Terms of Use

• Proprietary Statement
  This manual contains proprietary information of Zebra Technologies Corporation and its subsidiaries (“Zebra Technologies”). It is intended solely for the information and use of parties operating and maintaining the equipment described herein. Such proprietary information may not be used, reproduced, or disclosed to any other parties for any other purpose without the express, written permission of Zebra Technologies.

• Product Improvements
  Continuous improvement of products is a policy of Zebra Technologies. All specifications and designs are subject to change without notice.

• Liability Disclaimer
  Zebra Technologies takes steps to ensure that its published Engineering specifications and manuals are correct; however, errors do occur. Zebra Technologies reserves the right to correct any such errors and disclaims liability resulting therefrom.

• Limitation of Liability
  In no event shall Zebra Technologies or anyone else involved in the creation, production, or delivery of the accompanying product (including hardware and software) be liable for any damages whatsoever (including, without limitation, consequential damages including loss of business profits, business interruption, or loss of business information) arising out of the use of, the results of use of, or inability to use such product, even if Zebra Technologies has been advised of the possibility of such damages. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Index ........................................................................................................................... 201
Introduction

This guide provides information about using the TC51 touch computer and accessories. The TC51 refers to both the TC51 (Standard) and TC51-HC (Healthcare) configurations, except where noted.

NOTE: Screens and windows pictured in this guide are samples and can differ from actual screens.

Documentation Set

The documentation set provides information for specific user needs, and includes:

- TC51 Touch Computer Quick Start Guide - describes how to get the device up and running.
- TC51 Touch Computer User Guide for Android 8.1 Oreo - describes how to use the device.
- TC51 Touch Computer Integrator Guide for Android 8.1 Oreo - describes how to set up the device and accessories.

Configurations

This guide covers the following configurations:

<table>
<thead>
<tr>
<th>Configuration</th>
<th>Radios</th>
<th>Display</th>
<th>Memory</th>
<th>Data Capture Options</th>
<th>Operating System</th>
</tr>
</thead>
<tbody>
<tr>
<td>TC510K-1</td>
<td>WLAN: 802.11 a/b/g/n/d/h/i/k/r WPAN: Bluetooth v4.1 Low Energy</td>
<td>5.0” High Definition (1280 x 720) LCD</td>
<td>2 GB RAM / 16 GB Flash or 4 GB RAM / 32 GB Flash</td>
<td>2D imager (SE-4710) and integrated NFC</td>
<td>Android-based, Google ™ Mobile Services (GMS) 8.1.</td>
</tr>
<tr>
<td>TC510K-2</td>
<td>WLAN: 802.11 a/b/g/n/d/h/i/k/r WPAN: Bluetooth v4.1 Low Energy</td>
<td>5.0” High Definition (1280 x 720) LCD</td>
<td>2 GB RAM / 16 GB Flash or 4 GB RAM / 32 GB Flash</td>
<td>2D imager (SE-4710) and integrated NFC</td>
<td>Android-based, Android Open-Source Project 8.1.</td>
</tr>
</tbody>
</table>
Software Versions

To determine the current software versions:

1. Swipe down from the Status bar to open the Quick Settings bar.
2. Touch > System.
3. Touch About phonetablet.
4. Scroll to view the following information:
   • Model
   • Android version
   • Android security patch version
   • Baseband version
   • Kernel version
   • Build number.

To determine the device serial number, touch About phone > Status.
   • Serial number

Chapter Descriptions

Topics covered in this guide are as follows:

• Getting Started provides information on getting the device up and running for the first time.
• Using the Device provides information for operating the device.
• Applications provides information on using applications installed on the device.
• Data Capture provides information for capturing bar code data using the imager.
• Wireless provides information on the various wireless options.
• Accessories provides information for using the accessories for the device.
• Maintenance and Troubleshooting includes instructions on cleaning and provides troubleshooting solutions for potential problems during device operation.
• Technical Specifications provides the technical specifications for the device.

Notational Conventions

The following conventions are used in this document:

• Tablet refers to the Zebra ET51 or ET56 tablet.
• **Bold** text is used to highlight the following:
  • Dialog box, window and screen names
  • Drop-down list and list box names
  • Check box and radio button names
  • Icons on a screen
  • Key names on a keypad
  • Button names on a screen.
• Bullets (•) indicate:
  • Action items
  • Lists of alternatives
  • Lists of required steps that are not necessarily sequential.
  • Sequential lists (for example, those that describe step-by-step procedures) appear as numbered lists.

Related Documents

Service Information

If you have a problem with your equipment, contact Customer Support for your region. Contact information is available at: www.zebra.com/support.

When contacting support, please have the following information available:
  • Serial number of the unit (found on manufacturing label)
  • Model number or product name (found on manufacturing label)
  • Software type and version number

Customer Support responds to calls by email or telephone within the time limits set forth in support agreements.

If the problem cannot be solved by Customer Support, you may need to return the equipment for servicing and will be given specific directions. We are not responsible for any damages incurred during shipment if the approved shipping container is not used. Shipping the units improperly can possibly void the warranty. Remove the microSD card from the device before shipping for service.

If the device was purchased from a business partner, contact that business partner for support.
Provide Documentation Feedback

If you have comments, questions, or suggestions about this guide, send an email to EVM-Techdocs@zebra.com.
Getting Started

Introduction

This chapter provides information for getting the device up and running for the first time.

Unpacking

1. Carefully remove all protective material from the device and save the shipping container for later storage and shipping.

2. Verify that the following were received:
   - device
   - >15.48 Watt hours (typical) / ≥ 4,150 mAh PowerPrecision+ Lithium-ion battery
   - Regulatory Guide.

3. Inspect the equipment for damage. If any equipment is missing or damaged, contact the Global Customer Support center immediately.

4. Prior to using the device for the first time, remove the protective shipping film that covers the scan window, display and camera window.

Features

NOTE: All features are available on both the TC51 (Standard) and TC51-HC (Healthcare) configurations, except where noted.

Setup

Perform this procedure to start using the device for the first time.

1. Install a micro secure digital (SD) card (optional).
2. Install hand strap (optional).
3. Install the battery.
4. Charge the device.
5. Power on the device.

Installing a microSD Card

The microSD card slot provides secondary non-volatile storage. The slot is located under the battery pack. Refer to the documentation provided with the card for more information, and follow the manufacturer’s recommendations for use.

**CAUTION:** Follow proper electrostatic discharge (ESD) precautions to avoid damaging the microSD card. Proper ESD precautions include, but are not limited to, working on an ESD mat and ensuring that the operator is properly grounded.

1. Lift the access door.

**Figure 3** Lift Access Door

2. Slide the microSD card holder to the unlock position.

**Figure 4** Unlock microSD Card Holder

3. Lift the microSD card holder.
4. Insert the microSD card into the card holder door ensuring that the card slides into the holding tabs on each side of the door.

5. Close the microSD card holder and slide into the lock position.

CAUTION: Access door must be replaced and securely seated to ensure proper device sealing.

6. Re-install the access door.
Installing the Battery

1. Insert the battery, bottom first, into the battery compartment in the back of the device.

2. Press the battery down into the battery compartment until the battery release latches snap into place.

Charging the Battery

Before using the device for the first time, charge the main battery until the green Charging/Notification light emitting diode (LED) remains lit. To charge the device use a cable or a cradle with the appropriate power supply. For information about the accessories available for the device see Accessories for more information.

The $15.48$ Watt hours (typical) / $4,150$ mAh battery charges from fully depleted to $90\%$ in approximately $2.5$ hours and from fully depleted to $100\%$ in approximately three hours.

**NOTE:** In many cases the $90\%$ charge provides plenty of charge for daily use. A full $100\%$ charge lasts for approximately $14$ hours of use. To achieve the best fast charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the device in sleep mode.
Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or accessory always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or accessory may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device or accessory indicates when charging is disabled due to abnormal temperatures via its LED and a notification appears on the display.

To charge the main battery:
1. Connect the charging accessory to the appropriate power source.
2. Insert the device into a cradle or attach to a cable. The device turns on and begins charging. The Charging/Notification LED blinks amber while charging, then turns solid green when fully charged.

## Charging Indicators

**Table 3  Charging/Notification LED Charging Indicators**

<table>
<thead>
<tr>
<th>State</th>
<th>LED</th>
<th>Indication</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td></td>
<td>Device is not charging. Device is not inserted correctly in the cradle or connected to a power source. Charger/cradle is not powered.</td>
</tr>
<tr>
<td>Slow Blinking Amber (1 blink every 4 seconds)</td>
<td>amber</td>
<td>Device is charging.</td>
</tr>
<tr>
<td>Slow Blinking Red (1 blink every 4 seconds)</td>
<td>red</td>
<td>Device is charging but the battery is at end of useful life.</td>
</tr>
<tr>
<td>Solid Green</td>
<td></td>
<td>Charging complete.</td>
</tr>
<tr>
<td>Solid Red</td>
<td></td>
<td>Charging complete but the battery is at end of useful life.</td>
</tr>
</tbody>
</table>
| Fast Blinking Amber (2 blinks/second) | amber | Charging error, e.g.:
|                               |     | • Temperature is too low or too high.                                      |
|                               |     | • Charging has gone on too long without completion (typically eight hours). |
| Fast Blinking Red (2 blinks/second) | red  | Charging error but the battery is at end of useful life, e.g.:
|                               |     | • Temperature is too low or too high.                                      |
|                               |     | • Charging has gone on too long without completion (typically eight hours). |

## Google Account Setup

**NOTE:** You must connect the device to the internet in order to set up a Google™ account. A Google account is only required on devices with GMS software.

The first time the device starts, the Setup Wizard displays. Follow the on-screen instructions to set up a Google account, configure Google Pay ™ for purchasing items from the Google Play ™ store, to enter your personal information, and enable backup or restore features.
**Zebra Visibility Services**

The device captures and provides device analytics to a system administrator. The first time the device boots (or after a Factory reset), the *Zebra Services* agreement screen displays.

Figure 10  Zebra Services

1. Touch the **Device Data** switch to disable the device from sending analytics data.
2. Touch **OK**.

**Replacing the Battery**

**CAUTION:** Do not add or remove microSD card during battery replacement.

1. Press the Power button until the menu appears.
2. Touch **Battery Swap**.
3. Follow the on-screen instructions.

**WARNING:** Do not remove the battery until after the red LED completely turns off. Loss of data may result.

4. Wait for the red LED to completely turn off.
5. If hand strap is attached, remove hand strap.
6. Press the two battery latches in.
7. Lift the battery from the device.

**Figure 12  Lift the Battery**

**CAUTION:** Replace the battery within 90 seconds. After 90 seconds the device reboots and data may be lost.

8. Insert the replacement battery, bottom first, into the battery compartment in the back of the device.

9. Press the battery down until the battery release latches snap into place.

10. Replace the hand strap, if required.

11. Press the Power button to turn on the device.

**Replacing the microSD Card**

To replace the microSD card:

1. Press the Power button until the menu appears.

2. Touch **Power off**.

3. Touch **OK**.

4. If hand strap is attached, slide the hand strap clip up toward the top of the device and then lift.

5. Press the two battery latches in.
6. Lift the battery from the device.
7. Lift the access door.

**Figure 13**  Remove Access Door

8. Remove microSD card from holder.
9. Insert the replacement microSD card.

**CAUTION:** Access door must be replaced and securely seated to ensure proper device sealing.

10. Replace the access door.

**Figure 14**  Replace Access Door

11. Insert the battery, bottom first, into the battery compartment in the back of the device.
12. Press the battery down until the battery release latches snap into place.
13. Replace the hand strap, if required.
14. Press and hold the Power button to turn on the device.

**Battery Management**

**NOTE:** Prior to checking the battery charge level, remove the device from any AC power source (cradle or cable).
To check the charge status of the main battery, open Settings and touch System > About phone > Battery Information.

Battery present status indicates if the battery is present and Battery level lists the battery charge (as a percentage of fully charged). The battery percentage can also be viewed next to the battery icon in the quick access panel. Swipe down with two fingers from the status bar to open the quick access panel.

**Monitoring Battery Usage**

The Battery screen provides battery charge details, power management options, and a list of apps that consume the most battery power.

Use the power management options to extend battery life, or touch an app to display details about its power consumption. Different apps display different information. Some apps include buttons that open screens with settings to adjust power use. Use the DISABLE or FORCE CLOSE buttons to turn off apps that consume too much power.

1. Swipe down from the Status bar to open the Quick Settings bar and then touch 📡.
2. Touch Battery.

**Figure 15  Battery Screen**

![Battery Screen](image)

**Low Battery Notification**

When the battery charge level drops below 18%, the device displays a notice to connect the device to power. The user should charge the battery using one of the charging accessories.

When the battery charge drops below 10%, the device displays a notice to connect the device to power. The user must charge the battery using one of the charging accessories.
When the battery charge drops below 4%, the device turns off. The user must charge the battery using one of the charging accessories.

**Figure 16  Low Battery Notification**

![Low Battery Notification](image)

**Battery Optimization**

Observe the following battery saving tips:
- Set the screen to turn off after a short period of non-use.
- Reduce screen brightness.
- Turn off all wireless radios when not in use.
- Turn off automatic syncing for Email, Calendar, Contacts, and other apps.
- Minimize use of apps that keep the device from suspending, for example, music and video apps.

**Setting the Date and Time**

You are only required to set the time zone or set the date and time if the wireless LAN does not support Network Time Protocol (NTP).

To set the date and time:
1. Swipe down from the Status bar to open the Quick Settings bar and then touch 📅.
2. Touch System > Date & time.
3. Touch Automatic date & time to disable automatic date and time synchronization.
4. Touch Set date.
5. In the calendar, set today’s date.
6. Touch OK.
7. Touch Set time.
8. Touch the green circle, drag to the current hour and then release.
9. Touch the green circle, drag to the current minute and then release.
10. Touch AM or PM.
11. Touch OK.
12. Touch Use 24-hour format.
13. Touch 〇.

Display Setting

Use Display settings to change the screen brightness, change the background image, enable screen rotation, set sleep time and change font size.

Setting the Screen Brightness

To manually set the screen brightness using the touchscreen:
1. Swipe down with two fingers from the Status bar to open the Quick Access panel.
2. Slide the icon to adjust the screen brightness level.

![Brightness Slider]

To let the device automatically adjust the screen brightness using the built-in light sensor:
1. Swipe down from the status bar to open the quick settings bar and then touch ☀.
2. Touch Display.
3. If disabled, touch Adaptive brightness to automatically adjust the brightness.
   By default, Adaptive brightness is enabled. Toggle the switch to disable.
4. Touch 〇.

Setting Screen Rotation

By default, screen rotation is enabled.

To disable screen rotation:
1. Swipe down from the Status bar to open the Quick Settings bar and then touch ☀.
2. Touch Display > Advanced.
3. Touch Auto-rotate screen.

**NOTE:** To change the Home screen rotation, see Setting Home Screen Rotation.

4. Touch 〇.

Setting Home Screen Rotation

By default the Home screen rotation is disabled. To enable Home screen rotation:
1. Touch and hold anywhere on the Home screen until the options appear.
2. Touch ☀.
3. Touch **Allow rotation**.

4. Touch ◯.

5. Rotate the device.

**Figure 18** Rotated Home Screen

---

**Setting Screen Timeout**

To set the screen sleep time:

1. Swipe down from the Status bar to open the Quick Settings bar and then touch ◯.

2. Touch **Display > Advanced > Sleep**.

3. Select one of the sleep values.
   - 15 seconds
   - 30 seconds
   - 1 minute (default)
   - 2 minutes
   - 5 minutes
   - 10 minutes
   - 30 minutes (default).

4. Touch ◯.

**Setting Font Size**

To set the size of the font in system apps:

1. Swipe down from the Status bar to open the Quick Settings panel and then touch ◯.

2. Touch **Display > Advanced**.

3. Touch **Font size**.
4. Select one of the font size values.
   - Small
   - Default
   - Large
   - Largest.

5. Touch ○.

**Ambient Display**

The Ambient display setting wakes the screen when notifications are received. To disable ambient display:

1. Swipe down with two fingers from the status bar to open the quick access panel and then touch ○.
2. Touch Display.
3. Touch Ambient display to disable.
4. Touch ○.

**Touch Panel Mode**

The device display is able to detect touches using a finger, a conductive-tip stylus, or gloved finger.

**NOTE:** A glove can be made of medical latex, leather, cotton, or wool. For optimal performance use a Zebra certified stylus.

1. Swipe down from the Status bar to open the Quick Settings bar and then touch ○.
2. Touch Display > Advanced.
3. Touch **Touch panel mode**.

**Figure 20** Screen Protector Mode Dialog Box

<table>
<thead>
<tr>
<th>Screen Protector Mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glove and Finger</td>
</tr>
<tr>
<td>Stylus and Finger</td>
</tr>
</tbody>
</table>

4. Select:
   a. **Glove and Finger (Screen Protector off)** to use a finger or a gloved finger on the screen without a screen protector.
   b. **Stylus and Finger (Screen Protector off)** to use a finger or a stylus on the screen without a screen protector.

