Warranty

For the complete Zebra hardware product warranty statement, go to: http://www.zebra.com/warranty.
Introduction

This guide describes how to install and use the VCD9500 Vehicle Cradle and the VBC9500 Vehicle Battery Charger.

The VCD9500:
- holds the MC9500 securely in place
- provides power for operating the MC9500
- re-charges the battery in the MC9500
- provides power to the Vehicle Battery Charger.

The VBC9500:
- holds the battery securely in place
- charges a spare 4800 mAh battery.

The cradle and charger are powered by the vehicle’s 12VDC or 24VDC electrical system.

Requirements

Vehicle Cradle Mounting
- four #10-32 self-locking nuts (included)
- four #10 washers (included)
- a drill with a #2 (0.221”) or 6 mm drill bit.

Vehicle Cradle Power Connection
- power input cable (included), p/n 25-61987-01R
- UL Listed in-line fuse rated 250 VDC, 5 A (included), must be used if not connecting to vehicle’s fuse panel.
- in-line fuse holder (included), must be used if not connecting to vehicle’s fuse panel.
Vehicle Battery Charger Mounting

- two M4 x 0.7 screws of appropriate length for mounting surface
- two M4 lock washers
- a drill with a #8 (0.204”) or 5 mm drill bit.

Vehicle Battery Charger Power Connection

- auto-charger cable, p/n VCA9500-01R
  or
- jumper cable, p/n 25-122028-01R.

---

**CAUTION** ROAD SAFETY - Do not use the MC9500-K while driving. Park the vehicle first. Always ensure the MC9500-K is fully inserted into the cradle. Do not place it on the seat or where it can break loose in a collision or sudden stop. Lack of proper insertion may result in property damage or personal injury. Zebra is not responsible for any loss resulting from the use of the products while driving. Remember: Safety comes first.
Mounting the Vehicle Cradle

**CAUTION** Only mount the Vehicle Cradle in a vertical position with the release level at the top or in a horizontal position with the mobile computer display facing up. Never mount the vehicle cradle on the side or upside down or on a wall that can be subject to impact or collision of greater than 40Gs, in accordance with SAE J1455 Section 4.10.3.5

1. Select a mounting location for the cradle. It should be flat, and must provide adequate support for the cradle.

2. Prepare the mounting surface to accept four #10-32 studs, using the mounting template below. Drill four holes with a #2 or 6 mm drill bit.

3. Position the cradle on the mounting surface.
4. Fasten it using four #10 washers and four #10-32 self-locking nuts.

**CAUTION**  Do not install a Vehicle Cradle on or near an air bag cover plate or within an aerobic zone. Also, do not install it in a location that affects vehicle safety or driveability.

**Power Connection**

Please read all of these instructions before beginning.

**WARNING!**  A properly trained technician must perform the power connection. Improper connection can damage your vehicle, cradle or mobile computer. Refer to the vehicle’s Owner’s Manual for instructions for removing power.

To connect the cradle to power:

**CAUTION**  When setting up connection for this cradle, only use the power input cable provided with this cradle.

1. Locate the vehicle power source.
2. Route the power input cable from the cradle’s power port to the connection point for the vehicle’s power source.

**NOTE** The means of routing and securing the power input cable from the cradle through to the vehicle power source is extremely important. Hazards associated with improper wiring can be severe. To avoid unintentional contact between the wire and any sharp edges, provide the cable with proper bushings and clamping where it passes through openings. If the wire is subjected to sharp surfaces and excess engine vibration, the wiring harness insulation can wear away, causing a short between the bare wire and chassis. This can start a fire. To avoid any mishaps, all wiring should be routed away from moving parts, high temperature areas and any contaminants.

**NOTE** The ideal location for connecting the vehicle cradle power input cable would be an accessory output in your vehicle’s fuse panel. The vehicle cradle should be added to a circuit with a maximum load capacity for the cradle and the original circuit. Refer to the vehicle’s *Owner’s Manual* for identification of the circuit. If a fused output is not available, the vehicle cradle must be installed with the provided in-line fuse holder and UL Listed 5A fuse. The fuse protects the vehicle from an electrical short on the power line to the cradle. To use the cradle to charge the MC9500-K, when the vehicle’s ignition is off, connect the cradle to unswitched power.
3. When using the supplied in-line fuse holder (which must be used if not connecting to vehicle’s fuse panel):
   a. Ensure the fuse holder contains a 5A UL Listed slow-blow fuse.
   b. Splice the fuse holder to the end of the red V+ wire, as shown below. Make the distance from the fuse to the power connection point as short as possible.

4. Prepare the cable termination.
   a. Red wire: connect to a +12 or 24 VDC vehicle power source.
   b. Black wire and Shield wire: connect to vehicle ground wire or chassis ground.
5. Connect the power input cable into the power port on the cradle.

