Introduction

This guide provides information about using the TC70x touch computer running Microsoft Windows 10 IoT Mobile Enterprise and accessories.

NOTE Screens and windows pictured in this guide are samples and can differ from actual screens.

Documentation Set

The documentation set for the TC70x provides information for specific user needs, and includes:

- TC70x Quick Start Guide for Windows 10 IOT Mobile Enterprise - describes how to get the TC70x up and running.
- TC70x User Guide for Windows 10 IOT Mobile Enterprise - describes how to use the TC70x.
- TC70x Integrator Guide for Windows 10 IOT Mobile Enterprise - describes how to set up the TC70x and accessories.

Configurations

This guide covers the following configurations:

<table>
<thead>
<tr>
<th>Configuration</th>
<th>Radios</th>
<th>Display</th>
<th>Memory</th>
<th>Data Capture Options</th>
<th>Operating System</th>
</tr>
</thead>
<tbody>
<tr>
<td>TC700J</td>
<td>WLAN: 802.11 a/b/g/n/d/h/i/k/ac, WPAN: Bluetooth v4.0 Low Energy</td>
<td>4.7” High Definition (1280 x 720) LCD</td>
<td>2 GB RAM / 16 GB Flash (SLC High Reliability Flash)</td>
<td>2D imager and integrated NFC</td>
<td>Windows 10 IoT Mobile Enterprise</td>
</tr>
</tbody>
</table>
Software Versions

To determine the current software versions:

1. Swipe down from the top of the screen, and touch All settings > System > About.
2. Touch More Info button.
   - **Model** - Displays the model number.
   - **Software** - Displays the operating system type.
   - **Version** - Displays the software version number.
   - **Firmware Version Number** - Displays the Microsoft firmware version number.

Chapter Descriptions

Topics covered in this guide are as follows:

- **Chapter 1, Getting Started** provides information on getting the TC70x up and running for the first time.
- **Chapter 2, Using the TC70x** provides information for operating the TC70x.
- **Chapter 3, Applications** provides information on using applications installed on the TC70x.
- **Chapter 4, Data Capture** provides information for capturing bar code data using the imager.
- **Chapter 5, Wireless** provides information on the various wireless options.
- **Chapter 6, Accessories** provides information for using the accessories for the TC70x.
- **Chapter 7, Maintenance and Troubleshooting** includes instructions on cleaning and provides troubleshooting solutions for potential problems during TC70x operation.
- **Appendix A, Technical Specifications** provides the technical specifications for the TC70x.

Notational Conventions

The following conventions are used in this document:

- **Italics** are used to highlight the following:
  - Chapters and sections in this and related documents
  - Icons on a screen.
- **Bold** text is used to highlight the following:
  - Dialog box, window, and screen names
  - Drop-down list and list box names
  - Check box and radio button names
  - Button names on a screen.
• Bullets (•) indicate:
  • Action items
  • Lists of alternatives
  • Lists of required steps that are not necessarily sequential
  • Sequential lists (for example, lists that describe step-by-step procedures) appear as numbered lists.

---

### Icon Conventions

The documentation set is designed to give the reader more visual clues. The following graphic icons are used throughout the documentation set. These icons and their associated meanings are described below.

**WARNING!** The word WARNING with the associated safety icon implies information that, if disregarded, could result in death or serious injury, or serious product damage.

**CAUTION** The word CAUTION with the associated safety icon implies information that, if disregarded, may result in minor or moderate injury, or serious product damage.

**NOTE** NOTE contains information more important than the surrounding text, such as exceptions or preconditions. They also refer the reader elsewhere for additional information, remind the reader how to complete an action (when it is not part of the current procedure, for instance), or tell the reader where something is located on the screen. There is no warning level associated with a note.

---

### Service Information

If you have a problem with the equipment, contact Customer Support in the region. Contact information is available at: http://www.zebra.com/support.

When contacting support, please have the following information available:

- Serial number of the unit (found on manufacturing label)
- Model number or product name (found on manufacturing label)
- Software type and version number
Customer Support responds to calls by email or telephone within the time limits set forth in support agreements.

If the problem cannot be solved by Customer Support, the user may need to return the equipment for servicing and will be given specific directions. We are not responsible for any damages incurred during shipment if the approved shipping container is not used. Shipping the units improperly can possibly void the warranty. Remove the microSD card from the device before shipping for service.

If the device was purchased from a business partner, contact that business partner for support.
This chapter provides information for getting the device up and running for the first time.

Unpacking

1. Carefully remove all protective material from the TC70x and save the shipping container for later storage and shipping.
2. Verify that the following were received:
   - TC70x touch computer
   - 4,620 mAh Lithium-ion battery
   - Hand strap
   - Regulatory Guide.
3. Inspect the equipment for damage. If any equipment is missing or damaged, contact the Global Customer Support center immediately.
4. Prior to using the TC70x for the first time, remove the protective shipping film that covers the scan window, display and camera window.

Perform these procedures to start using the TC70x for the first time.

1. Install a micro secure digital (SD) card (optional).
2. Install hand strap (optional).
3. Install the battery.
4. Charge the TC70x.
5. Power on the TC70x.

Installing a microSD Card

The microSD card slot provides secondary non-volatile storage. The slot is located under the battery pack. Refer to the documentation provided with the card for more information, and follow the manufacturer’s recommendations for use.

**CAUTION** Follow proper electrostatic discharge (ESD) precautions to avoid damaging the microSD card. Proper ESD precautions include, but are not limited to, working on an ESD mat and ensuring that the operator is properly grounded.

1. Remove the hand strap, if installed.
2. Lift the access door.
3. Insert the microSD card into the card holder door ensuring that the card slides into the holding tabs on each side of the door.
4. Re-install the access door.

Installing the Hand Strap and Battery

NOTE Installation of the hand strap is optional. Skip this section if not installing the hand strap.

1. Remove the hand strap filler from the hand strap slot. Store the hand strap filler in a safe place for future replacement.

2. Insert the hand strap plate into the hand strap slot.

3. Insert the battery, bottom first, into the battery compartment in the back of the TC70x.
Installing the Battery

1. Insert the battery, bottom first, into the battery compartment in the back of the TC70x.

4. Rotate the top of the battery into the battery compartment.

5. Press the battery down into the battery compartment until the battery release latches snap into place.

6. Place hand strap clip into hand strap mounting slot and pull down until it snaps into place.
2. Rotate the top of the battery into the battery compartment.
3. Press the battery down into the battery compartment until the battery release latches snap into place.

Charging the Battery

Before using the TC70x for the first time, charge the main battery until the green Charging/Notification light emitting diode (LED) remains lit. To charge the TC70x, use a cable or a cradle with the appropriate power supply. For information about the accessories available for the TC70x, see Chapter 6, Accessories for more information.

- Snap-On USB Cable
- Charging Cable Cup
- 2-Slot Charge Only Cradle
- 2-Slot USB/Ethernet Cradle
- 5-Slot Charge Only Cradle
- 5-Slot Ethernet Cradle
- Charge Only Vehicle Cradle
- TC7X Vehicle Communication Cradle
- Auto Charging Cable Cup.
- Serial Cable Cup

The 4,620 mAh fully depleted battery fully charges in less than 4.5 hours at room temperature.

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The TC70x or accessory always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the TC70x or accessory may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The TC70x or accessory indicates when charging is disabled due to abnormal temperatures via its LED.

1. To charge the main battery, connect the charging accessory to the appropriate power source.
2. Insert the TC70x into a cradle or attach to a cable. The TC70x turns on and begins charging. The Charging/Notification LED blinks amber while charging, then turns solid green when fully charged.
Charging Indicators

<table>
<thead>
<tr>
<th>State</th>
<th>Indication</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>TC70x is not charging. TC70x is not inserted correctly in the cradle or connected to a power source. Charger/cradle is not powered.</td>
</tr>
<tr>
<td>Slow Blinks Amber (1 blink every 2 seconds)</td>
<td>TC70x is charging.</td>
</tr>
<tr>
<td>Solid Green</td>
<td>Charging complete.</td>
</tr>
<tr>
<td>Fast Blinks Amber (2 blinks/second)</td>
<td>Charging error, e.g.:</td>
</tr>
<tr>
<td></td>
<td>• Temperature is too low or too high.</td>
</tr>
<tr>
<td></td>
<td>• Charging has gone on too long without completion (typically eight hours).</td>
</tr>
<tr>
<td>Slow Blinks Red (1 blink every 2 seconds)</td>
<td>TC70x is charging but the battery is at end of useful life.</td>
</tr>
<tr>
<td>Solid Red</td>
<td>Charging complete but the battery is at end of useful life.</td>
</tr>
<tr>
<td>Fast Blinks Red (2 blinks/second)</td>
<td>Charging error but the battery is at end of useful life, e.g.:</td>
</tr>
<tr>
<td></td>
<td>• Temperature is too low or too high.</td>
</tr>
<tr>
<td></td>
<td>• Charging has gone on too long without completion (typically eight hours).</td>
</tr>
</tbody>
</table>

Microsoft Account Setup

NOTE The TC70x has to be connected to the internet, through Wi-Fi, in-order to set up a Microsoft account.

User can skip account set up and enter information at a later time.

The first time the TC70x starts, the Setup Wizard displays. Follow the on-screen instructions to set up a Windows account, configure Store for purchasing items from the Windows Store, entering your personal information, and enabling backup/restore features.

Turn On the Device

Press the power key for about five seconds until the boot screen appears.

Turn Off the Device

To turn off the device:

1. Press and hold the power key.
2. Drag the lock screen down toward the bottom of the screen. The word **Goodbye** appears on the screen as the TC70x turns off.

---

## Replacing the Battery

**CAUTION** Do not add or remove SAM or microSD card during battery replacement.

3. Remove any accessory attached to the device.
4. Press the Power button until the power down screen appears.
5. Drag the lock screen down toward the bottom of the screen. The word **Goodbye** appears on the screen as the TC70x turns off.
6. If hand strap is attached, slide the hand strap clip up toward the top of the TC70x and then lift.

![Figure 1-12 Remove Hand Strap Clip](image)

7. Press the two battery latches in.

![Figure 1-13 Press Battery Latches](image)
8. Lift the battery from the TC70x.

9. Insert the replacement battery, bottom first, into the battery compartment in the back of the TC70x.
10. Press the battery down until the battery release latch snaps into place.
11. Replace the hand strap, if required.
12. Press and hold the Power button to turn on the TC70x.

---

**Revising the microSD Card**

To replace the microSD card:

1. Press the Power button until the power down screen appears.
2. Drag the lock screen down toward the bottom of the screen. The word *Goodbye* appears on the screen as the TC70x turns off.
3. If hand strap is attached, slide the hand strap clip up toward the top of the TC70x and then lift.

**CAUTION** Replace the battery within two minutes. After two minutes the device reboots and data may be lost.
4. Press the two battery latches in.
5. Lift the battery from the TC70x.
6. Lift the access door.

7. Remove microSD card from holder.
8. Press the access door down and ensure that it is properly seated.
9. Insert the replacement microSD card.
10. Replace the access door.
11. Insert the battery, bottom first, into the battery compartment in the back of the TC70x.
12. Press the battery down until the battery release latch snaps into place.
13. Replace the hand strap, if required.
14. Press and hold the Power button to turn on the TC70x.
Battery Management

✓ **NOTE** Prior to checking the battery charge level, remove the TC70x from any AC power source (cradle or cable).

To check the charge status of the main battery:

1. Swipe down from the top of the screen.
2. Touch **All settings > System > Battery saver**.

![Battery Saver Screen](image)

**Overview**

- **Battery level remaining**: 94%
- **Estimated time remaining**: 2 days

**Battery saver**

Extends battery life by limiting background activity and push notifications.

Choose when battery saver turns on automatically and how it affects your system.

**Figure 1-18  Battery Saver Screen**

**Battery level remaining** indicates the battery charge (as a percentage of fully charged).

**Estimated time remaining** indicates the amount of time the charge.

Touch **Battery use** to view the **Battery Use** screen.

Monitor Battery Usage

The **Battery Use** screen lists which applications consume the most battery power. Also use it to turn off applications that were downloaded if they are consuming too much power.
The **Battery Use** screen lists the applications using the battery.

