1. Drill four holes as shown below.
2. If required, install proper anchors.
3. Install top two screws into the wall.
4. The screw heads should protrude 12.7 mm (0.5 in.) from the wall.
5. Remove the two screws securing the bracket flange to the bracket.
6. Align the flange with the screw holes at the back of the bracket.
7. Ensure that the tab goes into the tab slot.
8. Secure the flange to the bracket using the two screws.
9. Repeat for the other side of the bracket.
1. Install four screw studs into the threaded holes as shown.
2. Secure the screw studs using a Phillips screwdriver.

3. Align the screw slots on the bottom of the cradle with the four Screw Studs on the bracket.
4. Place the cradle only the studs and slide down.

5. Place the power supply into the shelf under the bracket.
6. Plug the AC Line Cord into the power supply.
7. Plug the DC cable into the power input of the cradle.
8. Use tie wraps to secure the cables to the bracket, as required.

MOUNTING 5 FOUR SLOT BATTERY CHARGERS

1. Install twenty screw studs into the threaded holes as shown.
2. Secure the screw studs using a Phillips screwdriver.

3. Align the screw slots on the bottom of the chargers with the four Screw Studs on the bracket.
4. Place the charger onto the studs and slide down.

5. Place each power supply into the shelf under the bracket.
6. Plug an AC Line Cord into each power supply.
7. Plug the DC cable into the power input of each charger.
8. Use tie wraps to secure the cables to the bracket, as required.