**NOTE** How the cable terminates depends on the vehicle. If the vehicle has a power output connector, then you must attach a mating connector to the end of the power cable. You may be able to connect to a fuse panel with a simple blade terminal or commercially available connector. Consult the vehicle *Owner’s Manual* for information on how to access the power supply in the vehicle.

**CAUTION** Secure the power cable within (6.0 in.) from the cradle to reduce possible cable vibration and or damage from items striking the cables.

When installing the cradle with an adjustable mount, a loop must be provided between the cradle and the point which the cable is secured.

To see if the cradle has power, insert the MC9500-K. The Charging LED on the MC9500-K blinks slowly to indicate charging and turns solid amber when the battery is completely charged. See *MC9500-K LED Indicators on page 19* for other indications.
Mounting the Vehicle Battery Charger

**CAUTION**  Only mount the Vehicle Battery Charger in a vertical position with the release button at the top position. Never mount the vehicle battery charger on the side or upside down or on a wall that can be subject to impact or collision of greater than 40Gs, in accordance with SAE J1455 Section 4.10.3.5

1. Select a mounting location for the charger. It should be flat, and must provide adequate support for the charger.

2. Prepare the mounting surface to accept two M4 screws, using the mounting template below. Drill two holes with a #8 or 5 mm drill bit.

3. Position the charger on the mounting surface.
4. Fasten it using two M4 lock washers and two M4 x 0.7 screws.

**CAUTION** Do not install a Vehicle Battery Charger on or near an air bag cover plate or within an aerobic zone. Also, do not install it in a location that affects vehicle safety or driveability.

**Power Connection**

To connect the cradle to power:

1. Connect the barrel jack of the auto-charge cable into the power input port on the charger.
2. Rotate the plug and secure in the cable channel.

3. Plug the auto-charge cable into the vehicle cigarette lighter.

**Mounting the Cradle and Charger with Mounting Bracket**

To mount the Vehicle Cradle and Vehicle Battery Charger together with the mounting bracket:

> **CAUTION** Only mount the Vehicle Cradle, Vehicle Battery Charger and bracket in a vertical position with the release level at the top or in a horizontal position with the mobile computer display/spare battery facing up. Never mount the cradle/charger on the side or upside down or on a wall that can be subject to impact or collision of greater than 40Gs, in accordance with SAE J1455 Section 4.10.3.5

1. Select a mounting location for the cradle/charger. It should be flat, and must provide adequate support for the cradle and charger.

2. Prepare the mounting surface to accept four #10-32 studs, using the mounting template below. Drill four holes with a #2 or 6 mm drill bit.
3. Secure the charger to the mounting bracket using two M4 lock washers and two M4 x 0.7 screws.

4. Align the four mounting holes on the mounting bracket with the four screws on the cradle.

5. Position the cradle/charger on the mounting surface.
6. Fasten it using four #10 washers and four #10-32 self-locking nuts.

**CAUTION** Do not install a cradle/charger on or near an air bag cover plate or within an aerobic zone. Also, do not install it in a location that affects vehicle safety or driveability.

7. Connect one end of the jumper cable to the power input on the charger.

8. Connect the other end of the cable to the power output port on the cradle.
MC9500-K Insertion and Removal

NOTE The vehicle cradle supports the insertion and charging of an MC9500-K with a 4800 mAh battery.

Ensure that the cradle is in the open position before inserting the MC9500-K.
To ensure the MC9500-K was inserted correctly, listen for the audible click that signifies that the MC9500-K button release locking mechanism was enabled and the MC9500-K was locked into place.

**CAUTION** Ensure that the MC9500-K is fully inserted into the cradle. Lack of proper insertion may result in property damage or personal injury. Zebra is not responsible for any loss resulting from the use of the products while driving.

**MC9500-K Charging**

1. Ensure the cradle is connected to a power source. See *Power Connection on page 8.*

2. Insert the MC9500-K into the cradle. See *MC9500-K Insertion and Removal on page 17.*

The MC9500-K starts to charge through the cradle as soon as it is inserted. This does not deplete the vehicle battery significantly. The 4800 mAh battery charges in approximately six hours. See *MC9500-K*
**MC9500-K LED Indicators**