Touch an application in **Battery Use** then **Details** to display details about its power consumption. Different applications display different information. Some applications include buttons that open screens with settings to adjust power use.

### Low Battery Notification

When the battery charge level drops below 20%, the TC70x displays a notice to connect the TC70x to power. The user should charge the battery using one of the charging accessories.

![Battery Use Screen](image)

**Figure 1-19**  _Battery Use Screen_

When the battery charge drops below 10%, the TC70x displays a notice to connect the TC70x to power. The user must charge the battery using one of the charging accessories.

When the battery charge drops below 4%, the TC70x turns off.

![Low Battery Notification](image)

**Figure 1-20**  _Low Battery Notification_
The user must charge the TC70x using one of the charging accessories.

**Battery Optimization**

Observe the following battery saving tips:

- Enable Battery Saver mode.
- Remove Snap-on accessories when not in use.
- Set the screen to turn off after a short period of non-use. See *Setting Screen Timeout Setting on page 1-15*.
- Reduce screen brightness. See *Setting the Screen Brightness on page 1-14*.
- Turn off automatic syncing for Email, Calendar, Contacts and other applications.
- Minimize use of applications that keep the TC70x from suspending, for example, music band video applications.

**Turning Off the Radios**

To turn off all the radios and place the TC70x into Airplane mode, swipe down from the top of the screen, and touch *Airplane mode*. Appears in the status bar.

**Setting the Date and Time**

The date and time is automatically updates. To set the date and time manually:

1. Swipe down from the top of the screen, and touch *All settings > Time & language > Date & time*.
2. Touch the *Set date and time automatically* switch to turn off and edit the time and date.
3. Touch the *Time zone* drop-down list and select a time zone.
4. Touch the *Date* option.
5. Select the current month, day and year.
6. Touch ✓.
7. Touch the Time option.
8. Select the current hour, minutes and time of day.
10. Touch ✓.

**Display Setting**

Use Display settings to change the screen brightness, change the background image, enable screen rotation, set sleep time and change font size.

**Setting the Screen Brightness**

To set the screen brightness:

1. Swipe down from the top of the screen, and touch *All settings > System > Display*. 
2. Touch the **Automatically adjust display brightness** switch to turn off.

![Brightness Dialog Box](image)

**Figure 1-21**  *Brightness Dialog Box*

3. Drag the **Brightness level** slider to adjust the brightness level.

4. Touch .

### Setting Screen Rotation

✓ **NOTE** The Start screen does not rotate to the horizontal position.

By default, screen rotation is enabled. To disable screen rotation:

1. Rotate the device vertically or horizontally.

2. Swipe down from the top of the screen, and touch **Rotation lock**.

3. Touch .

### Setting Screen Timeout Setting

To set the screen sleep time:

1. Swipe down from the top of the screen, and touch **All settings > Personalization > Lock screen**.

2. Touch the **Screen timeout after** drop-down list.

3. Select one of the timeout values.

   - **30 seconds**
   - **1 minute** (default)
   - **3 minutes**
   - **5 minutes**
   - **15 minutes**
   - **30 minutes**
   - **Never**.

4. Touch .
Setting Font Size

To set the size of the font is system applications:

1. Swipe down from the top of the screen, and touch 🔄 All settings > 📦 System > Display.
2. Drag the Size of text, app, and items on the display slider.
3. Touch Apply.
4. Touch Restart Now.

Changing Accent Color

To change the device color scheme:

1. Swipe down from the top of the screen, and touch 🔄 All settings > 📦 Personalization > Colors.

![Colors Screen](image)

2. Under Choose your mode, select Dark or Light radio button.
3. Under Choose your accent color, select a color tile.
4. Touch 🖼️. The tile accent colors change to the new color.

General Sound Setting

Use the Sounds settings to configure media and alarm volumes.
1. Swipe down from the top of the screen, and touch All settings > Personalization > Sounds.

![Figure 1-23 Sounds Screen](image)

- **Ringtone** – Touch to select a ringtone to sound when an incoming call is received.
- **Vibrate** - Check to make the device vibrate when a call is received (default – enabled).
- **Play a sound for**
  - **Key press** - Check to play a sound when a keyboard key is touched (default – enabled).
  - **Lock and unlock** - Check to play a sound when locking and unlocking the screen (default – disabled).
  - **Camera shutter** - Check to play a sound when taking photos.
  - **System alerts** - Places all sounds in sound mode.

### Hardware Beeper Volume

The Hardware Beeper Volume controls the volume of the scan beep when a bar code is decoded. To change the beeper volume:

1. Swipe down from the top of the screen, and touch All settings > Extra > Zebra TC700J Settings.
2. Touch HW Beeper Setting.
3. Drag the slider to change the volume level.
   Volume level 0 = off.

---

**Setting Touch Key Light**

The three touch keys under the screen are backlit. Configure the touch key light to save battery power.

1.Swipe down from the top of the screen, and touch **All settings > Extra > MoreSettings**.
2. Touch **Touch Configuration**.
3. Touch the switch to turn on backlight control.
4. In the drop-down list, select time.
   - Always off
   - 6 seconds (default)
   - 10 seconds
   - 15 seconds
   - 30 seconds
   - 1 minute
   - Always on.
5. Touch .
CHAPTER 2 USING THE TC70X

Introduction

This chapter explains the buttons, status icons, and controls on the TC70x, and provides basic instructions for using the TC70x, including resetting the TC70x and entering data.

Start Screen

The Start screen displays when the TC70x turns on and after the lock screen, if applicable. Depending upon the configuration, the Start screen might appear different. Contact your system administrator for more information.

The animated live tiles display messages, news and other information based on the application.
Figure 2-1  Start Screen

Not all apps are on the Start screen. Swipe the Start screen to the left to display all the All Apps screen. To return to the Start screen, swipe to the right.
All apps list alphabetically. If there are a lot of apps, touch the search bar at the top of the screen and enter the first letter or character for the app.

**Customizing the Start Screen**

Choose a background photo and pin a favorite app to the Start screen. Live tiles allows the user to see updates on news, weather, finance, etc., immediately on the Start screen without opening the app.

**Moving Tiles**

The user can rearrange tiles on the Start screen. To move a tile to a different location:

1. Touch and hold a tile. The tiles float on the screen.
2. Drag the tile to a new location. Other tiles move as the floating tile move over them.
3. Lift finger and drop the tile.
4. Touch the screen.

**Resize a Tile**

The user can change the size of tiles on the Start screen. To resize a tile:

1. Touch and hold the tile.
2. Touch \( \bigcirc \) to make it smaller.
3. Touch \( \bigcirc \) to make it larger.
Using the TC70x  2 - 5

4. Size Tile Larger

**Unpin a Tile**

To unpin the tile and remove it from the Start screen:

1. Touch and hold the tile.
2. Touch .
3. The Tile no longer appears in the Start screen.

**Figure 2-5  Unpin Tile**

**Grouping Tiles**

The user can group app tiles into groups or folders:

1. Touch and hold a tile.
2. Drag and drop it on top of another tile or folder.
3. Touch **Name folder** to provide a name for the new folder.
4. In the text box, enter a name for the folder.
5. Touch Enter key.
6. Touch the folder tile to close the folder.

To open an app from a folder:

1. Touch the folder.
Figure 2-6  Group Folder

2. The folder expands to show the apps in the folder.
3. Touch the app icon to open the app.

To change the name of the folder:

1. Touch the folder to open it.
2. Touch and hold the name. A text box appears.
3. In the text box, enter a new name for the folder.
4. Touch the Enter key.
5. Touch the folder tile to close the folder.

To remove a folder:

1. Touch the folder to open it.
2. Touch and hold each app tile.
3. Touch the unpin icon.
4. Repeat for each tile in the folder.

**Pinning an App on the Start Screen**

To pin an app onto the Start screen:

1. Swipe left to go to the All Apps screen.
2. Touch and hold the app until the menu appears.
3. Touch **Pin to Start**. The app tile appears on the Start screen.
Changing Start Screen Background

To change the Start screen background images:

1. Swipe down from the top of the screen, and touch **All settings** > **Personalization** > **Start**.
2. In the Background drop-down list, select **My pictures**, **Sample images** or **None**.
3. Touch **Browse**.
4. Select a photo and crop accordingly.
5. Touch ✓.
6. In **Choose style** section, select either **Tile picture** or **Full screen picture** radio button.
7. Slide the **Transparency** slider to increase the transparency of the tiles. A lower number, the tiles are more solid and a higher number, the tiles are more transparent.
8. Touch ✓.

Change the Background Photo

To change a background photo:

1. Swipe down from the top of the screen, and touch **All settings** > **Personalization** > **Lock screen**.
2. Touch **Browse**.
3. Select a photo and crop.
4. Touch ✓.
5. Touch ✓.
**Action Center**

The Action Center provides easy access to some frequently used settings and notifications.

To open the Action Center, swipe down from the top of the screen. The first row of setting option boxes display and any notifications.

![Action Center](image)

**Figure 2-8  Action Center**

Touch **Expand** to view all setting option boxes.
The Action Center settings:

- **Connect** - Connects the device to Bluetooth audio devices and wireless displays.
- **Battery Saver** - Places the device in battery saver mode.
- **Flashlight** - Turns the rear camera flash LED on or off.
- **Note** - Opens the OneNote application, if installed.
- **VPN** - Opens the VPN settings screen to add or connect to a VPN.
- **Location** - Displays the current state of the Location settings. Touch to enables or disables locationing. Default - Enabled.
- **Airplane Mode** – Displays the Airplane mode status. Touch to toggle Airplane mode on and off. Turn on Airplane mode to turn off all the radios.
- **Camera** - Opens the Camera application.
- **Quiet hours** - Enable to hide notifications. Requires Contana to set quiet hours.
- **Screen Brightness** - Touch to change the screen brightness settings. Options: **Automatic** (default), 25%, 50%, 75% or 100%.

**NOTE** Highlighted titles indicate that the setting is enabled.
- Wi-Fi - Indicates Wi-Fi network connection status. Touch to turn Wi-Fi on or off.
- Bluetooth – Displays the current state of the Bluetooth radio. Touch to turn Bluetooth on or off.
- Rotation lock - Touch to lock the screen in the current orientation.
- All settings - Opens the Settings screen.

To close the Action Center, drag the bottom to the top of the screen or touch .

Notifications

Notification icons report the arrival of new messages, calendar events, and alarms. When a notification occurs, an icon appears in the Status bar. See Notification Icons on page 2-17 for a list of possible notification icons and their descriptions. Open the Action Center to view a list of all the notifications.

To respond to a notification, open the Action Center and then touch a notification. The Action Center closes and the subsequent activity is dependent on the notification.

To delete a notification, swipe the notification to the right.

To close the Action Center, drag the bottom of the Action Center to the top of the screen or touch .

Personalize the Action Center

To change the Action Center:

1. Swipe down from the top of the screen.
2. Touch All settings > System > Notifications & actions.
3. To change a shortcut, touch the shortcut and select the new app from the list.

To select which notifications to receive and how:

In the Notification section, touch the switches to turn off or on the particular notification.
Applications

The **All apps** screen displays a list of all installed applications. The table below lists the applications installed on the TC70x by default. Refer to the *TC70x Integrator Guide for Windows 10 IoT Mobile Enterprise* for information on installing and uninstalling application.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Icon" /></td>
<td><strong>Alarms &amp; Clock</strong> – Use to schedule alarms for appointments or as a wake-up.</td>
</tr>
<tr>

</table>

Switching Between Recent Applications

Touch and hold ➡️. A window appears on the screen with icons of recently used applications.
Figure 2-11  Recently Used Applications

- Slide the window left and right to view all recently used applications.
- Swipe down or touch X to remove application from the list and force close the application.
- Touch an application to open it.
- Touch ← to return to the current screen.

Status Bar

The Status bar displays notification icons (left side) and status icons (right side).

</table>
Using the Touchscreen

Use the multi-touch sensitive screen to operate the device.

