alt="Prepare" /></td>
<td>Preparing Internal Storage.</td>
</tr>
<tr>
<td><img src="image" alt="USB Debug" /></td>
<td>Indicates that USB debugging is enabled on the device.</td>
</tr>
<tr>
<td><img src="image" alt="Screenshot" /></td>
<td>Screenshot captured.</td>
</tr>
</tbody>
</table>
Managing Notifications

Notification icons report the arrival of new messages, calendar events, and alarms, as well as ongoing events. When a notification occurs, an icon appears in the Status bar with a brief description. See on page 2-3 for a list of possible notification icons and their description. Open the Notifications panel to view a list of all the notifications.

To open the Notification panel, drag the Status bar down from the top of the screen.

Table 2-3 Notification Icons (Continued)

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Image](Error capturing screenshot.)</td>
<td>Error capturing screenshot.</td>
</tr>
<tr>
<td><img src="MultiUser" alt="Image" /></td>
<td>Indicates that the MultiUser feature is enabled. Appears only when MultiUser Administrator application is installed.</td>
</tr>
<tr>
<td><img src="Login" alt="Image" /></td>
<td>Indicates that a new user is logging in. Appears only when MultiUser Administrator application is installed.</td>
</tr>
<tr>
<td><img src="RxLogger" alt="Image" /></td>
<td>Indicates that the RxLogger application is running and capturing data.</td>
</tr>
<tr>
<td>![Image](PTT Express)</td>
<td>Indicates the status of the PTT Express Voice Client. See Notification Icons for complete list of PTT Express notification icons.</td>
</tr>
<tr>
<td><img src="DataWedge" alt="Image" /></td>
<td>Indicates that DataWedge application is running on the device.</td>
</tr>
</tbody>
</table>

Figure 2-3 Notification Panel

To respond to a notification, open the Notifications Panel and then touch a notification. The Notifications Panel closes and the subsequent activity is dependent on the notification.
To clear all notifications, open the Notifications Panel and then touch \[ \text{ } \]. All event-based notifications are removed. Ongoing notifications remain in the list.

To close the Notification Panel, drag the bottom of the Notifications Panel to the top of the screen or touch \[ \text{ } \].

---

**Quick Settings**

Use Quick Settings to get to frequently used settings, like turning on airplane mode. To open Quick Settings, swipe down from the top of the screen with two fingers or twice with one finger.

![Quick Settings](image)

**Figure 2-4  Quick Settings**

To change a setting, just touch the icon:

- **Display Brightness** - Slide to lower or increase the brightness of the screen.
- **Wi-Fi** - Turn Wi-Fi on or off. To open Wi-Fi settings, touch the Wi-Fi network name.
- **Bluetooth** - Turn Bluetooth on or off. To open Bluetooth settings, touch the Bluetooth.
- **Airplane Mode** - Turn airplane mode on or off. Airplane mode means device will not connect to Wi-Fi or Bluetooth.
- **Auto-rotate**: - Lock the device’s orientation in portrait or landscape mode or set to automatically rotate.

To close the Quick Settings Panel, drag the bottom of the Quick Settings panel to the top of the screen or touch \[ \text{ } \].

---

**Application Shortcuts and Widgets**

Application shortcuts placed on the Home screen allow quick and easy access to applications. Widgets are self-contained applications placed on the Home screen to access frequently used features.

**Adding an Application or Widget to the Home Screen**

1. Go to the desired Home screen.

2. Touch \[ \text{ } \].
3. Swipe right, if necessary, to find the application icon or widget.
4. Touch and hold the icon or widget until the Home screen appears.
5. Position the icon on the screen and then release.

Moving Items on the Home Screen
1. Touch and hold the item until it floats on the screen.
2. Drag the item to a new location. Pause at the edge of the screen to drag the item onto an adjacent Home screen.
3. Lift finger to place the item on the Home screen.

Removing an App or Widget from the Home Screen
1. Go to the desired Home screen.
2. Touch and hold the application shortcut or widget icon until it floats on the screen.
3. Drag the icon to \( \times \) Remove on the top of the screen and then release.

Folders

Use Folders to organize similar applications together. Tap the folder to open and display items in the folder.

Creating Folders
1. Go to the desired Home screen.
2. Place at least two application shortcuts on the Home screen.
3. Touch and hold a shortcut until it floats on the screen.
4. Move the icon over another icon. A circle appears around the icons.
5. Lift finger to stack the icons. The shortcut icons appear over a black circle.

Naming Folders
1. Touch the folder.
2. Touch the title area and enter a folder name using the keyboard.
3. Touch Done on the keyboard.
4. Touch anywhere on the Home screen to close the folder. The folder name appears under the folder.

Removing a Folder
1. Touch and hold the folder icon until it enlarges.
2. Drag the icon to \( \times \) Remove and release.
Home Screen Wallpaper

NOTE Use of Live Wallpaper may reduce battery life.

Change the Home Screen Wallpaper

1. Touch and hold on the Home screen until the Choose Wallpaper from menu appears.
2. Touch Gallery, Live wallpapers or Wallpapers.
   • Gallery - Select to use an image stored on the device.
   • Live wallpapers - Select to use an animated wallpaper image.
   • Wallpapers - Select to use a wallpaper image.
3. Touch Save or Set wallpaper.

Using the Touchscreen

Use the dual-touch sensitive screen to operate the device.

• **Touch** - Touch to:
  • select items on the screen
  • type letters and symbols using the on-screen keyboard
  • press on-screen buttons.
• **Touch and Hold** - Touch and hold:
  • an item on the Home screen to move it to a new location or to the trash.
  • an item in the All Apps screen to create a shortcut on the Home screen.
  • the Home screen to change the Home screen wallpaper.
• **Drag** - Touch and hold an item for a moment and then move finger on the screen until reaching the new position.
• **Swipe** - Move finger up and down or left and right on the screen to:
  • unlock the screen
  • view additional Home screens
  • view additional application icons in the All Apps screen
  • view more information on an application’s screen.
• **Double-tap** - Tap twice on a web page, map, or other screen to zoom in and out.
• **Pinch** - In some applications such as Camera, zoom in and out by placing two fingers on the screen and pinching them together (to zoom out) or spreading them apart (to zoom in).
Using the On-screen Keyboard

Use the on-screen keyboard to enter text in a text field. To configure the keyboard settings, touch and hold (comma) > and then select **Android keyboard settings**.

**Editing Text**

Edit entered text and use menu commands to cut, copy, and paste text within or across applications. Some applications do not support editing some or all of the text they display; others may offer their own way to select text.

**Entering Numbers, Symbols and Special Characters**

To enter numbers and symbols:

- Touch and hold one of the top-row keys until a menu appears then select a number. Keys with alternate characters display an ellipsis ( ... ) below the character.
- Touch and hold the Shift key with one finger, touch one or more capital letters or symbols to enter them, and then lift both fingers to return to the lowercase keyboard.
- Touch \[7123\] to switch to the numbers and symbols keyboard.
- Touch the \[123\] key on the numbers and symbols keyboard to view additional symbols.

To enter special characters, touch and hold a number or symbol key to open a menu of additional symbols.

- A larger version of the key displays briefly over the keyboard.
- Keys with alternate characters display an ellipsis ( ... ) below the character.

**Applications**

The **All Apps** screen displays icons for all installed applications. Status Icons lists the applications available on the MC40. Refer to the **MC40 Integrator Guide** for information on installing and uninstalling applications.

</tr>
</tbody>
</table>
Accessing Applications

All applications installed on the device are accessed using the **APPS** window.

1. On the Home screen touch 🔄. The **APPS** window displays.

2. Slide the **APPS** window left or right to view more application icons. Touch an icon to open the application.

   See *Application Shortcuts and Widgets on page 2-6* for information on creating a shortcut on the Home screen.