<table>
<thead>
<tr>
<th>LED</th>
<th>Indication</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>MC95XX Battery Charging (LED is on MC9500-K)</strong></td>
<td></td>
</tr>
<tr>
<td>Off</td>
<td>MC9500-K is not in cradle, MC9500-K is not seated correctly, or cradle is not powered.</td>
</tr>
<tr>
<td>Fast Blinking Amber (twice a second)</td>
<td>Error in charging (not within battery charging temperature or charging for too long without completion). Check placement of MC9500-K.</td>
</tr>
<tr>
<td>Slow Blinking Amber (once every two seconds)</td>
<td>A healthy MC9500-K battery is charging.</td>
</tr>
<tr>
<td>Slow Blinking Red (once every two seconds)</td>
<td>An unhealthy MC9500-K battery is charging.</td>
</tr>
<tr>
<td>Solid Green</td>
<td>A healthy battery is fully charged.</td>
</tr>
<tr>
<td>Solid Red</td>
<td>Unhealthy battery is fully charged.</td>
</tr>
</tbody>
</table>
Spare Battery Charging

To charge a spare battery in the VBC:

1. Insert the battery bottom first into the VBC.
2. Push the battery into the VBC until it snaps into place.

</tbody>
</table>
Care and Cleaning

Avoid getting oils, grease or gasoline on the cradle, and do not let debris gather in the bottom of the cradle slot. When necessary, clean the cradle with a mild cleaner. If you are not sure whether or not to use a particular cleaner, contact Zebra for advice.

Troubleshooting

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Possible Cause</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>MC9500-K battery charging LED does not light up.</td>
<td>Cradle is not receiving power.</td>
<td>Ensure the Power Input cable is securely connected to the cradle’s Power Port.</td>
</tr>
<tr>
<td>MC9500-K battery is not recharging.</td>
<td>MC9500-K was removed from the cradle too soon.</td>
<td>Replace the MC9500-K in the cradle; you may have removed it before it was recharged. If a MC95XX battery pack is fully depleted, it can take seven hours to fully recharge a 4800 mAh battery.</td>
</tr>
<tr>
<td>Battery is faulty.</td>
<td></td>
<td>Replace the battery.</td>
</tr>
<tr>
<td>MC9500-K was not placed correctly in the cradle.</td>
<td></td>
<td>Remove the MC9500-K from the cradle, and re-insert correctly. If the battery still does not charge, contact Customer Support. The MC9500-K battery charging LED slowly blinks amber when the MC9500-K is correctly inserted and charging.</td>
</tr>
</tbody>
</table>
Health and Safety Recommendations

Vehicle Installation

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles (including safety systems). Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

An air bag inflates with great force. DO NOT place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

Position your device within easy reach. Be able to access your device without removing your eyes from the road.

Note: Connection to an alert device that will cause a vehicle horn to sound or lights to flash, on receipt of a call on public roads, is not permitted.

Safety on the Road

Do not take notes or use the device while driving. Jotting down a “to do” list or flipping through your address book takes attention away from your primary responsibility, driving safely.

When driving a car, driving is your first responsibility - Give full attention to driving. Check the laws and regulations on the use of wireless devices in the areas where you drive. Always obey them.

When using a wireless device behind the wheel of a car, practice good common sense and remember the following tips:

- Get to know your wireless device and any features such as speed dial and redial. If available, these features help you to place your call without taking your attention off the road.
• When available, use a hands free device.

• Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, ice, and even heavy traffic can be hazardous.

• Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan calls when your car will be stationary. If you need to make a call while moving, dial only a few numbers, check the road and your mirrors, then continue.

• Do not engage in stressful or emotional conversations that may be distracting. Make people you are talking with aware you are driving and suspend conversations that have the potential to divert your attention from the road.

• Use your wireless phone to call for help. Dial the Emergency services, (9-1-1 in the US, and 1-1-2 in Europe) or other local emergency number in the case of fire, traffic accident or medical emergencies. Remember, it is a free call on your wireless phone! The call can be made regardless of any security codes and depending on a network, with or without a SIM card inserted.

• Use your wireless phone to help others in emergencies. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call the Emergency Services, (9-1-1 in the US, and 1-1-2 in Europe) or other local emergency number, as you would want others to do for you.

• Call roadside assistance or a special non-emergency wireless assistance number when necessary. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured, or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number.
“The wireless industry reminds you to use your device / phone safely when driving”.

Regulatory Information

The VCD9500-1 (9 – 32V, 1.87A) and VBC9500-1 (4.2 - 7V, 1A) are approved under Symbol Technologies, Inc., a Zebra Technologies company.

All Zebra devices are designed to be compliant with rules and regulations in locations they are sold and will be labeled as required.

Any changes or modifications to Zebra equipment, not expressly approved by Zebra, could void the user’s authority to operate the equipment.

For use only with Zebra approved and UL Listed mobile computers. Zebra approved and UL Listed accessories and/or Zebra approved and UL Listed/Recognized battery packs.

CAUTION Only use Zebra approved and UL listed accessories, battery packs and battery chargers.

Do NOT attempt to charge damp/wet mobile computers or batteries. All components must be dry before connecting to an external power source.

Declared maximum operating temperature 50ºC.

