Terms of Use

Proprietary Statement

This manual contains proprietary information of Zebra Technologies Corporation and its subsidiaries ("Zebra Technologies"). It is intended solely for the information and use of parties operating and maintaining the equipment described herein. Such proprietary information may not be used, reproduced, or disclosed to any other parties for any other purpose without the express, written permission of Zebra Technologies.

Product Improvements

Continuous improvement of products is a policy of Zebra Technologies. All specifications and designs are subject to change without notice.

Liability Disclaimer

Zebra Technologies takes steps to ensure that its published Engineering specifications and manuals are correct; however, errors do occur. Zebra Technologies reserves the right to correct any such errors and disclaims liability resulting therefrom.

Limitation of Liability

In no event shall Zebra Technologies or anyone else involved in the creation, production, or delivery of the accompanying product (including hardware and software) be liable for any damages whatsoever (including, without limitation, consequential damages including loss of business profits, business interruption, or loss of business information) arising out of the use of, the results of use of, or inability to use such product, even if Zebra Technologies has been advised of the possibility of such damages. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Features

This section lists the features of the TC58 touch computer.

Figure 1 Front and Side Views

Table 1 TC58 Front View

Number	Item	Description
1	Front camera 8MP	Takes photos and videos.
2	Scan LED	Indicates data capture status.
3	Receiver	Use for audio playback in Handset mode.
4	Proximity/light sensor	Determines proximity and ambient light for controlling display backlight intensity.
5	Battery status LED	Indicates battery charging status while charging and application generated notifications.
6, 9	Scan button	Initiates data capture (programmable).
7	Volume up/down button	Increase and decrease audio volume (programmable).
8	6 in. LCD touch screen	Displays all information needed to operate the device.
10	PTT button	Typically used for PTT communications. Where regulatory restrictions exist ¹ , button is configurable for use with other applications.
¹ Pakistan, Qatar		

Figure 2 Back, Top, and Bottom View

Table 2 TC58 Rear View

Number	Item	Description
1	Power button	Turns the display on and off. Press and hold to reset the device, power off or swap battery.
2, 4, 9	Microphone	Use for noise cancellation.
3	Back common I/O 8 pins	Provides host communications, audio and device charging via cables and accessories.
5	Battery release latches	Pinch both latches in and lift up to remove the battery.
6	Battery	Provides power to the device.
7	Speaker	Provides audio output for video and music playback. Provides audio in speakerphone mode.
8	DC input pins	Power/ground for charging (5V through 9V).

Table 2 TC58 Rear View (Continued)

Number	Item	Description
10	USB Type C and 2 charge pins	Provides power to the device using I/O USB-C interface with 2 charge pins.
11	Hand strap attachment points	Attachment points for the hand strap.
12	ToF module	Employs time of flight techniques to resolve distance between the camera and subject (premium configurations only).
13	16 MP rear camera with flash	Takes photos and videos with flash to provide illumination for the camera.

Installing a microSD Card

The microSD card slot provides secondary non-volatile storage. The slot is located under the battery pack. Refer to the documentation provided with the card for more information, and follow the manufacturer's recommendations for use.

CAUTION—ESD: Follow proper electrostatic discharge (ESD) precautions to avoid damaging the microSD card. Proper ESD precautions include, but are not limited to, working on an ESD mat and ensuring the operator is properly grounded.

1. Lift the access door.

2. Slide the microSD card holder to the Open position.

3. Lift the microSD card holder door.

4. Insert the microSD card into the card holder ensuring that the card slides into the holding tabs on each side of the door.

5. Close the microSD card holder door.

6. Slide the microSD card holder door to the Lock position.

NOTE: Access door must be replaced and securely seated to ensure proper device sealing.

7. Re-install the access door.

Installing the SIM Card

CAUTION: Follow proper electrostatic discharge (ESD) precautions to avoid damaging the microSD card. Proper ESD precautions include, but are not limited to, working on an ESD mat and ensuring the operator is properly grounded.

1. Remove the access cover.

2. Slide the SIM card holder to the unlock position.

3. Lift the SIM card holder door.

Installing the SIM Card

4. Place the SIM card into the card holder with contacts facing down.

5. Close the SIM card holder door.

6. Slide the SIM card holder door to the lock position.

NOTE: Access door must be replaced and securely seated to ensure proper device sealing.

7. Reinstall the access door.

Activating an eSIM

Activating an eSIM on the TC58.

Before adding an eSIM, contact your carrier to obtain the eSIM service and its activation or QR code.