Switching Between Recent Applications

1. Touch 🔄. A window appears on the screen with icons of recently used applications.
2. Slide the window up and down to view all recently used applications.
3. Swipe left or right to remove application from the list and force close the application.
4. Touch an icon to open it or touch \( \rightarrow \) to return to the current screen.

---

**Un-Locking the Screen**

Use the Lock screen to protect access to data on the MC40. Some email account require locking the screen. Refer to the *MC40 Integrator Guide* for information on setting up the locking feature. The Locking feature functions differently in Single User mode or Multiple User mode.

**Single User Mode**

When locked, a pattern, PIN or password is required to unlock the device. Press the Power button to lock the screen. The device also locks after a pre-defined time-out.

Press and release the Power button to wake the device.

The Lock screen displays. Slide \( \leftarrow \) up to unlock the screen. If the Pattern screen unlock feature is enabled, the Pattern screen appears instead of the Lock screen.

If the PIN or Password screen unlock feature is enabled, enter the PIN or password after unlocking the screen.
Figure 2-7  Lock Screen

Figure 2-8  PIN Screen
**Figure 2-9**  *Pattern Screen*

**Figure 2-10**  *Password Screen*
MultiUser Mode

With MultiUser login, multiple users can log on to the device with each user having access to various applications and features. When enabled, the Login screen appears after powering on, resetting or after the device wakes from suspend mode.

MultiUser Login

1. In the **Login** text field, enter the username.

2. In the **Password** text field, enter the password.

3. Touch **OK**. After a resume from suspend, the user must enter the password.

Figure 2-11  *Multiple User Log In Screen*

MultiUser Logout

1. Drag the Status Bar down from the top of the screen.

2. Touch **MultiUser is active**.

3. Touch **Logout**.

4. The **Login** screen appears.
Resetting the Device

There are two reset functions, soft reset and hard reset.

Performing a Soft Reset

Perform a soft reset if applications stop responding.

1. Press and hold the Power button until the menu appears.
2. Touch Reset.
3. The device shuts down and then reboots.

Performing a Hard Reset

Perform a Hard Reset if the device stops responding. To perform a Hard Reset:

2. The device shuts down and then reboots.

Suspend Mode

The MC40 goes into suspend mode when the user presses the Power button or after a period of inactivity (set in the Display settings window).

To wake the MC40 from Suspend mode, press the Power button.

The Lock screen displays. Slide up to unlock the screen. If the Pattern screen unlock feature is enabled, the Pattern screen appears instead of the Lock screen. See Un-Locking the Screen on page 2-13.

**NOTE** If the user enters the PIN, password or pattern incorrectly five times, they must wait 30 seconds before trying again.

If the user forgets the PIN, password or pattern contact the system administrator.
VoIP Telephony Ready

The MC40 VoIP telephony-ready models are optimized to support telephony VoIP functionality.

Use the Zebra Mobile Extensions Client or other 3rd party clients are required. Refer to the documentation provided with the client software for installation and usage information.

Low RAM Device Configuration

By default, the MC40 with Android V5.1.1 is configured as a low RAM device. This restricts some features available on the device, such as Data Separation and Multiuser functionality. To change the configuration to enable those features, the system property "persist.lowram_override" must be set to true. This system property overrides the default "low-ram" setting (configured via ro.config.low_ram flag) that the device is shipped with.
CHAPTER 3 APPLICATIONS

This section describes the applications installed on the device.

File Browser

Use the File Browser application to view and manage files on the device.

To open File Browser, touch 📲 > 📝.
Figure 3-1  File Browser Screen

The address bar (1) indicates the current folder path. Touch the current folder path to manually enter a path and folder name.

Use (2) to select multiple files/folder.

Use (3) to view the internal storage root folder.

Use (4) to view the microSD card On Device Storage root folder.

Use (5) to view the previous folder or to exit the application.

Touch and hold an item to perform an operation on that item. Select one of the options from the File Operations menu:

- **Information** - View detailed information about the file or folder.
- **Move** - Move the file or folder to a new location.
- **Copy** - Copy the select file.
- **Delete** - Delete the selected file.
- **Rename** - Rename the select file.
- **Open as** - Open the selected file as a specific file type.
- **Share** - Share the file with other devices.
Touch ➤ to open additional functionality:

- Touch ➤ > New Folder to create a new folder in the current folder.
- Touch ➤ > Search to search for a file or folder.
- Touch ➤ > Sort to sort the list by name, by type, by size or by date.
- Touch ➤ > Refresh to re-display the contents of the current folder.
- Touch ➤ > List View to change the folder view from tile to list format.
- Touch ➤ > Change Size to change the size of the icons: Large, Normal or Small.
- Touch ➤ > About File Browser to view the application version information.
DataWedge Demonstration

Use DataWedge Demonstration to demonstrate data capture functionality.

![DataWedge Demonstration Window](image)

**Figure 3-2** *DataWedge Demonstration Window*

**Table 3-1** *DataWedge Demonstration Icons*

<table>

</tr>
</tbody>
</table>

**NOTE** See the MC40 Integrator Guide for information on DataWedge configuration.
Either press a Scan key or touch the yellow scan button in the application to enable data capture. The captured data appears in the text field below the yellow button.

## PTT Express Voice Client

**NOTE** PTT Express Voice Client creates Push-To-Talk (PTT) communication capability between disparate enterprise devices. Leveraging existing Wireless Local Area Network (WLAN) infrastructure, PTT Express delivers simple PTT communication without the need of a voice communication server.

- **Group Call**: Press and hold the PTT (Talk) button to start communicating with other voice client users.
- **Private Response**: (Optional) Press and hold the Left Scan/Action (Private) button to respond to the originator of the last broadcast or to make a Private Response. For more information on using this feature, refer to the *PTT Express V1.2 User Guide*.

## PTT Audible Indicators

The following tones provide helpful cues when using the voice client.

- **Talk Tone**: Double chirp. Plays when the Talk (or Private) button is depressed. This is a prompt for the user to start talking.
- **Access Tone**: Single beep. Plays when another user just finished a broadcast or response. The user is now able to initiate a Group Broadcast or Private Response.
- **Busy Tone**: Continuous tone. Plays when the Talk (or Private) button is depressed and another user is already communicating on the same talkgroup. Plays after the maximum allowed talk time is reached (60 seconds).
- **Network Tone**:
  - Three increasing pitch beeps. Plays when PTT Express has acquired the WLAN connection and the service is enabled.
  - Three decreasing pitch beeps. Plays when PTT Express has lost the WLAN connection or the service is disabled.
**Figure 3-3**  *PTT Express Default User Interface (Enabled)*

### Selecting a Talk Group

One of 32 Talk Groups can be selected by PTT Express users. However, only one talk group may be enabled at a time on the device. Touch one of the 32 Talk Groups. The selected Talk Group is highlighted.
PTT Communication

NOTE This section describes the default PTT Express client configuration. See the PTT Express V1.2 User Guide for detailed information on using the client.

PTT communication may be established as a Group Call or Private Response. When PTT Express is enabled, the buttons on the left side of the device are assigned for PTT communication. When the Wired Headset is used, Group Calls and Private Responses can also be initiated using the headset Talk button.

Creating a Group Call

1. Press and hold the Group Call button (or the Talk button on the headset) and listen for the talk tone to play. If a busy tone is heard, release the button and wait a moment before making another attempt. Ensure that PTT Express and the WLAN are enabled.
2. Start talking after the talk tone is heard.
3. Release the button when finished talking.

Responding to a Group Broadcast
1. Wait until an access tone is heard.
2. Press and hold the Talk button, and listen for the talk tone to play.
   If a busy tone is heard, release the Talk button and wait a moment before making another attempt. Ensure that PTT Express and the WLAN are enabled.
3. Start talking after the talk tone plays.
4. Release the Talk button when finished talking.