- **Touch** - Touch to:
  - select items on the screen
  - type letters and symbols using the on-screen keyboard
  - press on-screen buttons.
- **Touch and Hold** - Touch and hold:
  - an item on the Start screen to move it to a new location.
  - an item in All Apps to create a shortcut on the Start screen.
- **Drag** - Touch and hold an item for a moment and then move finger on the screen until reaching the new position.
- **Swipe** - Move finger up and down or left and right on the screen to:
  - unlock the screen
  - view Start and All Apps screens
  - view additional application icons in the All Apps screen
  - view more information on an application’s screen.
- **Double-tap** - Tap twice on a web page, map, or other screen to zoom in and out.
- **Pinch** - In some applications, zoom in and out by placing two fingers on the screen and pinching them together (to zoom out) or spreading them apart (to zoom in).

Using the On-screen Keyboard

Writing with the on-screen keyboard is easy. Use the keyboard when holding the device in portrait or landscape mode. Write messages by touching the letters or by swiping through them.

Touch in a text box. The keyboard automatically appears.
Editing Text

Edit entered text and use menu commands to cut, copy, and paste text within or across applications. Some applications do not support editing some or all of the text they display; others may offer their own way to select text.

Switch Between Upper and Lower Case Characters

Touch the shift key. To turn caps lock mode on, double-tap the shift key. To return to normal mode, tap the shift key again.

Entering Numbers, Symbols and Special Characters

To enter numbers and symbols:

- Touch and hold one of the top-row keys until a menu appears then select a number.
- Touch and hold the Shift key with one finger, touch one or more capital letters or symbols to enter them, and then lift both fingers to return to the lowercase keyboard.
- Touch \ to switch to the numbers and symbols keyboard.
- Touch the key on the numbers and symbols keyboard to view additional symbols.

To enter special characters, touch and hold a number or symbol key to open a menu of additional symbols. The menu expands to display additional symbols.

NOTE The keyboard layout can vary in different apps and languages.
Swiping

Touch the keyboard and slide finger from the first letter of the word, and draw a path from letter to letter. Lift finger after the last letter.

To continue, keep on swiping without tapping the space key. Spaces are added automatically.

Figure 2-14  Swipe on Keyboard

Copying or Pasting Text

To copy text:
1. Touch and hold on a word.
2. Drag the circles before and after the word to highlight the section to copy.
3. Touch Copy.

To paste text:
1. Touch and hold on a location where text will go.
2. Touch Paste.

Switching Between the Writing Languages

NOTE To add additional keyboard languages, refer to the TC70x Integrator Guide for Windows 10 IoT Mobile Enterprise or your system administrator.

The keyboard can be configured for multiple languages. To select a different language swipe left or right on the space bar until the language appears.

Using the Cursor Controller

To move the cursor from one character or line to another, touch and hold the cursor controller, and drag your finger to the direction you want.

Word Suggestions

The TC70x suggests words as you write, to help you write quickly and more accurately.
When you start writing a word, the TC70x suggests possible words. When the word appears in the suggestion bar, select the word. To see more suggestions, swipe left.

**NOTE** If the suggested word is marked in bold, the TC70x automatically uses it to replace the word you wrote. If the word is wrong, tap it to see the original word and a few other suggestions.

### Correcting a Word

If you notice that you have misspelled a word, tap it to see suggestions for correcting the word.

### Turn Word Suggestions Off

To turn off word suggestions:

1. Swipe down from the top of the screen, and tap **All settings > Time & language > Keyboard**.
2. Touch the language keyboard.
3. Deselect the **Suggest text** check box.

**NOTE** Word suggestions may not be available in all languages.
Un-Locking the Screen

Use the Lock screen to protect access to data on the TC70x. Some email account require locking the screen. Refer to the TC70x Integrator Guide for Windows 10 IoT Mobile Enterprise for information on setting up the locking feature.

To lock the device press the power key.

Set a PIN to Unlock Device

To require the user to enter a PIN when unlocking the screen:

1. Swipe down from the top of the screen, touch All settings > Accounts > Sign-in options.
2. Touch Add.
3. In the New PIN text box, enter a new PIN.
4. In the Confirm PIN text box, enter a new PIN again.
5. Touch OK.
6. In the Require sign-in drop-down list, select the amount of time before Windows requires the user to sign back in again.
7. Touch .

Unlock the Screen

To unlock the screen:

1. Press the power, scan or programmable button to wake the device.
2. Drag the lock screen up.
3. Enter the PIN. The device unlocks.

**Customizing Lock Screen**

To change the background photo on the lock screen:

1. Swipe down from the top of the screen, and touch **All settings > Personalization > Lock screen**.
2. Touch the **Background** drop-down list and select **My picture**, **Sample images** or **Bing**.
3. For **My picture** or **sample images**, touch **Browse**.
4. Select a photo.
5. For My picture, crop accordingly.
6. Touch ✓.

**Taking a Screenshot**

To take a screenshot of the TC70x’s screen, press the volume up key and the power key at the same time.

To view or manage the screenshots taken, touch **Photos > Albums > Screenshots**.
Resetting the Device

Perform a hardware reset if applications stop responding.

1. Press and hold the Power button, volume up button and Scan button for at least four seconds.

2. The device shuts down and then reboots.

**CAUTION** Performing a hard reset with a SD card installed in the TC70x may cause damage or data corruption to the SD card.
This section describes the applications installed on the device.

---

**Store**

![NOTE](image) A Microsoft account is required to use **Store**.

Use the **Store** to download applications and to update current applications.

Touch 🏠.
Installing Applications

Use the Microsoft Store to install applications on the TC70x.

1. Touch Store.
2. Touch > Apps.
3. Search for an application.

   ✔️ **NOTE** The Store contains free applications and paid applications. An account set up with payment is required for downloading paid applications.
4. Follow the instructions for downloading and installing the application.
5. The application appears in the All Apps list.

Updating Applications

Application updates bring important bug fixes and new functionalities. To get the best out of the TC70x, make sure all applications are up to date.

1. Touch Store.
2. Touch > Downloads and updates.
NOTE By default, the device automatically updates the applications when connected to Wi-Fi.

3. Touch **Check for updates**.

![Download Screen](image)

**Figure 3-2  Download Screen**

To turn off automatic updates:

1. Touch **Store > > Settings**.
2. Switch **Update apps automatically** to **Off**.
People

Use the People application to manage contacts.

From a Start or All Apps screen, touch People opens to the main list of contacts. View contacts in three ways at the top of the screen: Contacts, What’s New, and Groups. Touch the tabs to change how to view the contacts. Swipe up or down to scroll through the lists.

Adding a Contact

To add a contact:

1. In the People application, touch +.

   ![New Outlook Contact Screen](image)

   **Figure 3-3  New Outlook Contact Screen**

2. In the Name text box, enter the person’s name.
3. Touch the drop-down list, to select the type of phone. Options: Mobile, Home, Work, Company, Pager, Home fax, or Work fax.
4. In the text box, enter the person’s phone number.
5. Touch + Phone to add additional phone numbers. Repeat steps 3 and 4 for each additional phone number.
6. Touch the drop-down list, to select the type of email account. Options: Personal, Home or Other.
7. In the text box, enter the person’s email address.
8. Touch + Email to add additional email accounts. Repeat steps 3 and 4 for each additional email account.
9. Touch + Text tone to select a sound to play when a text message is received from the contact.
10. Touch + Address to add an address for the contact.
11. Touch + Other to add other personal information Options: Website, Company, Job Title, Office location, Significant other, Children, Birthday, Anniversary, or Notes.
12. In the text box, enter the person’s information.
13. Touch .

**Editing Contacts**
1. In the People application, touch and hold a person’s name.
2. Touch Edit.
3. Edit the contact information.
4. Touch .

**Deleting Contacts**
1. In the People application, touch and hold a person’s name.
2. Touch Delete.
3. Touch Delete to confirm.
Camera

This section provides information for taking photos and recording videos using the integrated digital cameras.

**NOTE** If a microSD card is installed, The TC70x saves photos and videos on the microSD card. If a microSD card is not installed, the TC70x saves photos and videos on the internal storage.

**Taking Photos**

**NOTE** Camera settings are described in *Photo Settings on page 3-8*.

1. Swipe down from the top of the screen.
2. Touch **Camera**.
3. If in video mode, touch  

![Camera Mode](image)

**Figure 3-4  Camera Mode**

4. To switch between the rear camera and front camera, touch  
5. Frame the subject on the screen.
6. To zoom in or out, press two fingers on the display and pinch or expand fingers.
7. Touch an area on the screen to focus.
8. Touch 📷.
The camera takes a photo and a shutter sound plays.
The photo displays as a thumbnail in the upper right corner.

Recording Videos

To record a video:

1. Swipe down from the top of the screen.
2. Touch Camera.
3. If in photo mode, touch 📷.
4. To switch between the rear camera and front camera, touch 📷.
5. Point the camera and frame the scene.
6. To zoom in or out, press two fingers on the display and pinch or expand fingers.
7. Touch 🎥 to start recording.
   The device starts recording the video. The video time displays the recording time.
8. Touch 🎥 to end recording.
   The video displays as a thumbnail in the upper right corner.

Figure 3-5 Video Mode
Photo Settings

When in Photo mode, photo settings display on screen.

- **Switch** - Touch to switch between the front and rear camera.
- **Flash mode** - Touch to set whether Rear-facing Camera relies on its light meter to decide whether a flash is necessary, or to turn it on or off for all shots.
  - **Flash off** - Disable flash.
  - **Flash auto** - Camera adjusts flash automatically depending upon light meter.
  - **Flash on** - Enable flash upon taking a photo (default).
- **HDR** – Touch to enable High Dynamic Range (HDR) imaging. HDR adds more dynamic range to photographs (the ratio of light to dark). HDR uses three photos, taken at different exposures to create the photo (default - disabled).

Touch the down arrow to view additional Pro settings.

- **White balance** - Touch to select how Camera adjusts colors in different kinds of light, to achieve the most natural-looking colors. Drag the slider around the arc to select options.
  - **Auto** - Adjust the white balance automatically (default).
  - **Cloudy** - Adjust the white balance for a cloudy environment.
  - **Daylight** - Adjust the white balance for daylight.
  - **Fluorescent** - Adjust the white balance for florescent lighting.
  - **Incandescent** - Adjust the white balance for incandescent lighting.
- **Focus Mode** - Touch to select the camera focus setting. Options: **Auto** (default), M (marco) or **Infinently**.
- **ISO Sensitivity** - **Auto** (default), 100, 200, 400, 800, 1600 or 3200.
- **Shutter speed** - **Auto**, 1/16000, 1/8000, 1/6400, 1/5000, 1/4000, 1/3200, ... 0.8s.
- **Brightness** - Touch to adjust the exposure settings. Options: +2, +1.7, +1.3, +1, +0.7, +0.3, 0 (default), -0.3, -0.7, -1, -1.3, -1.7, -2.

Video Settings

When in Video mode, video settings are displayed on screen.

- **Switch** - Touch to switch between the front and rear camera.
- **Video light** - Turn flash on and off.
  - **On**
  - **Off**

Touch the down arrow to view additional Pro settings.
- **White balance** - Touch to select how Camera adjusts colors in different kinds of light, to achieve the most natural-looking colors.
  - **Auto** - Adjust the white balance automatically (default).
  - **Cloudy** - Adjust the white balance for a cloudy environment.
  - **Daylight** - Adjust the white balance for daylight.
  - **Fluorescent** - Adjust the white balance for fluorescent lighting.
  - **Incandescent** - Adjust the white balance for incandescent lighting.
- **Focus Mode** - Touch to select the camera focus setting. Options: **Auto** (default), **M** (macro) or **Infinitely**.
- **Brightness** - Touch to adjust the exposure settings. Options: +2, +1.7, +1.3, +1, +0.7, +0.3, 0 (default), -0.3, -0.7, -1, -1.3, -1.7, -2.

**Camera Settings**

For additional settings touch • • • in the lower right corner of the screen.

