- Keypad Number Keys
- Numeric Keypad
- Blue Key
- Orange Key
- Programmable Button

GETTING STARTED

1. MicroSD and SIM Card Installation
2. Insert the Battery
3. Charge the MC45

MicroSD and SIM Card Installation

1. Insert the Battery
2. Charge the MC45

Charging/Battery Status LED

- Slow Blinking Green = Charging
- Solid Green = Fully Charged
- Fast Blinking Red = Charging Error

Note: See the MC45 User Guide for detailed keypad information.

Orange Key

Use this key to access the secondary layer of characters and actions.

- Press the orange key once to activate this mode followed by another key.
- Press the orange key twice to lock the keypad in the orange keys mode.
- Press the orange key again to return to the normal mode.

Blue Key

Use this key to access the function keys shown on the keypad in blue.

- Press the blue key once to activate this mode followed by another key.
- Press the blue key twice to lock the keypad in the blue keys mode.
- Press the blue key again to return to the normal mode.

Note: To lock the battery cover, slide the battery cover latch to the right until the red dot is not visible.

It is recommended that this product be charged for 24 hours before the first use to ensure that the internal battery is fully charged.
Screen Protector

Zebra recommends the use of a screen protector to minimize wear and tear. Screen protectors enhance the usability and durability of touch screen displays. Benefits include:

- Protection from scratches and gouges
- Durable writing and touch surface with tactile feel
- Abrasion and chemical resistance
- Glare reduction
- Keeping the device’s screen looking like new
- Quick and easy installation.

Note: Not using a screen protector can affect your warranty coverage. An initial screen protector is already applied to your MC45. Contact your local account manager or Zebra, Inc. for more information and purchasing details.

1. Tap Start > Pictures & Videos.
2. Point the MC45 at an object.
3. Press the Camera button.
4. Hold the MC45 still until the “Shutter Sound” is heard.

When using the GPS feature of the MC45:

- Acquiring satellite signals may take a few minutes. It is best to be outside and have a clear, unobstructed view of the sky.
- Without a clear view, acquisition takes much longer and could result in the MC45 being unable to compute the initial position quickly.

Obtain a satellite fix before moving.

Shutdown GPS application when not in use to extend battery life.

Follow the on-screen ActiveSync® 4.5 instructions to establish a connection between the MC45 and the host computer.

Create a Partnership

Follow the on-screen instructions to establish a partnership between the MC45 and the host computer.

Battery Removal

1. Turn off the MC45 before removing the battery. If the MC45 is in suspend mode, press the red Power button to wake the MC45. Press the red Power button for 3 seconds until a screen appears. Select the Power Off option to turn off the MC45.

Note: To unlock and remove the battery cover, slide the battery cover latch to the left until the green indicators align with the eject icon and the red dot is visible. The battery cover ejects slightly. Lift to remove.

2. Launch a barcode reading application on the MC45.
3. Point the MC45 towards the barcode.
4. Press the Scan button.
5. In the image window, align the camera over the barcode. When the MC45 decodes the barcode, a beep sounds.
6. Release the Scan button.

Camera Decode

• Removing or replacing a battery may take a few minutes. It is best to acquire a satellite fix before removing the battery.
• Without a clear view, acquisition takes much longer and could result in the MC45 being unable to compute the initial position quickly.

Camera Photo

1. Tap Start > Pictures & Videos.
2. Point the MC45 at an object.
3. Press the Camera button.
4. Hold the MC45 still until the “Shutter Sound” is heard.

GPS Information

When using the GPS feature of the MC45:

1. Set the GPS Photo Date and Time.
2. Set the GPS Location.
3. Set the GPS Geoloc.
4. Set the GPS Meters.

Note: To unlock and remove the battery cover, slide the battery cover latch to the left until the green indicators align with the eject icon and the red dot is visible. The battery cover ejects slightly. Lift to remove.
