

TWO SLOT BATTERY CHARGER USER GUIDE

Introduction

Use the Two Slot Charger to charge two TC55 batteries; both the 2,940 mAh and 4,410 mAh batteries. Both batteries can be charged in any combination.

Battery Installation

1. If installed, remove the battery covers.
2. Align the three tabs on the bottom of the battery with the three slots in the battery compartment.
3. Press the battery down and then rotate until it locks into place.

4. Align the battery cover with the back of the charger and press the battery cover down until it snaps into place.

NOTE: The cover must be installed for charging to begin.

Charging

Charge the batteries in the Two Slot Charger using the Charge Only Cable or the Five Slot Charging Cradle. The batteries begins charging. The LED blinks green while charging, then turns solid green when fully charged. Two 2,940 mAh batteries charge in approximately 8 hours and two 4,410 mAh batteries charge in approximately 11 hours. Single batteries charge in approximately half the time of two batteries.

Remove insert from cradle cup.

NOTE: ENSURE ARROW FACES FRONT OF CRADLE

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). Note that charging is intelligently controlled by the charger. To accomplish this, for small periods of time, the charger alternately enables and disables battery charging to keep the battery at acceptable temperatures. The charger indicates when charging is disabled due to abnormal temperatures via its LED.

LED Indicators

Status	Indication
Off	Battery is not inserted correctly. Charger is not connected to power source.
Slow blinking green (1 blink every two seconds)	Battery is charging.
Solid green	Charging complete.
Fast blinking red (2 blinks/second)	Battery cover is removed. Batteries will not charge. Charging error: Temperature is too low or too high Charging has gone on too long without completion (typically eight hours).

Removing the Battery

1. Place thumbnail at notch and lift the battery cover.

2. For the 2,490 mAh battery, pull the battery tab down at a 45 degree angle.

3. For the 4,410 mAh battery, with two fingers, press the battery down and rotate the battery out of the compartment.

4. Remove the battery from the battery compartment.

Specifications

Item	Description
Dimensions	Height: 164.8 mm (6.49 in.) Width: 73.3 mm (2.89 in.) Depth: 34.4 mm (1.35 in.)
Weight	150 g (5.30 oz)
Operating Temperature	0 °C to 50 °C (32 °F to 122 °F)
Charging Temperature	0 °C to 40 °C (32 °F to 104 °F)
Storage Temperature	-40 °C to 70 °C (-40 °F to 158 °F) (Not including battery)
Humidity	5% to 85%

Zebra reserves the right to make changes to any product to improve reliability, function, or design. Zebra does not assume any product liability arising out of, or in connection with, the application or use of any product, circuit, or application described herein. No license is granted, either expressly or by implication, estoppel, or otherwise under any patent right or patent, covering or relating to any combination, system, apparatus, machine, material, method, or process in which Zebra products might be used. An implied license exists only for equipment, circuits, and subsystems contained in Zebra products.

Regulatory Information

This guide applies to the following Model Number: SAC-TC55-2BTYC1. All Zebra devices are designed to be compliant with rules and regulations in locations they are sold and will be labeled as required. Local language translations are available at the following website: <http://www.zebra.com/support>. Any changes or modifications to Zebra equipment, not expressly approved by Zebra could void the user's authority to operate the equipment. For use only with Zebra approved and UL Listed/Recognized battery packs. Only use Zebra approved and UL Listed accessories, battery packs and battery chargers.

Declared maximum operating temperature 50°C.

Health and Safety Recommendations

Safety in Hospitals

Power Supply

Use ONLY a Zebra approved Nationally Recognized Test Laboratory (NRTL) Certified ITE (LPS) power supply with electrical ratings: Output 5.0 V DC, min 1.2 A, with a maximum ambient temperature of at least 50 °C. Use of alternative power supply will invalidate any approvals given to this unit and may be dangerous.

Batteries

Battery Information

CAUTION Risk of explosion if battery is replaced by an incorrect type. Dispose of batteries according to instructions.

Use only Zebra approved batteries. Accessories which have battery charging capability are approved for use with the following battery models:

- Model 82-164807-01 (3.7 VDC, 2940 mAh)
- Model 82-172087-01 (3.7 VDC, 4410 mAh)

Zebra rechargeable battery packs are designed and constructed to the highest standards within the industry. However, there are limitations to how long a battery can operate or be stored before needing replacement. Many factors affect

the actual life cycle of a battery pack, such as heat, cold, harsh environmental conditions and severe drops. When batteries are stored over six (6) months, some irreversible deterioration in overall battery quality may occur. Store batteries at half of full charge in a dry, cool place, removed from the equipment to prevent loss of capacity, rusting of metallic parts and electrolyte leakage. When storing batteries for one year or longer, the charge level should be verified at least once a year and charged to half of full charge. Replace the battery when a significant loss of run time is detected. Standard warranty period for all Zebra batteries is one year, regardless if the battery was purchased separately or included as part of the mobile computer. For more information on Zebra batteries, please visit: <http://www.zebra.com/batterybasics>.

Battery Safety Guidelines

- The area in which the units are charged should be clear of debris and combustible materials or chemicals. Particular care should be taken where the device is charged in a non commercial environment.
- Follow battery usage, storage, and charging guidelines found in the user's guide.
- Improper battery use may result in a fire, explosion, or other hazard.
- To charge the mobile device battery, the battery and charger temperatures must be between 0 °C and +40 °C (+32 °F and +104 °F).
- Do not use incompatible batteries and chargers. Use of an incompatible battery or charger may present a risk of fire, explosion, leakage, or other hazard. If you have any questions about the compatibility of a battery or a charger, contact Zebra Global Customer Support.

Radio Frequency Interference Requirements-FCC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.
