

Filter Box Installation Instructions

WARNING! A qualified service person must perform the installation in a vehicle. Improper installation can damage the vehicle and/or the VC5090.

This guide describes how to properly connect the VC5090 Filter Box. This filter box needs to be connected between the forklift power source and the VC5090 in order to reduce potentially problematic electrical noise generated by the forklift's electric motor drive. This filter box should only be used on nominal 24, 36 or 48 volt electric forklifts. The filter box is not required on propane forklifts. Do not use the filter box if the electric forklift is providing power through a DC to DC converter with an output less than 24 VDC. When using the filter box, the ignition sense feature of the VC5090 is disabled.

For more information on the VC5090, see the *VC5090 Product Reference Guide*.

WARNING! Never perform an installation on a live electric forklift.

1. Place the VC5090 main power switch on top of the device to the off position.
2. Disconnect the forklift battery.
3. Select a location for installing the filter box that is near the current VC5090 power cable installation.
4. Secure the filter box to the forklift, using #8 screws.

5. Cut the current VC5090 power cable between the fuses and the vehicle computer close to the filter box location.
6. Cut back the outer jacket of both ends of the VC5090 power cable.
The VC5090 power cable contains four wires (red, yellow, green and black).

7. On the fuse side of the VC5090 power cable, strip the ends of all the wires except for the yellow wire.
The yellow wire is not used and can be cut back or tied off.
8. On the VC5090 side of the VC5090 power cable, strip the ends of all the wires.
9. If required, cut the VC5090 filter box cables to a desired length so that they can be connected to the VC5090 power cable.
10. If required, strip the ends of all wires of the filter box cables.

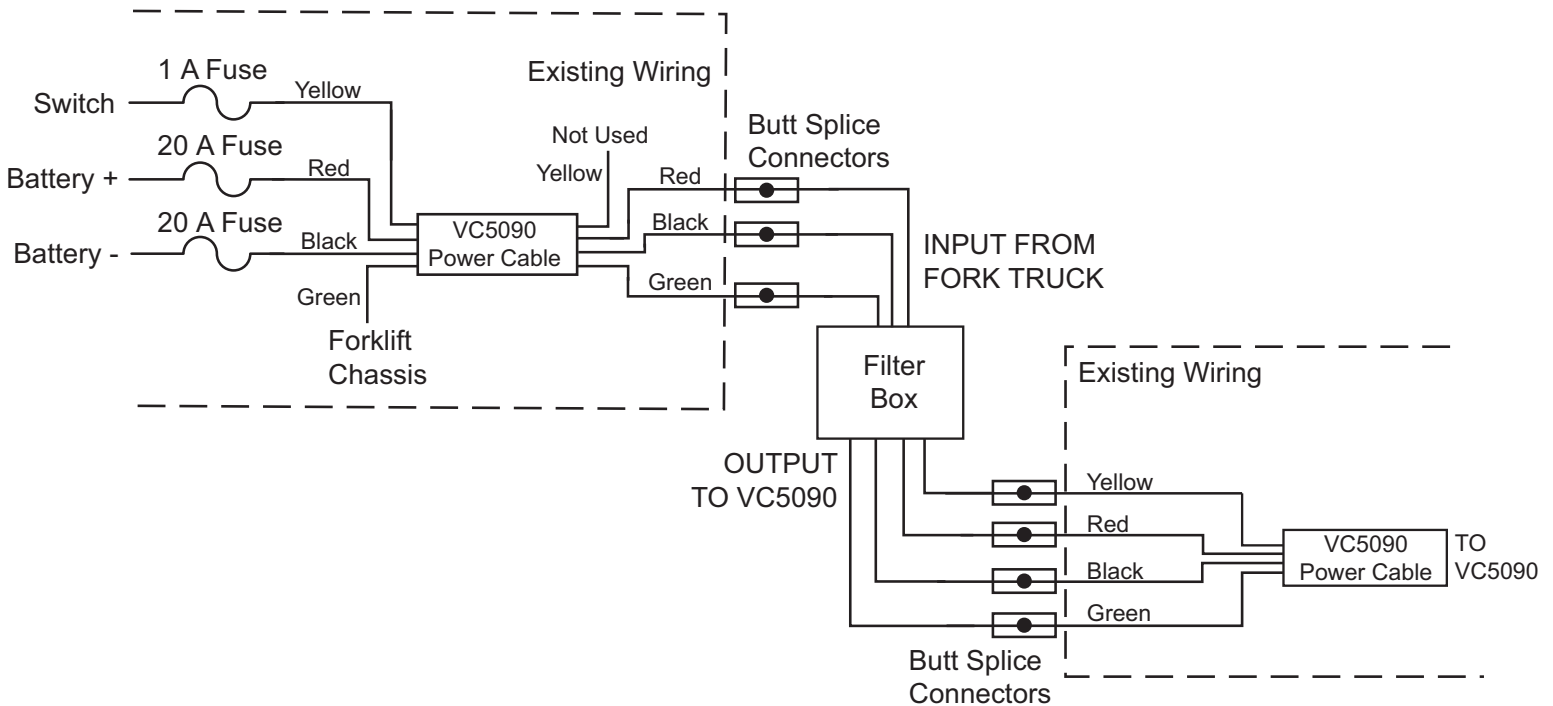

NOTE Each filter box cable contains a label that indicates connection location.

11. Connect the wires together using butt splice connectors as shown in the diagram below. The butt splice connectors should be able to accept 14 gauge wires.

Ensure the wiring connections created are sufficiently insulated from each other.

12. Secure cables with cable ties.
13. Re-connect the electric forklift battery.

Waste Electrical and Electronic Equipment (WEEE)

English: For EU Customers: All products at the end of their life must be returned to Zebra for recycling. For information on how to return product, please go to: <http://www.zebra.com/weee>.

Bulgarian: За клиенти от ЕС: След края на ползването им живот всички продукти трябва да се връщат на Zebra за рециклиране. За информация относно връщането на продукти, моля отидете на адрес: <http://www.zebra.com/weee>.

Français : Clients de l'Union Européenne : Tous les produits en fin de cycle de vie doivent être retournés à Zebra pour recyclage. Pour de plus amples informations sur le retour de produits, consultez : <http://www.zebra.com/weee>.

Español: Para clientes en la Unión Europea: todos los productos deberán entregarse a Zebra al final de su ciclo de vida para que sean reciclados. Si desea más información sobre cómo devolver un producto, visite: <http://www.zebra.com/weee>.

Deutsch: Für Kunden innerhalb der EU: Alle Produkte müssen am Ende ihrer Lebensdauer zum Recycling an Zebra zurückgesandt werden. Informationen zur Rücksendung von Produkten finden Sie unter <http://www.zebra.com/weee>.

Italiano: per i clienti dell'UE: tutti i prodotti che sono giunti al termine del rispettivo ciclo di vita devono essere restituiti a Zebra al fine di consentirne il riciclaggio. Per informazioni sulle modalità di restituzione, visitare il seguente sito Web: <http://www.zebra.com/weee>.
