Revision A - October 2004

symbol[®]
The Enterprise Mobility Company[™]

The ADP9000-110 differs from the standard product in that 5 volts is available at pin 6. This product was developed and tested to work with a MC9060-KH0HBEEA4WW and a Sinbon cable (p/n A9110525) attached to a LS3408-ER20005 scanner.

CAUTION: Do not plug in 3 volt peripherals. Damage may occur.
