This Product, and its accessories, comply with the requirements of the Waste Electrical and Electronic Equipment (WEEE) Directive 2012/19/EU. The batteries used in this Product comply with the requirements of Directive 2006/66/EC.

If your end-of-life Zebra product, battery or accessory carries a label as shown here, please contact your local country representative for details on how to arrange recycling.

RESTRICTION ON HAZARDOUS SUBSTANCES (ROHS) DIRECTIVE 2011/65/EU

What is RoHS?

The European Union has mandated that high environmental standards be met in the design and manufacture of electronic and electrical products sold in Europe, to reduce hazardous substances from entering the environment. The “Restriction on Hazardous Substances Directive (RoHS)” prescribes the maximum trace levels of lead, cadmium, mercury, hexavalent chromium, and flame retardants PBB and PBDE that may be contained in a product. Only products meeting these high environmental standards may be “placed on the market” in EU member states after July 1, 2006.
Although there is no legal requirement to mark RoHS-compliant products, Zebra indicates its compliance with the directive as follows:

The RoHS logo located either on the back of the product or underneath the battery in the battery compartment (or on a related accessory such as the charger or docking station) signifies that the product is RoHS-compliant as per the EU directive. Other than as noted below, a Zebra product that does not have an accompanying RoHS logo signifies that it was placed on the EU market prior to July 1, 2006, and is thereby exempt from the directive.

Note: Not all accessories or peripherals will have a RoHS logo due to physical space limitations or as a result of their exempt status.

DISCLAIMER

Every effort has been made to make this material complete, accurate, and up-to-date. In addition, changes are periodically added to the information herein; these changes will be incorporated into new editions of the publication.

Zebra reserves the right to make improvements and/or changes in the product(s) and/or the program(s) described in this document without notice, and shall not be responsible for any damages, including but not limited to consequential damages, caused by reliance on the material presented, including but not limited to typographical errors.

1. DECLARATION of Conformity

When used in a residential, commercial or light industrial environment the product and its approved UK and European peripherals fulfil all requirements for CE marking.

EU Directives

This equipment complies with the essential requirements of EU Directives 1995/5/EC or 2014/53/EU, 2004/108/EC and 2006/95/EC, as applicable. Declarations are available from your local representative.

2. REGULATORY SUMMARY

FCC Information To Users
Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is
subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution: Any changes or modifications made to this equipment not expressly approved by Zebra may void the FCC authorization to operate this equipment.

Emissions Information For Canada
This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations (ICES-003).

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada (ICES-003).

Warning for Australia
The user needs to switch off the device when exposed to areas with potentially explosive atmospheres such as petrol stations, chemical storage depots and blasting operations.

South Korean Approval

3. SAFETY SUMMARY

3.1 CHARGING DEVICES SAFETY INSTRUCTIONS

SAVE THESE INSTRUCTIONS – This manual contains important safety and operating instructions for charging devices.

Important: To avoid the risk of fire or personal injury, use only the AC adaptor recommended by Zebra.
• Before using the charging accessories, read all instructions and cautionary markings on (1) charging device, (2) battery and (3) product using battery.
• The mains power cord shall comply with national safety regulations of the country where the equipment is to be used.
• Use of an attachment not recommended or sold by Zebra may result in fire, electric shock, or personal injury.
• To reduce risk of damage to the electric plug and cord when unplugging the charging device, pull the plug rather than the cord.
• Make sure the cord is positioned so that it is not stepped on, tripped over, or otherwise subjected to damage or stress.
• Do not operate the charging device with a damaged cord or plug. Replace immediately.
• Do not operate the charging device if it has received a sharp blow, been dropped, or otherwise damaged in any way; it should be inspected by qualified service personnel.
• Do not disassemble the charging device; it should be repaired by qualified service personnel. Incorrect reassembly may result in electric shock or fire.
• To reduce risk of electric shock, unplug the charging device from the outlet before attempting any maintenance or cleaning.
• An extension cord should not be used unless absolutely necessary. Use of an improper extension cord could result in fire or electric shock. If an extension cord must be used, make sure:
  - The plug pins on the extension cord are the same number, size, and shape as those on the charging device.
  - The extension cord is properly wired and in good electrical condition and that the wire size is larger than 16 AWG.
• For indoor use only. Do not expose the charging device to rain or snow.
• Do not connect the Ethernet port of the accessory to outdoor cables.
• Do not use the charging device if, after an overnight charge, any of the batteries feel warmer than the charging device housing. The charging device should be inspected by qualified service personnel.