- **Lenses** - Add more features to the camera app using Lenses. Available using the **Store** application.
- **Photo Timer** - Use to set a timer to take a photo after a selected delay.
- **Settings**
  - **Press and hold camera button** - Select the operation when the user presses and holds the camera button.
    - **Video** - Records video until the user lifts finger off the camera button.
    - **Photo burst** - Continuously takes photos until the user lifts finger off the camera button.
    - **Disabled** - Normal camera operation. (default).
  - **Photos** - Select additional photo options.
    - **Aspect ratio** - Select the aspect ratio of the photo. Options: 4:3 or 16:9 (default).
    - **Framing grid** - Adds a grid for aligning photos. Options: **Off** (default), **Rule of thirds**, **Golden ratio**, **Crosshairs** or **Square**.
    - **Focus light** - Use flash settings (default), **Auto** or **Always off**.
  - **Videos** - Select additional video options.
    - **Video recording** - Select video size and frame rate. Options: 1920x1080p/30 fps (default), 1920x1080p/24 fps, 1920x1080p/15 fps, 1920x720p/30 fps, 1920x720p/24 fps, 1920x720p/15 fps, 952x528p/30 fps, 952x528p/24 fps or 952x528p/15 fps
    - **Digital video stabilization** - Options: **Auto** (default) or **Off**.
Use Photos to:

- view photos and videos
- perform basic editing of photos.

**View Photos and Videos**

To view photos and videos:

1. Touch Photos.

2. To view a photo or video, touch the photo or video.

*NOTE* The device supports the following image formats: jpeg, gif, png and bmp.

The device supports the following video formats: H.263, H.264 and MPEG4 Simple Profile.

![Photos App](image)
Figure 3-7  View Photo

3. To view the next photo or video, swipe left. To view the previous photo or video, swipe right.

   ![Photo]  

   **NOTE** To zoom in or out, place two fingers on the screen, and slide fingers together or apart.

   - ![Share photo] - Share photo - send photo to another person, application or device.
   - ![Favorite] - Make photo a favorite
   - ![Edit photo] - Edit a photo
   - ![Delete photo] - Delete photo
   - ![More] - More
     - Slideshow - display all photos in the display in sequence.
     - Set as - set photo as the lock screen, background or Photo tile.
     - Add to Album - add the photo to an album.
     - File Info - View information about the photo.

**Editing a Photo**

To edit a photo:

1. Touch **Photos**.
2. Touch a photo to open it.
3. Touch 🖌.

✓ **NOTE** If other photo editor apps were downloaded from the Store, they are listed as editing options.

![Figure 3-8 Editing a Photo](image)

Touch one of the following basic editing features:

- 📂 - Crop the photo to a new size.
- 🌟 - Enhance the resolution and clarity of the photo.
- ⌚ - Rotate the photo 90° clockwise.
- 🖼 - Save a copy of the photo.

1. To save the edited photo, Touch ••• > Save.
Continuum

With Continuum-compatible accessories, connect the TC70x to a monitor, mouse or keyboard to make the TC70x work like a laptop.

Continuum takes advantage of the Universal Windows application framework by allowing applications to optimize their appearance based on which display (such as the device screen, monitor, big screen television or conference room projector) they are opened on.

When connecting the TC70x to an external display such as a monitor, television or projector, Windows 10 Mobile launches a separate tailored experience on the external display while maintaining the expected experience on the TC70x. Additionally, a mouse or a keyboard may be used with the external display similar to how they would with a host computer.

![Wireless Connection](image)

**Figure 3-9  Wireless Connection**

The TC70x and monitor are managed as separate independent displays; a cursor or application windows cannot be dragged between and the desktop cannot be extended across them. An application can be launched on either monitor, and applications can choose to have a companion experience on the internal screen when the app is running on the extended screen. When a keyboard and mouse are paired to the TC70x their input is targeted only to the external screen. If a keyboard and mouse is not connected, the TC70x can be used to provide input to the external screen.

In the desktop environment, you have:

- Traditional desktop experience with Start Menu
- Windows 10 apps scale to the external screen
- Full keyboard and mouse support

In the mobile environment, you have:

- Full mobile functionality including communication and apps
- Windows 10 apps scale to device screen size.

**NOTE** Zebra verified the ScreenBeam Mini2 Continuum edition dongle from Actiontec.

Cortana

NOTE A Microsoft account is required to use Cortana.

Cortana is a voice activated assistant.

Make sure that the device and speech language match and are supported by Cortana. If the Cortana language is not supported in your region, try changing the regional settings. For example, if the device and speech language is Italian, set Italy as the region.

Cortana can:

• Schedule a meeting
• Set a reminder for an important task
• Send automatic replies for callers when you don’t want to be disturbed
• Send email
• Check your location
• Search the web and cloud storage
• Get up-to-date traffic and weather information.

Set Up Cortana

Tell Cortana a little bit about yourself, so you can get better help and find what you’re looking for.

1. Touch the search key.
2. Follow the instructions shown on the device.

To later change your settings

1. Touch \(\bigcirc\). 
2. Touch \(\equiv\) > Notebook > Settings.

Install a Speech Language

Depending on your region and Cortana version, you may need to download and install the appropriate speech language to use Cortana.

1. Swipe down from the top of the screen, and Touch All settings > Time & language > Speech.
2. Touch Add a language, and follow the instructions to install the language.
   After installation reboot may be required.

Using Cortana

To use Contana:

1. Touch \(\bigcirc\).
2. Touch \(\bigcirc\).
3. Speak a command and follow the instructions shown on the device.
To open the Cortana voice assistant quickly, touch and hold 🔍. Example: Say “Make an appointment.”
Messaging

Use Messaging to send and receive messages using Skype. From the Start or All Apps screen, touch 📬.

Figure 3-10  Messaging Screen

Sending a Text Message

1. In the main Messaging screen, touch 📬.
2. In the **To** field, enter a name from Contacts list.

3. In the **Type message** field, enter the text message.
   
   If the user presses the Back button while composing a message, it’s saved as a draft in the Messaging screen. Touch the conversation to resume composing it.

4. Touch ➤ to send the message.
Figure 3-12  Skype Conversation Screen
Microsoft Edge

Use Microsoft Edge web browser to access web pages.

Figure 3-13  Microsoft Edge

Opening a Web Page

To open a web page:

1. Touch Microsoft Edge.
2. Touch the address bar.
3. Enter a web address.
4. Touch →.
Opening a New Tab

When visiting several websites at the same time, open new browser tabs and switch between them.

1. Touch > .

Switching Between Tabs

To switch between open tabs:

1. Touch .
2. Touch the tab to view.

Closing a Tab

To close open tabs:

1. Touch .
2. Touch on the tab to close.

Tip: To close all tabs, Touch, and select if you want to close all tabs or only the ones you’ve opened for private browsing.

Make a website easier to read
Small text on a website can be hard to read. Use your browser in mobile or desktop mode, or switch certain web pages to the reading view and set the font size to your liking. To set the browser to always use the mode you want, Touch Microsoft Edge > > Settings, and change the setting for Website preference.

Adding a Website to Favorites

To add a website to favorites:

1. Go to a website.
2. Touch > add to favorites.
3. In the Name text box, edit the name of the website.
4. In the Save location drop-down list, select Favorites or Favorites Bar.
5. Touch ADD.

✓ NOTE You can also pin your favorite websites to the start screen. While browsing a website, Touch > Pin this page to Start.

Found a website you want to read, but don’t have time right now? Add it to your reading list. Touch > Add to reading list > ADD. If you’re signed in to your Microsoft account, your reading list is synced to your account, so you can find your reading list on all your devices. To find the websites you have saved to your reading list, Touch > Reading list.

Opening a Favorite Website

To open a favorite website:

1. Touch > Favorites.
2. Touch a website from the list.
OneDrive

NOTE A Microsoft account is required to use OneDrive.

Use OneDrive to upload and save any file type including documents, photos, videos, and music files.

Upload Files

To upload files:

1. In the folder where you want the photos added, tap Add ⌃.
2. At Choose an app, pick the source of the file to upload, such as This Device or Photos app.

NOTE If the TC70x is set to save photos automatically to OneDrive, the Photos app shows photos from OneDrive as well as photos that have not been uploaded. Uploading a photo already in OneDrive creates a duplicate of the photo.

3. Find the file to upload.
4. Touch to select the photo.
5. Touch ✅. The file uploads to OneDrive.

Upload Photos Automatically

To automatically upload photos to OneDrive:

1. Touch 📷 > ☀️ Settings > Camera upload.
2. Under Camera upload, turn the switch On.
3. To also automatically upload videos, turn On the Include videos switch.

NOTE The user can upload videos automatically only if Camera upload is also turned on.

4. Under Camera backup account, open the list and select the OneDrive account that you want pictures uploading to.

Add a Folder

Add folders in the Files view, or inside any other folder in OneDrive.

1. In the All Files view, tap ⋮ > Create a new folder.
2. Enter a name for the new folder.
3. Touch ✓.

Move Files to Another folder

To move files:
1. Touch \[\text{•••}\].
2. Touch the check box of one or more files to move.
3. Touch \[\text{⋯ > Move}\].
4. At Move items to, touch a folder.
5. Touch \[\checkmark\].

Find Files

To search for file or folder names, text within files, and text and tags in photos.

1. Touch \[\text{🔎}\] in the top right corner of the screen.
2. In the Search text box, enter a phrase.
3. Touch \[\text{🔎}\].

Download Files to the Device

To download files from OneDrive:

1. Touch \[\text{•••}\].
2. Touch the check box of the files that you want.
3. Touch \[\text{▼}\].
4. Touch \[\checkmark\].

\[\text{NOTE}\] OneDrive currently does not support downloading folders or OneNote notebooks.

5. Find and open the folder on your device where you want the downloads.
6. Touch \[\checkmark\].
**OneNote**

- **NOTE** A Microsoft account is required to use OneDrive.

Use OneNote to take notes. OneNote automatically syncs notes to OneDrive.

1. Touch **OneNote**.
2. Touch ‡ to create a new note.
3. In the heading, enter a title for the note.
4. In the note body section, write notes.

- **NOTE** Touch ‡ to use speak to text to write a note.

5. Use the toolbar above the keyboard to format text (text format, paragraph format, etc.).
6. Touch ‡ to save the note.

- **NOTE** To add an attachment, Touch ‡.
Outlook Calendar

Use Outlook Calendar to create appointment and events.

Viewing Calendar

In the Start screen or All App screen, touch Outlook Calendar.

Figure 3-16  Outlook Calendar

- **Today** - Show today calendar.
- **New** - Create new appointment.
- **View** - Change calendar view: Agenda, Day, Week, Month or Year view.
- ...
  - **Manage accounts** - add and delete accounts associated with Outlook Calendar.
  - **Settings** - change Outlook Calendar settings.
  - **Feedback** - provide feedback to Microsoft about Outlook Calendar.

Creating an Appointment

To create an appointment:
3. Touch . The appointment appears in the Calendar view.

Sending a Meeting Invitation

To invite people to a meeting:

1. Touch .
2. In the Details tab, enter all the meeting information.
3. Touch People tab.
4. In the Invite someone text box, enter the name or email address of the attendees.
5. Touch .
Outlook Mail

Use Outlook Mail to send and receive emails.

Sending Emails

To send an email:
1. Touch **Outlook Mail**.
2. In the inbox, touch .
3. In the **To** field, add a recipient from contacts list or write an email address.
4. In the **Subject** field, enter the subject.
5. In the message body, enter the email message.
6. To attach a photo or a file, touch .
6. Touch ➤ to send the email.

Reading Email

To read an email:
1. Touch Outlook Mail.
2. In the inbox, touch the email. Unread email is marked in a different color.

✓ **NOTE** To zoom in or out, place 2 fingers on the screen, and slide them together or apart.

Deleting Mails

To delete multiple emails:
1. In your mailbox, touch .
2. Touch the check boxes that appear next to the emails.
3. Touch .

✓ **NOTE** All the selected emails are deleted. Depending on email account, the email may also be deleted from the email server.

To delete a single email:
1. Open the email.
2. Touch .

Forwarding Mail

To send an email to another user:
1. Open the mail.
2. Touch > Forward.
3. In the To: filed, enter an email address.
4. In the message body, enter a message.
5. Touch ➡ to forward the email.

**Sending Automatic Replies**

If you are on vacation or otherwise out of the office, you can send automatic replies to the emails that arrive during your absence.

1. Open Outlook Mail.
3. Switch Send automatic replies to On.
4. In the text box, enter a reply.
5. Touch ←.
Skype

NOTE A Microsoft account is required to use Skype.