Disabling PTT Express Voice Client Communication
1. Touch 📞 > 📞.
2. Slide the Enable/Diable Switch to the OFF position. The button changes to OFF.
3. Touch 📞.
Camera

This section provides information for taking photos and recording videos using the integrated digital cameras.

![Camera Mode](image)

3. Frame the subject on the screen.
4. To zoom in or out, press two fingers on the display and pinch or expand fingers. The zoom controls appear on the screen.
5. Touch an area on the screen to focus. The focus circle appears on the screen.
6. Touch ✈. The camera takes a photo and a shutter sound plays.

Alternately, touch ✈ and hold to focus first, before taking a photo; then release to take a focused photo.

**NOTE** The MC40 saves photos and videos on the internal storage.
Recording Videos

To record a video:

1. Touch > ✒️.
2. If in photo mode, swipe in from left side of screen and touch ✒️ Video.
3. Touch the options bar and touch ✒️.
4. Point the camera and frame the scene.
5. To zoom in or out, press two fingers on the display and pinch or expand fingers. The zoom controls appear on the screen.
6. Touch ✨ to start recording.
   The device starts recording the video. The video time remaining appears in the top left of the screen.
7. Touch ✨ to end recording.

Camera and Video Settings

To change camera settings:

1. Swipe in from left.
2. Touch 🛠️.
Resolution & quality

Camera

- Back camera photo
  - (4:3) 8.0 megapixels
  - (4:3) 5.0 megapixels
  - (4:3) 3.0 megapixels
  - (16:9) 3.8 megapixels
  - (16:9) 1.4 megapixels
  - (16:9) 1.0 megapixels

Video

- Back camera video
  - HD 1080p
  - HD 720p
  - SD 480p

Advanced

- Manual exposure (default - off).
**Photo Settings**

When in Photo mode, photo settings display on screen. Touch 📹 to display the photo settings options.

- **Exposure** - Touch to adjust the exposure settings. Options: +2, +1, 0 (default), -1 or -2.
- **Countdown timer** - Options: Off (default), 3 seconds, or 10 seconds.
- **AE-Bracket** - Touch to set Automatic Exposure Bracketing (default - disabled).

**Video Settings**

When in Video mode, video settings display on screen. Touch 📹 to display the video settings options.

- **AE-Bracket** - Touch to set Automatic Exposure Bracketing (default - disabled).
Gallery

**NOTE** The device supports the following image formats: jpeg, gif, png and bmp.

The device supports the following video formats: H.263, H.264 and MPEG4 Simple Profile.

Use Gallery to:

- view photos
- play videos
- perform basic editing of photos
- set photos as wallpaper
- set photos as a contact photo
- share photos and videos.

To open the Gallery application, touch 📷 > 📷 or in the camera application touch the thumbnail image at the top right.

Gallery presents all photos and videos stored on the “on device storage”.

Figure 3-10  Gallery — Albums

- Touch an album to open it and view its contents. The photos and videos in the album are displayed in chronological order.
- Touch a photo or video in an album to view it.
Working with Albums

Albums are groups of images and videos in folders. Touch an album to open it. The photos and videos are listed in a chronologically ordered grid. The name of the album displays at the top of the screen.

Figure 3-11 Photos Inside an Album

Swipe left or right to scroll images across the screen.

Share an Album

1. Touch >.
2. Touch and hold an album until it highlights.
3. Touch other albums as required.
4. Touch arrows. The Share menu opens. Touch the application to use to share the selected albums.
5. Follow the instructions within the selected application.
Get Album Information

1. Touch > .
2. Touch and hold an album until it highlights.
3. Touch > Details.

Deleting an Album

To delete an album and its contents:

1. Touch > .
2. Touch and hold an album until it highlights.
3. Check other albums to delete. Ensure that other albums are selected.
4. Touch > Delete.
5. In the Delete selected item? menu, touch OK to delete the album.

Working with Photos

Use Gallery to view, edit and share photos.

Viewing and Browsing Photos

To view a photo:

1. Touch > .
2. Touch an album to open it.
3. Touch a photo.
4. Swipe left or right to view the next or previous photo in the album.
5. Turn the device to view the photo in upright (portrait) or sideways (landscape) orientation. The photo is displayed (but not saved) in the new orientation.
6. Touch the photo to view the controls.
7. Double-tap the screen to zoom in or pinch two fingers together or spread them apart to zoom in or out.
8. Drag the photo to view parts that are not in view.

Rotating a Photo
1. Touch a photo to view the controls.
2. Touch .
3. Touch **Rotate Left** or **Rotate Right**.
   The photo is automatically saved with the new orientation.

Cropping a Photo
1. In Gallery, touch a photo to view the controls.
2. Touch .
3. Touch **Crop**. The cropping tool appears.
4. Use the cropping tool to select the portion of the photo to crop.
   - Drag from the inside of the cropping tool to move it.
   - Drag an edge of the cropping tool to resize it to any proportion.
• Drag a corner of the cropping tool to resize it with fixed proportions.

Figure 3-13  Cropping Tool

5. Touch Save to save a copy of the cropped photo. The original version is retained.

Setting a Photo as a Contact Icon

1. Touch ☰ ☰ > 📷.
2. Touch an album to open it.
3. Touch the photo to open it.
4. Touch ☰ ☰ > Set picture as.
5. Touch Contact photo.
6. In the People application, touch a contact.
7. Touch the blue box and crop the photo accordingly.
8. Touch OK.

Get Photo Information

1. Touch ☰ ☰ > 📷.
2. Touch an album to open it.
3. Touch the photo to open it.
4. Touch ☰ ☰ > Details.
5. Touch Close.
Share a Photo

1. Touch 📸 > .
2. Touch an album to open it.
3. Touch a photo to open it.
4. Touch .
5. Touch the application to use to share the selected photo. The application selected opens with the photo attached to a new message.

Deleting a Photo

1. Touch 📸 > .
2. Touch an album to open it.
3. Touch a photo to open it.
4. Touch ☹️ > Delete.
5. Touch OK to delete the photo.
Working with Videos

Use Gallery to view videos and share videos.

Watching Videos

1. Touch > .
2. Touch an album to open it.
3. Touch a video.

4. Touch . The video begins to play.
5. Touch the screen to view the playback controls.

Sharing a Video

1. Touch > .
2. Touch an album to open it.
3. Touch a video to open it.
5. Touch the application to use to share the selected video. The application selected opens with the video attached to a new message.
Deleting a Video

1. Touch 📽️ > 🎥.
2. Touch an album to open it.
3. Touch a video to open it.
4. Touch ⏯️ > Delete.
5. Touch OK.
Sound Recorder

Use Sound Recorder to record audio messages.

Recordings are saved on the On Device Storage and available in the Music application playlist titled "My Recordings."

Figure 3-15  Sound Recorder Application
Applications 3 - 23

Elemez

**NOTE** Elemez collects specific device information in the background and sends this information to us to help improve product functionality. This feature can be disabled. See Disabling Elemez Data Collection on page 3-23.

Use Elemez to provide diagnostics information to Zebra. Touch **Submit Diagnostics** button to send the data.

![Elemez Application Image](image)

**Figure 3-16**  *Elemez Application*

**Disabling Elemez Data Collection**

The user can disable the Elemez application from collection specific data in the background and sending it to Zebra Technologies.

1. From the **Home** screen, touch 🌐 > 📱 **Apps**.
2. Swipe left or right until the **ALL** tab displays.
3. Scroll through the list and touch **elemez**.
4. In the **App info** screen, touch **Uninstall updates**.
5. In the **Uninstall updates** dialog box, touch **OK**.
6. Touch **OK**.
7. After uninstall is complete, touch **OK**.
8. In the **All** tab, scroll through the list and touch **elemez**.
9. Touch **Disable**.
10. In the **Disable built-in app?** dialog box, touch **OK**.
11. Touch 🌐
Enabling Elemez Data Collection

The user can re-enable the Elemez application for collection specific data in the background and sending it to Zebra Technologies.