NOTE: Ensure Airplane mode is turned **OFF**.

1. On the device, establish an internet connection via Wi-Fi or cellular data with an installed SIM card.
2. Go to **Settings**.
3. Touch **Network & internet > Mobile Networks**.
4. Touch + next to **SIMs** if a SIM card is already installed, or touch **SIMs** if there is no SIM card installed.

NOTE: A secure lock screen must be created or already in use to proceed.

The **Mobile network** screen displays.

5. Select either:
 - **MANUAL CODE ENTRY** to enter the activation code, or
 - **SCAN** to scan the QR code to download the eSIM profile.

The **Confirmation!!!** dialog box displays.

6. Touch **OK**.
7. Enter the activation code or scan the QR Code.
 - a) If you are manually entering the activation code, you will have to select **Next** to proceed.

The **Downloading a profile** message displays, followed by the **Use <Network Name>?** message.

8. Touch **ACTIVATE**.

9. Touch **Done**.

The eSIM is now active.

Deactivating an eSIM

Turn off an eSIM temporarily and reactivate it later.

NOTE: Ensure Airplane mode is turned **OFF**.

1. Touch **Network & internet > SIMs**.
2. In the **Downloaded SIM** section, touch the name of the eSIM to deactivate.
3. Touch **Use SIM** switch to turn off the eSIM.
4. Touch **Yes**.

The eSIM is deactivated.

Reactivating an eSim

Once the SIM is deactivated, you can reactivate it.

1. Touch **Use SIM** switch to turn on the eSIM.
2. Touch **Yes**.

The eSIM is reactivated.

Erasing an eSIM Profile

Erasing an eSIM profile removes it completely from the TC58.

After erasing an eSIM from the device, you cannot use it again.

NOTE: Ensure Airplane mode is turned **OFF**.

1. Touch **Network & internet > SIMs**.
2. In the **Downloaded SIM** section, touch the name of the eSIM to erase.
3. Touch **Erase**.

NOTE: A secure lock screen must be created or already in use to proceed.

The **Erase this downloaded SIM?** message displays.

4. Touch **Erase**.

The eSIM profile is erased from the device.

Installing the Battery

This section describes how to install the battery into the device.

NOTE: User modification of the device, particularly in the battery well, such as labels, asset tags, engravings, stickers, etc., may compromise the intended performance of the device or accessories. Performance levels such as sealing (Ingress Protection (IP)), impact performance (drop and tumble), functionality, temperature resistance, etc. could be affected. DO NOT put any labels, asset tags, engravings, stickers, etc. in the battery well.

1. Insert the battery, bottom first, into the battery compartment in the back of the device.
2. Press the battery down until it snaps into place.

Using the Rechargeable Li-Ion Battery with BLE Beacon

This device utilizes a rechargeable Li-Ion battery to facilitate BLE Beacon. Once enabled, the battery transmits a BLE signal for up to seven days while the device is powered off due to battery depletion.

NOTE: The device transmits a Bluetooth beacon only when the device is powered off or in Airplane Mode.

For additional information on configuring the Secondary BLE settings, see techdocs.zebra.com/emdk-for-android/11-0/mx/beaconmgr/.

Charging the Device

This section provides information for charging the device.

NOTE: Ensure that you follow the guidelines for battery safety described in the TC53/TC58 Product Reference Guide.

1. To charge the main battery, connect the charging accessory to the appropriate power source.
2. Insert the device into a cradle or attach to a cable. The device turns on and begins charging. The Charging/Notification LED blinks amber while charging, then turns solid green when fully charged.

The standard battery charges from fully depleted to 90% in approximately two hours and from fully depleted to 100% in approximately three hours. In many cases the 90% charge provides plenty of charge for daily use. Depending on usage profile, a full 100% charge lasts for approximately 14 hours of use. To achieve the best charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the device in sleep mode.

Charging Indications

The charging/notification LED indicates charging status.

Table 3 Charging/Notification LED Charging Indicators

State	LED	Indications
Off		Device is not charging. Device is not inserted correctly in the cradle or connected to a power source. Charger/cradle is not powered.
Slow Blinking Amber (1 blink every 4 seconds)		Device is charging.
Slow Blinking Red (1 blink every 4 seconds)		Device is charging but the battery is at end of useful life.
Solid Green		Charging complete.
Solid Red		Charging complete but the battery is at end of useful life.