3.2 BATTERY SAFETY INSTRUCTIONS

Warning: BATTERIES MUST BE DISPOSED OF SAFELY AND PROPERLY AND IN ACCORDANCE WITH LOCAL LEGISLATION.

You can also contact your local representative for battery disposal information in your area.

Warning: Counterfeit Lithium-Ion Battery Packs!

Only use genuine Zebra battery packs. Counterfeit battery packs and battery packs re-manufactured using non original battery cells and components could pose a safety hazard due to poor quality components and/or lack of safety protection circuits. Non genuine battery packs are also not likely to meet the strict functional and environmental specification required for safe and correct operation when used in Zebra equipment. Using or attempting to recharge non genuine battery packs could result in poor performance, product damage, excessive heat being generated, battery leakage, fire or explosion resulting in personal injury. To avoid these issues only purchase and use genuine battery packs from authorized Zebra distributors.

All batteries recommended for this system have been qualified to IEEE1725: 2006. Replace only with the same or equivalent type recommended by Zebra. Dispose of used batteries according to the instructions.
**Warning:** Before charging or using the battery pack, it is critical that the safety information in this section be reviewed and that all warnings are strictly followed.

**Warning:** TO PREVENT the battery from leaking acid, generating heat or exploding, adhere to the precautions below.

- **Caution!** Danger of fire, explosion, leakage or other hazard if a battery is incorrectly handled, charged, disposed of or replaced.
- The battery incorporates built-in safety devices. To ensure their proper function, do not disassemble or alter any parts of the battery.
- Do not short-circuit the battery by directly connecting any of the exposed terminals with metal objects such as wire. Do not transport or store the battery together with metal objects such as necklaces, hair pins, etc.
- Do not dispose of batteries in fire as they may explode or release toxic materials and cause burns.
- Do not use or leave the battery near a heat source such as a fire or heater.
- Do not immerse the battery in water.
- When charging, use the charging device specifically designed for the battery.
- Do not pierce, strike, throw or step on the battery.
- Do not directly solder the battery.
- Do not connect the battery to an electrical outlet, vehicle cigarette lighter, etc.
- Do not put battery into a microwave oven or pressurized container.
• Immediately remove the battery from the device or charger and stop use if the battery gives off an odour, generates heat, becomes discoloured or deformed, or in any way appears abnormal during use.
• Do not continue charging the battery if it does not recharge within the specified charge time.
• The battery may burst or ignite if the battery leaks. Always ensure that it is away from any exposed flames.
• If leaking electrolyte sprays into your eyes, rinse them with clean running water, and immediately seek medical attention.
• Do not store the battery in extremely high temperatures (e.g., a vehicle, strong direct sunlight, etc.). This may cause the battery to overheat or ignite, and it may also reduce the performance and service life of the battery.
• Do not use in areas where static electricity is greater than what the manufacturer guarantees.
• Keep batteries out of reach of children.
• Do Not Operate In An Explosive Atmosphere! Operating Zebra equipment where explosive gas is present may result in an explosion.
• Do not remove covers or open enclosures! To avoid injury, the equipment covers and enclosures should only be removed by qualified service personnel. Do not operate the equipment without the covers and enclosures properly installed.
• Avoid dropping the hand-held or battery. If the computer or the battery is dropped, especially on a hard surface, and the operator suspects damage, have it checked by qualified service personnel.

Standard warranty period for all Zebra batteries is one year, regardless if the battery was purchased separately or included as part of the mobile computer. For more information on Zebra batteries, please visit: www.zebra.com/batterybasics.
4. SUPPORT SERVICES AND WORLDWIDE OFFICES

Zebra provides a complete range of product support services to its customers worldwide. These services include technical support and product repairs.