1. From the Home screen, touch 📱 > 📅 Apps.
2. Swipe left or right until the ALL tab displays.
3. Scroll through the list and touch elemez.
4. In the App info screen, touch Enable.
5. Touch 📱 > ⏌ > .
6. Touch Enable Elemez.
Contacts

Use the Contacts application to manage contacts.

From a Home or Apps screen, touch Contacts. Contacts opens to the main list of contacts. View contacts in three ways at the top of the screen: Groups, All contacts, and Favorites. Touch the tabs to change how to view the contacts. Swipe up or down to scroll through the lists.

Adding Contacts

1. In the Contacts application, touch .
2. If there are more than one account with contacts, touch the one to use.
3. Type the contact’s name and other information. Touch a field to start typing, and swipe down to view all categories.
4. To add more than one entry for a category - for example, to add a work address after typing a personal address - touch Add new for that field. To open a menu with preset labels, such as Home or Work for an email address, touch the label to the right of the item of contact information. Or, to create your own label, touch Custom in the menu.
5. Touch Done.

Editing Contacts

1. In the Contacts application, touch a contact to edit.
2. Touch .
3. Edit the contact information.
4. Touch Done.

Deleting Contacts

1. In the Contacts application, touch a contact to delete.
2. Touch .
3. Touch Delete.
4. Touch OK to confirm.
CHAPTER 4 DATA CAPTURE

The MC40 offers the following data capture options:

- integrated imager
- integrated digital camera
- Magnetic stripe reader (MSR)
- RS507 Hands-free imager.

**NOTE** By default, the good decode beep is set to system volume (Music and Media). The good decode beep can be set to another sound (Notifications or Alarms) and the volume can be independently controlled. See the DataWedge section in the MC40 Integrator Guide for more information.

DataWedge is installed and enabled on the MC40 by default.

---

**Imager**

The device with an integrated imager has the following features:

- Omnidirectional reading of a variety of bar code symbologies, including the most popular linear, postal, PDF417, and 2D matrix code types.
- Advanced intuitive laser aiming cross-hair for easy point-and-shoot operation.

The modules uses digital camera technology to take a digital picture of a bar code, stores the resulting image in its memory, and executes state-of-the-art software decoding algorithms to extract the data from the image.

**Operational Modes**

The device with an integrated imager supports two modes of operation, listed below. Activate each mode by pressing a scan button.

- **Decode Mode**: In this mode, the device attempts to locate and decode enabled bar codes within its field of view. The imager remains in this mode as long as the user holds the scan button, or until it decodes a bar code.

**NOTE** To enable Pick List Mode, configure in DataWedge.
• **Pick List Mode**: This mode allows the user to selectively decode a bar code when more than one bar code is in the device’s field of view. To accomplish this, move the aiming crosshair over the required bar code to decode only this bar code. This feature is ideal for pick lists containing multiple bar codes and manufacturing or transport labels containing more than one bar code type (either 1D or 2D).

---

**Digital Camera**

The device with an integrated camera based bar code scanning solution has the following features:

- Omnidirectional reading of a variety of bar code symbologies, including the most popular linear, postal, QR, PDF417, and 2D matrix code types.
- Cross-hair reticle for easy point-and-shoot operation.
- Picklist mode to decode a particular bar code from many in the field of view.

The solution uses the advanced camera technology to take a digital picture of a bar code, and executes state-of-the-art software decoding algorithms to extract the data from the image.

---

**RS507 Hands-Free Imager**

The RS507 Hands-free Imager is a wearable bar code scan solution for both 1D and 2D bar code symbologies. The scanner supports Simple Serial Interface (SSI) and Bluetooth Human Interface Device (HID) connection to the device where the scanner emulates a keyboard.

![RS507 Hands-Free Imager](image_url)

*Figure 4-1  RS507 Hands-Free Imager*

See to the **RS507 Hands-free Imager Product Reference Guide** for more information.

---

**Scanning Considerations**

Typically, scanning is a simple matter of aim, scan, and decode where a few quick trial efforts master it. However, consider the following to optimize scanning performance:

- **Range**
  - Any scanning device decodes well over a particular working range — minimum and maximum distances from the bar code. This range varies according to bar code density and scanning device optics.
  - Scanning within range brings quick and constant decodes; scanning too close or too far away prevents decodes. Move the scanner closer and farther away to find the right working range for the bar codes being scanned.
• Angle
  • Scan angle is important for promoting quick decodes. When laser beams reflect directly back into the scanner from the bar code, this specular reflection can “blind” the scanner.
  • To avoid this, scan the bar code so that the beam does not bounce directly back. But do not scan at too sharp an angle; the scanner needs to collect scattered reflections from the scan to make a successful decode. Practice quickly shows what tolerances to work within.
  • Hold the device farther away for larger symbols.
  • Move the device closer for symbols with bars that are close together.

  ![NOTE] Scanning procedures depend on the application and device configuration. An application may use different scanning procedures from those described.

---

**Bar Code Capture with Imager**

To capture bar code data:

1. Ensure that an application is open on the device and a text field is in focus (text cursor in text field).
2. Point the top of the device at a bar code.

![Figure 4-2 Bar Code Scanning](image)

3. Press and hold the Scan button.
   
   The red laser aiming pattern turns on to assist in aiming. Ensure the bar code is within the area formed by the cross-hairs in the aiming pattern. The aiming dot is used for increased visibility in bright lighting conditions.

   The Left and Right LEDs light light green and a beep sounds to indicate the bar code was decoded successfully. Note that when the MC40 is in Pick List Mode, the MC40 does not decode the bar code until the center of the crosshair touches the bar code.

![Figure 4-3 Aiming Pattern](image)
4. Release the scan button.
5. The captured data appears in the text field.

---

**Bar Code Capture with Integrated Camera**

To capture bar code data:

1. Ensure that an application is open on the device and a text field is in focus (text cursor in text field).
2. Aim the camera at a bar code.
3. Press and hold the Scan button. By default, a preview window appears on the screen. The Decode light emitting diode (LED) lights red to indicate that data capture is in process.

4. Move the device until the bar code is centered.
5. The Decode LED lights green and a beep sounds to indicate the bar code was decoded successfully.
6. The captured data appears in the text field.

---

**Bar Code Capture with RS507 Hands-Free Imager**

Pair the RS507 with the MC40. See *Pairing the RS507 Hands-Free Imager Using SSI on page 4-6* or *Pairing the RS507 Hands-Free Imager Bluetooth HID on page 4-7* for more information.

1. Ensure that an application is open on the device and a text field is in focus (text cursor in text field).
2. Point the RS507 at a bar code.

![Figure 4-6  Bar Code Scanning with RS507](image)

3. Press and hold the trigger.

   The red laser aiming pattern turns on to assist in aiming. Ensure the bar code is within the area formed by the cross-hairs in the aiming pattern. The aiming dot is used for increased visibility in bright lighting conditions.

   The RS507 LEDs light green, a beep sounds to indicate the bar code was decoded successfully. Note that when the RS507 is in Pick List Mode, the RS507 does not decode the bar code until the center of the crosshair touches the bar code.

![Figure 4-7  Aiming Pattern](image)
4. The captured data appears in the text field.

**Pairing the RS507 Hands-Free Imager Using SSI**

An RS507 Hands-free Imager can be used with the device to capture bar code data.

1. Ensure that the two devices are within 10 meters (32.8 feet) of one another.
2. Install the battery into the RS507.
3. On the MC40, touch 📖.
4. Touch 📖.

5. Using the RS507, scan the bar code on the screen.
   - The RS507 emits a high/low/high/low beeps. The Scan LED flashes green indicating that the RS507 is
     attempting to establish connection with the MC40. When connection is established, the Scan LED turns off and
     the RS507 emits one string of low/high beeps.
6. On the MC40, touch 📖 Exit.
Pairing the RS507 Hands-Free Imager Bluetooth HID

An RS507 Hands-free Imager can be used with the device to capture bar code data.