Table 3 Charging/Notification LED Charging Indicators (Continued)

State	LED	Indications
Fast Blinking Amber (2 blinks/second)		Charging error, e.g.: <ul style="list-style-type: none"> • Temperature is too low or too high. • Charging has gone on too long without completion (typically twelve hours).
Fast Blinking Red (2 blinks/second)		Charging error but the battery is at end of useful life., e.g.: <ul style="list-style-type: none"> • Temperature is too low or too high. • Charging has gone on too long without completion (typically twelve hours).

Charging the Spare Battery

This section provides information on charging a spare battery.

1. Insert a spare battery into the spare battery slot.
2. Ensure the battery is seated properly. The Spare Battery Charging LED blinks indicating charging. See [Charging Indications](#) on page 15 for charging indicators.

The battery charges from fully depleted to 90% in approximately 2.5 hours and from fully depleted to 100% in approximately 3.5 hours. In many cases the 90% charge provides plenty of charge for daily use. Depending on the usage profile, a full 100% charge lasts for approximately 14 hours of use. To achieve the best charging results use only Zebra charging accessories and batteries.

Accessories for Charging

Use one of the following accessories to charge the device and/or spare battery.

Charging and Communication

Description	Part Number	Charging		Communication	
		Battery (In device)	Spare Battery	USB	Ethernet
1-Slot USB/Charge Only Cradle Kit	CRD-NGTC5-2SC1B	Yes	Yes	No	No
1-Slot USB/Ethernet Cradle Kit	CRD-NGTC5-2SE1B	Yes	Yes	Yes	Yes
5-Slot Charge Only Cradle with Battery Kit	CRD-NGTC5-5SC4B	Yes	Yes	No	No
5-Slot Charge Only Cradle Kit	CRD-NGTC5-5SC5D	Yes	No	No	No
5-Slot Ethernet Cradle Kit	CRD-NGTC5-5SE5D	Yes	No	No	Yes
Charge/USB Cable	CBL-TC5X-USBC2A-01	Yes	No	Yes	No

2-Slot (1 Device/1 Spare Battery) USB Charging Cradle

1	Spare battery charging slot
2	Power LED
3	Device charging slot with shim
4	DC power supply
5	AC line cord

2-Slot (1 Device/1 Spare Battery) Ethernet and Communication Setup

1	Ethernet switch
2	Power Supply
3	AC line cord
4	Host computer
5	USB to Ethernet module kit (sold separately)
6	USB port (on USB to Ethernet module kit)
7	Ethernet port (on USB to Ethernet module kit)
8	DC line cord

NOTE: The USB to Ethernet module kit (KT-TC51-ETH1-01) connects via a single-slot USB charger.

5-Slot Charge Only Cradle

1	AC line cord
2	DC power supply
3	DC line cord
4	Device charging slot with shim
5	Power LED

5-Slot Ethernet Cradle Setup

1	Ethernet switch
2	DC power supply
3	Ethernet port

5-Slot (4 Device/4 Spare Battery) Charge Only Cradle with Battery Charger

1	AC line cord
2	DC power supply
3	DC line cord
4	Device charging slot with shim
5	Spare battery charging slot
6	Spare battery charging LED
7	Power LED

Charge/USB-C Cable

Scanning

To read a barcode, a scan-enabled application is required. The device contains the DataWedge application that allows the user to enable the imager, decode the barcode data and display the barcode content.

NOTE: The SE55 displays the green dash-dot-dash aimer. The SE4720 imager displays a red dot aimer.

1. Ensure that an application is open on the device and a text field is in focus (text cursor in text field).
2. Point the exit window on the top of the device at a barcode.

3. Press and hold the scan button.

To assist in aiming, the red LED aiming pattern and red aiming dot turn on for the SE4720 and the green LED aiming pattern and green dash-dot-dash turn on for the SE55.

NOTE: When the device is in Picklist mode, the imager does not decode the barcode until the crosshair or aiming dot touches the barcode.

4. Ensure the barcode is within the area formed in the aiming pattern. The aiming dot is used for increased visibility in bright lighting conditions.

Figure 3 Aiming Pattern

Figure 4 Pick List Mode with Multiple Barcodes in Aiming Pattern

5. The Data Capture LED lights green and a beep sounds, by default, to indicate the barcode was decoded successfully.
6. Release the scan button.

NOTE: Imager decoding usually occurs instantaneously. The device repeats the steps required to take a digital picture (image) of a poor or difficult barcode as long as the scan button remains pressed.

7. The barcode content data displays in the text field.

Ergonomic Considerations

Avoid extreme wrist angles when using the device.

Service Information

Repair services using Zebra-qualified parts are available for at least three years after the end of production and can be requested at zebra.com/support.