Use the TC70x to make Skype-to-Skype calls and video calls over Wi-Fi.

Making a Call

To make a call:

1. Touch 📞 Skype.
2. Sign in with your Microsoft account.
3. To call a Skype contact, touch people.
4. Touch the contact to call.
5. Touch 📞.

6. Talk to the other person.
7. Touch to end the call.

Figure 3-17  Skype Audio Screen
Receiving a Call

_Verified_ When using a Bluetooth headset, press the headset button to answer the call. Do not press the on-screen button on the device.

To answer a Skype call:

1. When an incoming Skype call occurs, the following displays.

![Incoming Skype Call](image)

Figure 3-18  *Incoming Skype Call*

2. Touch _Answer_ on the device or press the Bluetooth headset button to answer the call. Touch _Ignore_ to not answer the call.

3. Touch _to end the call._

Making a Video Call

To make a video call:

1. Touch _Skype_.
2. Sign in with your Microsoft account.
3. To call a Skype contact, touch _people_.
4. Touch the contact to call.
5. Touch _.
6. Talk to the other person.

7. Touch to end the call.

Receiving a Video Call

NOTE When using a Bluetooth headset, press the headset button to answer the video call. Do not press the on-screen button on the device.

To answer a Skype video call:

1. When an incoming Skype video call occurs, the following displays.
Figure 3-20  Receive Video Call

2. Touch **Video** on the device or press the Bluetooth headset button to answer the call.
   - Touch **Audio** to answer as an audio call.
   - Touch **Ignore** to not answer the video call.

3. Touch **结束** to end the call.

Chat using Skype

*NOTE* A Microsoft account is required to send messages using Skype.

Use the TC70x to send Skype-to-Skype instant messages.

1. Touch **Skype**.
2. Sign in with your Microsoft account.
3. To send a message to a Skype contact, touch **people**.
4. Touch a contact.
5. In the message box, write a message.
Figure 3-21  *Send Skype Message*

6. Touch ☺️ to send the message.
Skype Video

NOTE A Microsoft account is required to use Skype Video.

To make a video call using Skype Video:

1. Touch Skype Video.
2. Touch to view contact list.
3. Touch the contact to call.
4. Touch Skype video. When the video call connects, the recipient appears in the main screen and the caller appears in the small box.

5. Touch to end the video call.

Figure 3-22 Skype Video
File Explorer

Use File Explorer to view and manage files on the TC70x.

To open File Explorer, touch File Explorer.

Options:

- Select - Select one or more files or folders.
- New Folder - Create a new folder,
- Icons - Display files or folders in list or grid.
- Search - Search for files or folders on the device.
- More
  - Refresh - Refresh the current folder list.
  - Select all - Select all files or folders in the current folder.
  - Rename - Rename a file or folder.
  - Clear selection - Clear selected files.
  - Properties - View information about the selected folder or file.

After selecting a file, performs any of the following options:
Figure 3-24  Selected File

- Delete - Delete the select files or folders.
- Move - Move the select file to another folder.
- Copy - Copy the select file to another folder.
- Share - Share the selected file via Bluetooth, messaging or mail.
- . . . More
  - Select all - Select all files or folders in the current folder.
  - Clear selection - Clear selected files.
  - Rename - Rename a file or folder.
  - Properties - View information about the selected folder or file.
Zebra Barcode Scanner

Use the Zebra Barcode Scanner app to demonstrate scan functionality of the TC70x.

Download the Zebra Barcode Scanner app from the Microsoft Store. See Store on page 3-1.

To demonstrate bar code scanning:

1. Open the Zebra Barcode Scanner app.

2. Point the exit window on the top of the TC70x at a bar code.
3. Press and hold the scan button. The red laser aiming pattern turns on to assist in aiming.
4. Ensure the bar code is within the area formed by the crosshairs in the aiming pattern. The aiming dot is used for increased visibility in bright lighting conditions.
5. The Data Capture LED lights green to indicate the bar code was decoded successfully.
6. Release the scan button. The decoded data displays on the screen.
Figure 3-26  Decoded Data

Settings

**NOTE** Before opening Settings menu, ensure that the Status is “Scanner claimed. Ready to scan.”

Set Profiles

The Set Profiles option allows the user to select various scanner options.

1. Touch ...
2. Touch Set Profiles.
3. Touch an option to select.
4. Touch Set Profile to enable the option.
5. Touch Back.

Set Symbologies

The Set Symbologies option allows the user to enable or disable symbologies that the app decodes.

1. Touch ...
2. Touch Set Symbologies.
3. Touch a checkbox to enable or disable the symbology.
4. Touch Set Symbologies to enable the options.
5. Touch Back.
CHAPTER 4 DATA CAPTURE

The TC70x offers data capture using the integrated imager.

Imaging

The TC70x with an integrated 2D imager has the following features:

- Omnidirectional reading of a variety of bar code symbologies, including the most popular linear, postal, PDF417, and 2D matrix code types.
- The ability to capture and download images to a host for a variety of imaging applications.
- Advanced intuitive laser aiming cross-hair and dot aiming for easy point-and-shoot operation.

The imager uses imaging technology to take a picture of a bar code, stores the resulting image in its memory, and executes state-of-the-art software decoding algorithms to extract the bar code data from the image.

Operational Modes

The TC70x with an integrated imager supports two modes of operation, listed below. Activate each mode by pressing the Scan button.

- **Decode Mode**: In this mode, the TC70x attempts to locate and decode enabled bar codes within its field of view. The imager remains in this mode as long as the user holds the scan button, or until it decodes a bar code.

- **Pick List Mode**: This mode allows the user to selectively decode a bar code when more than one bar code is in the TC70x’s field of view. To accomplish this, move the aiming crosshair or dot over the required bar code to decode only this bar code. This feature is ideal for pick lists containing multiple bar codes and manufacturing or transport labels containing more than one bar code type (either 1D or 2D).
Scanning Considerations

Typically, scanning is a simple matter of aim, scan, and decode and a few quick trial efforts master it. However, consider the following to optimize scanning performance:

- **Range**: Any scanning device decodes well over a particular working range — minimum and maximum distances from the bar code. This range varies according to bar code density and scanning device optics. Scanning within range brings quick and constant decodes; scanning too close or too far away prevents decodes. Move the scanner closer and further away to find the right working range for the bar codes being scanned.

- **Angle**: Scanning angle is important for promoting quick decodes. When laser beams reflect directly back into the scanner from the bar code, this specular reflection can “blind” the scanner. To avoid this, scan the bar code so that the beam does not bounce directly back. But don’t scan at too sharp an angle; the scanner needs to collect scattered reflections from the scan to make a successful decode. Practice quickly shows what tolerances to work within.

- Hold the TC70x farther away for larger symbols
- Move the TC70x closer for symbols with bars that are close together.

**NOTE** Scanning procedures depend on the application and TC70x configuration. An application may use different scanning procedures from the one listed above.

Imager Scanning

To read a bar code, a scan-enabled application is required.

1. Ensure that an application is open on the TC70x and a text field is in focus (text cursor in text field).
2. Point the exit window on the top of the TC70x at a bar code.

3. Press and hold the scan button.
   The red laser aiming pattern turns on to assist in aiming.

**NOTE** When the TC70x is in Picklist mode, the imager does not decode the bar code until the crosshair or aiming dot touches the bar code.
4. Ensure the bar code is within the area formed by the crosshairs in the aiming pattern. The aiming dot is used for increased visibility in bright lighting conditions.

![Figure 4-2 Aiming Pattern]

5. The Data Capture LED lights green and a beep sounds, by default, to indicate the bar code was decoded successfully.

6. Release the scan button.
   
   Imager decoding usually occurs instantaneously. The TC70x repeats the steps required to take a digital picture (image) of a poor or difficult bar code as long as the scan button remains pressed.

7. The bar code content data displays in the text field.
CHAPTER 5 WIRELESS

This section provides information on the wireless features:

- Wireless Local Area Network (WLAN)
- Bluetooth
- Near Field Communications (NFC)

Wireless Local Area Networks

Wireless local area networks (WLANs) allow the TC70x to communicate wirelessly inside a building. Before using the TC70x on a WLAN, the facility must be set up with the required hardware to run the WLAN (sometimes known as infrastructure). The infrastructure and the TC70x must both be properly configured to enable this communication.

Refer to the documentation provided with the infrastructure (access points (APs), access ports, switches, Radius servers, etc.) for instructions on how to set up the infrastructure.

Once the infrastructure is set up to enforce the chosen WLAN security scheme, use the Wireless & networks settings configure the TC70x to match the security scheme.

The TC70x supports the following WLAN security options:

- Open
- Wireless Equivalent Privacy (WEP).
- Wi-Fi Protected Access (WPA)/WPA2 Personal (PSK).
- 802.11x.

The Status bar displays icons that indicate Wi-Fi network availability and Wi-Fi status. See Status Bar on page 2-16 for more information.

NOTE Turn off Wi-Fi when not using it, to extend the life of the battery.

Scan and Connect to a Wi-Fi Network

To connect to a Wi-Fi network:
1. Swipe down from the top of the screen, and touch \( \text{All settings} > \text{Network & wireless} > \text{Wi-Fi} \).
2. Touch the **Wi-Fi networking** switch to turn on the Wi-Fi radio.
3. The TC70x searches for WLANs in the area and lists them.

![Wi-Fi Screen](image)

**Figure 5-1** Wi-Fi Screen

4. Scroll through the list and select the desired WLAN network.
5. In the **Sign in** window, enter the network password.
6. Touch **Done**.
7. For open networks, touch profile once or for secure networks enter the required password or other credentials then touch **Done**. See the system administrator for more information.
   - The TC70x obtains a network address and other required information from the network using the dynamic host configuration protocol (DHCP) protocol. To configure the TC70x with a fixed internet protocol (IP) address, Refer to the **TC70x Integrator Guide for Windows 10 IoT Mobile Enterprise** for more information.
8. In the Wi-Fi setting field, **Connected** appears indicating that the TC70x is connected to the WLAN.

**Remove a Wi-Fi Network**

To remove a remembered or connected network:

1. Swipe down from the top of the screen, and touch \( \text{All settings} > \text{Network & wireless} > \text{Wi-Fi} \).
2. Under **Connected to**, touch and hold a network name until a menu appears.
3. Touch **Delete**.
4. Touch \( \) .
Bluetooth

Bluetooth-equipped devices can communicate without wires, using frequency-hopping spread spectrum (FHSS) radio frequency (RF) to transmit and receive data in the 2.4 GHz Industry Scientific and Medical (ISM) band (802.15.1). Bluetooth wireless technology is specifically designed for short-range (10 meters (32.8 feet)) communication and low power consumption.

Devices with Bluetooth capabilities can exchange information (e.g., files, appointments, and tasks) with other Bluetooth enabled devices such as printers, access points, and other mobile devices.

The TC70x support Bluetooth Low Energy. Bluetooth Low Energy is targeted at applications in the healthcare, fitness, security, and home entertainment industries. It provides reduced power consumption and cost while maintaining standard Bluetooth range.

Adaptive Frequency Hopping

Adaptive Frequency Hopping (AFH) is a method of avoiding fixed frequency interferers, and can be used with Bluetooth voice. All devices in the piconet (Bluetooth network) must be AFH-capable in order for AFH to work. There is no AFH when connecting and discovering devices. Avoid making Bluetooth connections and discoveries during critical 802.11b communications. AFH for Bluetooth consists of four main sections:

- Channel Classification - A method of detecting an interference on a channel-by-channel basis, or pre-defined channel mask.
- Link Management - Coordinates and distributes the AFH information to the rest of the Bluetooth network.
- Hop Sequence Modification - Avoids interference by selectively reducing the number of hopping channels.
- Channel Maintenance - A method for periodically re-evaluating the channels.

When AFH is enabled, the Bluetooth radio “hops around” (instead of through) the 802.11b high-rate channels. AFH coexistence allows Enterprise devices to operate in any infrastructure.

The Bluetooth radio in this device operates as a Class 2 device power class. The maximum output power is 2.5 mW and the expected range is 10 meters (32.8 ft.). A definition of ranges based on power class is difficult to obtain due to power and device differences, and whether one measures open space or closed office space.

