Service Information
If you have a problem using the equipment, contact your facility’s Technical or Systems Support. If there is a problem with the equipment, they will contact the Zebra Support at: http://www.zebra.com/support.
For the latest version of this guide go to: http://www.zebra.com/support.
SHARECRADLE-02
2-Slot Charge Only Cradle

The 2-Slot Charge Only Cradle:
• provides 5 VDC (nominal) power for operating the device
• charges a spare battery.

Charging the Device
1. Insert the device into the TC8000 charge well.
2. Ensure the device is seated properly. The Charging/Scan LED blinks indicating charging.

Charging the Spare Battery
1. Insert a spare battery into the spare battery slot.
2. Ensure the battery is seated properly. The Spare Battery Charging LED blinks indicating charging.

Battery Charging

Main Battery Charging
The TC8000 Charging/Scan LED indicates the status of the battery charging in the device. See Table 1-1. The 6,700 mAh battery fully charges in less than four hours at room temperature.

Spare Battery Charging
The Spare Battery Charging LED indicates the status of the spare battery charging. The 6,700 mAh battery fully charges in less than four hours at room temperature.

Table 1-1  LED Charging Indicators

<table>
<thead>
<tr>
<th>State</th>
<th>Indication</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The device/battery is not charging. The device/battery is not inserted correctly in the cradle or connected to a power source. Cradle is not powered.</td>
</tr>
<tr>
<td>Solid Amber</td>
<td>Healthy battery is charging.</td>
</tr>
<tr>
<td>Solid Green</td>
<td>Healthy battery charging is complete.</td>
</tr>
<tr>
<td>Fast Blinking Red</td>
<td>Charging error, e.g.: - Temperature is too low or too high. - Charging has gone on too long without completion (typically eight hours).</td>
</tr>
<tr>
<td>Solid Red</td>
<td>Unhealthy battery is charging or fully charged.</td>
</tr>
</tbody>
</table>

Charging Temperature
Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). The device or cradle always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37 °C (+98 °F)) the device or cradle may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The device and cradle indicates when charging is disabled due to abnormal temperatures via its LED.
SHARECRADLE-MC

5-Slot Charge Only Cradle

The 5-Slot Charge Only Cradle:
- Provides 5 VDC (nominal) power for operating the TC8000.
- Simultaneously charges up to five TC8000s.

Charging the TC8000

To Charge the TC8000:
1. Insert the TC8000 in a charge well to begin charging.
2. Ensure that the TC8000 is properly seated in the charge well.

Battery Charging

Main Battery Charging

The TC8000 Charging/Scan LED indicates the status of the battery charging in the device. See Table 1-1 on page 3. The 6,700 mAh battery fully charges in less than four hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). The battery charger always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37 °C (+98 °F)) the battery charger may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The battery charger indicates when charging is disabled due to abnormal temperatures via its LED.

5-Slot Charge Only Cradle with Battery Charger

The 5-Slot Charge Only Cradle with Battery Charger:
- Provides 5 VDC (nominal) power for operating the TC8000.
- Simultaneously charges up to four TC8000s.
- Simultaneously charges up to four spare batteries.

Charging the Device

To Charge the TC8000:
1. Insert the TC8000 in a charge well to begin charging.
2. Ensure that the TC8000 is properly seated in the charge well.

Charging the Spare Battery

1. Insert a spare battery into the spare battery slot.
2. Ensure the battery is seated properly. The Spare Battery Charging LED blinks indicating charging.

Battery Charging

Main Battery Charging

The TC8000 Charging/Scan LED indicates the status of the battery charging in the device. See Table 1-1 on page 3. The 6,700 mAh battery fully charges in less than four hours at room temperature.
**Spare Battery Charging**

Each Battery Charging LED indicates the status of the battery charging in each slot. See Table 1-1 on page 3. The 6,700 mAh battery fully charges in less than four hours at room temperature.

**Charging Temperature**

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). The battery charger always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37 °C (+98 °F)) the battery charger may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The battery charger indicates when charging is disabled due to abnormal temperatures via its LED.

