

Special Operating Instructions

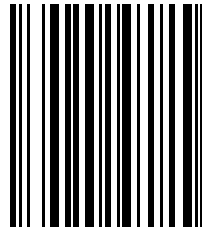

*73-42246-15
Revision A - April 2002*

This configuration, PDT 7246-LII40C15, differs from the standard model in that it incorporates a Long Range (LR) scan engine, p/n 20-16372-05 instead of the Advanced Long Range (ALR) scan engine, 20-16372-15.

The functional performance is based upon the ability of this custom product to scan a standard 1D, 123 bar code as shown here.