NOTE It is not recommended to perform Bluetooth wireless technology inquiry when high rate 802.11b operation is required.

Security

The current Bluetooth specification defines security at the link level. Application-level security is not specified. This allows application developers to define security mechanisms tailored to their specific need. Link-level security occurs between devices, not users, while application-level security can be implemented on a per-user basis. The Bluetooth specification defines security algorithms and procedures required to authenticate devices, and if needed, encrypt the data flowing on the link between the devices. Device authentication is a mandatory feature of Bluetooth while link encryption is optional.

Pairing of Bluetooth devices is accomplished by creating an initialization key used to authenticate the devices and create a link key for them. Entering a common personal identification number (PIN) in the devices being paired generates the initialization key. The PIN is never sent over the air. By default, the Bluetooth stack responds with no key when a key is requested (it is up to user to respond to the key request event). Authentication of Bluetooth devices is based-upon a challenge-response transaction. Bluetooth allows for a PIN or passkey used to create other 128-bit keys used for security and encryption. The encryption key is derived from the link key used to
authenticate the pairing devices. Also worthy of note is the limited range and fast frequency hopping of the Bluetooth radios that makes long-distance eavesdropping difficult.

Recommendations are:

- Perform pairing in a secure environment
- Keep PIN codes private and do not store the PIN codes in the device
- Implement application-level security.

Bluetooth Profiles

The device supports the following Bluetooth services:

- Service Discovery Protocol (SDP) - Handles the search for known and specific services as well as general services.
- Serial Port Profile (SPP) - Allows use of RFCOMM protocol to emulate serial cable connection between two Bluetooth peer devices. For example, connecting the device to a printer.
- Object Push Profile (OPP) - Allows the device to push and pull objects to and from a push server.
- Advanced Audio Distribution Profile (A2DP) - Allows the device to stream stereo-quality audio to a wireless headset or wireless stereo speakers.
- Audio/Video Remote Control Profile (AVRCP) - Allows the device to control A/V equipment to which a user has access. It may be used in concert with A2DP.
- Personal Area Network (PAN) - Allows the use of Bluetooth Network Encapsulation Protocol to provide L3 networking capabilities over a Bluetooth link. Only PANU role is supported.
- Human Interface Device Profile (HID) - Allows Bluetooth keyboards, pointing devices, gaming devices and remote monitoring devices to connect to the device.
- Headset Profile (HSP) - Allows a hands-free device, such as a Bluetooth headset, to place and receive calls on the device.
- Hands-Free Profile (HFP) - Allows car hands-free kits to communicate with the device in the car.
- Out of Band (OOB) - Allows exchange of information used in the pairing process. Pairing is completed using the Bluetooth radio, but requires information from the OOB mechanism. Using OOB with NFC enables pairing when devices simply get close, rather than requiring a lengthy discovery process.
- Generic Attributes (GATT) - Provides profile discovery and description services for Bluetooth Low Energy protocol and defines how attributes are grouped together into sets to form services.

Bluetooth Power States

The Bluetooth radio is off by default.

- Connected Standby - When the TC70x goes into connected standby mode, the Bluetooth radio stays on.
- Airplane Mode - When the TC70x is placed in Airplane Mode, the Bluetooth radio turns off. When Airplane mode is disabled, the Bluetooth radio returns to the prior state. When in Airplane Mode, the Bluetooth radio can be turned back on if desired.

Bluetooth Radio Power

Turn off the Bluetooth radio to save power or if entering an area with radio restrictions (e.g., an airplane). When the radio is off, other Bluetooth devices cannot see or connect to the device. Turn on the Bluetooth radio to exchange information with other Bluetooth devices (within range). Communicate only with Bluetooth radios in close proximity.
Enabling Bluetooth

1. Swipe down from the top of the screen, and touch "All settings" > "Devices" > "Bluetooth".
2. Touch the "Status" switch to turn Bluetooth on.
3. Touch .

Disabling Bluetooth

1. Swipe down from the top of the screen, and touch "All settings" > "Devices" > "Bluetooth".
2. Touch the "Status" switch to turn Bluetooth off.
3. Touch .

Discovering Bluetooth Device(s)

The TC70x can receive information from discovered devices without pairing. However, once paired, the TC70x and a paired device exchange information automatically when the Bluetooth radio is on. To find Bluetooth devices in the area:

1. Ensure that Bluetooth is enabled on both devices.
2. Ensure that the Bluetooth device to discover is in discoverable mode.
3. Ensure that the two devices are within 10 meters (32.8 feet) of one another.
4. Swipe down from the top of the screen, and touch "All settings" > "Devices" > "Bluetooth".
5. Touch the "Status" switch to turn Bluetooth on. The TC70x begins searching for discoverable Bluetooth devices in the area and displays them on the screen.
6. Scroll through the list and select a device. The Bluetooth pairing request dialog box appears.
7. Enter a PIN in the text box and touch OK. Enter the same PIN on the other device.
8. For Simple Pairing, touch Pair on both devices.
9. The Bluetooth device is added to the Bluetooth devices list and a trusted ("paired") connection is established.

Changing the Device Name

By default, the TC70x has a generic name that is visible to other devices when connected.

1. Swipe down from the top of the screen, and touch "All settings" > "System" > "About".
2. Touch Edit name.
3. Enter a name and touch Save.
4. Touch .

Connecting to a Bluetooth Device

Once paired, connect to a Bluetooth device.
1. Swipe down from the top of the screen, and touch All settings > Devices > Bluetooth.
2. Touch the Status switch to turn Bluetooth on.
3. Touch Bluetooth.
4. If Bluetooth is not on, slide the switch to the ON position.
5. In the PAIRED DEVICES list, touch and hold on a unconnected Bluetooth device until a menu appears.
6. Touch Connect. When connected, the device is displayed as connected in the list.

Selecting Profiles on the Bluetooth Device

Some Bluetooth devices have multiple profiles. To select a profile:

1. Swipe down from the top of the screen, and touch All settings > Devices > Bluetooth.
2. In the PAIRED DEVICES list, touch next to the device name.
3. Under PROFILES, check or uncheck a profile to allow the device to use that profile.
4. Touch .

Unpairing a Bluetooth Device

To unpair a Bluetooth device and erase all pairing information:

1. Swipe down from the top of the screen, and touch All settings > Devices > Bluetooth.
2. Touch and hold on a device name until a menu appears.
3. Touch Delete.
4. Touch .
Near Field Communications

NFC/HF RFID is a short-range wireless connectivity technology standard that enables secure transaction between a reader and a contactless smartcard. The technology is based on ISO/IEC 14443 type A and B (proximity) and ISO/IEC 15693 (vicinity) standards, using the HF 13.56 MHz unlicensed band. The TC70x support 3 operating modes:

- Reader mode
- Peer-to-Peer communication
- Card Emulation mode.

Using NFC, the TC70x can:

- Read contactless cards such as contactless tickets, ID cards and ePassport.
- Read and write information to contactless cards such as SmartPosters and tickets, as well as devices with NFC interface such as vending machines.
- Read information from supported medical sensors.
- Pair with supported Bluetooth devices such as printers and headsets.
- Exchange data with another NFC device.
- Emulate contactless card such as payment, ticket or SmartPoster.

The TC70x NFC antenna is uniquely positioned to read NFC cards from the top of the device while being held in the user’s hand.

Reading NFC Cards

1. Launch an NFC enabled application.
2. Hold device as shown.
3. Move TC70x close to the NFC card until the TC70x detects the card.
4. Hold the card steadily until the transaction is complete (usually indicated by the application).

Sharing Information Using NFC

You can beam content like a web page, contact cards, pictures, YouTube links or location information from your screen to another device by bringing the devices together back to back.

Make sure both devices are unlocked, support NFC, and have both NFC and Android Beam turned on.

1. Open a screen that contains a web page, video, photo or contact.
2. Move the top of the TC70x toward the top of the other device.

![Sharing Data Using NFC](image)

When the devices connect, you hear a sound, the image on the screen reduces in size, the message **Touch to beam** appears.

3. Touch anywhere on the screen.
   The transfer begins.

NFC Settings

To enable NFC:

1. Swipe down from the top of the screen, and touch 🛡️ **All settings** > 📦 **Devices** > **NFC**.
2. Touch the **Tap to share** switch to turn NFC to **On**.

⚠️ **NOTE** Before using NFC, make sure the screen and keys are unlocked.

Read NFC Tags

NFC tags can contain info, such as a web address, a phone number, or a business card.

Tap a tag with the NFC area of the TC70x.
This chapter provides information for using the accessories for the device.

## Accessories

This table lists the accessories available for the TC70x.

<table>
<thead>
<tr>
<th>Accessory</th>

Table 6-1  TC70x Accessories  (Continued)
2-Slot Charge Only Cradle

**CAUTION** Ensure that you follow the guidelines for battery safety described in *Battery Safety Guidelines on page 7-1*.

The 2-Slot Charge Only Cradle:
- Provides 5 VDC power for operating the device.
- Charges the device’s battery.
- Charges a spare battery.

**Figure 6-1** 2-Slot Charge Only Cradle

**Charging the Device**

1. Insert the device into the slot to begin charging.
2. Ensure the device is seated properly.

**Charging the Spare Battery**

1. Insert the battery into the right slot to begin charging.

2. Ensure the battery is seated properly.
Battery Charging

**Main Battery Charging**

The device’s Charging/Notification LED indicates the status of the battery charging in the device. The 4,620 mAh fully depleted battery fully charges in less than five hours at room temperature.

**Spare Battery Charging**

The Spare battery Charging LED on the cup indicates the status of the spare battery charging. The 4,620 mAh fully depleted battery fully charges in less than five hours at room temperature.

### Table 6-2 **Spare Battery Charging LED Indicators**

<table>
<thead>
<tr>
<th>LED</th>

<td>Charging complete and battery is at the end of useful life.</td>
</tr>
<tr>
<td>Fast Blinking Red</td>
<td>Error in charging; check placement of spare battery and battery is at the end of useful life.</td>
</tr>
<tr>
<td>Off</td>
<td>No spare battery in slot; spare battery not placed correctly; cradle is not powered.</td>
</tr>
</tbody>
</table>

**Charging Temperature**

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.
2-Slot USB/Ethernet Cradle

CAUTION Ensure that you follow the guidelines for battery safety described in Battery Safety Guidelines on page 7-1.

The 2-Slot USB/Ethernet Cradle:

- Provides 5.0 VDC power for operating the device.
- Charges the device’s battery.
- Charges a spare battery.
- Connects the device to an Ethernet network.
- Provides communication to a host computer using a USB cable.

NOTE Remove all attachments on the device, except the hand strap, before place onto the cradle.

Figure 6-4 2-Slot USB/Ethernet Cradle

Charging the Device

1. Place the bottom of the device into the base.
1. Rotate the top of the device until the connector on the back of the device mates with the connector on the cradle.

2. Ensure the device is connected properly. The charging Charging/Notification LED on the device begins blinking amber indicating that the device is charging.

**Charging the Spare Battery**

1. Insert the battery into the right slot to begin charging.
2. Ensure the battery is seated properly.

**Battery Charging**

**Main Battery Charging**

The device's Charging/Notification LED indicates the status of the battery charging in the device.

The 4,620 mAh fully depleted battery fully charges in less than five hours at room temperature.

**Spare Battery Charging**

The Spare battery Charging LED on the cup indicates the status of the spare battery charging.

The 4,620 mAh fully depleted battery fully charges in less than five hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.

USB/Ethernet Communication

The 2–Slot USB/Ethernet Cradle provides both Ethernet communication with a network and USB communication with a host computer. Prior to using the cradle for Ethernet or USB communication. Ensure that the switch on the USB/Ethernet module is set properly.

Turn the cradle over to view the module.

![2-Slot USB/Ethernet Cradle Module Switch](image)

For Ethernet communication, slide the switch to the position.

For USB communication, slide the switch to the position.

Place the switch in the center position to disable communications.

Ethernet LED Indicators

There are two LEDs on the USB/Ethernet Module RJ-45 connector. The green LED lights to indicate that the transfer rate is 100 Mbps. When the LED is not lit the transfer rate is 10 Mbps. The yellow LED blinks to indicate activity, or stays lit to indicate that a link is established. When it is not lit it indicates that there is no link.