1. Ensure that Bluetooth is enabled on both devices.
2. Ensure that the Bluetooth device to discover is in discoverable mode.
3. Ensure that the two devices are within 10 meters (32.8 feet) of one another.
4. Place the RS507 in Human Interface Device (HID) mode. If the RS507 is already in HID mode, skip to step 5.
   a. Remove the battery from the RS507.
   b. Press and hold the Restore key.
   c. Install the battery onto the RS507.
   d. Keep holding the Restore key for about five seconds until a chirp is heard and the Scan LEDs flash green.
   e. Scan the bar code below to place the RS507 in HID mode.

![Figure 4-10 RS507 Bluetooth HID Bar Code](image)

5. Remove the battery from the RS507.
6. Re-install the battery into the RS507.
7. On the MC40, touch 📦 > 📦 > Bluetooth.
8. Touch SCAN FOR DEVICES. The device begins searching for discoverable Bluetooth devices in the area and displays them under AVAILABLE DEVICES.
9. Scroll through the list and select RS507.
   The device connects to the RS507 and Connected appears below the device name. The Bluetooth device is added to the Bluetooth devices list and a trusted ("paired") connection is established.

Reading Magnetic Stripe Cards

Use the integrated MSR to read magnetic stripe card.

✓ **NOTE** Use the Card Swipe Tutorial application to practice swiping magnetic stripe cards through the MSR.

1. Ensure that MSR input is enabled in DataWedge and the cursor is in a text field.
2. Grip MC40 firmly in one hand.
3. Hold magnetic stripe card firmly in the other hand.
4. Align the magnetic stripe on the card toward the display and swipe the card smoothly in either direction.
5. The captured data appears in the text field.
Improper Swiping

Figure 4-12  Do Not Start Swipe in Middle of Card
Figure 4-13  Avoid Thumb Hitting Device

Figure 4-14  Do Not Hold End of Card While Swiping
Figure 4-15  *Do Not Swipe Card on Angle*
DataWedge

DataWedge is a utility that adds advanced bar code scanning capability to any application without writing code. It runs in the background and handles the interface to built-in bar code scanners. The captured bar code data is converted to keystrokes and sent to the target application as if it was typed on the keypad.

To configure DataWedge refer to the *MC40 Integrator Guide*.

Enabling DataWedge

1. Touch 📲 > 📈 >
2. Touch 🕒 > Settings.
3. Touch the DataWedge enabled checkbox. A blue checkmark appears in the checkbox indicating that DataWedge is enabled.
4. Touch 📲.

Disabling DataWedge

1. Touch 📲 > 📈.
2. Touch 🕒 > Settings.
3. Touch the DataWedge enabled checkbox. The blue checkmark disappears from the checkbox indicating that DataWedge is disabled.
4. Touch 📲.
CHAPTER 5 WLAN

Wireless local area networks (WLANs) allow the MC40 to communicate wirelessly inside a building. Before using the MC40 on a WLAN, the facility must be set up with the required hardware to run the WLAN (sometimes known as infrastructure). The infrastructure and the MC40 must both be properly configured to enable this communication.

Refer to the documentation provided with the infrastructure (access points (APs), access ports, switches, Radius servers, etc.) for instructions on how to set up the infrastructure.

Once the infrastructure is set up to enforce the chosen WLAN security scheme, use the Wireless & networks settings to configure the MC40 to match the security scheme.

The MC40 supports Zebra Pan-Enterprise features. These features are available on the Zebra wireless LAN running WiNG 5.8 (and above) infrastructure. These features include:

- **Coverage Hole Detection (CHD)** - The MC40 device include enhancements to the IEEE 802.11k standard. These improvements will report gaps in signal coverage to the Zebra wireless LAN infrastructure. Network administrators can report and mitigate coverage gaps present in the network for greater reliability and signal integrity.

- **Aggregated Fast Transition (FT)** - Aggregated FT improves on IEEE 802.11r, Over-the-DS fast roaming. In conjunction with Zebra wireless LAN infrastructure, MC40 will achieve more reliable and consistent fast roaming.

- **Scan Assist** - MC40 monitors neighbor access points and other information from the Zebra wireless LAN infrastructure without doing scans. Using this Scan Assist feature, the MC40 improves roaming.

**NOTE** Turn off Wi-Fi when not using it, to extend the life of the battery.

The Status bar displays icons that indicate Wi-Fi network availability and Wi-Fi status. See Status Bar for more information.
Scan and Connect to a Wi-Fi Network

To set up WLAN on the device:

1. Touch ☰ > Wi-Fi.
2. If Wi-Fi is off, slide the Wi-Fi switch to the On position.
3. Touch Wi-Fi. The MC40 searches for WLANs in the area and lists them.

4. Scroll through the list and select the desired WLAN network.
5. For open networks, touch Connect or for secure networks enter the required password or other credentials then touch Connect. See the system administrator for more information.

   The MC40 obtains a network address and other required information from the network using the dynamic host configuration protocol (DHCP) protocol. To configure the MC40 with a fixed internet protocol (IP) address, Refer to the MC40 Integrator Guide for more information.

6. In the Wi-Fi setting field, Connected appears indicating that the MC40 is connected to the WLAN.
Bluetooth-equipped devices can communicate without wires, using frequency-hopping spread spectrum (FHSS) radio frequency (RF) to transmit and receive data in the 2.4 GHz Industry Scientific and Medical (ISM) band (802.15.1). Bluetooth wireless technology is specifically designed for short-range (10 meters (32.8 feet) ) communication and low power consumption.

Devices with Bluetooth capabilities can exchange information (e.g., files, appointments, and tasks) with other Bluetooth enabled devices such as printers, access points, and other mobile devices.

**Adaptive Frequency Hopping**

Adaptive Frequency Hopping (AFH) is a method of avoiding fixed frequency interferers, and can be used with Bluetooth voice. All devices in the piconet (Bluetooth network) must be AFH-capable in order for AFH to work. There is no AFH when connecting and discovering devices. Avoid making Bluetooth connections and discoveries during critical 802.11b communications. AFH for Bluetooth consists of four main sections:

- **Channel Classification** - A method of detecting an interference on a channel-by-channel basis, or pre-defined channel mask.
- **Link Management** - Coordinates and distributes the AFH information to the rest of the Bluetooth network.
- **Hop Sequence Modification** - Avoids interference by selectively reducing the number of hopping channels.
- **Channel Maintenance** - A method for periodically re-evaluating the channels.

When AFH is enabled, the Bluetooth radio “hops around” (instead of through) the 802.11b high-rate channels. AFH coexistence allows Enterprise devices to operate in any infrastructure.

The Bluetooth radio in this device operates as a Class 2 device power class. The maximum output power is 2.5 mW and the expected range is 10 meters (32.8 ft.). A definition of ranges based on power class is difficult to obtain due to power and device differences, and whether one measures open space or closed office space.

*NOTE* It is not recommended to perform Bluetooth wireless technology inquiry when high rate 802.11b operation is required.
Security

The current Bluetooth specification defines security at the link level. Application-level security is not specified. This allows application developers to define security mechanisms tailored to their specific need. Link-level security occurs between devices, not users, while application-level security can be implemented on a per-user basis. The Bluetooth specification defines security algorithms and procedures required to authenticate devices, and if needed, encrypt the data flowing on the link between the devices. Device authentication is a mandatory feature of Bluetooth while link encryption is optional.

