WALL MOUNTING

⚠️ CAUTION
Use mounting hardware (screws and/or anchors) appropriate for the type of wall you are mounting the bracket onto. The 8-bay Cradle mounting slots dimensions are 5 mm (0.2 in.). Fasteners must be able to hold a minimum of 18.1 Kg (40 lbs.)

For proper installation consult a professional installer. Failure to install the 8-bay Cradle properly can possibly result in damage to the hardware.

1. Install four screws into the wall using the dimensions indicated on the right. The screw heads should protrude 2.5 mm (3/32") from the wall.
2. Connect an Ethernet cable to Port 1 on the top cradle.
3. Align the 8-bay cradle’s four mounting holes with the four screws on the wall.
4. Place the 8-bay cradle on the screws and ensure that the cradle is secure.
5. Plug the Power cable into an AC outline.
SHELF MOUNTING

1. Attach the shelf bracket to the bottom of the 8-bay cradle using four M4x0.7 8 mm screws.
2. Place the 8-bay cradle on the shelf with end of the shelf bracket hanging over the shelf lip.
3. Slide the J-bracket onto the shelf lip and shelf bracket and secure using two M4x0.7 8 mm screws.
4. Feed the belt through the bracket slot and the J-bracket slot.
5. Feed the belt through the buckle.
6. Slide the J-bracket onto the shelf lip.
7. Tighten the belt.
8. Connect an Ethernet cable to Port 1 on the top cradle.
9. Plug the Power cable into an AC outline.