5-Slot Charge Only Cradle

**CAUTION** Ensure that you follow the guidelines for battery safety described in *Battery Safety Guidelines on page 7-1.*

The 5-Slot Charge Only Cradle:

- Provides 5 VDC power for operating the TC70x.
- Simultaneously charges up to five TC70x devices and up to four TC70x devices and on 4-Slot Battery Charger using the Battery Charger Adapter. See the *TC70x Integrator Guide* for information on installing the 4-Slot Battery Charger onto the cradle.
- Consists of a cradle base and cups that can be configured for various charging requirements.

**Figure 6-9** 5-Slot Charge Only Cradle

**Charging the TC70x**

1. Insert the TC70x into a slot to begin charging.
Figure 6-10  TC70x Battery Charging

Figure 6-11  5-Slot Charge Only Cradle with Four Slot Battery Charger
2. Ensure the TC70x is seated properly.
   See the TC70x Integrator Guide for information on installing the 4-Slot Battery Charger onto the cradle.

Battery Charging

Main Battery Charging
The device’s Charging/Notification LED indicates the status of the battery charging in the device.
The 4,620 mAh fully depleted battery fully charges in less than five hours at room temperature.

Spare Battery Charging
The Spare battery Charging LED on the cup indicates the status of the spare battery charging.
The 4,620 mAh fully depleted battery fully charges in less than five hours at room temperature.

</table>

Charging Temperature
Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.
5-Slot Ethernet Cradle

**CAUTION** Ensure that you follow the guidelines for battery safety described in [Battery Safety Guidelines on page 7-1](#).

The 5-Slot Ethernet Cradle:

- Provides 5.0 VDC power for operating the device.
- Connects the device (up to five) to an Ethernet network.
- Simultaneously charges up to five TC70x devices and up to four TC70x devices and on 4-Slot Battery Charger using the Battery Charger Adapter. See the *TC70x Integrator Guide* for information on installing the 4-Slot Battery Charger onto the cradle.

**Figure 6-12** 5-Slot Ethernet Cradle
Charging the TC70x

1. Insert the TC70x into a slot to begin charging.

2. Ensure the TC70x is seated properly.

4-Slot Battery Charger

**CAUTION** Ensure that you follow the guidelines for battery safety described in *Battery Safety Guidelines on page 7-1.*

This section describes how to use the 4-Slot Battery Charger to charge up to four TC70x batteries.

**Charging Spare Batteries**

1. Connect the charger to a power source.
2. Insert the battery into a battery charging well and gently press down on the battery to ensure proper contact.

![4-Slot Battery Charger](image)

**Figure 6-15** 4-Slot Battery Charger

**Battery Charging**

**Spare Battery Charging**

Each Battery Charging LED indicates the status of the battery charging in each slot. The table below describes the Battery Charging LED status.

The 4,620 mAh fully depleted battery fully charges in less than five hours at room temperature.
Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The battery charger always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the battery charger may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. 3.5 mm Audio Adapter

The 3.5 mm Audio Adapter snaps onto the back of the TC70x and removes easily when not in use. When attached to the TC70x, the 3.55 mm Audio Adapter allows a user to connect a wired headset to the TC70x.

Connecting a Headset to the 3.5 mm Audio Adapter

1. Connect the Quick Disconnect connect of the headset to the Quick Disconnect connector of the 3.5 mm Quick Disconnect Adapter Cable.

2. Connect the audio jack of the 3.5 mm Quick Disconnect Adapter Cable to the 3.5 mm Audio Adapter.
Attaching the 3.5 mm Audio Adapter

1. Align the top mounting points on the 3.5 mm Audio Adapter with the mounting slots on the TC70x.

![Audio Adapter Installation](Image)

2. Rotate the Audio Adapter down and press down until it snaps into position.

Device with 3.5 mm Audio Adapter in Holster

When using the TC70x and the audio adapter in a holster, ensure that the display faces in and the headset cable is securely attached to the audio adapter.

![Device with 3.5 mm Audio Adapter in Holster](Image)

Removing the 3.5 mm Audio Adapter

1. Disconnect headset plug from 3.5 mm Audio Adapter.
2. Lift the bottom of the Audio Adapter away from the TC70x.

Figure 6-20  \textit{Remove Audio Adapter from TC70x}

3. Remove Audio Adapter from the TC70x.
Snap-On USB Cable

The Snap-On USB Cable snaps on to the back of the TC70x and removes easily when not in use. When attached to the TC70x, the Snap-On USB Cable allows the TC70x to transfer data to a host computer and provide power for charging the TC70x.

Connecting to TC70x

1. Align the top mounting points on the cable with the mounting slots on the TC70x.

![Figure 6-21 Cable Installation](image)

2. Rotate the cable down and press until it snaps into place. Magnetics hold the cable to the TC70x.

![Figure 6-22 Cable Attached to TC70x](image)

USB Communication

1. Connect the Snap-On USB Cable to the TC70x.
2. Connect the USB connector of the cable to a host computer.

### Charging the TC70x

1. Connect the Snap-On USB Cable to the TC70x.
2. Connect the power supply to the Snap-On USB Cable

### Disconnecting from TC70x

1. Press down on the cable.
2. Rotate away from the TC70x. The magnetics release the cable from the TC70x.

Battery Charging

Main Battery Charging

The device’s Charging/Notification LED indicates the status of the battery charging in the device.

The 4,620 mAh fully depleted battery fully charges in less than 4.5 hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device indicates when charging is disabled due to abnormal temperatures via its LED.
Charging Cable Cup

This section describes how to use the Charging Cable Cup to charge the TC70x.

Charging the TC70x

1. Insert the TC70x into the cup of the Charging Cable Cup.

![Image of TC70x Charging](image)

Figure 6-27  TC70x Charging

2. Ensure the TC70x is seated properly.
3. Slide the two yellow locking tabs up to lock the cable to the TC70x.

![Image of Lock Cable Cup](image)

Figure 6-28  Lock Cable Cup

4. Connect the power supply to the Charging Cable Cup and to a power source.
Battery Charging

Main Battery Charging

The device's Charging/Notification LED indicates the status of the battery charging in the device.

The 4,620 mAh fully depleted battery fully charges in less than 4.5 hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device indicates when charging is disabled due to abnormal temperatures via its LED.
Trigger Handle

The Trigger Handle adds a gun-style handle with a scanning trigger to the device. It increases comfort when using the device in scan-intensive applications for extended periods of time.

![Diagram of Trigger Handle]

**Figure 6-30  Trigger Handle**

Installing the Attachment Plate with Tether

1. Feed the loop end of the tether through the mounting slot on the bottom of the handle.
2. Feed the Attachment Plate through the loop.

![Diagram of Tether Installation]

**Figure 6-31  Tether Installation**

3. Pull the attachment plate until the tether is tight.

Installing the Trigger Handle Plate

1. Press and hold the **Power** button until the menu appears.
2. Touch **Power off**.
3. Touch **OK**.
4. Press in the two battery latches.
5. Lift the battery from the device.
6. Remove the hand strap filler plate from the hand strap slot. Store the hand strap filler plate in a safe place for future replacement.

![Figure 6-32](image)

**Figure 6-32 Remove Hand Strap Plate**

7. Insert the attachment plate into the hand strap slot.

![Figure 6-33](image)

**Figure 6-33 Insert Trigger Handle Attachment Plate**

8. Insert the battery, bottom first, into the battery compartment in the back of the device.
9. Rotate the top of the battery into the battery compartment.
10. Press the battery down into the battery compartment until the battery release latches snap into place.

**Inserting the Device into the Trigger Handle**

1. Align the back of the Trigger handle with the Trigger Mounting Plate.
2. Press the two release latches.
3. Rotate the device down and press down until it snaps into place.

Figure 6-34  Connect Device to Trigger Handle

Figure 6-35  Rotate Device onto Trigger Handle
Removing the Device from the Trigger Handle

1. Press both Trigger Handle release latches.

2. Rotate the device up and remove from the Trigger handle.

3. Rotate the device down and press down until it snaps into place.

Figure 6-36  Press Release Latches
**Figure 6-37  Rotate Device onto Trigger Handle**

---

**Vehicle Charging Cable Cup**

This section describes how to use the Vehicle Charging Cable Cup to charge the TC70x.
Figure 6-38  Vehicle Charging Cable Cup

Charging the TC70x

1. Insert the TC70x into the cup of the Vehicle Charging Cable.

Figure 6-39  TC70x Charging
2. Ensure the TC70x is seated properly.
3. Slide the two yellow locking tabs up to lock the cable to the TC70x.

![Figure 6-40 Lock Cable Cup](image)

4. Insert the Cigarette Lighter plug into the vehicle cigarette lighter socket.

![Figure 6-41 Connect Cable to Vehicle Power Source](image)

**Battery Charging**

**Main Battery Charging**

The device’s Charging/Notification LED indicates the status of the battery charging in the device.

The 4,620 mAh fully depleted battery fully charges in less than 4.5 hours at room temperature.

**Charging Temperature**

Charge batteries in temperatures from 0°C to 40°C (32°F to 104°F). The device always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37°C (+98°F)) the device may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device indicates when charging is disabled due to abnormal temperatures via its LED.
Vehicle Cradle

Refer to the TC70x Integrator Guide for information on installing the Vehicle Cradle.

The cradle:

• holds the TC70x securely in place
• provides power for operating the TC70x
• re-charges the battery in the TC70x.

The cradle is powered by the vehicle’s 12V or 24V electrical system. The operating voltage range is 9V to 32V and supplies a maximum current of 3A.

![Vehicle Cradle](image)

Figure 6-42 Vehicle Cradle

TC70x Insertion and Removal

⚠️ CAUTION Ensure that the TC70x is fully inserted into the cradle. Lack of proper insertion may result in property damage or personal injury. Zebra Technologies Corporation is not responsible for any loss resulting from the use of the products while driving.

To ensure the TC70x was inserted correctly, listen for the audible click that signifies that the TC70x locking mechanism was enabled and the TC70x was locked into place.
To remove the TC70x from the cradle, grasp the TC70x and lift out of the cradle.
Battery Charging

Ensure the cradle is connected to a power source.

Insert the TC70x into the cradle. The TC70x starts to charge through the cradle as soon as it is inserted. This does not deplete the vehicle battery significantly. The battery charges in approximately four hours.

**NOTE** The Vehicle Cradle operating temperature is -40°C to +85°C. When in the cradle, the TC70x will only charge when its temperature is between 0°C to +40°C.

<table>

</tbody>
</table>
TC7X Vehicle Communication Charging Cradle

The Vehicle Communication Charging Cradle:

- holds the TC70x securely in place
- provides power for operating the TC70x
- re-charges the battery in the TC70x.

The cradle is powered by the USB I/O Hub.

Refer to the *TC70x Touch Computer Integrator Guide with Windows 10 IoT Mobile Enterprise* for information on installing the TC7X Vehicle Communication Charging Cradle.

Figure 6-45  *TC7X Vehicle Communication Charging Cradle*
TC70x Insertion and Removal

To ensure the TC70x was inserted correctly, listen for the audible click that signifies that the TC70x locking mechanism was enabled and the TC70x was locked into place.

![Insert and Remove TC70x into Cradle](image)

**CAUTION** Ensure that the TC70x is fully inserted into the cradle. Lack of proper insertion may result in property damage or personal injury. Zebra Technologies Corporation is not responsible for any loss resulting from the use of the products while driving.

To remove the TC70x from the cradle, press the release latch, grasp the TC70x and lift out of the vehicle cradle.

TC70x Battery Charging

Insert the TC70x into the cradle. The TC70x starts to charge through the cradle as soon as it is inserted. This does not deplete the vehicle battery significantly. The battery charges in approximately four hours. See Table 1-3 on page 1-8 for all charging indications.

**Charging Note**

The Vehicle Cradle operating temperature is -40°C to +85°C. When in the cradle, the TC70x will only charge when its temperature is between 0°C to +40°C.
USB I/O Hub

The USB I/O Hub:

- provides power to a vehicle cradle
- provides USB hub for three USB devices (such as printers)
- provides a powered USB port for charging another device.