Pairing of Bluetooth devices is accomplished by creating an initialization key used to authenticate the devices and create a link key for them. Entering a common personal identification number (PIN) in the devices being paired generates the initialization key. The PIN is never sent over the air. By default, the Bluetooth stack responds with no key when a key is requested (it is up to user to respond to the key request event). Authentication of Bluetooth devices is based-upon a challenge-response transaction. Bluetooth allows for a PIN or passkey used to create other 128-bit keys used for security and encryption. The encryption key is derived from the link key used to authenticate the pairing devices. Also worthy of note is the limited range and fast frequency hopping of the Bluetooth radios that makes long-distance eavesdropping difficult.

Recommendations are:

- Perform pairing in a secure environment
- Keep PIN codes private and do not store the PIN codes in the device
- Implement application-level security.

Bluetooth Profiles

The MC40 supports the following Bluetooth services:

- Generic Access Profile (GAP) - Use for device discovery and authentication.
- Service Discovery Protocol (SDP) - Handles the search for known and specific services as well as general services.
- Serial Port Profile (SPP) - Sets up a virtual serial port and connects two Bluetooth enabled devices. For example, connecting the MC40 to a printer.
- Human Interface Device Profile (HID) - Allows Bluetooth keyboards, pointing devices, gaming devices and remote monitoring devices to connect to the MC40.
- Object Push Profile (OPP) - Allows the MC40 to push and pull objects to and from a push server.
- Headset Profile (HSP) - Allows a Bluetooth headset to communicate with the MC40.
- Advanced Audio Distribution Profile (A2DP) - Allows the MC40 to stream stereo-quality audio to a wireless headset or wireless stereo speakers.
- Audio/Video Remote Control Profile (AVRCP) - Allows the MC40 to control televisions, hi-fi equipment, etc.
- Personal Area Network (PAN) - Allows the MC40 to use of Bluetooth Network Encapsulation Protocol on Layer 3 protocols for transport over a Bluetooth link.
- Generic Attribute Profile (GATT) - Provides profile discovery and description services for Bluetooth Low Energy protocol. Defines how attributes are grouped together into sets to form services.
- HID over GATT Profile (HOGP) - Defines how a device with Bluetooth Low Energy can support HID services over the Bluetooth Low Energy protocol stack using the GAP.
Bluetooth Power States

The Bluetooth radio is off by default.

- **Suspend** — When the MC40 goes into suspend mode, the Bluetooth radio state is retained upon resume.
- **Airplane Mode** — When the MC40 is placed in Airplane Mode, the Bluetooth radio turns off. When in Airplane Mode, the Bluetooth radio can be turned back on if desired.

Bluetooth Radio Power

Turn off the Bluetooth radio to save power or if entering an area with radio restrictions (e.g., an airplane). When the radio is off, other Bluetooth devices cannot see or connect to the device. Turn on the Bluetooth radio to exchange information with other Bluetooth devices (within range). Communicate only with Bluetooth radios in close proximity.

**NOTE** To achieve the best battery life turn off radios when not in use.

Enabling Bluetooth

To enable Bluetooth:

1. Touch 📱 > 📩 Bluetooth.
2. Slide the Bluetooth switch to the ON position. The Bluetooth icon also appears in the Status bar.
3. Touch 📱

Disabling Bluetooth

To disable Bluetooth:

1. Touch 📱 > 📩 Bluetooth.
2. Slide the Bluetooth switch to the OFF position.
3. Touch 📱

Discovering Bluetooth Device(s)

The MC40 can receive information from discovered devices without pairing. However, once paired, the MC40 and the paired device will exchange information automatically when the Bluetooth radio is on.

To discover Bluetooth device(s):

1. Ensure that Bluetooth is enabled on the device to discover.
2. Ensure that the Bluetooth device to discover is in discoverable mode.
3. Ensure that the two devices are within 10 meters (32.8 feet) of one another.
4. Touch 📱 > 📩 Bluetooth.
5. If Bluetooth is off, slide the switch to the **ON** position.
6. The MC40 begins searching for discoverable Bluetooth devices in the area and displays them under **Available Devices**.
7. Scroll through the list and select a device. The **Bluetooth pairing request** dialog box appears.

![Bluetooth pairing request](image)

**Figure 6-1  Bluetooth Pairing — Smart Pairing**

8. Enter a PIN in the text box and touch **OK**.
9. Enter the same PIN on the other device.
10. For Simple Pairing, touch **Pair** on both devices.
11. The Bluetooth device is added to the **Paired Devices** list and a trusted (“paired”) connection is established.

---

### Changing the Bluetooth Name

By default, the MC40 has a generic Bluetooth name that is visible to other devices when connected.

To change the Bluetooth name:

1. Touch 📱 > 📡 **Bluetooth**.
2. If Bluetooth is not on, slide the switch to the **ON** position.
3. Touch 📲 > **Rename this device**.
4. In the Rename device dialog box, enter a name and touch **Rename**.
5. Touch 🎉
Connecting to a Bluetooth Device

Once paired, connect to a Bluetooth device:

1. Touch 📱 > Bluetooth.
2. If Bluetooth is not on, slide the switch to the ON position.
3. In the PAIRED DEVICES list, touch and hold on an unconnected Bluetooth device until a menu appears.
4. Touch Connect. When connected, the device is displayed as connected in the list.

Selecting Profiles on the Bluetooth Device

Some Bluetooth devices have multiple profiles. To select a profile:

1. Touch 📱 > Bluetooth.
2. If Bluetooth is not turned on, slide the blue switch to the ON position.
3. In the PAIRED DEVICES list, touch † next to the device name.
4. Under PROFILES, check or uncheck a profile to allow the device to use that profile.
5. Touch †.

Disconnecting from a Bluetooth Device

To disconnect from a Bluetooth device:

1. Touch 📱 > Bluetooth.
2. In the Bluetooth devices list, touch and hold on a device until a menu appears.
3. Touch Disconnect.
4. Touch †.

Unpairing a Bluetooth Device

To unpair a Bluetooth device:

1. Touch 📱 > Bluetooth.
2. In the Paired Devices list, touch † next to the device name.
3. Touch Unpair.
4. Touch †.
CHAPTER 7 ACCESSORIES

This chapter provides information for using the accessories for the device.

MC40 Accessories

MC40 Accessories lists the accessories available for the MC40.

Table 7-1  MC40 Accessories

<td>HDST-25MM-PTVP-01</td>
<td>2.5 mm wired headset for PTT and VoIP telephony communications.</td>
</tr>
</tbody>
</table>
Micro USB Cable

Use the Micro USB cable to connect the MC40 to the power supply for charging or to a host computer for communication.

Figure 7-1 Charging Using the Micro USB Cable

Communication

When the MC40 is connected to a host computer using the Micro USB cable, the MC40 appears as a Removable Disk on the host computer. Refer to the MC40 Integrator Guide for more information.

Figure 7-2 Communication Using the Micro USB Cable
**Single Slot Charge Cradle**

The Single Slot Charge Cradle provides 5 VDC power for operating the MC40 and charging the battery.

**Charging the MC40 Battery**

Connect the cradle to power. Insert the MC40 into the slot to begin charging.

![Figure 7-3 MC40 Battery Charging](image)

The MC40’s Right light emitting diode (LED) indicates the status of the battery charging in the MC40. See *Table 1-5 on page 1-8* for charging status indications. The 2680 mAh battery charges in approximately four hours.

Charge batteries in ambient temperatures from 0 °C to 40 °C (32 °F to 104 °F) or up to 45 °C (113 °F) as reported by the battery. To view the battery temperature, touch 🌈 > 🚀 > 📦 > 🚀 > About device > Battery Information.

Note that charging is intelligently controlled by the MC40. To accomplish this, for small periods of time, the MC40 or accessory alternately enables and disables battery charging to keep the battery at acceptable temperatures. The MC40 or accessory indicates when charging is disabled due to abnormal temperatures via its Right LED. See *Table 1-5 on page 1-8*. 
Five Slot Charge Only Cradle

The Five Slot Charge Only Cradle:

- Provides 5 VDC power for operating the MC40.
- Simultaneously charges up to five MC40s.
- Consists of a cradle base and optional cups that can be configured for various charging requirements.
- Provides mounting for a Four Slot Battery Charger (requires separate power supply).