5. Touch .

**Setting Notification LED**

The Charging/Notification LED lights blue when an application, such as email and VoIP, generates a programmable notification or to indicate when the device is connected to a Bluetooth device. By default, LED notifications are enabled. To change the notification setting:

1. Swipe down with two fingers from the status bar to open the quick access panel and then touch .
2. Touch **Apps & notifications > Notifications**.
3. Touch **Blink light** to toggle the notification on or off.
4. Touch .

**General Sound Setting**

Use the **Sound** settings to configure media and alarm volumes.

To access sound settings:

1. Swipe down from the Status bar to open the Quick Settings bar and then touch .
2. Touch **Sound**.
3. Touch an option to set sounds.
Figure 21  Sound Screen

- **Zebra volume controls**
  - **Ring volume** - Controls the ringtone volume.
  - **Media volume** - Controls the music, games, and media volume.
  - **Alarm volume** - Controls the alarm clock volume.
  - **Notifications volume** - Controls the notification volume.
  - **Scanner volume** - Controls the scanner volume.

- **Volume presets**
  - 🔊 - Mutes the ring, notifications, and scanner so that the device does not make sounds or vibrate.
  - 📢 - All sounds except media and alarms are silenced and vibrate mode is active.
  - 🗓️ - Enables all sounds at the user defined levels.

- **Do Not Disturb preferences** - Mutes some or all sounds and vibrations.
  - **Priority only allows** - Use to set the priorities for the following:
    - **Reminders** - Switch on or off.
    - **Events** - Switch on or off.
    - **Alarms** - This is always enabled.
    - **Messages** - Choose to allow messages from anyone, starred contacts, any contact, or none. To star contacts, use the Contacts app.
    - **Calls** - Choose to allow calls from anyone, starred contacts, any contact, or none. To star contacts, use the Contacts app.
    - **Repeat callers** - Choose whether or not the phone rings if the same person calls again within 15 minutes.

- **Block visual disturbances**
  - **Block when screen is on** - This option prevents notifications from displaying over the screen (peeking) while you are actively using the device.
• **Block when screen is off** - This option prevents notifications from turning on the screen or pulsing the LED light when a new notification is received while you are not using the device.

• **Automatic rules** - Choose when to automatically silence the device. Touch a default rule, such as Weekend or Weeknight, or create your own rule. To create your own rule, tap **Add more** and then **Time rule**.

• **Phone ringtone** - Touch to select a sound to play when the phone rings.

• **Advanced** - Touch to display advanced sound options.
  
  • **Default notification sound** - Touch to select a sound to play for all system notifications.
  
  • **Default alarm sound** - Touch to select a sound to play for alarms.

• **Other sounds and vibrations**
  
  • **Dial pad tones** - Play a sound when pressing keys on dial pad (default - disabled).
  
  • **Screen locking sounds** - Play a sound when locking and unlocking the screen (default – enabled).
  
  • **Charging sounds** - Not applicable.
  
  • **Touch sounds** - Play a sound when making screen selections (default – enabled).
  
  • **Vibrate on tap** - Vibrate the device when making screen selections (default – disabled).

• **Emergency alerts** - Touch to configure emergency broadcast settings and notifications.

---

### Wake-Up Sources

By default the device wakes from suspend mode when the user presses the power button. The device can be configured to wake when the user presses the PTT or Scan buttons on the left side of the device.

1. Swipe down with two fingers from the status bar to open the quick access panel and then touch 📲.

2. Touch **Wake-Up Sources**.

3. Touch one or more of the options:
   
   • Touch **SCAN** checkbox to enable the left scan button. A check appears in the checkbox.
   
   • Touch **RIGHT_TRIGGER_2** checkbox to enable the right scan button. A check appears in the checkbox.
   
   • Touch **LEFT_TRIGGER_2** checkbox to enable the PTT button. A check appears in the checkbox.
   
   • Touch **REAR_BUTTON** checkbox rear programmable button. A check appears in the checkbox.

Introduction

This chapter explains the buttons, status icons, and controls on the device, and provides basic instructions for using the device including resetting the device and entering data.

Google Mobile Services

NOTE: This section applies to Google Mobile Services (GMS) devices only.

Devices with GMS contain apps and services that provide additional functionality.

GMS includes:

• Apps - GMS adds a variety of Google apps and associated widgets including Chrome, Gmail, Drive, and Maps.
• Services:
  • Speech to Text - Allows for free format speech to text in many languages for both connected and disconnected network. Launch by touching the microphone icon on the keyboard.
  • TalkBack Service - Provides spoken feedback on various parts of the user interface. To enable, go to Settings > Accessibility.
  • Network Location Provider - Adds a location provider which uses mobile network tower information and Wi-Fi access point information to provide a location without using GPS. To enable, go to Settings > Security & location > Location.
  • Widevine DRM - Enables Digital Rights Management (DRM) so that protected streaming video content can be played. Enable DRM Info from the Google Play™ store.
  • Google Cloud Messaging - Allows the device to receive data from the server and other devices on the same connection.
  • Backup and Restore - Allows the users settings and apps to be backed up to a Google server and subsequently restored from that server after a factory reset.
  • Google Accounts - Create and use a Google account to synchronize mail, files, music, photos, contacts and calendar events.

Home Screen

The Home screen displays when the device turns on. Depending upon the configuration, the Home screen might appear different. Contact your system administrator for more information.
After a suspend or screen time-out, the Home screen displays with the lock sliders. Touch the screen and slide up to unlock. For screen locking information see Un-Locking the Screen on page 53.

**Figure 23  Home Screen**

![Home Screen](image)

<table>
<thead>
<tr>

</tr>
<tr>
<td>6 — Status Bar</td>
<td>Displays the time, status icons (right side), and notification icons (left side). For more information see Status Bar on page 36 and Managing Notifications on page 38.</td>
</tr>
</tbody>
</table>

The Home screen provides four additional screens for placement of widgets and shortcuts. When available, swipe the screen left or right to view the additional screens. The additional screens are not viewable by default.
Status Bar

The Status bar displays the time, notification icons (left side), and status icons (right side).

NOTE: Some Status icons may not appear in the Status bar if there are too many icons to display.

Figure 24  Notification and Status Icons

If there are more notifications than can fit in the Status bar, two dots display indicating that more notifications exist. Swipe down from the Status bar to open the Notification panel and view all notifications and status.

### Managing Notifications

Notification icons report the arrival of new messages, calendar events, alarms, and ongoing events. When a notification occurs, an icon appears in the Status bar with a brief description. See Notification Icons for a list of possible notification icons and their description. Open the Notification panel to view a list of all the notifications.

To open the Notification panel, drag the Status bar down from the top of the screen.
To respond to a notification, open the Notification panel and then touch a notification. The Notification panel closes and the corresponding app opens.

To clear all notifications, open the Notification panel and then touch CLEAR ALL. All event-based notifications are removed. Ongoing notifications remain in the list.

To close the Notification panel, swipe the Notification panel up.

**Setting App Notifications**

To set notification settings for a specific app:

1. Swipe down from the Status bar to open the Quick Settings bar and then touch 📢.
2. Touch Apps & notifications > Notifications > App notifications.
3. Select an app.
4. Select an available option:
   - **On / Off** - Select to turn all notifications from this app On (default) or Off.
   - **Allow notification dot** - Do not allow this app to add a notification dot to the app icon.
   - **Allow interruptions** - Do not allow notifications from this app to make sound, vibrate, or pop notifications on the screen.
   - **Override Do Not Disturb** - Allow these notifications to interrupt when Do Not Disturb is set to Priority Only.
   - **Categories** - Do not allow specific types of notifications from this app.
   - **Additional settings in the app** - Open the app settings.

**NOTE:** To change the notification settings for an app, slide the notification slightly left or right and touch 📢.
Viewing Notification Settings for All Apps

To view the notification settings for all apps:
1. Swipe down from the Status bar to open the Quick Settings bar and then touch 📷.
2. Touch Apps & Notifications.
3. Scroll down to Notifications to view how many apps have notifications turned off.
4. To set or view notifications settings for a specific app, see Setting App Notifications.

Controlling Lock Screen Notifications

To control whether notifications can be seen when the device is locked:
1. Swipe down from the Status bar to open the Quick Settings bar and then touch 📷.
2. Touch Apps & notifications > Notifications.
3. Touch On the lock screen and select one of the following:
   • Show all notification content (default)
   • Don’t show notifications at all.

Quick Access Panel

Use the Quick Access panel to access frequently used settings (for example, Airplane mode).

Figure 26   Quick Settings Bar

To see the full Quick Access panel:
• If the device is locked, swipe down once.
• If the device is unlocked, swipe down once with two fingers, or twice with one finger.
• If the Quick Settings bar is open, touch the Down arrow.
NOTE: Not all icons are pictured. Icons may vary.

To change a setting, touch the icon:

- Display brightness - Use the slider to decrease or increase the brightness of the screen.
- Wi-Fi network - Turn Wi-Fi on or off. To open Wi-Fi settings, touch the Wi-Fi network name.
- Bluetooth settings - Turn Bluetooth on or off. To open Bluetooth settings, touch Bluetooth.
- Battery saver - Turn Battery saver mode on or off. When Battery saver mode is on the performance of the device is reduced to preserve battery power.
- Invert colors - Invert the display colors.
- Do not disturb - Control how and when to receive notifications.
- Airplane mode - Turn Airplane mode on or off. When Airplane mode is on the device does not connect to Wi-Fi or Bluetooth.
- Auto-rotate - Lock the device’s orientation in portrait or landscape mode or set to automatically rotate.
- Flashlight - Turn flashlight on or off. Turn camera flash on or off.
- Location - Enable or disable locationing feature.
- Hotspot - Turn on to share the device’s mobile data connection with other devices.
- Night Light - Tint the screen amber to make it easier to look at the screen in dim light. Set Night Light to turn on automatically from sunset to sunrise, or at other times.
- Nearby - Helps find and interact with services and devices close to the device.
- Cast - Share phone content on Chromecast or a television with Google Cast built-in. Touch cast screen to display a list of devices, then touch a device to begin casting.

Editing Icons on Quick Settings

The first several setting tiles from the Quick Access panel become the Quick Settings bar.

To move a setting tile:

1. Open the Quick Access panel.
2. Touch ✒️.
3. Touch and drag a setting tile to another location.
4. Release the tile.
5. Touch \(\leftarrow\) to save tiles and return to the Quick Access panel.

To add a setting tile:
1. Open the Quick Access panel.
2. Touch \(\rightarrow\).
3. Slide the Quick Settings panel up to reveal additional tiles.
4. Touch and drag a setting tile from the Drag to add tiles area to the main area.
5. Release the tile.
6. Touch \(\leftarrow\) to save tiles and return to Quick Access panel.

To remove a setting tile:
1. Open the Quick Access panel.
2. Touch \(\rightarrow\).
3. Touch and drag a setting tile to the Drag here to remove area.
4. Release the tile.
5. Touch \(\leftarrow\) to save tiles and return to Quick Access panel.

**App Shortcuts and Widgets**

App shortcuts placed on the Home screen allow quick and easy access to apps. Widgets are self-contained apps placed on the Home screen to access frequently used features.

**Adding an App Shortcut to the Home Screen**

To add an app shortcut to the Home screen:
1. Go to the desired Home screen.
2. Swipe up from the bottom of the screen.
3. Scroll through the list to find the app icon.
4. Touch and hold the icon until the Home screen appears.
5. Position the icon on the screen and then release.

**Adding a Widget to the Home Screen**

To add a widget to the Home screen:
1. Go to the desired Home screen.
2. Touch and hold until the menu appears.
3. Touch **WIDGETS**.
4. Scroll through the list to find the widget.
5. Touch and hold the widget until the Home screen appears.
6. Position the widget on the screen and then release.

Moving Items on the Home Screen

To move app shortcuts or widgets on the Home screen:
1. Touch and hold the item until it floats on the screen.
2. Drag the item to a new location. Pause at the edge of the screen to drag the item onto an adjacent Home screen.
3. Lift finger to place the item on the Home screen.

Removing an App Shortcut or Widget from the Home Screen

To remove an app shortcut or widget from the Home screen:
1. Go to the desired Home screen.
2. Touch and hold the app shortcut or widget icon until it floats on the screen.
3. Drag the icon to X Remove at the top of the screen and then release.

Folders

Use Folders to organize similar applications together. Tap the folder to open and display items in the folder.

Creating a Folder

There must be at least two app icons on the Home screen.

To create a folder:
1. Go to the desired Home screen.
2. Touch and hold one app icon.
3. Drag the icon and stack on top of another icon.
4. Lift and release.

Naming Folders

To name a folder:
1. Touch the folder.
2. Touch the title area and enter a folder name using the keyboard.

3. Touch \( \text{ }\) on the keyboard.

4. Touch anywhere on the Home screen to close the folder. The folder name appears under the folder.

**Removing a Folder**

To remove a folder:

1. Touch and hold the folder icon until it enlarges.

2. Drag the folder to \( \text{X Remove} \) and release.

**Home Screen Wallpaper**

To change the Home screen wallpaper:

1. Touch and hold the screen until the menu appears.

2. Touch **WALLPAPERS**.

3. Touch **Photos** or **Gallery** to select a photo or select one of the pre-installed wallpapers.

4. Touch **Set wallpaper**.

**Using the Touchscreen**

Use the multi-tap sensitive screen to operate the device.

- **Tap** - Tap to:
  - Select items on the screen.
  - Type letters and symbols using the on-screen keyboard.
  - Press on-screen buttons.
- **Tap and Hold** - Tap and hold:
  - An item on the Home screen to move it to a new location or to the trash.
  - An item in Apps to create a shortcut on the Home screen.
  - The Home screen to open a menu for customizing the Home screen.
  - An empty area on the Home screen until the menu appears.
- **Drag** - Tap and hold an item for a moment and then move finger on the screen until reaching the new position.
• Swipe - Move finger up and down or left and right on the screen to:
  • Unlock the screen.
  • View additional Home screens.
  • View additional app icons in the Launcher window.
  • View more information on an app’s screen.
• Double-tap - Tap twice on a web page, map, or other screen to zoom in and out.
• Pinch - In some apps, zoom in and out by placing two fingers on the screen and pinching them together (to zoom out) or spreading them apart (to zoom in).

Keyboards

Use the on-screen keyboard to enter text in a text field.

Editing Text

Edit entered text and use menu commands to cut, copy, and paste text within or across applications. Some applications do not support editing some or all of the text they display; others may offer their own way to select text.

Entering Numbers, Symbols, and Special Characters

To enter numbers and symbols:
• Touch and hold one of the top-row keys until a menu appears then select a number or special character.
• Touch the Shift key once for a single capital letter. Touch the Shift key twice to lock in uppercase. Touch the Shift key a third time to unlock Capslock.
• Touch ?123 to switch to the numbers and symbols keyboard.
• Touch the ≡ key on the numbers and symbols keyboard to view additional symbols.

To enter special characters, touch and hold a number or symbol key to open a menu of additional symbols. A larger version of the key displays briefly over the keyboard.

Keyboard Configuration

Enabling Keyboards

To enable keyboards:
1. Swipe down from the Status bar to open the Quick Settings bar and then touch 📲.
2. Touch System > Languages & input > Virtual keyboard > Manage keyboards.
3. Touch a keyboard to enable.

Switching Between Keyboards

To switch between keyboards, touch in a text box to display the current keyboard.
• On the Android or Gboard keyboards, touch and hold 📲.
• On the Enterprise keyboard, touch 📲.
Do Not Disturb Feature

This mode mutes the device so that it does not make sounds or vibrate.

For example, use Do Not Disturb to:

• Automatically limit sounds at night or during events
• Mute interruptions other than alarms
• Get alerted to messages only from favorite contacts.

Limit Sounds and Vibrations

Mute the device completely, or let through the important alarms or important calls.

Total Silence

To completely mute the device so that it does not make a sound or vibrate, choose Total silence.

In Total silence mode:

• Alarms do not make noise.
• Device does not vibrate or make sounds when receiving a message, or notification.
• Sounds from music, videos, games, and other media are muted.

NOTE: All alarms are silenced in Total silence mode.

1. Swipe down with two fingers from the Status bar to open the Quick Access panel.
2. Touch Do not disturb > Total silence.
3. Choose Until you turn it off or select a time period.
4. Touch Done.

When Total Silence is on, appears in the quick access panel and the Status bar.

To turn off Total Silence, open quick access panel and touch Total silence.

Alarms Only

To mute the device so that you hear alarms, choose Alarms only. This option does not mute sounds from music, videos, games, or other media.

1. Swipe down with two fingers from the status bar to open the quick access panel.
2. Touch Do not disturb > Alarms only.
3. Choose Until you turn it off or select a time period.
4. Touch Done.

When Alarms Only is on, appears in the quick access panel and the Status Bar.

To turn off Alarms Only, open the Quick Access panel and touch Alarms only.
NOTE: To quickly turn on Alarms Only, with the screen on, press and hold the Volume Down button until the volume is all the way down. Then, press Volume Down again to turn on Alarms Only.

To turn off Alarms Only, press either the Volume Up or Volume Down button and the touch END NOW in the alert message.

Automatically Block Sounds and Vibrations

Automatically silence the device during certain times or events, turn sounds back on, and override Do Not Disturb mode.

