Quick Start Guide for MC67ND with Windows Embedded Handheld
**Quick Start Guide**

**1. Launch a bar code reading application or use DataWedge.**

**2. Point the MC67 at the bar code.**

**3. Press the Scan button.**

**4. In the image window align the red target over the bar code. When the MC67 decodes the bar code the Scan/Decode LED light green and a beep sounds.**

**5. Release the Scan button.**

---

**1. Tap Start > Pictures & Videos > Camera.**

**2. Point the MC67 at an object.**

**3. Press the Enter key.**

**4. Hold MC67 still until "Shutter Sound" is heard.**

---

**GPS Information**

Acquiring satellite signals may take a few minutes. It is best to be outside and have a clear, unobstructed view of the sky.

Without a clear view, acquisition takes much longer and could result in the MC67 being unable to compute the initial position quickly.

Obtain a satellite fix before moving.

Shutdown GPS application when not in use.

When using the GPS feature of the MC67:

---

**Communication**

**Avoid Extreme Wrist Angles**

---

**Accessories**

**Battery Removal**

1. If the MC67’s in suspend mode, press the Power button to wake the MC67.

2. When the MC67 is in suspend mode, press and hold the Power button for 5 seconds. The MC67 is now in suspend mode.

3. Slide the battery from the MC67. You battery system requires up to 35 minutes to cool before you can replace the battery.