5-Slot Ethernet Cradle

The 5-Slot Ethernet Cradle:
- Provides 5 VDC (nominal) power for operating the TC8000.
- Connects up to five TC8000s to an Ethernet network.
- Simultaneously charges up to five TC8000s.

Charging the TC8000

To charge the TC8000:
1. Insert the TC8000 in a charge well to begin charging.
2. Ensure that the TC8000 is properly seated in the charge well.

**Battery Charging**

**Main Battery Charging**

The TC8000 Charging/Scan LED indicates the status of the battery charging in the device. See Table 1-1 on page 3. The 6,700 mAh battery fully charges in less than four hours at room temperature.

**Charging Temperature**

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). The battery charger always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37 °C (+98 °F)) the battery charger may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The battery charger indicates when charging is disabled due to abnormal temperatures via its LED.

**Establishing Ethernet Communication**

- **NOTE** Refer to the TC8000 Integrator Guide for information on configuring the Ethernet settings.

1. Touch 🌐.
2. Touch Ethernet.
3. Slide the Ethernet switch to the ON position.
4. Insert the device into a slot.
5. The ↔ icon appears in the Status bar.
6. Touch Eth0 to view Ethernet connection details.

**Ethernet LED Indicators**

There are two green LEDs on the side of the cradle. These green LEDs light and blink to indicate the data transfer rate.

<table>
<thead>
<tr>
<th>Data Rate</th>

**5-Slot Ethernet Cradle with Battery Charger**

The 5-Slot Ethernet Cradle:
- Provides 5 VDC (nominal) power for operating the TC8000.
- Connects up to four TC8000s to an Ethernet network.
- Simultaneously charges up to four TC8000s.
- Simultaneously charges up to four spare batteries.
Charging the TC8000

To charge the TC8000:
1. Insert the TC8000 in a charge well to begin charging.
2. Ensure that the TC8000 is properly seated in the charge well.

Charging the Spare Battery

1. Insert a spare battery into the spare battery slot.
2. Ensure the battery is seated properly. The Spare Battery Charging LED blinks indicating charging.

Battery Charging

Main Battery Charging

The TC8000 Charging/Scan LED indicates the status of the battery charging in the device. See Table 1-1 on page 3. The 6,700 mAh battery fully charges in less than four hours at room temperature.

Spare Battery Charging

Each Battery Charging LED indicates the status of the battery charging in each slot. See Table 1-1 on page 3. The 6,700 mAh battery fully charges in less than four hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). The battery charger always performs battery charging in a safe and intelligent manner. At higher temperatures (e.g. approximately +37 °C (+98 °F)) the battery charger may for small periods of time alternately enable and disable battery charging to keep the battery at acceptable temperatures. The battery charger indicates when charging is disabled due to abnormal temperatures via its LED.

Establishing Ethernet Communication

NOTE Refer to the TC8000 Integrator Guide for information on configuring the Ethernet settings.
1. Touch [ ] > [ ] > Ethernet.
2. Slide the Ethernet switch to the ON position.
3. Insert the device into a slot.
4. The [ ] icon appears in the Status bar.
5. Touch Eth0 to view Ethernet connection details.

Ethernet LED Indicators

There are two green LEDs on the side of the cradle. These green LEDs light and blink to indicate the data transfer rate.

SHARECRADLE-MC
4-Slot Battery Charger
The 4-Slot Battery Charger charges up to four TC8000 batteries.

Battery Installation
To install the battery:
1. Insert the battery into a battery slot.
2. Gently press down on the battery until it snaps into place.

Battery Removal
To remove the battery, press the two release latches on each side of the battery and lift the battery out of the battery slot.

Battery Charging
Spare Battery Charging
Each Battery Charging LED indicates the status of the battery charging in each slot. See Table 1-1 on page 3. The 6,700 mAh battery fully charges in less than four hours at room temperature.

Charging Temperature
Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). The battery charger always performs battery charging in a safe and intelligent manner.