Silence Sounds During Certain Times

To automatically silence the device during certain times, like at night or on weekends:

1. Swipe down from the Status bar to open the Quick Settings bar and then touch 🕒.
2. Touch Sound > Do Not Disturb preferences.
3. Touch a default Weekend or Weeknight. Or, to make a new rule, touch Add more > Time rule.
4. Enter a rule name.
5. Touch OK.
6. Edit the new rule:
   • Rule name - Rename the rule.
   • Days, Start time, and End time - Set the rule's schedule.
   • Do Not Disturb preferences - Choose whether the rule uses Alarms only, Priority only, or Total silence.
   • Alarm can override end time - Allow the alarm to continue to make sound until the next alarm begins.
7. Touch the On/Off switch at the top to turn on the rule.

Silence Sounds During Events and Meetings

To automatically silence the device during events or meetings, set an event rules.

1. Swipe down from the Status bar to open the Quick Settings bar and then touch 🕒.
2. Touch Sound > Do Not Disturb preferences.
3. To edit the default rule, touch Event. Or, to create a new rule, touch Add rule > Event rule.
4. Edit the rule settings.
   • Rule name - Rename the rule.
   • During events for - Select which Google Calendar events the rule uses.
   • Where reply is - Set to: Yes, Maybe, or Not replied, Yes or Maybe, or Yes.
   • Do Not Disturb preferences - Choose whether the rule uses Priority only, Alarms only, or Total silence.
5. Touch the On/Off switch at the top to turn on the rule.
Turn Sounds Back On

When the device is in Do Not Disturb mode, Alarms only or Priority only display as 📣, or Total silence displays as 🗞.

To turn off Do Not Disturb, either:

- In the Quick Access panel, touch Alarms only, Priority only, or Total silence.
- Press the Volume Down button and touch End Now.

Override Do Not Disturb for Specific Apps

To let through notifications from specific apps:

1. Swipe down from the Status bar to open the Quick Settings bar and then touch 📣.
2. Touch Apps & notifications > Notifications > App notifications.
3. Touch an app.
4. Touch Override Do Not Disturb.

Apps

The APPS screen displays icons for all installed apps. The table below lists the apps installed on the device. Refer to the device Integrator Guide for Android Version 8.1 for information on installing and uninstalling apps.

**Accessing Apps**

All apps installed on the device are accessed using the **APPS** window.

1. On the Home screen, swipe up from the bottom of the screen.

**Figure 29  APPS Window Example**

![APPS Window Example](image)

Slide the **APPS** window up or down to view more app icons. Touch an icon to open the app.

**Switching Between Recent Apps**

To switch between recent apps:

1. Touch □. A window appears on the screen with icons of recently used apps.
2. Slide the apps displayed up and down to view all recently used apps.
3. Swipe left or right to remove app from the list and force close the app.
4. Touch an icon to open an app or touch \( \leftarrow \) to return to the current screen.

**Un-Locking the Screen**

Use the Lock screen to protect access to data on the device. Some email accounts require locking the screen. Refer to the device Integrator Guide for information on setting up the locking feature.

When locked, a pattern, PIN, or password is required to unlock the device. Press the Power button to lock the screen. The device also locks after a pre-defined time-out.

Press and release the Power button to wake the device. The Lock screen displays. Swipe the screen up to unlock. If the Pattern screen unlock feature is enabled, the Pattern screen appears instead of the Lock screen. If the PIN or Password screen unlock feature is enabled, enter the PIN or password after unlocking the screen.
Figure 31  Lock Screen

Figure 32  PIN Screen
Resetting the Device

There are two reset functions, soft reset and hard reset.
Performing a Soft Reset

Perform a soft reset if applications stop responding.

1. Press and hold the Power button until the menu appears.
2. Touch Reset.
3. The device reboots.

Performing a Hard Reset

⚠️ CAUTION: Performing a hard reset with a microSD card installed in the device may cause damage or data corruption to the microSD card. All un-saved data is lost after performing a hard reset.

Perform a hard reset if the device stops responding.

1. Simultaneously press and hold the Power button, the PTT button, and the Volume Up button for at least four seconds.
2. When the screen turns off, release the buttons.
   The device reboots.

Suspend Mode

The device goes into suspend mode when you press the Power button or after a period of inactivity (set in the Display settings window).

To wake the device from Suspend mode, press the Power button. The Lock screen displays. Swipe the screen up to unlock. If the Pattern screen unlock feature is enabled, the Pattern screen appears instead of the Lock screen. If the PIN or Password screen unlock feature is enabled, enter the PIN or password after unlocking the screen. See Un-Locking the Screen.

NOTE: If you enter the PIN, password, or pattern incorrectly five times, you must wait 30 seconds before trying again.
If you forget the PIN, password, or pattern contact your system administrator.

Transferring Files with a Host Computer via USB

Connect the device to a host computer using a USB cable or a USB cradle to transfer files between the device and the host computer.

When connecting the device to a host computer, follow the host computer’s instructions for connecting and disconnecting USB devices, to avoid damaging or corrupting files.

Transferring Files

NOTE: Use Transfer files to copy files between the device (internal memory or microSD card) and the host computer.

1. Connect a USB cable between the device and a host computerto the device or place the device into a USB cradle.
2. Pull down the Notification panel and touch **USB charging this device**. By default, **Charge this device** is selected.

**Figure 35** Use USB to Dialog Box

3. Touch **Transfer files**.

**NOTE:** After you change the setting to **Transfer files**, and then disconnect the USB cable, the setting reverts back to **Charge this device**. If the USB cable is reconnected, select **Transfer files** again.

4. On the host computer, open a file explorer application.

5. Locate the **device** as a portable device.

6. Open the **SD card** or the **Internal storage** folder.

7. Copy files to and from the device or delete files as required.

**Transferring Photos**

To transfer photos using Photo Transfer Protocol:

**NOTE:** Use Photo Transfer Protocol (PTP) to copy photos from either the microSD card or internal memory to the host computer.

1. Connect USB cable to the device or place the device into a USB cradle. See **Accessories** for setup information.

2. Pull down the Notification panel and touch **USB charging this device**.

3. Touch **Transfer photos (PTP)**.

4. On the host computer, open a file explorer application.

5. Open the **SD card** or the **Internal storage** folder.

6. Copy or delete photos as required.

**Disconnect from the Host Computer**

To disconnect the device from the host computer:

**CAUTION:** Carefully follow the host computer’s instructions to unmount the microSD card and disconnect USB devices correctly to avoid losing information.
1. On the host computer, unmount the device.
2. Remove the USB from the device or remove the device from the cradle.
Applications

Introduction

This section describes the applications installed on the device.

ActiveEdge Touch Zone

The ActiveEdge Touch Zone app provides configurable settings which enable quick and convenient one-touch access to key features or apps while using other apps.

NOTE: The ActiveEdge Touch Zone is only available when the display is set to Portrait mode.

Configuring ActiveEdge

Figure 36  ActiveEdge App Settings

To configure ActiveEdge, swipe up from the bottom of the Home screen and touch 📲.
• **Start or Stop ActiveEdge Service** - Touch to start/stop the ActiveEdge service to enable/disable the ActiveEdge Zone.

• **Start ActiveEdge Service on Boot Up** - Automatically start the ActiveEdge service when the device boots up. The service is always running and available.

• **Left ActiveEdge Zone** - Configure the left ActiveEdge Zone to **Scanner**, **Drawer**, or **None**.

• **Right ActiveEdge Zone** - Configure the right ActiveEdge Zone to **Scanner**, **Drawer**, or **None**.

**Figure 37  Left and Right ActiveEdge Zones**

• **Select Apps for Drawer** - Select up to three apps to appear in the drawer. See **Selecting Apps for a Drawer** on page 81.

• **Restore** - Restore the settings to the factory defaults.

• **About ActiveEdge** - Open the **About ActiveEdge** window to display the version number. Select > About.

### Selecting Apps for a Drawer

When the **Left ActiveEdge Zone** or the **Right ActiveEdge Zone** is set to **Drawer**, select up to three apps to display in the drawer.

To select which apps display in the drawer:

1. Touch **Select Apps for Drawer**.
2. Touch : > Select Apps.

3. Choose up to three apps to appear in the Drawer.

NOTE: Configure the Left ActiveEdge Zone and the Right ActiveEdge Zone to any combination of Scanner, Drawer, or None, except that both zones cannot be set to Drawer.

4. Touch 🔔.
Using ActiveEdge

Once configured, soft keys near the perimeter of the display provide access to those frequently used apps or tasks.

**Figure 41**  ActiveEdge Touch Zone Soft Key

When a soft key is set to Scanner, touch and hold the soft key to scan a barcode.

**Figure 42**  Left ActiveEdge Zone set to Scanner

When a soft key is set to **Drawer**, touch the soft key to open the drawer and then select an app.
Figure 43  Right ActiveEdge Zone set to Drawer

When the app is selected, the drawer automatically closes.

Battery Manager

The Battery Manager provides detailed information about the battery.

To open Battery Manager, swipe up from the bottom of the Home screen and touch .
- **Battery level** - The current battery charge level as a percentage. Displays -% when level is unknown.
- **Time until full** - The amount of time until the battery is fully charged.
- **Time since charging** - The amount of time since the device began charging.
- **Time until empty** - The amount of time until the battery is empty.
- **Battery status**
  - **Not charging** - The device is not connected to AC power.
  - **Charging over AC** - The device is connected to AC power and charging.
  - **Charging over USB** - The device is connected to a host computer with a USB cable and charging.
  - **Discharging** - That the battery is discharging.
  - **Full** - That the battery is fully charged.
  - **Unknown** - The battery status is unknown.

</table>
• **Battery health** - The health of the battery. If a critical error occurs,⚠ appears. Touch to view the error description.
  - **Decommission** - The battery is past its useful life and should be replaced. See system administrator.
  - **Good** - The battery is good.
  - **Charge error** - An error occurred while charging. See system administrator.
  - **Over Current** - An over-current condition occurred. See system administrator.
  - **Dead** - The battery has no charge. Replace the battery.
  - **Over Voltage** - An over-voltage condition occurred. See system administrator.
  - **Below Temperature** - The battery temperature is below the operating temperature. See system administrator.
  - **Failure Detected** - A failure has been detected in the battery. See system administrator.
  - **Unknown** - See system administrator.
• **Wear level** - The health of the battery in graphical form. When the wear level exceeds 80%, the bar color changes to red.
• **Advanced info** - Touch to view additional battery information.
  - **Battery present status** - Indicates that the battery is present.
  - **Battery level** - The battery charge level as a percentage of scale.
  - **Battery scale** - The battery scale level used to determine battery level (100).
  - **Battery voltage** - The current battery voltage in millivolts.
  - **Battery temperature** - The current battery temperature in degrees Centigrade.
  - **Battery technology** - The type of battery.
  - **Battery current** - The average current into or out of the battery over the last second in mAh.
  - **Battery manufacture date** - The date of manufacture.
  - **Battery serial number** - The battery serial number. The number matches the serial number printed on the battery label.
  - **Battery part number** - The battery part number.
  - **Battery rated capacity** - Lists the rated capacity of the backup battery in mAh.
  - **Battery decommission status** - Indicates if the battery is past its life span.
    - **Battery Good** - The battery is in good health.
    - **Decommissioned Battery** - The battery is past its useful life and should be replaced.
  - **Base cumulative charge** - Cumulative charge using Zebra charging equipment only.
  - **Battery present capacity** - Maximum amount of charge that could be pulled from the battery under the present discharge conditions if the battery were fully charged.
  - **Battery health percentage** - With a range from 0 to 100, this is the ratio of “present_capacity” to “design_capacity” at a discharge rate of “design_capacity”.
  - **% decommission threshold** - The default % decommission threshold for a gifted battery as 80%.
  - **Battery present charge** - Amount of usable charge remaining in the battery at present under the current discharge conditions.
  - **Battery total cumulative charge** - The total accumulated charge in all chargers.
  - **Battery time since first use** - The time passed since the battery was placed in a Zebra terminal for the first time.
  - **Battery error status** - The error status of the battery.
  - **App version** - The application version number.
Camera

This section provides information for taking photos and recording videos using the integrated digital cameras.

**NOTE:** The device saves photos and videos on the microSD card, if installed and the storage path is changed manually. By default, or if a microSD card is not installed, the device saves photos and videos on the internal storage.

**NOTE:** Front camera is optional.

**Taking Photos**

**NOTE:** See Photo Settings for camera setting descriptions.

1. Swipe up from the bottom of the Home screen and touch **Camera**.

2. If necessary, touch the Camera Mode icon and touch 📸.

3. To switch between the rear camera and front camera (if available), touch 📸.
4. Frame the subject on the screen.
5. To zoom in or out, press two fingers on the display and pinch or expand fingers. The zoom controls appear on the screen.
6. Touch an area on the screen to focus. The focus circle appears. The two bars turn green when in focus.
7. Touch 📷.
   The camera takes a photo and a shutter sound plays.
   The photo momentarily displays as a thumbnail in the lower left corner.

Taking a Panoramic Photo

Panorama mode creates a single wide image by panning slowly across a scene.
1. Swipe up from the bottom of the Home screen and touch Camera.

Figure 46  Panoramic Mode

2. Touch the Camera Mode icon and touch 📷.
3. Frame one side of the scene to capture.
4. Touch 📷 and slowly pan across the area to capture. A small white square appears inside the button indicating the capture is in progress.
   If you are panning too quickly, the message Too fast appears.
5. Touch 📷 to end the shot. The panorama appears immediately and a progress indicator displays while it saves the image.
Recording Videos

1. Swipe up from the bottom of the Home screen and touch Camera.

2. Touch the camera mode menu and touch 📹.

3. To switch between the rear camera and front camera (if available), touch 📷.

4. Point the camera and frame the scene.

5. To zoom in or out, press two fingers on the display and pinch or expand fingers. The zoom controls appear on the screen.

6. Touch 🎥 to start recording.
   The video time remaining appears in the top left of the screen.

7. Touch ✖️ to the end recording.
   The video momentarily displays as a thumbnail in the lower left corner.
Photo Settings

In Photo mode, photo settings appear on screen. Touch 📷 to display the photo settings options.

Front Camera

- GPS location - Add GPS location information to the photo meta-data. Options: On or Off (default).
- Picture size - Set the size (in pixels) of the photo to: 1.3M pixels (default), HD720, 1M pixels, WVGA, VGA, or QVGA.
- Picture quality - Set picture quality setting to: Low, Standard (default) or High.
- Countdown timer - Set to: Off (default), 2 seconds, 5 seconds or 10 seconds.
- Storage – Set location to store the photo to: Phone or SD Card.
- Face Detection - Select to turn face detection Off (default) or On.

Rear Camera

- Flash - Select whether the camera relies on its light meter to decide whether a flash is necessary, or to turn it on or off for all shots.
  - ✈ Off - Disable flash.
  - ✈ AUTO Auto - Adjust flash automatically depending upon light meter (default).
  - ✈ On - Enable flash upon taking a photo.
  - ✈ Torch - Turn flash on continuously.
- GPS location - Turn On or Off (default).
- Picture size - The size (in pixels) of the photo to: 13M pixels (default), 8M pixels, 5M pixels, 3M pixels, HD 1080, 2M pixels, 1.3M pixels, HD720, 1M pixels, WVGA, VGA, or QVGA.
- Picture quality - Set the picture quality setting to: Low, Standard (default) or High.
- Countdown timer - Select Off (default), 2 seconds, 5 seconds or 10 seconds.
- Storage – Set the location to store the photo to: Phone or SD Card.
- Face Detection - Select to turn face detection Off (default) or On.
- Exposure - Set the exposure settings to: +2, +1, 0 (default), -1 or -2.
- White balance - Select how the camera adjusts colors in different kinds of light, to achieve the most natural-looking colors:
  - 🕯️ Incandescent - Adjust the white balance for incandescent lighting.
  - ⬆️ Fluorescent - Adjust the white balance for florescent lighting.
  - ⬆️ AUTO Auto - Adjust the white balance automatically (default).
  - 🌞 Daylight - Adjust the white balance for daylight.
  - 🌂 Cloudy - Adjust the white balance for a cloudy environment.
- Focus mode - Touch to select the camera focus setting. Options: Auto, Infinity, Macro or CAF (Continuous Auto Focus) (default). ZSL option must be set to Off.
- ZSL - Set the camera to immediately take a picture when the button is pressed (default – enabled).
Video Settings

In Video mode, video settings appear on screen. Touch 📹 to display the video settings options.

Front Camera

- **Video quality** - Set video quality to: **HD 720p** (default), or **SD 480p**.
- **Video duration** - Set to: **30 seconds (MMS)** or **30 minutes** (default).
- **GPS location** - Turn **On** or **Off** (default).
- **Storage** – Set the location to store the photo to: **Phone** (default) or **SD Card**.