See the *MC40 Integrator Guide* for setup and configuration instructions. To charge the MC40, insert the MC40 into an open slot.

![Figure 7-4 Charging MC40s and Spare Batteries](image)

The MC40’s Right LED shows the status of the battery charging. See *Table 1-5 on page 1-8* for charging status indications. The 2680 mAh battery charges in approximately four hours.

Charge batteries in ambient temperatures from 0 °C to 40 °C (32 °F to 104 °F) or up to 45 °C (113 °F) as reported by the battery. To view the battery temperature, touch 🌡️ > 📊 About device > Battery Information.

Note that charging is intelligently controlled by the MC40. To accomplish this, for small periods of time, the MC40 or accessory alternately enables and disables battery charging to keep the battery at acceptable temperatures. The MC40 or accessory indicates when charging is disabled due to abnormal temperatures via its Right LED. See *Table 1-5 on page 1-8*. 
Four Slot Battery Charger

The Four Slot Battery Charger:

- Provides 12 VDC power for charging the batteries.
- Simultaneously charges up to four MC40 batteries.

To charge a spare battery:

![Four Slot Battery Charger](image)

**Figure 7-5  Four Slot Battery Charger**

The Four Slot Battery Charger has four amber Battery Charging LEDs, one for each battery charging well. The 2680 mAh battery charges in approximately four hours.

Charge batteries in ambient temperatures from 0 °C to 40 °C (32 °F to 104 °F) or up to 45 °C (113 °F) as reported by the battery. To view the battery temperature, touch 🌡️ > 📦 About device > Battery Information. Charging is intelligently controlled by the MC40. To accomplish this, for small periods of time, the charger alternately enables and disables battery charging to keep the battery at acceptable temperatures. The charger indicates when charging is disabled due to abnormal temperatures via its LED.

CHAPTER 8 MAINTENANCE AND TROUBLESHOOTING

This chapter includes instructions on cleaning and storing the device, and provides troubleshooting solutions for potential problems during operation.

Maintaining the MC40

For trouble-free service, observe the following tips when using the MC40:

- Do not scratch the screen of the MC40. When working with the MC40, use only a finger. Never use an actual pen or pencil or other sharp object on the surface of the MC40 screen.
- The touch-sensitive screen of the MC40 is glass. Do not drop the MC40 or subject it to strong impact.
- Protect the MC40 from temperature extremes. Do not leave it on the dashboard of a car on a hot day, and keep it away from heat sources.
- Do not store or use the MC40 in any location that is dusty, damp, or wet.
- Use a soft lens cloth to clean the MC40. If the surface of the MC40 screen becomes soiled, clean it with a soft cloth moistened with a diluted window-cleaning solution.
- Periodically replace the rechargeable battery to ensure maximum battery life and product performance. Battery life depends on individual usage patterns.

Battery Safety Guidelines

- The area in which the units are charged should be clear of debris and combustible materials or chemicals. Particular care should be taken where the device is charged in a non commercial environment.
- Follow battery usage, storage, and charging guidelines found in this guide.
- Improper battery use may result in a fire, explosion, or other hazard.
- To charge the mobile device battery, the battery and charger temperatures must be between +32 °F and +104 °F (0 °C and +40 °C)
- Do not use incompatible batteries and chargers. Use of an incompatible battery or charger may present a risk of fire, explosion, leakage, or other hazard. If you have any questions about the compatibility of a battery or a charger, contact Zebra Customer Support Center.
- For devices that utilize a USB port as a charging source, the device shall only be connected to products that bear the USB-IF logo or have completed the USB-IF compliance program.
• Do not disassemble or open, crush, bend or deform, puncture, or shred.
• Do not short circuit a battery or allow metallic or conductive objects to contact the battery terminals.
• Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, or expose to fire, explosion, or other hazard.
• Do not leave or store the equipment in or near areas that might get very hot, such as in a parked vehicle or near a radiator or other heat source. Do not place battery into a microwave oven or dryer.
• Battery usage by children should be supervised.
• Please follow local regulations to properly dispose of used re-chargeable batteries.
• Do not dispose of batteries in fire.
• In the event of a battery leak, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with large amounts of water and seek medical advice.
• If you suspect damage to your equipment or battery, contact Zebra Customer Support Center to arrange for inspection.

Cleaning Instructions

CAUTION Always wear eye protection.

Read warning label on compressed air and alcohol product before using.

If you have to use any other solution for medical reasons please contact the Global Customer Support Center for more information.

WARNING! Avoid exposing this product to contact with hot oil or other flammable liquids. If such exposure occurs, unplug the device and clean the product immediately in accordance with these guidelines.

Approved Cleanser Active Ingredients

100% of the active ingredients in any cleaner must consist of one or some combination of the following: isopropyl alcohol, bleach/sodium hypochlorite (see important note below), hydrogen peroxide or mild dish soap.

IMPORTANT Use pre-moistened wipes and do not allow liquid to pool.

1 When using sodium hypochlorite (bleach) based products always follow the manufacturer’s recommended instructions: use gloves during application and remove the residue afterwards with a damp alcohol cloth or a cotton swab to avoid prolonged skin contact while handling the device.

Due to the powerful oxidizing nature of sodium hypochlorite, the metal surfaces on the device are prone to oxidization (corrosion) when exposed to this chemical in the liquid form (including wipes). Avoid allowing any bleach based product to come in contact with the metal electrical contacts on the device, the battery, or the cradle. In the event that these types of disinfectants come in contact with metal on the device, prompt removal with alcohol-dampened cloth or cotton swab after the cleaning step is critical.
Harmful Ingredients

The following chemicals are known to damage the plastics on the device and should not come in contact with the device: ammonia solutions, compounds of amines or ammonia; acetone; ketones; ethers; aromatic and chlorinated hydrocarbons; aqueous or alcoholic alkaline solutions; ethanolamine; toluene; trichloroethylene; benzene; carboxylic acid and TB-lysoform.

Cleaning Instructions

Do not apply liquid directly to the device. Dampen a soft cloth or use pre-moistened wipes. Do not wrap the device in the cloth or wipe, but gently wipe the unit. Be careful not to let liquid pool around the display window or other places. Allow the unit to air dry before use.

Special Cleaning Notes

Many vinyl gloves contain phthalate additives, which are often not recommended for medical use and are known to be harmful to the housing of the device. The device should not be handled while wearing vinyl gloves containing phthalates, or before hands are washed to remove contaminant residue after gloves are removed. If products containing any of the harmful ingredients listed above are used prior to handling the device, such as hand sanitizer that contain ethanolamine, hands must be completely dry before handling the device to prevent damage to the plastics.

Cleaning Materials Required

- Alcohol wipes
- Lens tissue
- Cotton-tipped applicators
- Isopropyl alcohol
- Can of compressed air with a tube.

Cleaning Frequency

The cleaning frequency is up to the customer’s discretion due to the varied environments in which the mobile devices are used. They may be cleaned as frequently as required, but it is advisable to clean the camera window periodically when used in dirty environments to ensure optimum performance.

Cleaning the MC40

Housing

Using the alcohol wipes, wipe the housing including keys and in-between keys.

Display

The display can be wiped down with the alcohol wipes, but care should be taken not to allow any pooling of liquid around the edges of the display. Immediately dry the display with a soft, non-abrasive cloth to prevent streaking.
Exit and Camera Window

Wipe the camera window periodically with a lens tissue or other material suitable for cleaning optical material such as eyeglasses.