The cradle is powered by the vehicle’s 12V or 24V electrical system. The operating voltage range is 9V to 32V and supplies a maximum current of 3A to the vehicle cradle and 1.5 A to the four USB ports simultaneously.

Refer to the *TC70x Touch Computer Integrator Guide with Windows 10 IoT Mobile Enterprise* for information on installing the USB I/O Hub.

**Figure 6-47  USB I/O Hub**

**Connect USB Cables**

The USB I/O Hub provides three USB ports for connecting devices such as printers to a device in the vehicle cradle. To connect USB cables:

1. Slide the cable cover down and remove.
Figure 6-48  Remove Cover

2. Insert the USB cable connector into one of the USB ports.
3. Place each cable into the cable holder.

Figure 6-49  Connect USB Cable

4. Align the cable cover onto the USB I/O Hub. Ensure that the cables are within the cover opening.

Figure 6-50  Replace Cover

5. Slide cable cover up to lock into place.

External USB Cable

The USB I/O Hub provides a USB port for charging external devices such as cell phones. This port is for charging only.

1. Open the USB Access Cover.
2. Insert the USB cable connector into the USB port.

Figure 6-51  Insert External USB Cable

Power to Vehicle Cradle

The USB I/O Hub can provide power to a Vehicle Cradle.

1. Connect the Power Output Cable connector to the Power Input Cable connector of the Vehicle Cradle.

2. Tighten thumbscrews by hand until tight.

Figure 6-52  Connect Power to Vehicle Cradle

Audio Headset Connection

The USB I/O Hub provides audio connection to the device in a vehicle cradle.

Depending upon, headset, connect the headset and audio adapter to the Headset connector.
Figure 6-53  Connect Audio Headset
CHAPTER 7 MAINTENANCE AND TROUBLESHOOTING

This chapter includes instructions on cleaning and storing the device, and provides troubleshooting solutions for potential problems during operation.

Maintaining the TC70x

For trouble-free service, observe the following tips when using the TC70x:

- Do not scratch the screen of the TC70x. When working with the TC70x, use the supplied stylus or plastic-tipped pens intended for use with a touch-sensitive screen. Never use an actual pen or pencil or other sharp object on the surface of the TC70x screen.
- The touch-sensitive screen of the TC70x is glass. Do not to drop the TC70x or subject it to strong impact.
- Protect the TC70x from temperature extremes. Do not leave it on the dashboard of a car on a hot day, and keep it away from heat sources.
- Do not store or use the TC70x in any location that is dusty, damp, or wet.
- Use a soft lens cloth to clean the TC70x. If the surface of the TC70x screen becomes soiled, clean it with a soft cloth moistened with a diluted window-cleaning solution.
- Periodically replace the rechargeable battery to ensure maximum battery life and product performance. Battery life depends on individual usage patterns.

Battery Safety Guidelines

- The area in which the units are charged should be clear of debris and combustible materials or chemicals. Particular care should be taken where the device is charged in a non commercial environment.
- Follow battery usage, storage, and charging guidelines found in this guide.
- Improper battery use may result in a fire, explosion, or other hazard.
- To charge the mobile device battery, the battery and charger temperatures must be between +32°F and +104°F (0°C and +40°C)
- To charge the mobile device battery, the battery and charger temperatures must be between 0°C and +45°C (+32°F and +113°F)
• Do not use incompatible batteries and chargers. Use of an incompatible battery or charger may present a risk of fire, explosion, leakage, or other hazard. If you have any questions about the compatibility of a battery or a charger, contact the Global Customer Support Center.

• For devices that utilize a USB port as a charging source, the device shall only be connected to products that bear the USB-IF logo or have completed the USB-IF compliance program.

• To enable authentication of an approved battery, as required by IEEE1725 clause 10.2.1, all batteries will carry a hologram. Do not fit any battery without checking it has the authentication hologram.

• Do not disassemble or open, crush, bend or deform, puncture, or shred.

• Severe impact from dropping any battery-operated device on a hard surface could cause the battery to overheat.

• Do not short circuit a battery or allow metallic or conductive objects to contact the battery terminals.

• Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, or expose to fire, explosion, or other hazard.

• Do not leave or store the equipment in or near areas that might get very hot, such as in a parked vehicle or near a radiator or other heat source. Do not place battery into a microwave oven or dryer.

• Battery usage by children should be supervised.

• Please follow local regulations to properly dispose of used re-chargeable batteries.

• Do not dispose of batteries in fire.

• In the event of a battery leak, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with large amounts of water and seek medical advice.

• If you suspect damage to your equipment or battery, contact the Customer Support to arrange for inspection.

---

**Cleaning Instructions**

**CAUTION** Always wear eye protection.

Read warning label on compressed air and alcohol product before using.

If you have to use any other solution for medical reasons please contact the Global Customer Support Center for more information.

**WARNING!** Avoid exposing this product to contact with hot oil or other flammable liquids. If such exposure occurs, unplug the device and clean the product immediately in accordance with these guidelines.

**Approved Cleanser Active Ingredients**

100% of the active ingredients in any cleaner must consist of one or some combination of the following: isopropyl alcohol, bleach/sodium hypochlorite¹ (see important note below), hydrogen peroxide or mild dish soap.
Harmful Ingredients

The following chemicals are known to damage the plastics on the device and should not come in contact with the device: ammonia solutions, compounds of amines or ammonia; acetone; ketones; ethers; aromatic and chlorinated hydrocarbons; aqueous or alcoholic alkaline solutions; ethanolamine; toluene; trichloroethylene; benzene; carboxylic acid and TB-lysoform.

Cleaning Instructions

Do not apply liquid directly to the device. Dampen a soft cloth or use pre-moistened wipes. Do not wrap the device in the cloth or wipe, but gently wipe the unit. Be careful not to let liquid pool around the display window or other places. Allow the unit to air dry before use.

Special Cleaning Notes

Many vinyl gloves contain phthalate additives, which are often not recommended for medical use and are known to be harmful to the housing of the device. The device should not be handled while wearing vinyl gloves containing phthalates, or before hands are washed to remove contaminant residue after gloves are removed. If products containing any of the harmful ingredients listed above are used prior to handling the device, such as hand sanitizer that contain ethanolamine, hands must be completely dry before handling the device to prevent damage to the plastics.

Cleaning Materials Required

- Alcohol wipes
- Lens tissue
- Cotton-tipped applicators
- Isopropyl alcohol
- Can of compressed air with a tube.

Cleaning Frequency

The cleaning frequency is up to the customer’s discretion due to the varied environments in which the mobile devices are used. They may be cleaned as frequently as required, but it is advisable to clean the camera window periodically when used in dirty environments to ensure optimum performance.
Cleaning the TC70

Housing
Using the alcohol wipes, wipe the housing including buttons.

Display
The display can be wiped down with the alcohol wipes, but care should be taken not to allow any pooling of liquid around the edges of the display. Immediately dry the display with a soft, non-abrasive cloth to prevent streaking.

Camera and Exit Window
Wipe the camera and exit window periodically with a lens tissue or other material suitable for cleaning optical material such as eyeglasses.

Connector Cleaning
To clean the connectors:
1. Remove the main battery from mobile computer.
2. Dip the cotton portion of the cotton-tipped applicator in isopropyl alcohol.
4. Repeat at least three times.
5. Use the cotton-tipped applicator dipped in alcohol to remove any grease and dirt near the connector area.
6. Use a dry cotton-tipped applicator and repeat steps 4 through 6.

CAUTION Do not point nozzle at yourself and others, ensure the nozzle or tube is away from your face.
7. Spray compressed air on the connector area by pointing the tube/nozzle about ½ inch away from the surface.
8. Inspect the area for any grease or dirt, repeat if required.

Cleaning Cradle Connectors
To clean the connectors on a cradle:
1. Remove the DC power cable from the cradle.
2. Dip the cotton portion of the cotton-tipped applicator in isopropyl alcohol.
3. Rub the cotton portion of the cotton-tipped applicator along the pins of the connector. Slowly move the applicator back-and-forth from one side of the connector to the other. Do not leave any cotton residue on the connector.
4. All sides of the connector should also be rubbed with the cotton-tipped applicator.

CAUTION Do not point nozzle at yourself and others, ensure the nozzle or tube is pointed away from your face.
5. Spray compressed air in the connector area by pointing the tube/nozzle about ½ inch away from the surface.
6. Remove any lint left by the cotton-tipped applicator.
7. If grease and other dirt can be found on other areas of the cradle, use a lint-free cloth and alcohol to remove.
8. Allow at least 10 to 30 minutes (depending on ambient temperature and humidity) for the alcohol to air dry before applying power to cradle.

If the temperature is low and humidity is high, longer drying time is required. Warm temperature and dry humidity requires less drying time.
## Troubleshooting

The following tables provides typical problems that might arise and the solution for correcting the problem.

### TC70x

</tr>
<tr>
<td>TC70x shuts off.</td>
<td>TC70x is inactive.</td>
<td>The display turns off after a period of inactivity. Set this period to 15 seconds, 30 seconds, 1, 2, 5, 10 or 30 minutes.</td>
</tr>
<tr>
<td></td>
<td>Battery is depleted.</td>
<td>Replace the battery.</td>
</tr>
<tr>
<td>Tapping the window buttons or icons does not activate the corresponding feature.</td>
<td>The device is not responding.</td>
<td>Reset the device.</td>
</tr>
<tr>
<td>A message appears stating that the TC70x memory is full.</td>
<td>Too many files stored on the TC70x.</td>
<td>Delete unused memos and records. If necessary, save these records on the host computer (or use an SD card for additional memory).</td>
</tr>
<tr>
<td></td>
<td>Too many applications installed on the TC70x.</td>
<td>Remove user-installed applications on the TC70x to recover memory.</td>
</tr>
<tr>
<td>The TC70x does not decode with reading bar code.</td>
<td>Scanning application is not loaded.</td>
<td>Load a scanning application on the TC70x. See the system administrator.</td>
</tr>
<tr>
<td></td>
<td>Unreadable bar code.</td>
<td>Ensure the symbol is not defaced.</td>
</tr>
<tr>
<td></td>
<td>Distance between exit window and bar code is incorrect.</td>
<td>Place the TC70x within proper scanning range.</td>
</tr>
<tr>
<td></td>
<td>TC70x is not programmed for the bar code.</td>
<td>See system administrator.</td>
</tr>
<tr>
<td></td>
<td>TC70x is not programmed to generate a beep.</td>
<td>If the TC70x does not beep on a good decode, set the application to generate a beep on good decode.</td>
</tr>
<tr>
<td></td>
<td>Battery is low.</td>
<td>If the scanner stops emitting a laser beam upon a trigger press, check the battery level. When the battery is low, the scanner shuts off before the TC70x low battery condition notification. Note: If the scanner is still not reading symbols, contact the distributor or the Global Customer Support Center.</td>

<tbody>
<tr>
<td><strong>Physical Characteristics</strong></td>
<td></td>
</tr>
</tbody>
</table>
| Dimensions        | Height: 161 mm (6.3 in.)  
|                   | Width: 84 mm (3.3 in.)  
|                   | Depth: 28 mm (1.1 in.)                                                  |
| Weight            | 376 g (13.3 oz)                                                            |
| Display           | 4.7 in. High Definition (1280 x 720); exceptionally bright, outdoor viewable; optically bonded to touch panel |
| Imager Window     | Corning Gorilla Glass                                                      |
| Touch Panel       | Dual mode capacitive touch with stylus or bare fingertip input (conductive stylus sold separately); Corning Gorilla Glass |
| Backlight         | Light Emitting Diode (LED) backlight                                        |
| Battery Pack      | PowerPrecision/PowerPrecision+: Improved battery technology for longer cycle times and real-time visibility into battery metrics for better battery management  
|                   | Li-Ion 3.7 V, 4620 mAh typical                                             |
| Expansion Slot    | User accessible microSD up to 32 GB SDHC and up to 32 GB SDXC support       |
| Connection Interface | Universal Serial Bus (USB) 2.0 High Speed (host and client)            |
| Notification      | Audible tone plus multi-color LEDs, vibration                             |
| Voice and Audio   | Three microphone support with noise cancellation; vibrate alert; speaker; Bluetooth wireless headset support. |
### Performance Characteristics

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