Rear Camera

- **Flash** - Select whether Rear-facing Camera relies on its light meter to decide whether a flash is necessary, or to turn it on or off for all shots.
  - ✕ **Off** - Disable flash (default).
  - 🕯 **Torch** - Turn flash on continuously.
- **Video quality** - Set video quality to: **HD 1080p** (default), **HD 720p**, **SD 480p**.
- **Video duration** - Set to: **30 seconds (MMS)**, or **30 minutes** (default).
- **Storage** – Set the location to store the photo to: **Phone** (default) or **SD Card**.
- **White balance** - Select how the camera adjusts colors in different kinds of light, to achieve the most natural-looking colors.
  - 🕜 **Incandescent** - Adjust the white balance for incandescent lighting.
  - 💡 **Fluorescent** - Adjust the white balance for florescent lighting.
  - 🕱 **Auto** - Adjust the white balance automatically (default).
  - ☀ **Daylight** - Adjust the white balance for daylight.
  - 🌄 **Cloudy** - Adjust the white balance for a cloudy environment.

Contacts

Use the **Contacts** app to manage contacts.

From a Home or Apps screen, touch **Contacts** to open to the main list of contacts. Contacts are listed in alphabetical order. Swipe up or down to scroll through the list.

Adding a Contact

1. In the **Contacts** app, touch 📞.
2. If there is more than one account with contacts, touch the one you want to use.
3. Type the contact’s name and other information. Touch a field to start typing, and swipe down to view all categories.
4. To open a menu with preset labels, such as Home or Work for an email address, touch the label to the right of the item of contact information. Or, to create your own label, touch Custom in the menu.

5. Touch the check mark next to Add New Contact.

Editing Contacts

1. In the Contacts app, touch a contact name to edit.
2. Touch ☑.
3. Edit the contact information.
4. Touch SAVE.

Deleting Contacts

1. In the Contacts app, touch a contact name to delete.
2. Touch ☐.
3. Touch Delete.
4. Touch DELETE to confirm.
Device Central displays detailed information about the device and connected peripherals and supports the following Zebra devices:

- RS507/RS507X Hands-free Imager
- RS6000 Bluetooth Ring Scanner
- RS5000 Corded Ring Scanner
- HS3100 Bluetooth Headset
- DS3678 Digital Scanner.

Device Central features include:

- Discovering and pairing with supported peripherals via Bluetooth or corded connection.
- Paging a connected RS6000 Ring Scanner.
- Updating the firmware of supported ring scanners. Refer to the RS5000 Quick Start Guide or RS6000 User Guide for more information.
- Displaying the connection status of peripherals.
- Displaying information for a connected peripheral in the notification bar.

Figure 48  Device Central Screen
Device Central Tabs

- **Peripherals Tab** - displays all currently connected and previously connected peripherals. Connected peripherals display the length of time (in minutes) that they have been connected. When an RS6000 is connected the **Page** button displays. See Paging an RS6000 Ring Scanner.

Touch the peripheral information to display the **Device Details** screen.

- **Device Details** - displays detailed device information for the selected peripheral.
- **My Device** Tab - displays information about the device and the current version of Device Central.
  - **Device Details** - displays the **Phone status** screen.
  - **Device Battery Details** - displays the **Battery** screen.

**Figure 49**  Peripherals Tab
Paging an RS6000 Ring Scanner

Use **Page** button to easily locate the currently connected RS6000 Ring Scanner:

1. With the RS6000 Ring Scanner connected, swipe up from the bottom of the Home screen, and touch 📲.

   **NOTE:** The RS6000 Ring Scanner must be within 10 m (32 ft) of the device.

2. Under the RS6000 peripheral information, touch **Page** to page the RS6000. The paged RS6000 beeps and vibrates.

---

**Figure 50** Page RS6000

![Device Central](image_url)
To stop paging, press the scan trigger of the RS6000. On a triggerless RS6000, reset the RS6000 to stop paging. Refer to the RS6000 User Guide.

**DataWedge Demonstration**

**NOTE:** DataWedge is disabled on the Home screen. To enable this feature, go to the DataWedge settings and enable Barcode input option. Disables the **Launcher** profile.

Use **DataWedge Demonstration** to demonstrate data capture functionality.
Figure 51  DataWedge Demonstration Window

</tr>
</tbody>
</table>
Figure 56  Battery Subsystem Details

**Settings**

By default only the Battery and System tests are enabled. To enable other tests:

1. Touch ➞ Settings.
2. Touch to the left of the test name. A green box with a checkmark appears.
3. Touch SAVE.
4. Touch Yes to confirm.
5. Touch ◀.

**Battery Test Information**

The Battery Test obtains the following information:

- **Battery Level** - Current battery charge level
- **Battery Voltage** - Current battery voltage
- **Status** - Whether the battery is charging (on AC power) or discharging (on battery power)
- **Power Source** - Whether the device is receiving power from the battery or from an external source
- **Temperature** - Current battery temperature
- **Health Percentage** - Indicates the ratio of present capacity to design capacity at a discharge rate of design capacity.
- **Backup Battery Voltage** - Backup battery voltage.
- **Manufacture Date** - Manufacture date of the battery.
GPS Test Information

Not supported on this device.

System Test Information

Use the System Test to determine if the CPU or memory loads are too high, there are too many processes running on the device, or storage on the device is almost full.

The System Test obtains the following information:
- **CPU Load** - Amount of CPU being used
- **Free Physical Memory** - Amount of RAM available
- **Free Storage** - Amount of internal Flash memory available
- **Process Count** - Number of processes currently running.

WLAN Test Information

If the WiFi radio is not present or disabled, skip this test. This test determines if the device's WLAN configuration is correct or whether there is any connection with an access point or network.

The WLAN test obtains the following information:
- **WLAN Enabled** - WLAN radio is enabled or disabled
- **WLAN Status** - Current status of association with the access point
- **ESSID** - Name of the wireless network
- **BSSID** - MAC address of the connected access point
- **MAC Address** - Device's MAC address
- **Signal** - Strength of the Wi-Fi signal (in dBm)
- **IP Address** - IP address of the device.

WWAN Test Information

Not supported on this device.

Bluetooth Test Information

The Bluetooth Test obtains the following information:
- **Enabled** - Whether the Bluetooth radio is enabled or disabled
- **Status** - Whether the device is paired to another Bluetooth device
- **Connectable/Discoverable** - Whether the device is discoverable or able to connect
- **Address** - Bluetooth radio MAC address
- **Name** - Bluetooth name for the device.
Files

Use the Files app to view and manage files on the device.

To open Files, swipe up from the bottom of the screen and touch 📞.

**Figure 57** Files Screen

- Touch and hold an item to open the File Operations menu. Select an option:
  - Share the file with other devices.
  - Delete the file.
  - View additional options.
  - Open with - Select which app is used to open the file.
  - Select all - Select all folders and files.
  - Copy to... - Copy the file.
  - Move to... - Move the file or folder to a new location.
- **Compress** - Compress the selected file(s) into a ZIP file.
- **Rename** - Rename the file.
- Touch the Sort drop-down to sort files by name, type, size, or date.
- - View all file locations.
- - Search for a specific file on the device.
- - Change the folder to display items as a list / grid.
- - Open the options menu.
- **New Window** - Create a new Files window.
- **New Folder** - Create a new folder.
- **Select all** - Select all folders and files.
- **Show/Hide internal storage** - Show or hide internal storage.
**Gallery**

**NOTE:** The device supports the following image formats: jpeg, gif, png and bmp. The device supports the following video formats: H.263, H.264 and MPEG4 Simple Profile. Available on device with AOSP only.

Use Gallery to:

- View photos
- Play videos
- Perform basic editing of photos
- Set photos as wallpaper
- Set photos as a contact photo
- Share photos and videos.

**Gallery** presents all photos and videos stored on the microSD card and internal memory.

To open **Gallery**, swipe up from the bottom of the Home screen and touch **Gallery**, or in the camera app touch the thumbnail image at the bottom left.

By default, **Gallery** opens to the **Timeline** view.

**Figure 58** Gallery - Timeline View

Touch ☰ > **Albums** to view photos sorted by albums or ☰ > **Videos** to view only videos.
• Touch an album to open it and view its contents. The photos and videos in the album are displayed in chronological order.
• Touch a photo or video in an album to view it.
• Touch ➞ > Timeline to return to the default Gallery screen.

Working with Albums

Albums are groups of images and videos in folders. Touch an album to open it. The photos and videos are listed in a chronologically ordered grid. The name of the album displays at the top of the screen.
Figure 60  Photos Inside an Album

Swipe up or down to scroll through the images.
Sharing an Album

1. Swipe up from the bottom of the Home screen and touch **Gallery**.
2. Touch and hold an album to highlight it.
3. Touch other albums as required.
5. Touch the app to use to share the selected albums.
6. Follow the instructions within the selected app.

Getting Album Information

1. Swipe up from the bottom of the Home screen and touch **Gallery**.
2. Touch and hold an album to highlight it.
3. Touch ⚙.
4. Touch **Details**.

Deleting an Album

To delete an album and its contents:
1. Swipe up from the bottom of the Home screen and touch **Gallery**.
2. Touch and hold an album to highlight it.
3. Check other albums to delete.
4. Touch 🗑.
5. In the **Delete selected item?** menu, touch **OK** to delete the album.

Working with Photos

Use **Gallery** to view photos on the device and edit and share photos.

Viewing and Browsing Photos

To view a photo:
1. Swipe up from the bottom of the Home screen and touch **Gallery**.
2. Touch an album to open it.
3. Touch a photo.
4. Swipe left or right to view the next or previous photo in the album.

5. Turn the device to view the photo in upright (portrait) or sideways (landscape) orientation. The photo is displayed (but not saved) in the new orientation.

6. Touch the photo to view the controls.

7. Double-tap the screen to zoom in or pinch two fingers together or spread them apart to zoom in or out.

8. Drag the photo to view parts that are not in view.

**Cropping a Photo**

1. In **Gallery**, touch a photo to view the controls.

2. Touch ✒️ > ✏️ > 📷. The cropping tool appears.

3. Use the cropping tool to select the portion of the photo to crop.
   • Drag from the inside of the cropping tool to move it.
   • Drag an edge of the cropping tool to resize it to any proportion.
4. Touch ✓ > SAVE to save a copy of the cropped photo. The original version is retained.

**Setting a Photo as a Contact Icon**

1. Swipe up from the bottom of the Home screen and touch **Gallery**.
2. Touch an album to open it.
3. Touch a photo to open it.
4. Touch 🔍.
5. Touch **Set picture as**.
6. Touch **Contact photo**.
7. In **Contacts**, touch a contact.
8. Touch the white box and crop the photo accordingly.
9. Touch **SAVE**.

**Sharing a Photo**

1. Swipe up from the bottom of the Home screen and touch **Gallery**.
2. Touch an album to open it.
3. Touch a photo to open it.
4. Touch ⬅️.
5. Touch the app to use to share the selected photo.
6. Follow the instructions within the selected app.
Deleting a Photo

1. Swipe up from the bottom of the Home screen and touch Gallery.
2. Touch an album to open it.
3. Touch a photo to open it.
4. Touch .
5. Touch OK to delete the photo.

Working with Videos

Use Gallery to view and share videos.

Watching Videos

1. Swipe up from the bottom of the Home screen and touch Gallery.
2. Touch an album to open it.
3. Touch a video.
4. Touch to play.
5. Touch the screen to view the playback controls.

Sharing a Video

1. Swipe up from the bottom of the Home screen and touch Gallery.
2. Touch an album to open it.
3. Touch a video to open it.
5. Touch the app to use to share the selected video.
6. Follow the instructions within the selected app.

Deleting a Video

1. Swipe up from the bottom of the Home screen and touch Gallery.
2. Touch an album to open it.
3. Touch a video to open it.
4. Touch .
5. Touch OK.
Photos

NOTE: The device supports the following image formats: jpeg, gif, png, and bmp.
The device supports the following video formats: H.263, H.264, and MPEG4 Simple Profile.
Available on device with GMS only.

Use Photos to:

• View photos
• Play videos
• Perform basic editing of photos
• Set photos as wallpaper
• Set photos as a contact photo
• Share photos and videos.

Photos presents all photos and videos stored on the microSD card and internal memory.

To open Photos, swipe up from the bottom of the Home screen and touch Photos.
By default, Photos opens to the photos view.

Figure 63   Photos View

Touch Albums to view photos sorted by albums.
Figure 64  Albums View

- Touch an album to view its contents. The photos and videos in the album appear in chronological order.
- Touch a photo or video in an album to view it.
- Touch ← to return to the main screen.

Working with Albums

Albums are groups of images and videos in folders. Touch an album to open it. The photos and videos are listed in a chronologically ordered grid. The name of the album displays at the top of the screen.

![Photo Example](image)

3. Swipe left or right to view the next or previous photo in the album.
4. Turn the device to view the photo in upright (portrait) or sideways (landscape) orientation. The photo is displayed (but not saved) in the new orientation.
5. Touch the photo to view the controls.
6. Double-tap the screen to zoom in, or pinch two fingers together or spread them apart to zoom in or out.
7. Drag the photo to view parts that are not in view.

**Cropping a Photo**

1. Swipe up from the bottom of the Home screen and touch **Photos**.
2. Touch a photo to view the controls.
3. Touch 📷 > 📷. The cropping tool appears.

**Figure 67  Cropping Tool**

4. Use the cropping tool to select the portion of the photo to crop.
   - Drag from the inside of the cropping area to move it.
   - Drag an edge of the cropping area to resize it to any proportion.

5. Touch DONE.

6. Touch SAVE to save a copy of the cropped photo. The original version is retained.

**Setting a Photo as a Contact Icon**

1. Swipe up from the bottom of the Home screen and touch Photos.
2. Touch the photo to open it.
3. Touch 📷 > Use as.
4. Touch Contact photo.
5. In the Contacts app, touch a contact.
6. Touch the white box and crop the photo accordingly.
7. Touch Done.

**Sharing a Photo**

1. Swipe up from the bottom of the Home screen and touch Photos.
2. Touch an album to open it.
3. Touch a photo to open it.
4. Touch 🔄.
5. Touch the app to use to share the selected photo.
6. Follow the instructions within the selected app.

Deleting a Photo

1. Swipe up from the bottom of the Home screen and touch Photos.
2. Touch a photo to open it.
3. Touch 🔄.
4. Touch MOVE TO TRASH.

Working with Videos

Use Photos to view and share videos.

Watching a Video

1. Swipe up from the bottom of the Home screen and touch Photos.
2. Touch a video to play.
3. Touch the screen to view the playback controls.

Sharing a Video

1. Swipe up from the bottom of the Home screen and touch Photos.
2. Touch a video to open it.
3. Touch 🔄. The Share menu appears.
4. Touch the app to use to share the selected video.
5. Follow the instructions within the selected app.

Deleting a Video

1. Swipe up from the bottom of the Home screen and touch Photos.
2. Touch a video to open it.
3. Touch 🔄.
4. Touch MOVE TO TRASH to delete the video.
PTT Express Voice Client

NOTE: PTT Express Voice Client enables Push-To-Talk (PTT) communication between disparate enterprise devices. Leveraging existing Wireless Local Area Network (WLAN) infrastructure, PTT Express delivers simple PTT communication without requiring a voice communication server.

- **Group Call**: Press and hold the PTT (Talk) button to start communicating with other voice client users.
- **Private Response**: Double-press the PTT button to respond to the originator of the last broadcast or to make a Private Response.

PTT Audible Indicators

The following tones provide helpful cues when using the voice client.

- **Talk Tone**: Double chirp. Plays when the Talk button is depressed. This is a prompt for you to start talking.
- **Access Tone**: Single beep. Plays when another user just finished a broadcast or response. You can now initiate a Group Broadcast or Private Response.
- **Busy Tone**: Continuous tone. Plays when the Talk button is depressed and another user is already communicating on the same talkgroup. Plays after the maximum allowed talk time is reached (60 seconds).
- **Network Tone**:
  - Three increasing pitch beeps. Plays when PTT Express acquires the WLAN connection and the service is enabled.
  - Three decreasing pitch beeps. Plays when PTT Express loses the WLAN connection or the service is disabled.

PTT Notification Icons

Notification icons indicate the current state of the PTT Express Voice client.

**Table 11  PTT Express Icon Descriptions**

</tbody>
</table>
Enabling PTT Communication

1. Swipe up from the bottom of the Home screen and touch 🔔.
2. Slide the **Enable/Disable Switch** to the **ON** position. The button changes to **ON**.

Selecting a Talk Group

One of 32 Talk Groups can be selected by PTT Express users. However, only one talk group may be enabled at a time on the device. Touch one of the 32 Talk Groups. The selected Talk Group is highlighted.

PTT Communication

*NOTE:* This section describes the default PTT Express client configuration. Refer to the PTT Express V1.2 User Guide for detailed information on using the client.

**Figure 68** PTT communication may be established as a Group Call. When PTT Express is enabled, the PTT button on the left side of the device is assigned for PTT communication. When the Wired Headset is used, Group Calls can also be initiated using the headset Talk button.

Creating a Group Call

*NOTE:* When using a wired headset, use only Zebra approved wired headsets with a PTT button.

1. Press and hold the PTT button (or the Talk button on the headset) and listen for the talk tone.
   
   If you hear a busy tone, release the button and wait a moment before making another attempt. Ensure that PTT Express and the WLAN are enabled.

2. Start talking after hearing the talk tone.

*NOTE:* Holding the button for more than 60 seconds (default) drops the call, allowing others to make Group calls. Release the button when finished talking to allow others to make calls.
Responding with a Private Response

The Private Response can only be initiated once a Group Call has been established. The initial Private Response is made to the originator of the Group Call.