Connector Cleaning

To clean the connectors:

1. Remove the main battery from mobile computer.
2. Dip the cotton portion of the cotton-tipped applicator in isopropyl alcohol.
4. Repeat at least three times.
5. Use the cotton-tipped applicator dipped in alcohol to remove any grease and dirt near the connector area.
6. Use a dry cotton-tipped applicator and repeat steps 4 through 6.

⚠️ CAUTION Do not point nozzle at yourself and others, ensure the nozzle or tube is away from your face.

7. Spray compressed air on the connector area by pointing the tube/nozzle about ½ inch away from the surface.
8. Inspect the area for any grease or dirt, repeat if required.

Cleaning Cradle Connectors

To clean the connectors on a cradle:

1. Remove the DC power cable from the cradle.
2. Dip the cotton portion of the cotton-tipped applicator in isopropyl alcohol.
3. Rub the cotton portion of the cotton-tipped applicator along the pins of the connector. Slowly move the applicator back-and-forth from one side of the connector to the other. Do not leave any cotton residue on the connector.
4. All sides of the connector should also be rubbed with the cotton-tipped applicator.

⚠️ CAUTION Do not point nozzle at yourself and others, ensure the nozzle or tube is pointed away from your face.

5. Spray compressed air in the connector area by pointing the tube/nozzle about ½ inch away from the surface.
6. Remove any lint left by the cotton-tipped applicator.
7. If grease and other dirt can be found on other areas of the cradle, use a lint-free cloth and alcohol to remove.
8. Allow at least 10 to 30 minutes (depending on ambient temperature and humidity) for the alcohol to air dry before applying power to cradle.
9. If the temperature is low and humidity is high, longer drying time is required. Warm temperature and dry humidity requires less drying time.
## Troubleshooting the MC40

<table>

</thead>
<tbody>
<tr>
<td>The MC40 does not decode when reading bar code.</td>
<td>DataWedge is not enabled.</td>
<td>Ensure that DataWedge is enabled and configured properly. Refer to the <em>MC40 Integrator Guide</em> for more information.</td>
</tr>
<tr>
<td></td>
<td>Unreadable bar code.</td>
<td>Ensure the symbol is not defaced.</td>
</tr>
<tr>
<td></td>
<td>Distance between the MC40 and bar code is incorrect.</td>
<td>Place the MC40 within proper scanning range.</td>
</tr>
<tr>
<td></td>
<td>MC40 is not programmed for the bar code type.</td>
<td>Program the MC40 to accept the type of bar code being scanned. Refer to the <em>MC40 Integrator Guide</em> for DataWedge configuration.</td>
</tr>
<tr>
<td></td>
<td>MC40 is not programmed to generate a beep.</td>
<td>If the MC40 does not beep on a good decode, set the application to generate a beep on good decode.</td>
</tr>
<tr>
<td>MC40 cannot find any Bluetooth devices nearby.</td>
<td>Too far from other Bluetooth devices.</td>
<td>Move closer to the other Bluetooth device(s), within a range of 10 meters (30 feet).</td>
</tr>
<tr>
<td></td>
<td>The Bluetooth device(s) nearby are not turned on.</td>
<td>Turn on the Bluetooth device(s) to find.</td>
</tr>
<tr>
<td></td>
<td>The Bluetooth device(s) are not in discoverable mode.</td>
<td>Set the Bluetooth device(s) to discoverable mode. If needed, refer to the device’s user documentation for help.</td>
</tr>
<tr>
<td>MC40 does not read magnetic stripe card.</td>
<td>Magnetic stripe on the card is facing the wrong way.</td>
<td>Ensure that magnetic stripe card is oriented correctly. Magnetic stripe on the card should be facing the display.</td>
</tr>
<tr>
<td>Cannot connect to WLAN.</td>
<td>Access Point (AP) does not broadcast country code.</td>
<td>Disable 802.11d feature. Touch 🌌 &gt; Wi-Fi &gt; ☰ &gt; Advanced. Deselect the Enable 802.11d checkbox.</td>
</tr>
<tr>
<td>Wired headset is not working as headset hook or not able to initiate a PTT call even through wired headset.</td>
<td>Wired headset not connected properly.</td>
<td>Ensure that the wired headset is connected properly.</td>

#### Performance Characteristics

- **CPU**: Texas Instruments OMAP 4430 @ 1 GHz, dual-core.  
- **Operating System**: Android-based AOSP 5.1.1 (Lollipop).  
- **Memory**: 1 GB RAM, 8 GB Flash.  
- **Output Power (USB)**: Docking Connector: 5 VDC @ 500 mA max.

#### User Environment

- **Operating Temperature**: 0°C to 50°C (32°F to 122°F)  
- **Storage Temperature**: -40°C to 70°C (-40°F to 158°F)  
- **Charging Temperature**: 0°C to 40°C (32°F to 104°F)  
- **Humidity**: 5% to 95% RH non-condensing  
- **Drop Specification**: Multiple 1.2 m (4 ft.) drops to plywood per MIL-STD 810G specifications. Multiple 0.9 m (3 ft.) drops to tile.  
- **Electrostatic Discharge (ESD)**: +/-15kVdc air discharge, +/-8kVdc direct discharge, +/-2kVdc indirect discharge  
- **Sealing**: IP54

#### Wireless LAN Data Communications

- **Wireless Local Area Network (WLAN) radio**: IEEE® 802.11a/b/g/n/d/h/i/k/r with internal antenna  
- **Data Rates**: 5GHz: 802.11a/n - up to 72.2 Mbps; 2.4GHz: 802.11b/g/n - up to 72.2 Mbps  
- **Operating Channels**: Chan 36 - 165 (5180 - 5825 MHz)  Chan 1 - 13 (2412 - 2472 MHz)  Actual operating channels/frequencies depend on regulatory rules and certification agency.
**Technical Specifications**

### Security and Encryption

- WEP (40 or 104 bit);
- WPA/WPA2 Personal (TKIP, and AES);
- WPA/WPA2 Enterprise (TKIP, and AES) — EAP-TTLS (PAP, MSCHAP, MSCHAPv2), EAP-TLS, PEAPv0- MSCHAPv2, PE APv1-EAP-GTC, EAP-FAST (MSCHAPv2 and EAP-GTC) and LEAP
- FIPS 140-2 Level 1 DIM (Data In Motion supported by FIPS Fusion - WLAN)

**Note:** Use the FIPS advanced option to enable or disable FIPS data in motion supported in WLAN FIPS 140-2, level 1 compliance.

- FIPS 140-2 DAR (Data at Rest supported by device) & FIPS DIM (Data in Motion - WLAN)

**Notes:**
- The FIPS DAR feature is enabled when device encryption is enabled through Settings > Security > Encrypt device.
- The FIPS DIM/DAR features are only available on the FIPS configuration of the device and are not available on the standard configuration.

### Multimedia

- Wi-Fi Multimedia™ (WMM)

### Certifications

- WFA (802.11n, WMM, WMM-PS), Cisco CCXv4

### Fast Roam

- PMKID Caching, Opportunistic Key Caching (OKC), Cisco CCKM, 802.11r, Zebra Aggregated FT

### Wireless PAN Data and Voice Communications

#### Bluetooth

- Class II, v 2.1 with EDR v 4.0 with Low Energy; integrated antenna.

### Data Capture

#### Imager

- Captures 1D and 2D bar codes.

#### Rear-facing Camera

- For bar code scanning and image capture: 8 MP auto-focus camera with aiming; captures 1D and 2D bar codes, photographs, video, signatures and documents.

#### Magnetic Stripe Reader

- Reads data on magnetic stripe cards.

#### RS507 Hands-free Imager

- Captures 1D and 2D bar codes.

### Sensors

#### Motion Sensor

- 3-axis accelerometer that enables motion sensing applications for dynamic screen orientation and power management.

#### Ambient Light/Proximity Sensor

- Automatically adjusts display brightness and turns off the display during VoIP calls.

### Imager (SE4500-DL) Specifications

---