Local language translations are available at the following web site: http://www.zebra.com/support.

Radio Frequency Interference Requirements-FCC

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment
generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

Radio Frequency Interference Requirements - Canada

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Marking and European Economic Area (EEA)

Statement of Compliance

Zebra hereby declares that this device is in compliance with all applicable Directives, 2014/30/EU, 2014/35/EU and 2011/65/EU. The full text of the EU Declaration of Conformity is available at the following internet address: http://www.zebra.com/doc.
Batteries
Taiwan - Recycling

EPA (Environmental Protection Administration) requires dry battery producing or importing firms in accordance with Article 15 of the Waste Disposal Act are required to indicate the recycling marks on the batteries used in sales, giveaway or promotion. Contact a qualified Taiwanese recycler for proper battery disposal.

Battery Information

Zebra rechargeable battery packs are designed and constructed to the highest standards within the industry.

However, there are limitations to how long a battery can operate or be stored before needing replacement. Many factors affect the actual life cycle of a battery pack, such as heat, cold, harsh environmental conditions and severe drops.

When batteries are stored over six (6) months, some irreversible deterioration in overall battery quality may occur. Store batteries at half of full charge in a dry, cool place, removed from the equipment to prevent loss of capacity, rusting of metallic parts and electrolyte leakage. When storing batteries for one year or longer, the charge level should be verified at least once a year and charged to half of full charge.

Replace the battery when a significant loss of run time is detected.

Standard warranty period for all Zebra batteries is one year, regardless if the battery was purchased separately or included as part of the mobile
computer. For more information on Zebra batteries, please visit: http://www.zebra.com/batterybasics

**CAUTION** Risk of explosion if battery is replaced by an incorrect type.

Dispose of batteries according to instructions.

**Battery Safety Guidelines**

- The area in which the units are charged should be clear of debris and combustible materials or chemicals. Particular care should be taken where the device is charged in a non commercial environment.
- Follow battery usage, storage, and charging guidelines found in the user's guide.
- Improper battery use may result in a fire, explosion, or other hazard.
- To charge the mobile device battery, the battery and charger temperatures must be between +32°F and +104°F (0°C and +40°C).
- Do not use incompatible batteries and chargers. Use of an incompatible battery or charger may present a risk of fire, explosion, leakage, or other hazard. If you have any questions about the compatibility of a battery or a charger, contact Zebra support.
- To enable authentication of approved batteries, as required by IEEE1725 clause 10.2.1, the 4800 mAh battery (p/n BTRY-MC95IABA0) contains a hologram. Do not install any battery without checking it has the authentication hologram.
- Do not disassemble or open, crush, bend or deform, puncture, or shred.
- Severe impact from dropping any battery-operated device on a hard surface could cause the battery to overheat.
- Do not short circuit a battery or allow metallic or conductive objects to contact the battery terminals.
• Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, or expose to fire, explosion, or other hazard.
• Do not leave or store the equipment in or near areas that might get very hot, such as in a parked vehicle or near a radiator or other heat source. Do not place battery into a microwave oven or dryer.
• Battery usage by children should be supervised.
• Please follow local regulations to promptly dispose of used re-chargeable batteries.
• Do not dispose of batteries in fire.
• Seek medical advice immediately if a battery has been swallowed.
• In the event of a battery leak, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with large amounts of water and seek medical advice.
• If you suspect damage to your equipment or battery, contact Zebra support to arrange for inspection.

Japan (VCCI) - Voluntary Control Council for Interference

Class B ITE

この装置は、情報処理装置等電波障害自主規制協議会（VCCI）の基準に基づくクラスB情報技術装置です。この装置は、家庭環境で使用することを目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。取扱説明書に従って正しい取り扱いをして下さい。

This is a Class B product based on the standard of the Voluntary Control Council for Interference from Information Technology Equipment (VCCI). If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install
and use the equipment according to the instruction manual.

Waste Electrical and Electronic Equipment (WEEE)

**English:** For EU Customers: All products at the end of their life must be returned to Zebra for recycling. For information on how to return product, please go to: http://www.zebra.com/weee.

**Français:** Clients de l’Union Européenne: Tous les produits en fin de cycle de vie doivent être retournés à Zebra pour recyclage. Pour de plus amples informations sur le retour de produits, consultez : http://www.zebra.com/weee.

**Español:** Para clientes en la Unión Europea: todos los productos deberán entregarse a Zebra al final de su ciclo de vida para que sean reciclados. Si desea más información sobre cómo devolver un producto, visite: http://www.zebra.com/weee.

**Bulgarish:** За клиенти от ЕС: След края на полезния им живот всички продукти трябва да се връщат на Zebra за рециклиране. За информация относно връщането на продукти, моля отидете на адрес: http://www.zebra.com/weee.