1. Wait for an access tone.
2. Within 10 seconds, double-press the PTT button, and listen for the talk tone.
3. If you hear a busy tone, release the button and wait a moment before making another attempt. Ensure that PTT Express and the WLAN are enabled.
4. Start talking after the talk tone plays.
5. Release the button when finished talking.

Disabling PTT Communication

1. Swipe up from the bottom of the Home screen and touch.
2. Slide the Enable/Disable Switch to the OFF position. The button changes to OFF.
3. Touch.
RxLogger

RxLogger is a comprehensive diagnostic tool that provides app and system metrics. Create custom plug-ins that work seamlessly with this tool. RxLogger diagnoses device and application issues, and tracks information for: CPU load, memory load, memory snapshots, battery consumption, power states, wireless logging, TCP dumps, Bluetooth logging, GPS logging, logcat, ANR dumps, etc. All logs and files generated are saved in flash storage on the device (internal or external).

Figure 69  RxLogger
RxLogger Utility

RxLogger Utility is a data monitoring application for viewing logs in the device while RxLogger is running. Access the logs and RxLogger Utility features in the App View or the Overlay View.

In the App View, view logs in the RxLogger Utility.

Figure 70  RxLogger Utility App View

Refer to the device Integrator Guide for detailed information on the RxLogger Utility.
SimulScan Demo

The SimulScan Demo app is an out of the box demonstration app, included on devices that support SimulScan.

The SimulScan Demo app includes the following:

- Postal, Transportation and Logistics Example - Demonstrate the Optical Character Recognition (OCR) and Optical Mark Recognition (OMR) features.
- Manufacturing Example - Demonstrate the MultiCode 20 feature.
- Demo Customization - Create a template using the Template Builder or use a default template. Test templates on the device.

Figure 71  SimulScan Demo Home Screen
Printing the Sample Forms

In order to perform the Postal, Transportation & Logistics or Manufacturing demonstrations, print the example forms stored on the device.

1. Launch SimulScan Demo application.

2. On the SimulScan Demo home screen, touch HOW TO USE THIS DEMO.

3. Scroll down and touch Export sample forms button. The device copies the forms to the \simulscan\samples folder in Internal Storage.

4. Connect the device to a computer using the USB Charging cable.

5. Copy the files from the \simulscan\samples folder in Internal Storage to the computer.

6. Print the forms.
Using the Postal, Transportation and Logistics Example

1. Print the Postal, Transportation and Logistics form. See Printing the Sample Forms.

Figure 72 Postal, Transportation and Logistics Form

2. Place the form on a flat surface.

3. On the device, launch SimulScan Demo app.

4. Touch the Menu icon in the top right corner of the screen.

5. Touch Postal, Transportation & Logistics.

6. Touch Start SimulScan.

7. Use the image control at the bottom of the screen to control the flash, audio and zoom level.
8. Position the camera over the form. Ensure that the complete border of the form is visible on the screen.

9. Hold the device steady.

10. Once the device detects the form **Tap Screen to Scan** appears on the screen.

11. Tap the screen to start the data capture. When completed, the device beeps and the data from the form displays.

**Figure 74**  Postal Data Screen

12. Touch the text boxes to correct any errors. Note: if there are too many errors, touch **Rescan** to perform the capture again.

13. Touch **Accept** to confirm the data is correct. The **Results summary** screen appears.

14. Touch **OK**.
Using the Manufacturing Example

1. Print the Manufacturing form. See Printing the Sample Forms.

Figure 75  Manufacturing Form

2. Place the form on a flat surface.

3. On the device, launch SimulScan Demo app.

4. Touch the Menu icon in the top right corner of the screen.

5. Touch Manufacturing.

6. Touch Start SimulScan.

7. Point the top of the device at the document and center the target on the document.

8. Hold the device steady.

9. The device starts the data capture. When completed, the device beeps and the data from the document displays.
Figure 76  Manufacturing Data

<table>
<thead>
<tr>
<th>Field</th>
<th>Parsed Data</th>

</tr>
<tr>
<td>Quantity</td>
<td>0000128</td>
</tr>
<tr>
<td>Serial Number</td>
<td>1SX1000114</td>
</tr>
</tbody>
</table>

10. Touch the text boxes to correct any errors. If there are too many errors, touch Rescan to perform the capture again.

11. Touch Accept to confirm the data is correct. The Results summary screen appears.

12. Touch OK.

Settings

To set the settings for the SimulScan Demo application touch Menu icon > Settings.

Figure 77  Settings Screen

- **Volume** - Toggle switch to turn audible notification on and off.
- **Haptic** - Toggle switch to turn vibration notification on and off.
- **Debug mode** - Toggle switch to enable or disable debug mode.
- **Template server login credentials** - enter credentials for accessing the template server.
**Advanced Settings**

Use the Advanced setting to configure data capture options. In the data capture screen, touch \[\] in the bottom right corner of the screen.

**Figure 78  Advanced Settings Screen**

- **Identification Timeout** - Set the amount of time to wait before timing out identifying the target document. Options: 2 seconds, 5 seconds, 10 seconds, 15 seconds, 20 seconds or 25 seconds.
- **Processing Timeout** - Once the target document is identified, amount of time to wait before timing out processing.
- **Audio Feedback** - Turn on or off audio feedback on successful parse.
- **Haptic Feedback** - Turn on or off haptic (vibration) feedback on successful parse.
- **LED Feedback** - Turn on or off LED feedback on successful parse.
- **Debug Mode** - If enabled, allows a session to write form capture, region images, region values, and other data to storage. Use only when directed by administrator.
- **Auto Capture** - Set to On to automatically capture forms when detected. Set to Off to manually capture forms when user taps screen or presses a trigger button.
- **Image Correction** - Turn on when document is crumpled or curved and requires advanced image correction.
- **Capture Sensitivity** - Increase sensitivity for increased document identification accuracy before processing.
- **About** - Displays the SimulScan Engine version number.
- **Quit Scanner** - Exit Advanced Settings screen.

**Creating a Demo Customization**

Before creating a customized demo, first:
• Create a template using the Template Builder tool.
• Copy a company logo and image to the device storage location.

1. Touch **Menu** icon.
2. Touch **Setup Custom Demo**.

**Figure 79**  Custom Demo Setup Screen

3. In the **Name** text box, enter a name for the custom demo that appears in the drop-down menu.
4. In the **Custom Demo Setup** text box, enter a title for the demo that appears in the demo screen title box.
5. Touch the **Image** field to select an image from the SD card.
6. Touch the **Logo** field to select the logo image from the SD card.
7. In the **Introduction** text box, enter text that appears on the demo screen.
8. In the **Header color** text box, enter the hex color value for the header.
9. In the **Icon color** text box, enter the hex color value for Menu icon and button text.
10. In the **Key Features** text box, enter text that appears in bullet format under the Key Feature heading.
11. Touch one of the **SimulScan Document Capture Template** fields to select a template
   a. **Browse external storage** - select a template loaded on the device.
   b. **Default templates** - select one of the default templates.
   c. **Select from server** - select a template from the SimulScan server.
12. Touch **Done**. The customized example appears on the screen.
13. Touch **Start SimulScan** to begin the demonstration.
Default Templates

The following templates are available:

- **Default - BankCheck.xml** – Reads the MICR E-13B font (length between 19 and 40 characters) on bank checks.
- **Default - Barcode 1.xml** – Reads a single supported bar code.
- **Default - Barcode 10.xml** – Reads up to 10 supported bar codes.
- **Default - Barcode 2.xml** – Reads two supported bar codes.
- **Default - Barcode 4.xml** – Reads up to supported four bar codes.
- **Default - Barcode 5.xml** – Reads up to supported five bar codes.
- **Default - DocCap + Optional Barcode** – Captures a full page image and decode any supported bar codes that are in the form. The captured area is the largest rectangular region in the field of view defined by the solid border or contrast of background. Any OCR or OMR content will not be decoded in this mode. The captured area is further processed to correct, de-skew and sharpen and returned as a picture.
- **Default - DocCap + Required Barcode** – Captures a full page image and decode of any supported bar codes that are present in the form. The captured area is the largest rectangular region in the field of view defined by the solid border or contrast of background. Any OCR or OMR content will not be decoded in this mode. The captured area is further processed to correct, de-skew and sharpen and returned as a picture.
- **Default - TravelDoc.xml** – Reads passport and Visa travel documents with OCR-B types A and B fonts.
- **Default - Unstructured Multi-Line** – Reads up to seven lines of text.
- **Default - Unstructured Single Line** – Reads a single line of text.

Sound Recorder

Use **Sound Recorder** to record audio messages.

Recordings are saved on the microSD card (if installed) or the internal storage and are available in the Music application (non-GMS devices) or the Play Music application (GMS devices).
Figure 80  Sound Recorder Application

Touch  to open options menu.
• **File type** - Select the file type for the recording file.
  • AMR
  • 3GPP
  • AAC
  • WAV
  • AMR-WR
  • AMR-WB-3GPP.

• **Storage location** - Select the location for the recording file.
  • Phone storage
  • SD card.
Data Capture

Introduction

The device supports data capture using:

• integrated imager
• integrated camera
• RS507 Hands-free imager
• RS6000 Bluetooth Ring Scanner
• DS3678 Digital Scanner
• LI3678 Bluetooth Linear Imager Scanner.

Imaging

The imager uses imaging technology to take a picture of a bar code, stores the resulting image in its memory, and executes state-of-the-art software decoding algorithms to extract the bar code data from the image. With a 2D imager, the device has the following features:

• Omnidirectional reading of a variety of bar code symbologies, including the most popular linear, postal, PDF417, and 2D matrix code types.
• Advanced intuitive laser aiming cross-hair and dot aiming for easy point-and-shoot operation.

Digital Camera

The device with an integrated camera based barcode scanning solution has the following features:

• Omnidirectional reading of a variety of barcode symbologies, including the most popular linear, postal, QR, PDF417, and 2D matrix code types.
• Cross-hair reticle for easy point-and-shoot operation.
• Picklist mode to decode a particular barcode from many in the field of view.

The solution uses the advanced camera technology to take a digital picture of a barcode, and executes state-of-the-art software decoding algorithms to extract the data from the image.

Linear Imager

The device with an integrated linear imager has the following features:
• Reading a variety of bar code symbologies, including the most popular 1-D code types.
• Intuitive aiming for easy point-and-shoot operation.

The imager uses imaging technology to take a picture of a bar code, stores the resulting image in its memory, and executes state-of-the-art software decoding algorithms to extract the bar code data from the image.

**Operational Modes**

The device with an integrated imager supports two modes of operation, listed below. Activate each mode by pressing the Scan button.

• **Decode Mode**: In this mode, the device attempts to locate and decode enabled barcodes within its field of view. The imager remains in this mode as long as the user holds the scan button, or until it decodes a barcode.

  **NOTE**: To enable Pick List Mode, configure in DataWedge or set in an application using an API command.

• **Pick List Mode**: This mode allows the user to selectively decode a barcode when more than one barcode is in the device’s field of view. To accomplish this, move the aiming crosshair or dot over the required barcode to decode only this barcode. This feature is ideal for pick lists containing multiple barcodes and manufacturing or transport labels containing more than one barcode type (either 1D or 2D).

  **NOTE**: To enable Basic MultiBarcode Mode, configure in DataWedge or set in an application using an API command.

• **Basic MultiBarcode Mode**: In this mode, the device attempts to locate and decode a specific number of unique barcodes within its field of view. The device remains in this mode as long as the user holds the scan button, or until it decodes all the barcodes. Available on integrated SE2100 or SE4710 imagers only.
  • The device attempts to scan the programmed number of unique barcodes (from 2 through 10).
  • If there are duplicate barcodes (same symbology type and data), only one of the duplicate barcodes is decoded and the remainder are ignored. If the label has two duplicate barcodes plus another two different barcodes, a maximum of three barcodes will be decoded from that label; one will be ignored as a duplicate.
  • Barcodes can be of multiple symbology types and still be acquired together. For example, if the specified quantity for a Basic MultiBarcode scan is four, two barcodes can be symbology type Code 128 and the other two can be symbology type Code 39.
  • If the specified number of unique barcodes is not initially in view of the device, the device will not decode any data until the device is moved to capture the additional barcode(s) or time out occurs. If the device field of view contains a number of barcodes greater than the specified quantity, the device randomly decodes barcode(s) until the specified number of unique barcodes is reached. For example, if the count is set to two and eight barcodes are in the field of view, the device decodes the first two unique barcodes it sees, returning the data in random order.
  • Basic MultiBarcode Mode does not support concatenated barcodes.

**RS507 Hands-Free Imager**

The RS507 Hands-free Imager is a wearable bar code scan solution for both 1D and 2D bar code symbologies. The scanner supports Bluetooth Human Interface Device (HID) connection to the device.
Refer to the RS507 Hands-free Imager Product Reference Guide for more information.

**RS6000 Bluetooth Ring Scanner**

The RS6000 Bluetooth Ring Scanner is a wearable barcode scan solution for both 1D and 2D barcode symbologies.

Refer to the RS6000 Bluetooth Ring Scanner Product Reference Guide for more information.

**DS3678 Digital Scanner**

The cordless DS3678 combines superior 1D and 2D omnidirectional barcode scanning performance and advanced ergonomics in a lightweight design. See the DS36X8 Product Reference Guide for more information.
LI3678 Linear Imager Scanner

The LI3678 cordless linear imager combines excellent scanning performance and advanced ergonomics to provide the best value in a lightweight scanner, ensuring comfort and ease of use for extended periods of time.

Scanning Considerations

Typically, scanning is a simple matter of aim, scan, and decode, with a few quick trial efforts to master it. However, consider the following to optimize scanning performance:

- **Range:** Scanners decode best over a particular working range — minimum and maximum distances from the barcode. This range varies according to barcode density and scanning device optics. Scan within range.
for quick and constant decodes; scanning too close or too far away prevents decodes. Move the scanner closer and further away to find the right working range for the barcodes being scanned.

- **Angle**: Scanning angle is important for quick decodes. When the illumination/flash reflects directly back into the imager, the specular reflection can blind/saturate the imager. To avoid this, scan the barcode so that the beam does not bounce directly back. Do not scan at too sharp an angle; the scanner needs to collect scattered reflections from the scan to make a successful decode. Practice quickly shows what tolerances to work within.

- Hold the device farther away for larger symbols.
- Move the device closer for symbols with bars that are close together.

**NOTE**: Scanning procedures depend on the app and device configuration. An app may use different scanning procedures from the one listed above.

### Scanning with Internal Imager

To read a barcode, a scan-enabled app is required. The device contains the DataWedge app that allows the user to enable the imager, decode the barcode data, and display the barcode content.

To scan with the internal imager:

1. Ensure that an app is open on the device and a text field is in focus (text cursor in text field).
2. Point the exit window on the top of the device at a barcode.

**Figure 85**  Imager Scanning

3. Press and hold the scan button.
   The red laser aiming pattern turns on to assist in aiming.

**NOTE**: When the device is in Picklist mode, the imager does not decode the barcode until the crosshair or aiming dot touches the barcode.

4. Ensure the barcode is within the area formed by the crosshairs in the aiming pattern. The aiming dot increases visibility in bright lighting conditions.
5. The Data Capture LED lights green and a beep sounds, by default, to indicate the barcode was decoded successfully.
6. Release the scan button.

**NOTE:** Imager decoding usually occurs instantaneously. The device repeats the steps required to take a digital picture (image) of a poor or difficult barcode as long as the scan button remains pressed.

7. The barcode content data displays in the text field.

### Scanning with Internal Camera

To read a barcode, a scan-enabled app is required. The device contains the DataWedge app that allows the user to enable the imager, decode the barcode data, and display the barcode content.

To scan with the internal camera:

**NOTE:** When capturing barcode data in poor lighting, turn on Illumination mode in the DataWedge application.

1. Ensure that an app is open on the device and a text field is in focus (text cursor in text field).
2. Point the camera exit window on the back of the device at a barcode.
3. Press and hold the scan button. By default, a preview window appears on the screen.

**NOTE:** When Picklist mode is enabled, move the device until the bar code is centered under the red target on the screen.

4. Move the device until the barcode is visible on the screen.

5. The Decode LED lights green, a beep sounds and the device vibrates, by default, to indicate the bar code was decoded successfully.

6. The captured data appears in the text field.

**Scanning with RS6000 Bluetooth Ring Scanner**

To read a barcode, a scan-enabled app is required. Devices that contain the Zebra DataWedge app allows you to enable the scanner to decode barcode data and display the barcode content.

**To scan with the RS6000:**

1. **Pair the RS6000 with the device.** See Pairing Bluetooth ScannersPairing Using Bluetooth Human Interface Device for more information.

2. **Ensure that an app is open on the device and a text field is in focus (text cursor in text field).**

3. **Point the RS6000 at a barcode.**
4. Press and hold the trigger.

The red laser aiming pattern turns on to assist in aiming. Ensure the barcode is within the area formed by the cross-hairs in the aiming pattern. The aiming dot increases visibility in bright lighting conditions.

The RS6000 LEDs light green and a beep sounds to indicate the barcode was decoded successfully. When the RS6000 is in Pick List mode, the RS6000 does not decode the barcode until the center of the crosshair touches the barcode.

5. The captured data appears in the text field.
Scanning with RS507/RS507X Hands-Free Imager

To read a barcode, a scan-enabled app is required. The device contains the DataWedge app that allows you to enable the scanner to decode barcode data and display the barcode content.

To scan with the RS507/RS507X:

1. Pair the RS507/RS507X with the device. See Pairing Using Simple Serial Interface Pairing Bluetooth Scanners or Pairing Using Bluetooth Human Interface Device for more information.

2. Ensure that an app is open on the device and a text field is in focus (text cursor in text field).

3. Point the RS507/RS507X at a barcode.

4. Press and hold the trigger.

   The red laser aiming pattern turns on to assist in aiming. Ensure the barcode is within the area formed by the cross-hairs in the aiming pattern. The aiming dot increases visibility in bright lighting conditions.

   The RS507/RS507X LEDs light green and a beep sounds to indicate the barcode was decoded successfully. When the RS507/RS507X is in Pick List mode, the RS507/RS507X does not decode the barcode until the center of the crosshair touches the barcode.
5. The captured data appears in the text field.

Scanning with the DS3608 USB Scanner or DS3678 Bluetooth Scanner

To scan with the DS3608 or DS3678:

1. Pair the scanner with the device. For more information, see Connecting a USB Scanner for the DS3608 or Pairing Bluetooth Scanners for the DS3678.
2. Ensure that an app is open on the device and a text field is in focus (text cursor in text field).
3. Point the scanner at a barcode.

4. Press and hold the trigger.

   Ensure the barcode is within the area formed by the aiming pattern. The aiming dot increases visibility in bright lighting conditions.

Figure 94  RS507/RS507X Pick List Mode with Multiple Barcodes in Aiming Pattern

Figure 95  Barcode Scanning (DS3678 shown)

Figure 96  DS3608/DS3678 Aiming Pattern
5. The captured data appears in the text field.

**Scanning with LI3678 Linear Imager**

To scan with the LI3678:

1. Pair the LI3678 with the device. See Pairing a Bluetooth Scanner on page 134 for more information.
2. Ensure that an app is open on the device and a text field is in focus (text cursor in text field).
3. Point the LI3678 at a barcode.

4. Press and hold the trigger.
5. Ensure the aiming pattern covers the barcode.

6. Upon successful decode, the scanner beeps and the LED displays a single green flash.
7. The captured data appears in the text field.

**Pairing the RS507/RS6000 Hands-Free Imager**

To connect the RS507 or RS6000 imagers to the device, use one of the following methods:

- Near Field Communication (NFC) (RS6000 only)
- Simple Serial Interface (SSI)
- Bluetooth Human Interface Device (HID) Mode.

**Pairing in SSI Mode Using Near Field Communication**

The device provides the ability to pair the RS6000 using NFC.

**NOTE:** RS6000 only.

1. Ensure that the RS6000 is in SSI mode. Refer to the RS6000 User Guide for more information.
2. Ensure that NFC is enabled on the device.
3. Align the NFC icon on the RS6000 with the NFC icon on the device battery.
   - The Status LED blinks blue indicating that the RS6000 is attempting to establish connection with the device. When connection is established, the Status LED turns off and the RS6000 emits a single string of low/high beeps.
   - A notification appears on the device screen.
   - The icon appears in the Status bar.

**Figure 100** Align NFC Antennas

The device pairs with the RS6000 and appears in the Status bar.

**NOTE:** Not all Zebra device support NFC readers and the Tap-to-Pair feature.
Pairing in HID Mode Using Near Field Communication

The device provides the ability to pair the RS6000 in HID Mode using NFC.

**NOTE:** RS6000 only.

1. Ensure that NFC is enabled on the device.
2. Ensure that Bluetooth is enabled on both devices.
3. Ensure that the Bluetooth device to discover is in discoverable mode.
4. Ensure that the two devices are within 10 meters (32.8 feet) of one another.
5. Place the RS6000 in Human Interface Device (HID) mode. If the RS6000 is already in HID mode, skip to step 6.
   a. Remove the battery from the RS6000.
   b. Press and hold the Restore key.
   c. Install the battery onto the RS6000.
   d. Keep holding the Restore key for about five seconds until a chirp is heard and the Scan LEDs flash green.
   e. Scan the bar code below to place the RS6000 in HID mode.

![Figure 101  Bluetooth HID Bar Code](image)

6. Remove the battery from the RS6000.
7. Re-install the battery into the RS6000.
8. Align the NFC icon on the RS6000 with the NFC icon on the device.

The Status LED blinks blue indicating that the RS6000 is attempting to establish connection with the device. When connection is established, the Status LED turns off and the RS6000 emits a single string of low/high beeps.

A notification appears on the device screen.

The icon appears in the Status bar.
Pairing Using Simple Serial Interface

To pair the RS507/RS6000 with the device using SSI:

1. Ensure that the two devices are within 10 meters (32.8 feet) of one another.
2. Install the battery into the RS507/RS6000.
3. On the device swipe up from the bottom of the Home screen and touch "A".
Figure 103  Bluetooth Pairing Utility

4. Using the RS507/RS6000, scan the bar code on the screen.

   The RS507/RS6000 emits a high/low/high/low beeps. The Scan LED flashes green indicating that the RS507/RS6000 is attempting to establish connection with the device. When connection is established, the Scan LED turns off and the RS507/RS6000 emits one string of low/high beeps.

   A notification appears on the device screen and the icon appears in the Status bar.

5. On the device touch .

Pairing Using Bluetooth Human Interface Device

To pair the RS507/RS6000 with the device using HID:

1. Ensure that Bluetooth is enabled on both devices.

2. Ensure that the Bluetooth device to discover is in discoverable mode.

3. Ensure that the two devices are within 10 meters (32.8 feet) of one another.

4. Place the RS507/RS6000 in Human Interface Device (HID) mode. If the RS507/RS6000 is already in HID mode, skip to step 5.
   a. Remove the battery from the RS507/RS6000.
   b. Press and hold the Restore key.
   c. Install the battery onto the RS507/RS6000.
   d. Keep holding the Restore key for about five seconds until a chirp is heard and the Scan LEDs flash green.
e. Scan the bar code below to place the RS507/RS6000 in HID mode.

**Figure 104** Bluetooth HID Bar Code

---

5. Remove the battery from the RS507/RS6000.
6. Re-install the battery into the RS507/RS6000.
7. Swipe down with two fingers from the status bar to open the quick access panel and then touch 📞.
8. Touch Bluetooth.
9. Touch **SCAN FOR DEVICES**. The device begins searching for discoverable Bluetooth devices in the area and displays them under **AVAILABLE DEVICES**.
10. Scroll through the list and select RS507/RS6000.

The device connects to the RS507/RS6000 and **Connected** appears below the device name. The Bluetooth device is added to the **Bluetooth devices** list and a trusted (“paired”) connection is established. A notification appears on the screen and the 📱 icon appears in the Status bar.

### Pairing a Bluetooth Scanner

Connect the scanner to the device using one of the following methods:

- Simple Serial Interface (SSI) mode
- Bluetooth Human Interface Device (HID) mode.

### Pairing Using Simple Serial Interface

To pair the scanner with the device using SSI:

1. Ensure that the two devices are within 10 meters (32.8 feet) of one another.
2. Install the battery into the scanner.
3. On the device swipe up from the bottom of the Home screen and touch 📱.
Figure 105  Bluetooth Pairing Utility

Please scan the Barcode to pair with this device
94:FB:29:2E:B5:AC

Please scan the Barcode to pair with this device
94:FB:29:5E:98:DB
4. Using the scanner, scan the barcode on the screen. The scanner emits a high/low/high/low beeps. The Scan LED flashes green indicating that the scanner is attempting to establish connection with the device. When connection is established, the Scan LED turns off and the scanner emits one string of low/high beeps.

5. On the device touch Bluetooth.

**Pairing Using Bluetooth Human Interface Device**

To pair the scanner with the device using HID:

1. Remove the battery from the scanner.
2. Replace the battery.
3. After the scanner reboots, scan the barcode below to place the scanner in HID mode.

![Figure 106 Bluetooth HID Classic Barcode](image)

4. On the device, swipe down from the Status bar to open the Quick Access panel and then touch Bluetooth.
5. Touch Bluetooth.
6. Touch **Pair new device**. The device begins searching for discoverable Bluetooth devices in the area and displays them under Available devices.
7. Scroll through the list and select XXXXX xxxxxx, where XXXXX is the scanner and xxxxxx is the serial number.

   The device connects to the scanner, the scanner beeps once and **Connected** appears below the device.
name. The Bluetooth device is added to the Paired devices list and a trusted ("paired") connection is established.

DataWedge

DataWedge is a utility that adds advanced barcode scanning capability to any application without writing code. It runs in the background and handles the interface to built-in barcode scanners. The captured barcode data is converted to keystrokes and sent to the target application as if it was copied and pasted, or typed on the keypad.

To configure DataWedge refer to the device Integrator Guide or Product Reference Guide.

Enabling DataWedge

1. Swipe up from the bottom of the Home screen and touch ．
2. Touch ☰ > Settings.
3. Touch the DataWedge enabled checkbox. A blue checkmark appears in the checkbox indicating that DataWedge is enabled.
4. Touch ☐ the Home button.

Disabling DataWedge

1. Swipe up from the bottom of the Home screen and touch ．
2. Touch ☰ > Settings.
3. Touch the DataWedge enabled checkbox. A blue checkmark disappears from the checkbox indicating that DataWedge is disabled.
4. Touch ☐ the Home button.
Introduction

This section provides information on the wireless features:

- Wireless Local Area Network (WLAN)
- Bluetooth
- Near Field Communications (NFC)
- Cast.

Wireless Local Area Networks

Wireless local area networks (WLANs) allow the device to communicate wirelessly inside a building. Before using the device on a WLAN, the facility must be set up with the required hardware to run the WLAN (sometimes known as infrastructure). The infrastructure and the device must both be properly configured to enable this communication.

Refer to the documentation provided with the infrastructure (access points (APs), access ports, switches, Radius servers, etc.) for instructions on how to set up the infrastructure.

Once the infrastructure is set up to enforce the chosen WLAN security scheme, use the Wireless & networks settings configure the device to match the security scheme.

The device supports the following WLAN security options:

- Open
- Wireless Equivalent Privacy (WEP)
- Wi-Fi Protected Access (WPA)/WPA2 Personal (PSK)
- Extensible Authentication Protocol (EAP).
  - EAP-FAST - with MSCHAPV2 and GTC authentication.

The Status bar displays icons that indicate Wi-Fi network availability and Wi-Fi status.

NOTE: To extend the life of the battery, turn off Wi-Fi when not in use.

Connecting to a Wi-Fi Network

To connect to a Wi-Fi network:
1. Swipe down from the Status bar to open the Quick Access panel.

**Figure 107** Quick Access Panel

![Quick Access Panel](image)

2. Touch **Wi-Fi** to open the **Wi-Fi** screen. The device searches for WLANs in the area and lists them.

**Figure 108** Wi-Fi Screen

![Wi-Fi Screen](image)

3. Scroll through the list and select the desired WLAN network.

4. For open networks, touch **profile once or press and hold and then select Connect to network** or for secure networks enter the required password or other credentials then touch **Connect**. See the system administrator for more information.

The device obtains a network address and other required information from the network using the dynamic host configuration protocol (DHCP) protocol. To configure the device with a fixed internet protocol (IP) address, Refer to the device Integrator Guide for more information.

5. In the Wi-Fi setting field, **Connected** appears indicating that the device is connected to the WLAN.
Removing a Wi-Fi Network

To remove a remembered or connected network:

1. Swipe down from the status bar to open the quick access panel and then touch ⚙.
2. Touch Network & Internet > Wi-Fi.
3. Scroll down to the bottom of the list and touch Saved networks.
4. Touch the name of the network.
5. In the dialog box, touch FORGET.
6. Touch ☑.

Bluetooth

Bluetooth devices can communicate without wires, using frequency-hopping spread spectrum (FHSS) radio frequency (RF) to transmit and receive data in the 2.4 GHz Industry Scientific and Medical (ISM) band (802.15.1). Bluetooth wireless technology is specifically designed for short-range (10 m (32.8 ft)) communication and low power consumption.

Devices with Bluetooth capabilities can exchange information (for example, files, appointments, and tasks) with other Bluetooth enabled devices such as printers, access points, and other mobile devices.

The device supports Bluetooth Low Energy. Bluetooth Low Energy is targeted at applications in the healthcare, fitness, security, and home entertainment industries. It provides reduced power consumption and cost while maintaining standard Bluetooth range.

Adaptive Frequency Hopping

Adaptive Frequency Hopping (AFH) is a method of avoiding fixed frequency interferers, and can be used with Bluetooth voice. All devices in the piconet (Bluetooth network) must be AFH-capable in order for AFH to work. There is no AFH when connecting and discovering devices. Avoid making Bluetooth connections and discoveries during critical 802.11b communications. AFH for Bluetooth consists of four main sections:

- Channel Classification - A method of detecting an interference on a channel-by-channel basis, or pre-defined channel mask.
- Link Management - Coordinates and distributes the AFH information to the rest of the Bluetooth network.
- Hop Sequence Modification - Avoids interference by selectively reducing the number of hopping channels.
- Channel Maintenance - A method for periodically re-evaluating the channels.

When AFH is enabled, the Bluetooth radio “hops around” (instead of through) the 802.11b high-rate channels. AFH coexistence allows enterprise devices to operate in any infrastructure.

The Bluetooth radio in this device operates as a Class 2 device power class. The maximum output power is 2.5 mW and the expected range is 10 m (32.8 ft). A definition of ranges based on power class is difficult to obtain due to power and device differences, and whether in open space or closed office space.

**NOTE:** It is not recommended to perform Bluetooth wireless technology inquiry when high rate 802.11b operation is required.
Security

The current Bluetooth specification defines security at the link level. Application-level security is not specified. This allows application developers to define security mechanisms tailored to their specific need. Link-level security occurs between devices, not users, while application-level security can be implemented on a per-user basis. The Bluetooth specification defines security algorithms and procedures required to authenticate devices, and if needed, encrypt the data flowing on the link between the devices. Device authentication is a mandatory feature of Bluetooth while link encryption is optional.

Pairing of Bluetooth devices is accomplished by creating an initialization key used to authenticate the devices and create a link key for them. Entering a common personal identification number (PIN) in the devices being paired generates the initialization key. The PIN is never sent over the air. By default, the Bluetooth stack responds with no key when a key is requested (it is up to user to respond to the key request event).

Authentication of Bluetooth devices is based upon a challenge-response transaction. Bluetooth allows for a PIN or passkey used to create other 128-bit keys used for security and encryption. The encryption key is derived from the link key used to authenticate the pairing devices. Also worthy of note is the limited range and fast frequency hopping of the Bluetooth radios that makes long-distance eavesdropping difficult.

Recommendations are:
- Perform pairing in a secure environment
- Keep PIN codes private and do not store the PIN codes in the device
- Implement application-level security.

Bluetooth Profiles

The device supports the Bluetooth services listed in the table below:

Table 12  Bluetooth Profiles

<table>
<thead>
<tr>
<th>Profile</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Service Discovery Protocol (SDP)</td>
<td>Handles the search for known and specific services as well as general services.</td>
</tr>
<tr>
<td>Serial Port Profile (SPP)</td>
<td>Allows use of RFCOMM protocol to emulate serial cable connection between two Bluetooth peer devices. For example, connecting the device to a printer.</td>
</tr>
<tr>
<td>Object Push Profile (OPP)</td>
<td>Allows the device to push and pull objects to and from a push server.</td>
</tr>
<tr>
<td>Advanced Audio Distribution Profile (A2DP)</td>
<td>Allows the device to stream stereo-quality audio to a wireless headset or wireless stereo speakers.</td>
</tr>
<tr>
<td>Audio/Video Remote Control Profile (AVRCP)</td>
<td>Allows the device to control A/V equipment to which a user has access. It may be used in concert with A2DP.</td>
</tr>
<tr>
<td>Personal Area Network (PAN)</td>
<td>Allows the use of Bluetooth Network Encapsulation Protocol to provide L3 networking capabilities over a Bluetooth link. Only PANU role is supported.</td>
</tr>
<tr>
<td>Human Interface Device Profile (HID)</td>
<td>Allows Bluetooth keyboards, pointing devices, gaming devices and remote monitoring devices to connect to the device.</td>
</tr>
<tr>
<td>Headset Profile (HSP)</td>
<td>Allows a hands-free device, such as a Bluetooth headset, to place and receive calls on the device.</td>
</tr>
<tr>
<td>Hands-Free Profile (HFP)</td>
<td>Allows car hands-free kits to communicate with the device in the car.</td>
</tr>
</tbody>
</table>
### Bluetooth Power States

The Bluetooth radio is off by default:

- Suspend - When the device goes into suspend mode, the Bluetooth radio stays on.
- Airplane Mode - When the device is placed in Airplane Mode, the Bluetooth radio turns off. When Airplane mode is disabled, the Bluetooth radio returns to the prior state. When in Airplane Mode, the Bluetooth radio can be turned back on if desired.

### Bluetooth Radio Power

Turn off the Bluetooth radio to save power or if entering an area with radio restrictions (for example, an airplane). When the radio is off, other Bluetooth devices cannot see or connect to the device. Turn on the Bluetooth radio to exchange information with other Bluetooth devices (within range). Communicate only with Bluetooth radios in close proximity.

**NOTE:** To achieve the best battery life, turn off radios when not in use.

#### Enabling Bluetooth

To enable Bluetooth:

1. Swipe down from the Status bar to open the Quick Access panel.
2. Touch \( \text{ } \) to turn Bluetooth on.
3. Touch \( \text{ } \).
Disabling Bluetooth

To disable Bluetooth:
1. Swipe down from the Status bar to open the Quick Access panel.
2. Touch ☑️ to turn Bluetooth off.
3. Touch ⬜️.

Discovering Bluetooth Device(s)

The device can receive information from discovered devices without pairing. However, once paired, the device and a paired device exchange information automatically when the Bluetooth radio is on. To find Bluetooth devices in the area:
1. Ensure that Bluetooth is enabled on both devices.
2. Ensure that the Bluetooth device to discover is in discoverable mode.
3. Ensure that the two devices are within 10 meters (32.8 feet) of one another.
4. Swipe down from the Status bar to open the Quick Access panel.
5. Touch Bluetooth.
6. Touch MORE SETTINGS. The Bluetooth screen appears.
7. Touch Pair new device. The device begins searching for discoverable Bluetooth devices in the area and displays them under Available devices.
8. Scroll through the list and select a device. The Bluetooth pairing request dialog box appears.
9. Touch Pair on both devices.
10. The Bluetooth device is added to the Paired devices list and a trusted ("paired") connection is established.

Changing the Bluetooth Name

By default, the device has a generic Bluetooth name that is visible to other devices when connected.
1. Swipe down from the Status bar to open the Quick Access panel and then touch 🗚.
2. Touch Connected devices > Bluetooth.
3. If Bluetooth is not on, move the switch to turn Bluetooth on.
4. Touch Device name.
5. Enter a name and touch RENAME.
6. Touch ☑️.

Connecting to a Bluetooth Device

Once paired, connect to a Bluetooth device.
1. Swipe down from the Status bar to open the Quick Access panel and then touch 🗚.
2. Touch **Connected device > Bluetooth**.

3. In the list, touch the unconnected Bluetooth device.
   When connected, **Connected** appears below the device name.

### Unpairing a Bluetooth Device

To unpair a Bluetooth device and erase all pairing information:

1. Swipe down from the Status bar to open the Quick Access panel and then touch 📡.
2. Touch **Connected devices > Bluetooth**.
3. In the **Paired Devices** list, touch ⚫ next to the device name.
4. Touch **FORGET**.
5. Touch 🔄.

### Near Field Communications

NFC/HF RFID is a short-range wireless connectivity technology standard that enables secure transaction between a reader and a contactless smartcard. The technology is based on ISO/IEC 14443 type A and B (proximity) and ISO/IEC 15693 (vicinity) standards, using the HF 13.56 MHz unlicensed band. The device support 3 operating modes:

- Reader mode
- Peer-to-Peer communication
- Card Emulation mode.

Using NFC, the device can:

- Read contactless cards such as contactless tickets, ID cards and ePassport.
- Read and write information to contactless cards such as SmartPosters and tickets, as well as devices with NFC interface such as vending machines.
- Read information from supported medical sensors.
- Pair with supported Bluetooth devices such as printers and headsets.
- Exchange data with another NFC device.
- Emulate contactless card such as payment, ticket or SmartPoster.

The device NFC antenna is uniquely positioned to read NFC cards from the top of the device while being held in the user’s hand.

### Reading NFC Cards

1. Launch an NFC enabled application.
2. Hold device as shown.

**Figure 109** Reading Cards

3. Move device close to the NFC card until the device detects the card.

4. Hold the card steadily until the transaction is complete (usually indicated by the application).

**Sharing Information Using NFC**

You can beam content like a web page, contact cards, pictures, YouTube links or location information from your screen to another device by bringing the devices together back to back.

Make sure both devices are unlocked, support NFC, and have both NFC and Android Beam turned on.

1. Open a screen that contains a web page, video, photo or contact.
2. Move the back of the device toward the back of the other device.

Figure 110  Sharing Data Using NFC

When the devices connect, you hear a sound, the image on the screen reduces in size, the message **Touch to beam** appears.

3. Touch anywhere on the screen.
   The transfer begins.

**Cast**

Use **Cast** to mirror the device screen on a Miracast enabled wireless display.

1. Swipe down from the Status bar to open the Quick Settings bar and then touch 🎉.
2. Touch **Connected Devices**.
3. Touch **Cast**.
4. Touch ☰ > **Enable wireless display**. The device searches for nearby Miracast devices and lists them.
5. Touch a device to begin casting.
6. Touch ☰.
Accessories

Introduction

This chapter provides information for using the accessories for the device.

Accessories

This table lists the accessories available for the device.

</tbody>
</table>
1-Slot USB Charge Cradle

**CAUTION:** Ensure that you follow the guidelines for battery safety described in Battery Safety Guidelines on page 189.

The 1-Slot USB Charge Cradle:
- Provides 5 VDC power for operating the device.
- Charges the device’s battery.
- Provides USB communication with host computer.

**Figure 111** 1–Slot USB Charge Cradle

### Charging the Device

To charge a device:

**NOTE:** If the device has a Rugged Boot, remove the cup insert before inserting the device. See Integrator Guide for details.

By default, the device includes an interface connector. If the interface connector is removed for USB Type C cable connectivity, then it must be replaced before charging or receiving an Ethernet IP address if placed in a cradle.

---

</table>
1. Insert the device into the slot to begin charging.

**Figure 112** Battery Charging

2. Ensure the device is seated properly.

**Inserting a Device with Rugged Boot into Cradle**

Each cradle cup has an insert that must be removed prior to inserting the device with Rugged Boot. Remove the insert and then insert the device into the cup.

**Figure 113** Remove Insert from Cup
Battery Charging

The device’s Charging/Notification LED indicates the status of the battery charging in the device. See Table 3 on page 21 for device charging status. The $15.48$ Watt hours (typical) / $4,150$ mAh battery charges from fully depleted to 90% in approximately 2.5 hours and from fully depleted to 100% in approximately three hours.

**NOTE:** In many cases the 90% charge provides plenty of charge for daily use. A full 100% charge lasts for approximately 14 hours of use.

To achieve the best fast charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the device in sleep mode.

Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.

4-Slot Charge Only Cradle with Battery Charger

**CAUTION:** Ensure that you follow the guidelines for battery safety described in Battery Safety Guidelines on page 189.

The 4-Slot Charge Only Cradle with Battery Charger:

- Provides 5 VDC power for operating the device.
- Simultaneously charges up to four devices and up to four spare batteries using the Battery Charger Adapter.
Charging the Device

To charge a device:

**NOTE:** If the device has a Rugged Boot, remove the cup insert before inserting the device. See Integrator Guide for details.

1. Insert the device into a slot to begin charging.
2. Ensure the device is seated properly.

**NOTE:** See the Integrator Guide for information on installing the 4-Slot Battery Charger onto the cradle.
Inserting a Device with Rugged Boot into Cradle

Each cradle cup has an insert that must be removed prior to inserting the device with Rugged Boot. Remove the insert and then insert the device into the cup.

Figure 117  Remove Insert from Cup

Battery Charging

Main Battery Charging

The device’s Charging/Notification LED indicates the status of the battery charging in the device. See Table 3 on page 21 for device charging status. The 4,150 mAh (typical) / 3,840 mAh (minimum) battery charges from fully depleted to 90% in approximately 2.5 hours and from fully depleted to 100% in approximately three hours.

NOTE: In many cases the 90% charge provides plenty of charge for daily use. A full 100% charge lasts for approximately 14 hours of use.

To achieve the best fast charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the device in sleep mode.

Spare Battery Charging

The Spare Battery Charging LED on the cup indicates the status of the spare battery charging. The > 15.48 Watt hours (typical) / ≥ 4,150 mAh battery charges from fully depleted to 90% in approximately 2.3 hours and from fully depleted to 100% in approximately three hours.

NOTE: In many cases the 90% charge provides plenty of charge for daily use. A full 100% charge lasts for approximately 14 hours of use.

To achieve the best fast charging results use only Zebra charging accessories and batteries.
Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.

5-Slot Charge Only Cradle

**CAUTION:** Ensure that you follow the guidelines for battery safety described in Battery Safety Guidelines on page 189.

The 5-Slot Charge Only Cradle:

- Provides 5 VDC power for operating the device.
- Simultaneously charges up to five devices.

Charging the Device

To charge a device:

**NOTE:** If the device has a Rugged Boot, remove the cup insert before inserting the device. See TC51 Touch Computer Integrator Guide for Android 8 Oreo for details.

1. Insert the device into a slot to begin charging.
2. Ensure the device is seated properly.

**NOTE:** See the TC51 Touch Computer Integrator Guide for Android 8 Oreo for information on installing the 4-Slot Battery Charger onto the cradle.

**Inserting a Device with Rugged Boot into Cradle**

Each cradle cup has an insert that must be removed prior to inserting the device with Rugged Boot. Remove the insert and then insert the device into the cup.

**Figure 120** Remove Insert from Cup
Battery Charging

Main Battery Charging

The device’s Charging/Notification LED indicates the status of the battery charging in the device. See Table 3 on page 21 for device charging status. The ≥ 15.48 Watt hours (typical) / ≥ 4,150 mAh battery charges from fully depleted to 90% in approximately 2.5 hours and from fully depleted to 100% in approximately three hours.

NOTE: In many cases the 90% charge provides plenty of charge for daily use. A full 100% charge lasts for approximately 14 hours of use.

To achieve the best fast charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the device in sleep mode.

Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.

5-Slot Ethernet Cradle

The 5-Slot Ethernet Cradle:

• Provides 5 VDC power for operating the device.
• Connects the device (up to five) to an Ethernet network.
• Simultaneously charges up to five devices.
Charging the Device

To charge a device:

NOTE: If the device has a Rugged Boot, remove the cup insert before inserting the device. See TC51 Touch Computer Integrator Guide for Android 8 Oreo for details.

1. Insert the device into a slot to begin charging.
2. Ensure the device is seated properly.

**Inserting a TC51 with Rugged Boot into Cradle**

Each cradle cup has an insert that must be removed prior to inserting the device with Rugged Boot. Remove the insert and then insert the device into the cup.

**Figure 123** Remove Insert from Cup
Battery Charging

Main Battery Charging

The device’s Charging/Notification LED indicates the status of the battery charging in the device. See Table 3 on page 21 for device charging status. The > 15.48 Watt hours (typical) / > 4,150 mAh battery charges from fully depleted to 90% in approximately 2.5 hours and from fully depleted to 100% in approximately three hours.

NOTE: In many cases the 90% charge provides plenty of charge for daily use. A full 100% charge lasts for approximately 14 hours of use.

To achieve the best fast charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the device in sleep mode.

Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.

Establishing Ethernet Connection

NOTE: Refer to the TC51 Touch Computer Integrator Guide for Android 8 Oreo for information on configuring the Ethernet settings.

1. Swipe down with two fingers from the status bar to open the quick access panel and then touch .
2. Touch Ethernet.
3. Slide the Ethernet switch to the ON position.
4. Insert the device into a slot.
   The icon appears in the Status bar.
5. Touch Eth0 to view Ethernet connection details.

LED Indicators

There are two green LEDs on the side of the cradle. These green LEDs light and blink to indicate the data transfer rate.

Table 15  LED Data Rate Indicators

4-Slot Battery Charger

**CAUTION:** Ensure that you follow the guidelines for battery safety described in Battery Safety Guidelines on page 189.

This section describes how to use the 4-Slot Battery Charger to charge up to four device batteries.

**Charging Spare Batteries**

1. Connect the charger to a power source.
2. Insert the battery into a battery charging well and gently press down on the battery to ensure proper contact.

*Figure 124 4-Slot Battery Charger*
Battery Charging

Spare Battery Charging

Figure 125   Insert Battery into Charger

Each Battery Charging LED indicates the status of the battery charging in each slot. See Table 14 on page 149 for spare battery charging indicator descriptions.

The ≥ 15.48 Watt hours (typical) / ≥ 4,150 mAh battery charges from fully depleted to 90% in approximately 2.3 hours and from fully depleted to 100% in approximately three hours.

NOTE: In many cases the 90% charge provides plenty of charge for daily use. A full 100% charge lasts for approximately 14 hours of use.

To achieve the best fast charging results use only Zebra charging accessories and batteries.

Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.

Rugged Boot

The Rugged Boot provides additional protection for the device.

Installation

To install the Rugged Boot:

1. Insert the bottom of the device into the bottom of the boot.
2. Lift the top of the Rugged Boot over the top of the device.

3. Push the device into the Rugged Boot.
Installing Stylus

To install the optional stylus:

1. Insert one of the loop ends of the tether through the hole in the stylus.
2. Feed the tether through the loop.
3. Pull the tether until the loop tightens.
4. Insert the loop into the hand strap holder.
5. Feed the stylus through the loop.

Figure 129  Install Tether to Stylus
Charging with Cradles

Before inserting the device with the Rugged Boot into the cradle cup, remove the insert from the cup.

1. Using index fingers on both hands, push the insert toward the center of the cup.

2. Lift insert out of cup.
3. Insert the device into the cradle.

Basic Hand Strap Kit

Use to Basic Hand Strap Kit to add a hand strap to the device.
Installation

To install the Basic Hand Strap Kit:

1. Remove the two rubber plugs on the back of the device.

2. Align the top cap onto the device.

3. Rotate the top cap over the top of the device.

4. Insert the tab end of the hand strap into the slot on the device.
5. Feed the tab into the cut in the strap.

6. Align the hand strap clip with the top cap.

7. Push the clip onto the top cap.

**Removal**

To remove the Basic Hand Strap Kit:

1. Using thumbs, push the top cap up and rotate over the top of the device.
Figure 140  Remove Top Cap

2. Pull the strap tab through the cut slot.

3. Pull the Hand Strap tab through the slot in the device.
2.5 mm Audio Adapter

NOTE: The Audio Adapter is available for the device standard configuration.

The 2.5 mm Audio Adapter plugs into the device and connects to a wired headset with a 2.5 mm plug.

To attach a 2.5 mm headset:
1. Open the headset jack cover.
2. Insert the 2.5 mm Audio Adapter plug into the headset jack.

Figure 141 Audio Adapter Installation

3. Insert the 2.5 mm headset plug into the jack on the Audio Adapter.

Figure 142 Connect Headset to Audio Adapter

CAUTION: After removing headset, headset jack cover must be replaced and securely seated to ensure proper device sealing.
3.5 mm Audio Adapter

NOTE: The Audio Adapter is available for the device standard configuration.

The 3.5 mm Audio Adapter plugs into the device and connects to a wired headset with a 3.5 mm plug.

To attach a 3.5 mm headset:

1. Open the headset jack cover.
2. Insert the 3.5 mm Audio Adapter plug into the headset jack.

**Figure 143** Audio Adapter Installation

3. Connect the 3.5 mm connector plug of the headset into the 3.5 mm Audio Adapter.

**Figure 144** Connect Headset to 3.5 mm Adapter Cable
CAUTION: After removing headset, headset jack cover must be replaced and securely seated to ensure proper device sealing.
Rugged Charge/USB Cable

The Rugged Charge/USB Cable snaps onto the bottom of the device and removes easily when not in use. When attached to the device allows charging and allows the device to transfer data to a host computer.

Figure 145  Rugged Charge/USB Cable

Connecting to TC51

1. Insert the device at an angle into the cable cup until the device touches the bottom of the cup.

Figure 146  Device Into Cable Cup

2. Rotate the device into the cup.
Connecting to TC51 with Rugged Boot

To connect the Rugged Charge/USB Cable to a device with a Rugged Boot:

1. Using thumb and index finger, squeeze the sides of the cup in.

2. Lift inert out of cup.
3. Align the cable cup with the bottom of the device.
4. Press the device into the cable cup until it securely in place.

**USB Communication**

To connect the device to a host computer:

1. Connect the Rugged Charge/USB Cable to the device.
2. Connect the USB connector of the cable to a host computer.

**Charging the Device**

To charge the device using the Rugged Charge/USB Cable:

1. Connect the Rugged Charge/USB Cable to the device.
2. Connect the USB connector of the power supply.
NOTE: See Power Supply on page 187 for information on setting up the power supply. By default, the device includes an interface connector. If the interface connector is removed for USB Type C cable connectivity, then it must be replaced before charging or receiving an Ethernet IP address if placed in a cradle.

3. Plug to power supply into an power outlet.

**Figure 151  Charging Using the Rugged Charge/USB Cable**

- Disconnecting the Rugged Charge/USB Cable

To disconnect the Rugged Charge/USB Cable from the device:

1. Rotate the device to one side.
2. Push the Rugged Charge/USB Cable to the other side.
3. Remove the device from the Rugged Charge/USB Cable.

Battery Charging

Main Battery Charging

The device’s Charging/Notification LED indicates the status of the battery charging in the device. See Table 3 on page 21 for device charging status. The 4,150 mAh (typical) / 3,840 mAh (minimum) battery charges from fully depleted to 90% in approximately 2.5 hours and from fully depleted to 100% in approximately three hours.

NOTE: In many cases the 90% charge provides plenty of charge for daily use. A full 100% charge lasts for approximately 14 hours of use.

To achieve the best fast charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the device in sleep mode.

Main Battery Charging

The device’s Charging/Notification LED indicates the status of the battery charging in the device.

NOTE: Charging using a host computer USB port or a power supply other than the Zebra PWR-WUA5V12W0xx could take longer. See Table 13 on page 147.

Non-Zebra power supply must provide 5 VDC @ 2.5 A.

The 4,300 mAh (typical) / 4,050 mAh (minimum) battery charges from fully depleted to 90% in approximately 2.5 hours and from fully depleted to 100% in approximately three hours.

NOTE: In many cases the 90% charge provides plenty of charge for daily use. A full 100% charge lasts for approximately
14 hours of use.

To achieve the best fast charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the device in sleep mode.

**Charging Temperature**

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.
Trigger Handle

**NOTE:** The Rugged Boot is required to install the Trigger Handle onto the device. Trigger Handle (p/n TRG-TC51-SNP1-01) does not contain the Rugged Boot and must be purchased separately. Trigger Handle Kit (p/n TRG-TC51-TRG1-01) contains the Rugged Boot.

The Trigger Handle adds a gun-style handle with a scanning trigger to the device. It increases comfort when using the device in scan-intensive applications for extended periods of time.

**NOTE:** The Trigger Handle is available for the TC51 standard configuration. It is also available for the TC51-HC configuration.

![Figure 153 Trigger Handle](image)

Installing the Rugged Boot

**NOTE:** If a Hand Strap is attached to the Rugged Boot, remove prior to installing onto device.

To install the Rugged Boot:

1. Insert the bottom of the device into the bottom of the boot.
2. Lift the top of the Rugged Boot over the top of the device.

3. Push the device into the Rugged Boot.
Installing the Optional Lanyard

To install the lanyard onto the Trigger Handle:

1. Insert the loop end of the tether into the slot on the bottom of the handle.
2. Feed the lanyard through the loop.
3. Pull the lanyard until the loop tightens.

**Inserting the Device into the Trigger Handle**

To install the device onto the Trigger handle:

1. Align and insert the flange of the Trigger Handle with the top of the Rugged Boot.

**Figure 158  Connect Device to Trigger Handle**

2. Rotate the device down and press down until it snaps into place.
Removing the Device from the Trigger Handle

To remove the device from the Trigger Handle:

1. Press Trigger Handle release latch.

2. Slide the device forward and then rotate the bottom of the device up.
Figure 161  Remove Device from Trigger Handle
Power Supply

Use the power supply with the Rugged Charge/USB Cable to charge the device. The power supply comes in various configurations with different plug adapters for use internationally. To change the plug adapters:

1. Pull the release button down.

**Figure 162**  Pull Release Button

2. Rotate the plug adapter up and out of the power supply.

**Figure 163**  Lift Plug Adapter

3. Insert the replace plug adapter into the power supply.

**Figure 164**  Insert Plug Adapter

4. Rotate the plug adapter down and snap into place.

**Figure 165**  Rotate Plug Adapter in Power Supply
Maintenance and Troubleshooting

Introduction

This chapter includes instructions on cleaning and storing the device, and provides troubleshooting solutions for potential problems during operation.

Maintaining the Device

For trouble-free service, observe the following tips when using the device:

• In order to avoid scratching the screen, use a stylus or plastic-tipped pen intended for use with a touch-sensitive screen. Never use an actual pen or pencil or other sharp object on the surface of the screen.

• The touch-sensitive screen is glass. Do not drop the device or subject it to strong impact.

• Protect the device from temperature extremes. Do not leave it on the dashboard of a car on a hot day, and keep it away from heat sources.

• Do not store the device in any location that is dusty, damp, or wet.

• Use a soft lens cloth to clean the device. If the surface of the screen becomes soiled, clean it with a soft cloth moistened with an approved cleanser. For a list of approved cleansers, see Approved Cleanser Active Ingredients on page 190 or Approved Disinfectant Cleaners for TC51-Healthcare on page 190.

• Periodically replace the rechargeable battery to ensure maximum battery life and product performance. Battery life depends on individual usage patterns.

Display Best Practices

Image Retention

Image retention may occur when a static image continuously displays for extended periods of time. A user may see a faint remnant of the image even after a new image displays.

To prevent image retention:

• set the display to turn off after a few minutes of idle time.

• rotate background images on a periodic basis.

• turn off the display when the device in not in use.
• use a screen saver with the following characteristics:
  • background color set to black
  • use a small moving image (approximately 2% of the display size).
  • move the image randomly across the screen
  • screen saver should be active as long as the static image is used.

Battery Safety Guidelines

The area in which the units are charged should be clear of debris and combustible materials or chemicals. Particular care should be taken where the device is charged in a non-commercial environment.

• Follow battery usage, storage, and charging guidelines found in the user's guide.
• Improper battery use may result in a fire, explosion, or other hazard.
• To charge the mobile device battery, the battery and charger temperatures must be between 32°F and +104°F (0°C and +40°C).
• Do not use incompatible batteries and chargers. Use of an incompatible battery or charger may present a risk of fire, explosion, leakage, or other hazard. If you have any questions about the compatibility of a battery or a charger, contact Zebra support.
• For devices that utilize a USB port as a charging source, the device shall only be connected to products that bear the USB-IF logo or have completed the USB-IF compliance program.
• Do not disassemble or open, crush, bend or deform, puncture, or shred.
• Severe impact from dropping any battery-operated device on a hard surface could cause the battery to overheat.
• Do not short circuit a battery or allow metallic or conductive objects to contact the battery terminals.
• Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, or expose to fire, explosion, or other hazard.
• Do not leave or store the equipment in or near areas that might get very hot, such as in a parked vehicle or near a radiator or other heat source. Do not place battery into a microwave oven or dryer.
• Battery usage by children should be supervised.
• Please follow local regulations to promptly dispose of used re-chargeable batteries.
• Do not dispose of batteries in fire.
• Seek medical advice immediately if a battery has been swallowed.
• In the event of a battery leak, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with large amounts of water and seek medical advice.
• If you suspect damage to your equipment or battery, contact Zebra support to arrange for inspection.

Cleaning Instructions

CAUTION: Always wear eye protection.
Read warning label on alcohol product before using.
If you have to use any other solution for medical reasons please contact the Global Customer Support Center for more information.

WARNING: Avoid exposing this product to contact with hot oil or other flammable liquids. If such exposure occurs, unplug the device and clean the product immediately in accordance with these guidelines.
Approved Cleanser Active Ingredients

100% of the active ingredients in any cleaner must consist of one or some combination of the following: isopropyl alcohol, bleach/sodium hypochlorite\(^1\) (see important note below), hydrogen peroxide, ammonium chloride, or mild dish soap.

**IMPORTANT:** Use pre-moistened wipes and do not allow liquid cleaner to pool.

\(^1\)When using sodium hypochlorite (bleach) based products, always follow the manufacturer’s recommended instructions: use gloves during application and remove the residue afterwards with a damp alcohol cloth or a cotton swab to avoid prolonged skin contact while handling the device.

Due to the powerful oxidizing nature of sodium hypochlorite, the metal surfaces on the device are prone to oxidation (corrosion) when exposed to this chemical in the liquid form (including wipes). In the event that these type of disinfectants come in contact with metal on the device, prompt removal with an alcohol-dampened cloth or cotton swab after the cleaning step is critical.

### Approved Disinfectant Cleaners for TC51-Healthcare

- Clorox Dispatch® with Bleach
- Clorox Healthcare® Bleach Germicidal Wipes
- Diversey - Dimension® 256 Neutral Disinfectant Cleaner
- Diversey - Virex® II 256
- Metrex CaviWipes®
- Metrex CaviWipes™
- PDI Easy Screen®
- PDI Sani-Cloth® AF3
- PDI Sani-Cloth® Bleach
- PDI Sani-Cloth® Plus
- PDI Sani-Hands®
- PDI Super Sani Cloth® Germicidal Wipes
- Purell®
- Sani Professional Sani-Wipes®
- SC Johnson Windex® Original Glass Cleaner
- Steris - Coverage Plus® Germicidal Surface Wipes
- The Clorox Company - 409® Glass and Surface Cleaner.

### Harmful Ingredients

The following chemicals are known to damage the plastics on the device and should not come in contact with the device: acetone; ketones; ethers; aromatic and chlorinated hydrocarbons; aqueous or alcoholic alkaline solutions; ethanolamine; toluene; trichloroethylene; benzene; carboxic acid and TB-lysoform.
Many vinyl gloves contain phthalate additives, which are often not recommended for medical use and are known to be harmful to the housing of the device.

Device Cleaning Instructions

Do not apply liquid directly to the device. Dampen a soft cloth or use pre-moistened wipes. Do not wrap the device in the cloth or wipe, instead gently wipe the unit. Be careful not to let liquid pool around the display window or other places. Before use, allow the unit to air dry.

**NOTE:** For thorough cleaning, it is recommended to first remove all accessory attachments, such as hand straps or cradle cups, from the mobile device and to clean them separately.

Special Cleaning Notes

The device should not be handled while wearing vinyl gloves containing phthalates, or before hands are washed to remove contaminant residue after gloves are removed.

If products containing any of the harmful ingredients listed above are used prior to handling the device, such as hand sanitizer that contain ethanolamine, hands must be completely dry before handling the device to prevent damage to the device.

**IMPORTANT:** If the battery connectors are exposed to cleaning agents, thoroughly wipe off as much of the chemical as possible and clean with an alcohol wipe. It is also recommended to install the battery in the terminal prior to cleaning and disinfecting the device to help minimize buildup on the connectors.

When using cleaning/disinfectant agents on the device, it is important to follow the directions prescribed by the cleaning/disinfectant agent manufacturer.

Recommended Cleaning Materials

**Standard and Healthcare Devices**

- Alcohol wipes
- Lens tissue
- Cotton-tipped applicators
- Isopropyl alcohol

**Healthcare Only Devices**

- See Approved Disinfectant Cleaners for TC51-Healthcare on page 190.

Cleaning Frequency

The cleaning frequency is at the customer’s discretion due to the varied environments in which the mobile devices are used and may be cleaned as frequently as required. When dirt is visible, it is recommended to clean the mobile device to avoid build up of particles which make the device more difficult to clean later on.

For consistency and optimum image capture, it is recommended to clean the camera window periodically especially when used in environments prone to dirt or dust.
Cleaning the Device

Housing

Thoroughly wipe the housing, including all buttons and triggers, using an approved alcohol wipe.

Display

The display can be wiped down with an approved alcohol wipe, but care should be taken not to allow any pooling of liquid around the edges of the display. Immediately dry the display with a soft, non-abrasive cloth to prevent streaking.

Camera and Exit Window

Wipe the camera and exit window periodically with a lens tissue or other material suitable for cleaning optical material such as eyeglasses.

Battery Guide Slots

Insert a cotton-tipped applicator dipped in alcohol into the battery guide rails to clean out debris and then dry with a dry cotton-tipped applicator.

Battery Connector and Locating Magnet Cleaning

To clean the battery connectors and locating magnet:

1. Remove the main battery from the device.
2. Dip the cotton portion of the cotton-tipped applicator in isopropyl alcohol.
3. To remove any grease or dirt, rub the cotton portion of the cotton-tipped applicator back-and-forth across the locating magnet and the connectors on the battery and terminal sides. Do not leave any cotton residue on the connectors or magnet.
4. Repeat at least three times.

5. Use a dry cotton-tipped applicator and repeat steps 3 and 4. Do not leave any cotton residue on the connectors or magnet.

6. Inspect the area for any grease or dirt and repeat the cleaning process if necessary.

**CAUTION:** After cleaning the battery connectors or locating magnet with bleach-based chemicals, follow the Battery Connector and Locator Magnet Cleaning instructions to remove bleach from the connectors and locating magnet.

### Cleaning Cradle Connectors

To clean the connectors on a cradle:

1. Remove the DC power cable from the cradle.
2. Dip the cotton portion of the cotton-tipped applicator in isopropyl alcohol.
3. Rub the cotton portion of the cotton-tipped applicator along the pins of the connector. Slowly move the applicator back-and-forth from one side of the connector to the other. Do not leave any cotton residue on the connector.
4. All sides of the connector should also be rubbed with the cotton-tipped applicator.
5. Remove any lint left by the cotton-tipped applicator.
6. If grease and other dirt can be found on other areas of the cradle, use a lint-free cloth and alcohol to remove.
7. Allow at least 10 to 30 minutes (depending on ambient temperature and humidity) for the alcohol to air dry before applying power to cradle.
   - If the temperature is low and humidity is high, longer drying time is required. Warm temperature and low humidity requires less drying time.

**CAUTION:** After cleaning the cradle connectors with bleach-based chemicals, follow the Cleaning Cradle Connectors instructions to remove bleach from the connectors.
## Troubleshooting

The following tables provides typical problems that might arise and the solution for correcting the problem.

### TC51

</table>
| Dimensions            | Height: 155 mm (6.1 in.)  
Width: 75.5 mm (2.9 in.)  
Depth: 18.6 mm (0.73 in.)                                                                                                         |
| Weight                | 249 g (8.8 oz) with battery                                                                                                         |
| Display               | 5.0 in. High Definition (1280 x 720); exceptionally bright, outdoor viewable; optically bonded to touch panel                                                                                      |
| Touch Panel           | Dual mode capacitive touch with stylus (TC51-Standard only) or bare or gloved fingertip input (conductive stylus sold separately); Corning Gorilla Glass 4                                                                 |
| Backlight             | Light Emitting Diode (LED) backlight                                                                                                       |
| Battery               | Rechargeable Li-Ion, Power Precision+ Standard Capacity, > 15.48 Watt hours (typical) / ≥ 4,150 mAh (TC51-Standard)/4050 mAh minimum (TC51-HC); improved battery technology for longer cycle times and real-time visibility into battery metrics for better battery management; fast charging (up to 2.4 mA) |
| Expansion Slot        | User accessible MicroSD up to 32GB SDHC and up to 128GB SDXC, using FAT32 format.                                                                                     |
| Connection Interface  | Universal Serial Bus (USB) 2.0 High Speed (host and client)                                                                                       |
| Network Connections   | WLAN, WPAN (Bluetooth)                                                                                                                  |
| Notification          | Audible tone; multi-color LEDs, vibration                                                                                               |
| Keypad                | On-screen keypad and enterprise keyboard                                                                                               |

</table>
### Formats

#### Data Rates Supported
- 5GHz: 802.11a/n/ac - up to 866.7 Mbps
- 2.4GHz: 802.11b/g/n - up to 144 Mbps

#### Operating Channels
- Chan 1 - 13 (2412 - 2472 MHz)
- Chan 36 - 165 (5180 - 5825 MHz)
- Channel Bandwidth: 20, 40, 80 MHz
- Actual operating channels/frequencies depend on regulatory rules and certification agency

#### Security and Encryption
- WEP (40 or 104 bit); WPA/WPA2 Personal (TKIP, and AES); WPA/WPA2 Enterprise (TKIP and AES) — EAP-TTLS (PAP, MSCHAP, MSCHAPv2), EAP-TLS, PEAPv0-MSCHAPv2, PEAPv1-EAP-GTC and LEAP
- Data in Motion: FIPS 140-2 Level 1
- Data at Rest: FIPS 140-2 Level 1

#### Certifications
- WFA (802.11n, 802.11ac, WMM-AC, Voice Enterprise, WMM-PS), Miracast

#### Fast Roam
- PMKID caching; Cisco CCKM; 802.11r; OKC

#### Wireless PAN Data and Voice Communications
- Bluetooth: Class 2, Bluetooth v4.1 (Bluetooth Smart technology); Bluetooth Wideband support HFPv1.6; Bluetooth v4.1 Low Energy (LE)

#### Data Capture Specifications
- Scanning: SE4710 imager (1D and 2D) with LED aimer.
- Camera: Front — 1.3 MP fixed focus. (TC51-HC)
- Rear — 13 MP autofocus; f/2.4 aperture; rear camera flash LED generates balanced white light; supports Torch mode.
- Near Field Communications (NFC): ISO 14443 Type A and B; F; FeliCa and ISO 15693 cards; P2P mode and Card Emulation via UICC (TC51-Standard) and Host

#### 2D Imager Engine (SE4710) Specifications
- Field of View: Horizontal - 48.0°
- Vertical - 36.7°
- Image Resolution: 1280 horizontal X 960 vertical pixels
- Roll: 360°
- Pitch Angle: +/- 60° from normal
- Skew Tolerance: +/- 60° from normal
- Ambient Light: Sunlight: 10,000 ft. candles (107,639 lux)
- Focal Distance: From front of engine: 17.7 cm (7.0 in.)
- Laser Aiming Element: Visible Laser Diode (VLD): 655 nm +/- 10 nm
- Central Dot Optical Power: 0.6 mW (typical)
- Pattern Angle: 48.0° horizontal, 38.0° vertical
- Illumination System: LEDs: Warm white LED
- Pattern Angle: 80° at 505 intensity
